If a threatened or actual strike imperils the national health or safety the President of the United States may direct the Attorney General to petition any district court of the United States having jurisdiction of the parties to enjoin such strike or lock-out. The parties, aided by the Mediation Service, must make every effort to adjust and settle their differences. Neither party shall be under any duty to accept, in whole or in part, any proposal of settlement made by the Service.

At the end of a 60-day period, unless the dispute has been settled, the board of inquiry shall report to the President the current position of the parties and the efforts which have been made for settlement and a statement of the employers' last offer of settlement. The Labor Board, within the succeeding 15 days, shall take a secret ballot of the employees of each employer involved in the dispute on the question of whether they wish to accept the final offer of settlement, and shall certify the results within 5 days.

The President shall submit to the Congress a full and comprehensive report, together with such recommendations as he may see fit to make for consideration and appropriate action. After going through this 80-day procedure, a legal strike may be called if no agreement has been reached. This line of procedure follows closely that prescribed in the existing Railway Labor Act.

UNION SHOP MEANS UNION SECURITY

Workers can bargain for a union shop if more than 50 percent of them vote for it. In a union shop an employer can hire union men or nonunion men. If the employer hires a nonunion man, he must join the union within 30 days or he loses his job.

Workers in a union shop may sign a permit to have their dues checked off or they can pay their dues direct to the

union. However, if they do not pay their dues they can be discharged from the union.

POLITICAL CONTRIBUTIONS

Labor organizations are placed on the same basis with national banks and corporations in regard to political contributions. It is unlawful for any national bank, any corporation, or labor organization, to make a contribution or expenditure in connection with any national election to any political office, political primary or political convention. It is also unlawful for any candidate, political committee or other person to accept or receive any contribution prohibited by this section.

This does not prevent a labor organization from endorsing candidates of their choice. It does not prevent workers from making voluntary contributions to assist or defeat candidates.

SECONDARY BOYCOTTS

Unions cannot strike against an employer with whom they do not have a dispute. The secondary boycott was outlawed because it injured innocent employers who could not do anything about the situation. Also many employees lost their wages and were forced to strike against their employer because his supplier was having labor difficulties. As a result, the public suffers through delay, inconvenience, and excessive cost.

CONCLUSION

I am convinced that if labor, management, and government will make a sincere effort to comply with the provisions of the Taft-Hartley Act, it will provide the system for industrial peace and prosperity.

EXTENSION OF REMARKS

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to extend the remarks I made earlier today and include a statement by Merwin Hart and also one by Mr. Ben Friedman.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. PLOESER asked and was given permission to extend his remarks in the RECORD and include reprint of a short story appearing in the Reader's Digest.

The SPEAKER pro tempore (Mr. JOHNSON of California). Under previous order of the House, the gentleman from Indiana [Mr. MITCHELL] is recognized for 5 minutes.

FEDERAL TAX ON OLEOMARGARINE

Mr. MITCHELL. Mr. Speaker, in 1886 a vicious, monopolistic piece of legislation was pasesd in the Congress imposing a tax upon the people of our country who would have the audacity to go to the grocery store and purchase a pound of table spread called margarine—in other words, exercise their freedom to spend their money as they wished.

Under the guise of protecting the poor ignorant citizens of the United States from fraud, certain selfish interests resorted to sectionalism and, with the aid of a powerful lobby, maneuvered the tyrannical law through the necessary procedure and onto our statute books.

This law still exists, and Mrs. Consumer is forced to pay as much as 20 percent in excess of the rightful cost for the privilege of purchasing a pound of margarine with which to supply her children with a nutritious, palatable, and economical spread for their bread.

In spite of their clamors against inflation, certain of my colleagues, for obviously selfish reasons, persist in throwing every stumbling block possible in the way of legislation to remove this additional cost-of-living item from the statute books.

Even though this imposition on the right of free people has been in existence for many years, the production of margarine between 1915 and 1947 increased from 142,000,000 pounds to 700,000,000 pounds, or a present per capita consumption of 4½ pounds per annum. And with butter at $1 per pound, the consumption of margarine is going ahead by leaps and bounds.

The citizens of this country who purchased this 700,000,000 pounds of margarine are aroused, and the farmers who raise the soybeans, corn, and cottonseed from which margarine is processed are aroused. Why in 1773 we had a tea party up in Boston because of unjust taxes such as this. The American people still retain the fighting spirit that prompted that historical event and it would not surprise me to see them have another "dumping party"—only this time it will have more dignity—the "dumping" will take place at the ballot boxes.

During the hearings before the Committee on Agriculture when the Seventy-eighth Congress was in session, one of the members of that committee made the suggestion that the low-income groups could be taken care of by purchasing lard, fortified with vitamins, in place of butter or margarine. Has any Member of the House ever tasted lard on a hot biscuit? It is interesting to note that this Member's State is prominent in the raising of hogs.

Recently I made an investigation into the purchase of butter by our armed services for the 12 months ending November 30, 1947, the result of which was the motivating factor in my addressing the following communication to the Commandant of the Coast Guard, Secretary of the Army, Secretary of the Navy, and Secretary of the Air Force:

In the interest of combating inflation and reducing the cost of Government to the taxpayers during these critical times, I have obtained figures from appropriate sources which prove conclusively that the armed services can make one change in their purchasing procedure which will save the Government in excess of $10,000,000 per year without impairing the health, efficiency, or well-being of the members of these services.

Your attention is invited to the purchases of butter from December 1, 1946, through November of 1947. The records of the Quartermaster Corps and the United States Coast Guard show that a total of 26,690,922 pounds of butter was purchased during this 12-month period at an average cost to the Government of 66.84 cents per pound. Had our armed services purchased the same amount of margarine—colored in the same manner as butter, fortified with 15,000 United States Pharmacopoeia units of vitamin A and possessing the same palatability, digestibility, and nutritive qualities as butter—our taxpayers would have been saved $10,077,506.36. The price of the above-described margarine, during the same period of purchase, averaged 30.25 cents or less per pound.

Added to the direct savings effected by this change would have been the release of the 26,690,922 pounds of butter to the open market over the 12-month period, which, of course, would have had a tendency to bring down the retail price of butter to the consumer.

It is respectfully recommended that the necessary directive be issued to correct this situation as expeditiously as possible in order that the taxpayers and housewives of our country will be afforded the relief that such a measure will certainly bring about.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1031. An act for the relief of Antonio Zamora; Mrs. Antonio Zamora; Antonio Zamora, Jr.; Mrs. Juan Chavez; John Chavez, Jr.; Roland Chavez; Selso Trujillo; Dr. M. G. Wright; and the heirs of Keith Lane; to the Committee on the Judiciary.

ENROLLED BILL SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 4055. An act to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans.

BILLS PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on Enrolled Bills, reported that that committee did on January 14, 1948, present to the President, for his approval, bills of the House of the following titles:

H. R. 389. An act for the relief of the dependents of Carl B. Sanborn;

H. R. 645. An act for the relief of Ben. W. Colburn;

H. R. 769. An act for the relief of the estate of Ruth Horton Hunter;

H. R. 1155. An act for the relief of the estate of W. H. Rodgers, deceased;

H. R. 1175. An act for the relief of the estate of Daphne Ward Pope, deceased;

H. R. 1319. An act for the relief of Calvin J. Frederick;

H. R. 1426. An act to extend veterans' preference benefits to widowed mothers of certain ex-servicemen and ex-servicewomen;

H. R. 1531. An act for the relief of William P. Gillingham;

H. R. 1645. An act for the relief of Mrs. Leona McMinn Winkler;

H. R. 1933. An act for the relief of Mrs. Elizabeth F. McCombie;

H. R. 2056. An act for the relief of J. C. Bateman;

H. R. 2348. An act for the relief of Charles J. Smith;

H. R. 2891. An act for the relief of Mattie A. Horner;

H. R. 3068. An act for the relief of Alfred Thomas Freitas;

H. R. 3146. An act to amend section 3 of the Flood Control Act approved August 28, 1937, and for other purposes; and

H. R. 3754. An act for the relief of Oscar and Anna Carlblom.

ADJOURNMENT

Mr. LANDIS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 41 minutes p. m.) the House, under its previous order, adjourned until Monday, January 19, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

1210. Under clause 2 of rule XXIV, a letter from the Secretary of the Interior, transmitting a detailed list of the lands exchanged under the provisions of the act of June 14, 1926 (44 Stat. 741, 43 U. S. C., sec. 869), was taken from the Speaker's table and referred to the Committee on Public Lands.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. REES: Committee on Post Office and Civil Service. Preliminary report pursuant to House Resolution 176, Eightieth Congress, relating to the survey and study of the postal service; without amendment (Rept. No. 1242). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CRAWFORD (by request):

H. R. 4978. A bill to amend section 2 of the act of June 16, 1936 (49 Stat. 1524), as amended; to the Committee on Armed Services.

By Mr. CRAWFORD:

H. R. 4979. A bill to provide for the disposition of internal-revenue collections on articles produced in the Virgin Islands; to the Committee on Ways and Means.

By Mr. D'EWART:

H. R. 4980. A bill relating to the acquisition by the United States of State-owned lands within Glacier National Park, in the State of Montana, and for other purposes; to the Committee on Public Lands.

By Mr. MARTIN of Iowa:

H. R. 4981. A bill to amend the Servicemen's Readjustment Act of 1944, as amended, to provide homes for veterans, through veterans' homestead associations, and the public facilities essential therefor; to the Committee on Veteran's Affairs.

By Mr. McGARVEY:

H. R. 4982. A bill to expedite the immigration of the alien parents of citizens of the United States; to the Committee on the Judiciary.

By Mr. RANKIN:

H. R. 4983. A bill to prohibit the transportation in interstate commerce of advertisements of alcoholic beverages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. TOWE:

H. R. 4984. A bill to provide for the maintaining of the corps of cadets at the United States Military Academy and the regiment of midshipmen at the United States Naval Academy at full strength, and for other purposes; to the Committee on Armed Services.

By Mr. BECKWORTH:

H. R. 4985. A bill granting the benefits of section 251 of the Internal Revenue Code to members of the armed forces taken as prisoners of war; to the Committee on Ways and Means.

By Mr. MILLER of California:

H. R. 4986. A bill to amend section 2000 (c) (1) of the Internal Revenue Code relating to cigars; to the Committee on Ways and Means.

By Mr. MORTON:

H. R. 4987. A bill relating to the authority to allocate the use of grain for the production of distilled spirits or neutral spirits for beverage purposes; to the Committee on Banking and Currency.

By Mr. O'HARA (by request):

H. R. 4988. A bill to establish control and jurisdiction of the armory of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. RUSSELL:

H. R. 4989. A bill to amend the act entitled "Boulder Canyon Project Adjustment Act," approved July 19, 1940; to the Committee on Public Lands.

By Mr. SHORT:

H. R. 4990. A bill to provide percentage depletion in the case of tripoli for taxable years beginning after December 31, 1946; to the Committee on Ways and Means.

By Mr. VURSELL:

H. R. 4991. A bill relating to the promotion of veterans of World War II in the field service of the Post Office Department; to the Committee on Post Office and Civil Service.

By Mr. GEARHART:

H. J. Res. 296. Joint resolution to maintain the status quo in respect of certain employment taxes and social-security benefits pending action by Congress on extended social-security coverage; to the Committee on Ways and Means.

By Mr. McCORMACK:

H. J. Res. 297. Joint resolution to increase the sum authorized to be appropriated for the presentation to Eire of a statue of Commodore John Barry; to the Committee on Foreign Affairs.

By Mr. CELLER:

H. Res. 429. Resolution to investigate the conduct of the Navy Department anent the proposed lease of Floyd Bennett Field to the Port of New York Authority; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of California:

H. R. 4992. A bill for the relief of Mr. and Mrs. Forrest J. McDermott; to the Committee on the Judiciary.

By Mr. CLASON:

H. R. 4993. A bill for the relief of Silvana Serra; to the Committee on the Judiciary.

H. R. 4994. A bill for the relief of William C. Pollett; to the Committee on the Judiciary.

By Mr. FALLON:

H. R. 4995. A bill for the relief of the Belle Isle Cab Co., Inc.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1129. By Mr. COLE of New York: Petition of the New York State Council of Churches, 75 State Street, Albany, N. Y., to the Congress of the United States, in opposition to universal military training; to the Committee on Armed Services.

1130. By Mr. HALLECK: Petition of citizens of La Fayette, Ind., in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1131. By Mr. HART: Petition of Unit 46, American Legion Auxiliary, of Union City, N. J., urging the establishment of a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1132. Also, petition of Unit No. 172, urging a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1133. Also, petition of New Jersey Licensed Beverage Association, Newark, N. J., opposing any further taxes on alcoholic beverages; to the Committee on Ways and Means.

1134. Also, petition of the New Jersey Licensed Beverage Association, of Newark, N. J., recommending that adequate and appropriate provision be made in the Revenue Act of 1947 for an adjustment of floor-stock taxes on distilled spirits of all retailers and distillers; to the Committee on Ways and Means.

1135. Also, petition of 87 residents of New Jersey urging the adoption of a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1136. Also, petition of New Jersey Licensed Beverage Association, of Newark, N. J., favoring the reduction of the present 20-percent cabaret tax to the prewar tax of 5 percent; to the Committee on Ways and Means.

1137. By Mr. HOPE: Petition of W. H. Halling and 10 other residents of Jetmore, Kans., against H. R. 4278, a bill to enact the National Security Training Act; to the Committee on Armed Services.

1138. By Mr. KILDAY: Petition of American Legion Auxiliary Unit No. 336 (Stonewall Jackson Post), San Antonio, Tex., with 35 signatures; Alamo Post, No. 2, American Legion, San Antonio, Tex., with 19 signatures; and Two Hundredth and Eleventh Medical Battalion, San Antonio, Tex., with 30 signatures, urging legislation to establish a system of universal military training; to the Committee on Armed Services.

1139. By Mr. LARCADE: Petition of citizens of Jennings, La., in favor of universal military training; to the Committee on Armed Services.

1140. Also, petition of Commander C. Shea Mooney and members of John C. Bowdon Post, No. 208, of the American Legion, Vinton, La., in favor of universal military training; to the Committee on Armed Services.

1141. Also, petition of Commander Edwin J. Jeanmard, American Legion Post, No. 236, and members of that post, Ville Platte, La., in favor of military training; to the Committee on Armed Services.

1142. Also, petition of the American Legion Auxiliary, Arceneaux Unit, No. 77, Rayne, La., and other citizens of Rayne, La.; to the Committee on Armed Services.

1143. Also, petition of Legionnaires and auxiliary members, De Ridder, La., and members of the Rotary Club, De Ridder, in favor of universal military training; to the Committee on Armed Services.

1144. Also, petition of the American Legion Auxiliary, Hackberry, La., and other citizens of Hackberry and Sulphur, La., in favor of universal military training; to the Committee on Armed Services.

1145. By Mr. PATMAN: Petition of A. T. Nelson, of Texarkana, Tex., and a number of other people, urging the Eightieth Congress to support and vote for legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Military

Training; to the Committee on Armed Services.

1146. By Mr. TOWE: Petition of Mrs. Frances Peterson and 90 other members of Barringer-Walker Post, No. 139, American Legion Auxiliary, Lyndhurst, N. J.; also petition of Roland E. Waller, of Hasbrouck Heights, N. J., and 36 others, urging enactment of universal military training; to the Committee on Armed Services.

1147. By the SPEAKER: Petition of the American Legion, of Albuquerque, N. Mex., petitioning consideration of their resolution with reference to legislation to establish a commission to hear claims of American nationals who were prisoners of the Japanese; to the Committee on Interstate and Foreign Commerce.

1148. Also, petition of the Los Angeles branch of the National Customs Service Association, petitioning consideration of their resolution with reference to endorsement of certain amendments to the retirement plan for Federal employees; to the Committee on Post Office and Civil Service.

SENATE

FRIDAY, JANUARY 16, 1948

(Legislative day of Wednesday, January 14, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Our Father, we turn to Thee because we are sore vexed with our own thoughts. Our minds plague us with questionings we cannot answer, and history confronts us with responsibilities we cannot evade. Who among us is sufficient for these things?

We are humbled by our experience of failure and driven by pressure to act before we are sure what Thou wouldst have us do. Thou knowest our deadlines as Thou knowest our need. We cannot push Thee, for Thou wilt not be hurried. But only Thou canst keep us from being pushed.

Give us, therefore, the unhurried mind and the untroubled heart, by the mercies of Christ our Lord. Amen.

ATTENDANCE OF A SENATOR

JOHN SHERMAN COOPER, a Senator from the State of Kentucky, appeared in his seat today.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of Wednesday, January 14, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Swanson, one of its reading clerks, notified the Senate that Mr. D'EWART and Mr. MURDOCK had been appointed additional managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1317) to give members of the Crow Tribe the power to manage and assume charge of their restricted lands, for their own use or for lease purposes, while such lands remain under trust patents.

The message announced that the House had agreed to the amendment of the Senate to the bill (H. R. 4055) to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans.

The message also announced that the House had passed a bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (H. R. 4055) to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans, and it was signed by the President pro tempore.

READING OF WASHINGTON'S FAREWELL ADDRESS

The PRESIDENT pro tempore. Under the order of the Senate of January 24, 1901, the Senate listens to the reading of Washington's Farewell Address annually on Washington's Birthday. It is read by a Senator designated by the Chair. The designation has faithfully alternated from one side of the aisle to the other each year. The Chair enters an order that this year Washington's Farewell Address will be read on Monday, February 23, inasmuch as February 22 falls on Sunday, and the Chair designates the Senator from Connecticut [Mr. MCMAHON] to read the address.

LEAVES OF ABSENCE

Mr. CAPEHART asked and obtained consent to be excused from attendance on sessions of the Senate on Monday, Tuesday, and Wednesday next.

Mr. MARTIN asked and obtained consent to be excused from attendance on the session of the Senate today after 12:45 p. m.

COMMITTEE MEETINGS DURING SESSION OF THE SENATE

Mr. LANGER. Mr. President, I ask unanimous consent that a subcommittee of the Committee on Post Office and Civil Service dealing with the pay increase may be authorized to sit during the remainder of the session of the Senate today.

The PRESIDENT pro tempore. Without objection, permission is granted.

Mr. WHERRY. Mr. President, I ask unanimous consent that a subcommittee of the Committee on Labor and Public Welfare may sit this afternoon for the purpose of hearing testimony on Senate bill 984, the antidiscrimination in employment bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE COST OF FOREIGN AID

Mr. KEM. Mr. President, tables prepared by the Legislative Reference Service of the Library of Congress at my request show that the loans, property credits, advances, relief, and rehabilitation grants and other authorizations to foreign countries by the United States Government from July 1, 1940, through June 30, 1947, total $73,092,058,013, and that the same items—partly estimated—for the period of July 1, 1945, through June 30, 1947, amount to $24,099,211,087.

Funds used prior to July 1, 1945, are considered, by and large, to be war expenditures; and authorizations since that time are considered to be peacetime expenditures for foreign aid. I should like to make some observations regarding the sum of $24,000,000,000 foreign aid provided during the period of July 1, 1945, to June 30, 1947, and the sum of $19,000,000,000 as requested by 16 nations at the Paris conference in September 1947.

HOW MUCH IS $24,000,000,000?

This sum of $24,099,211,087 is $183 for every man, woman, and child in America on the basis of the last official census. It is $616 for every American family. Think of it. Foreign aid has cost each American family more than $25 a month for each of the past 24 months. This tidy sum would pay all the income tax a married man with two children pays on a $4,000-a-year income.

In order to take a look at the cost of foreign aid to the average man, we have prepared a table showing with reference to each county and principal city in Missouri: (1) The cost of foreign aid since VJ-day to the residents of each county and city; (2) the cost of the proposed Marshall plan; and (3) the county revenue received from all sources in a 1-year period. I ask unanimous consent to have this table incorporated as a part of my remarks at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

County and cities	Foreign aid July 1, 1945, to June 30, 1947	Foreign aid proposed by Marshall plan	Total foreign aid provided and proposed	Annual tax receipts [1]
Adair	$3,705,018	$2,955,916	$6,660,934	$317,155
Kirksville	1,844,640	1,471,680	3,316,320	
Novinger	145,119	115,778	260,897	
Andrew	2,381,745	1,900,190	4,281,935	256,575

Mr. KEM. Mr. President, it will be observed from this table that the residents of my native county of Macon, a typical northeast Missouri county, have since VJ-day paid, on a per capita basis, a total of $3,915,468 for foreign aid; the Marshall plan, as proposed at the Paris conference, will cost them $3,123,816 more in the next 4 years, making a total foreign-aid bill of $7,039,284 for this county in northeastern Missouri. That is more money than Macon County, Mo., has collected in taxes during the past 20 years.

For 2 years the Federal Government has collected, on a per capita basis, a foreign-aid tax bill from the people of Macon County that is 11 times their county annual tax bill of $332,332.76. The Marshall plan, if adopted, will cost them as much in the next 4 years as all their county, county road, and school taxes will cost in the next 9 years.

Taney County, Mo., lies in what is known as the Shepherd of the Hills country. The residents of this Ozark county have a $90,000 annual county, road, and school tax bill, but their foreign-aid bill from July 1, 1945, to June 30, 1947, is 20 times their annual tax bill. Those people can multiply the tax bill they get from the county collector, for county, county road, and school purposes by 10 if they want to know what their annual share of the $24,000,000,000 foreign aid provided since VJ-day amounts to. Similar comparisons can be made for the residents of every county in Missouri. I dare say it is substantially the same for every county in the United States.

The civic-minded, progressive citizens of Kansas City, Mo., my own home city, recently concluded a successful campaign for approval at the polls of a $41,500,000 bond issue to pay for public improvements to be completed within the next 15 years. These bonds will run for 20 years, so we will probably be paying on them for the next 35 years. Since VJ-day, on the other hand, the people of Kansas City have provided $73,049,524 in foreign aid. If the Federal Government had distributed foreign aid to our own people, on a per capita basis, the people of Kansas City could have their bonds already paid and have enough left over to pay all the city taxes and license fees for the next 22 months.

The proposed Marshall plan will cost the people of Kansas City another $58,000,000 in the next 4 years. We may well contemplate the slums this would clear, the hospitals, homes, schools, and streets this would build; the playgrounds, parks, airports, and other improvements it would provide.

It takes a two-thirds vote by the people of Kansas City to pass a bond issue for their own public works and improvements; but foreign aid, costing nearly twice the recent bond issue, has already been appropriated by the Congress without the people of this country having had an opportunity to pass on the matter at the polls. It is interesting to speculate how the people of Kansas City would vote on a $58,000,000 bond issue to pay their share of the Marshall plan. It would be even more interesting to see what would happen to city officials who would raise every city tax and license fee in Kansas City the necessary 85 percent for the next 4 years just to pay Kansas Citians' per capita share of the Marshall plan.

Every major city in Missouri and most of the large cities in the United States can barely make ends meet. They have increased taxes time after time until they have about reached the limits set by the Constitution or by the taxpayers. The city of St. Louis has had a very economical administration. A city income tax was recently declared invalid by the Missouri Supreme Court with the result that there has been no alternative but to economize. The city administration has been compelled to reduce the number of city employees. The mayor has even asked the police and fire departments to reduce their personnel. Employees in some departments voluntarily have taken pay cuts in order that sufficient people may be kept on the city pay roll to render necessary service to the public. The maintenance of public buildings and streets has been allowed to lag. The building of public improvements has been postponed.

It is interesting to compare the financial predicament of the cities with the price their residents have paid and are being asked to pay for foreign aid. Since VJ-day the residents of St. Louis have provided for foreign aid $149,336,784, figured on a per capita basis. Under the 4-year Marshall plan they will provide an additional $119,143,008, making

the 6-year total $268,479,792. This is enough to pay all the city taxes in St. Louis for 10 years.

Unfortunately this is only the first cost of foreign aid. An additional cost is found on the price tag of every essential product. The high cost of giving is a major cause of the high cost of living in this country today. Every dollar sent to Europe weakens by that much our own national economy. We are distributing our wealth and resources around the world without the benefit that comes from ordinary foreign trade. Every such expenditure not only increases our national debt and the burden of taxation but causes shortages of scarce goods in our own country. This process raises prices, promotes inflation, and intensifies our own difficulties. The ultimate result will inevitably be to reduce our own national economy to the level of the countries we want to help and to make us as vulnerable as they are to communism. Instead of setting an example to lead Europe out of her economic and political chaos we may be forced to adopt the same economic planning and controls that we find plaguing Europe today, with such tragic results.

DEATH OF JOSEPHUS DANIELS

Mr. HOEY. Mr. President, I am deeply grieved to announce to the Senate the death of Hon. Josephus Daniels, which occurred at his home in Raleigh, N. C., on Thursday afternoon, January 15, 1948, after an illness of 10 days.

Mr. Daniels was North Carolina's most distinguished citizen. For the past 50 years he has held many positions of prominence and power in the Nation and has always discharged the high duties imposed upon him with great distinction to himself and credit to his State.

Mr. Daniels was 85 years of age but still in full vigor of physical and mental strength, and he was actively engaged in the editorship of the Raleigh News and Observer, one of the influential papers of the Nation. He was editor of this paper for 50 years.

Mr. Daniels first became known to the Nation when he was appointed Secretary of the Navy by President Woodrow Wilson in 1913, and he served 8 years in that important position. His record received the stamp of approval of the whole Nation. He inaugurated many reforms in the Navy which were at first unpopular but which added tremendously to the morale of the Navy, and later received the approval of the Navy and the public. Mr. Daniels was proud of the achievement of the Navy in convoying more than 2,000,000 American troops to Europe during World War I without the loss of a single life, notwithstanding the fact that the ocean was infested with submarines, and the voyages were made in the face of constant danger and hazard. He was the last survivor of the Wilson Cabinet.

After his retirement, on March 4, 1921, Mr. Daniels returned to the editorship of his paper and remained at this post until he was appointed Ambassador to Mexico by President Franklin D. Roosevelt in 1933. It so happened that President Roosevelt was Assistant Secretary of the Navy under Mr. Daniels, and was acquainted with his great ability, high integrity, and fine diplomacy. The service of Mr. Daniels justified this appraisal of him by the President, because he was able to establish and maintain good relationships with our neighbor to the South, and during his 8 years of service as Ambassador to Mexico the good-neighbor policy reached full fruition. The good results of his tenure of office continue to this day.

In 1941 Mr. Daniels returned to Raleigh, having resigned the Ambassadorship, and resumed again the editorship of his paper and the writing of many valuable books, which proved a great contribution to the history of the era in which he was such a vital factor. These books have gained large circulation.

In a brief word, Mr. Daniels, as editor, statesman, diplomat, and author, achieved distinction and renown, and in each field was able to make an outstanding contribution to his day and generation.

He was a crusader for any cause which enlisted his sympathy and stirred his enthusiasm. He believed definitely in popular government and democratic processes of life. He had an unfailing faith in the God whom he worshipped with sincerity and devotion, and reposed unshaken confidence in his fellow man.

All North Carolina mourns his passing, and friends and acquaintances throughout the Nation will shed a tear in honor of his memory.

Mr. HILL. Mr. President, yesterday, at his home in Raleigh, N. C., surrounded by family and friends and those he loved best, Josephus Daniels, suffering from pneumonia, quietly slipped out of the company of living men.

The Nation mourns his passing. He was a great American, who loved his country, and served it nobly and well. Three great Presidents called him into the public service. He first served under Grover Cleveland, was Secretary of the Navy under Woodrow Wilson, and Ambassador to Mexico under Franklin Roosevelt.

As Secretary of the Navy he did much to fashion and direct the mighty Navy that swept the seas free of German U-boats and German ships of war, and that contributed in such large measure to the winning of World War I. With fine courage and over powerful opposition, he accorded new rights to the enlisted personnel, giving them new worth and new dignity, and building a sturdier, finer morale.

As Ambassador to Mexico, he broke precedents, set aside conventions, became an apostle of America's humanity, dispelled old animosities, won the hearts of the Mexican people, and bound them to us with ties of friendship and affection. He was the Ambassador of the good neighbor.

Josephus Daniels enjoyed the unique distinction of being the confidant, the counselor, the intimate friend of both Woodrow Wilson and Franklin Roosevelt.

As newspaper editor and publisher he was ever in the fight for truth and justice and democracy, battling for the people and the advancement of their welfare, battling for all that touches and concerns human need. He was a valiant warrior who never lowered his arm in battle, never turned back, but marched on and fought on. Defeat held no terror for him, and he lived to see most of his causes triumph.

Josephus Daniels never grew old. The last time I saw him was exactly 4 weeks ago, when he lunched with the Senator from Rhode Island [Mr. McGRATH], my colleague from Alabama [Mr. SPARKMAN], and myself. In spite of his 85 years he was as vital, as vibrant, as joyous as ever, interested in all about him, concerned with all the momentous events and problems of the world today.

He did not grow old because he was too busy—too busy with fine achievements, too busy looking to the future with its challenges and its opportunities. His face was always to the rising sun, leaving the shadows to fall behind. He was ever presssing forward to new goals.

Josephus Daniels—editor, publisher, politician, statesman, churchman, Cabinet member, diplomat, author, and lecturer—was a remarkable man, but in nothing more remarkable than in his rare gift for friendship. Many in this Chamber were privileged to know the warmth, the sweetness, and the light of that friendship. It helped us on.

Josephus Daniels was one of God's great, good men. He has gone to a better place, to join the choice and master spirits of the ages.

Mr. SMITH. Mr. President, I should like to add a word to the fine remarks of the Senator from Alabama. Speaking from only a very slight acquaintance with the late Josephus Daniels, I pay my tribute of deep respect at this time on his passing.

Mr. BARKLEY. Mr. President, I wish to associate myself with the remarks made by the Senator from Alabama and the Senator from New Jersey in tribute to Josephus Daniels.

I had known of Mr. Daniels by reputation a good many years before I ever knew him personally. I think my first acquaintance with him was when he came to Washington as Secretary of the Navy. I became intimately acquainted not only with him, but with his very charming wife, who came from a distinguished family, and who preceded him to the grave by several years.

I may be mistaken regarding this, but I think I am correct when I say that he never became a candidate for any office in North Carolina. Under Woodrow Wilson he served as Secretary of the Navy, and subsequently he became Ambassador to Mexico, as we all know.

Josephus Daniels was a man who was fundamentally devoted to the American Government and to the principles of American democracy. He was a simple man in his tastes, but profound as a thinker and writer. He inaugurated some practices in the Navy when he became Secretary, and discontinued other practices in the Navy, which subjected him at the time to a considerable amount of ridicule throughout the country. But I dare say that no man as Secretary of the Navy ever did more to build up and strengthen the morale of the American Navy than did Josephus Daniels.

As a counselor and adviser he was wise and friendly. One always felt, after consulting him and asking his advice regarding any subject, that he

had disassociated himself from any selfish consideration, and tried to put himself in the other man's place, and tell him what he would do under the circumstances.

Though he was a man of the strictest morality and of the strictest and almost abstemious habits, to such a point that he was sometimes called a Puritan, he was tolerant and liberal in his views in regard to other men and their opinions. He enjoyed the affectionate respect of all those who knew him.

He wrote two or three very interesting books. One of his sons, Jonathan Daniels, has written a very interesting and valuable book which is a contribution to American literature and to American history.

I mourn the loss of Josephus Daniels at 85 years of age as being a loss to the American people. His quiet influence, the fact that he was still around, afforded a good deal of consolation to many people who knew him. In addition, I mourn his loss as a personal friend. I grieve with all his millions of friends in this country. He lived to a ripe age, to a mellow age, a decade and a half beyond the allotted time of three score years and ten. He has left an influence in the minds and hearts of the American people which will not soon be forgotten.

I wish to express to his sons in North Carolina and in Washington—one of whom is a distinguished physician in the city of Washington, one of the outstanding physicians in the Nation's Capital—my profound sympathy, and my affectionate hope that their father's long and distinguished life and his contribution to America will be in some degree a consolation for his loss to them.

Mr. CHAVEZ. Mr. President, the press of yesterday and today has carried the sad news of the demise of a distinguished American, the Honorable Josephus Daniels, former Secretary of the Navy of the United States, and Ambassador from the United States to the Republic of Mexico. I knew Mr. Daniels and his family well. I could call him my friend, and he could call me his friend. In my observation of American men of letters and American statesmen, I would say that the Honorable Josephus Daniels represented the best of American ideals and traditions, and that the United States of America is a better country because Josephus Daniels lived and served it. I shall miss him. The United States will miss him.

REPORT OF COMMISSION ON ERECTION OF MEMORIALS AND ENTOMBMENT OF BODIES IN THE ARLINGTON MEMORIAL AMPHITHEATER

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and referred to the Committe on Armed Services:

To the Congress of the United States:

In compliance with the requirements of the Public Act No. 397, Sixty-sixth Congress, I transmit herewith the Annual Report of the Commission on the Erection of Memorials and Entombment of Bodies in the Arlington Memorial Amphitheater.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 16, 1948.*

(NOTE.—The original report accompanied a similar message to the House of Representatives.)

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

EXCHANGE OF CERTAIN LANDS FOR RECREATIONAL PURPOSES

A letter from the Secretary of the Interior, reporting, pursuant to law, that no exchanges were consummated under the act of June 14, 1926 (44 Stat. 741, 43 U. S. C. sec. 869) providing, among other things, for the patenting to States, counties, and municipalities of lands classified chiefly valuable for recreational purposes in exchange for lands of equal value or equal quantity; to the Committee on Public Lands.

TRANSFER BY NAVY DEPARTMENT OF NAVAL PICKET BOAT TO STATE OF TEXAS

A letter from the Acting Secretary of the Navy, reporting, pursuant to law, that the State of Texas had requested the Navy Department to transfer a picket boat for use by the Texas Game, Fish and Oyster Commission in law enforcement work; to the Committee on Armed Services.

DONATIONS BY NAVY DEPARTMENT TO NONPROFIT INSTITUTIONS AND ORGANIZATIONS

A letter from the Acting Secretary of the Navy, reporting, pursuant to law, a list of institutions and organizations, all nonprofit and eligible, which have requested donations from the Navy Department; to the Committee on Armed Services.

REPORT OF FEDERAL WORKS AGENCY

A letter from the Administrator, Federal Works Agency, transmitting the eighth annual report of that Agency for the fiscal year 1947 (with an accompanying report); to the Committee on Public Works.

QUARTERLY REPORT OF UNITED STATES MARITIME COMMISSION

A letter from the Chairman of the United States Maritime Commission, transmitting, pursuant to law, the quarterly report of that Commission for the period October 1, through December 31, 1947 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

PROHIBITION AGAINST LIQUOR ADVERTISING—PETITION

Mr. HOLLAND. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a petition signed by about 25 very fine citizens of Orange City, Fla., praying for the enactment of Senate bill 265, to prohibit the transportation of alcoholic beverage advertising in interstate commerce, and the broadcasting of alcoholic beverage advertising over the radio, being a bill introduced by the distinguished senior Senator from Kansas [Mr. CAPPER].

There being no objection, the petition was received, referred to the Committee on Interstate and Foreign Commerce, and ordered to be printed in the RECORD, without the signatures attached, as follows:

DECEMBER 12, 1947.

To our Senators and Representatives in Congress:

We respectfully request that you use your influence and vote for the passage of S. 265, as introduced, without amendments, a bill to prohibit the transportation of alcoholic beverage advertising in interstate commerce and the broadcasting of alcoholic beverage advertising over the radio. The most pernicious effect of this advertising is the constant invitation and enticement to drink. The American people spent $8,770,000,000 for alcoholic beverages in 1946 as compared with $3,700,000,000 in 1942. During the same period there was a corresponding increase each year in crime. There is every reason why this expenditure should not be increased, but decreased.

REPORT OF COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS

Mr. AIKEN, from the Committee on Expenditures in the Executive Departments, to which was referred the resolution (S. Res. 189) authorizing the Committee on Expenditures in the Executive Departments to make certain expenditures and to employ temporary assistants, reported it without amendment, and, under the rule, the resolution was referred to the Committee on Rules and Administration.

PERSONS EMPLOYED BY COMMITTEES WHO ARE NOT FULL-TIME SENATE OR COMMITTEE EMPLOYEES

The PRESIDENT pro tempore laid before the Senate a report of the month of December 1947, from the chairman of a certain committee, in response to Senate Resolution 319, Seventy-eighth Congress, relative to persons employed by committees who are not full-time employees of the Senate or any committee thereof, which was ordered to lie on the table and to be printed in the RECORD, as follows:

SUBCOMMITTEE ON PRIVILEGES AND ELECTIONS OF THE COMMITTEE ON RULES AND ADMINISTRATION

UNITED STATES SENATE,
January 7, 1948.

To the Senate:

The above-mentioned committee hereby submits the following report showing the name of persons employed by the committee who are not full-time employees of the Senate or of the committee for the month of December, 1947, in compliance with the terms of Senate Resolution 319, agreed to August 23, 1944:

James H. Cunningham, care P. M. S. and T. University of Connecticut, Storrs, Conn., United States Army; annual rate of salary, $3,912.

W. E. JENNER,
Chairman, Subcommittee on Privileges and Elections.

REPORTS OF COMMITTEES ON PERSONNEL AND FUNDS

Pursuant to Senate Resolution 123, Eightieth Congress, first session, the following reports were received by the Secretary of the Senate:

REPORT OF COMMITTEE ON APPROPRIATIONS

UNITED STATES SENATE,

OWEN BREWSTER,
Chairman.

INTERIM REPORT OF COMMITTEE TO STUDY PROBLEMS OF AMERICAN SMALL BUSINESS RELATING TO STEEL SUPPLY AND DISTRIBUTION (REPT. NO. 825)

Mr. MARTIN. Mr. President, I have been designated by the junior Senator from Nebraska [Mr. WHERRY], chairman of the Senate Special Committee To Study Problems of American Small Business, to submit to the Senate a report on steel supply and distribution, which is the result of investigations over the past 6 months by the Steel Subcommittee, of which I am chairman. It seems particularly timely to call to the attention of the Senate the situation with respect to the Nation's most vital resource—steel.

Steel is the basic commodity of our economy—and of the world's economy.

No other material is of such value in the construction and reconstruction of the world's commerce and trade.

The job opportunity of every worker, the market for every farmer, the success

of every businessman depends, in some degree, upon the production and distribution of steel.

We cannot have prosperity today unless we have enough steel to make that prosperity possible.

Balance in the domestic economy and success of a European recovery program will depend, in the final analysis, upon steel.

The steel subcommittee in its investigations and hearings has given attention to disruptions to normal channels of trade and to increased integration in the steel industry which are cutting off sources of supply for the smaller businessman.

It has studied remedies for the shortages of basic raw materials which go into the manufacture of steel.

The subcommittee has heard from both sides of the question as to whether steel capacity should be increased. Testimony ranged from demands for no expansion to statistical projections calling for a 20,000,000-ton increase. The fact that no executive agency of Government has made any survey of actual, over-all demands for steel since the early days of the war has made it impractical for the subcommittee to make a recommendation as to the necessity for steel expansion. The subcommittee has recommended that an overall survey of steel requirements be undertaken by the executive agencies as the only intelligent basis for demands upon the industry or commitments abroad.

It takes steel to make steel, to build new facilities, to transport basic materials. Increased production and capacity are limited by these factors.

In the world picture, large exports of critically short steel products have thrown the domestic economy out of gear. It is the fear of the steel subcommittee that present export levels will be maintained and further inroads made upon domestic supplies. In such case, the smaller independent businessman in the steel industry, suffering from extreme shortage now, will be forced to the wall.

Although the subcommittee has dealt with emergency supply situations, has obtained relief for many distress cases, and has been successful in revealing and discouraging the steel gray market, the basic problems which are threatening small business in the steel industry are as urgent today as when the subcommittee began its investigations in May 1947.

The maintenance of free competitive enterprise—large or small—is the keystone of our democracy and of our form of government.

It will profit us little either in the immediate problems or in longer-range considerations to foster the flame of free enterprise in western Europe, if we must submit our own economy to regimentation.

Mr. President, I now ask unanimous consent to submit the interim report and request that it be printed, with an illustration.

The PRESIDENT pro tempore. Without objection, the report will be received and printed, as requested by the Senator from Pennsylvania.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MOORE (for himself, Mr. McCARRAN, Mr. KNOWLAND, Mr. BRICKER, Mr. HAWKES, Mr. BUTLER, Mr. HOLLAND, Mr. EASTLAND, Mr. MARTIN, Mr. ELLENDER, Mr. SALTONSTALL, Mr. O'CONOR, Mr. O'DANIEL, Mr. DOWNEY, Mr. CONNALLY, Mr. BYRD, Mr. OVERTON, Mr. HICKENLOOPER, and Mr. BROOKS):

S. 1988. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. ECTON:

S. 1989. A bill to provide for the payment of certain Government employees for accumulated or accrued annual leave in cases involving transfers to other Government agencies under different leave systems; to the Committee on Post Office and Civil Service.

By Mr. WATKINS:

S. 1990. A bill to provide a means for the orderly continuation and completion of the Deer Creek and Aqueduct divisions of the Provo River project, Utah; to the Committee on Public Lands.

By Mr. BUTLER:

S. 1991. A bill for the relief of Louis J. Waline; to the Committee on the Judiciary.

S. 1992. A bill to authorize the purchase of a new post-office site at Omaha, Nebr.; and

S. 1993. A bill to authorize the alteration of certain highway bridges at Federal expense in connection with flood-control projects, and for other purposes; to the Committee on Public Works.

By Mr. CAPEHART:

S. 1994. A bill for the relief of Barbara O'Brien Farquer;

S. 1995. A bill for the relief of George Bailey; and

S. 1996. A bill to legalize the admission into the United States of Chang Ha Kim; to the Committee on the Judiciary.

By Mr. MARTIN:

S. 1997. A bill for the relief of Sister Anna M. Alzbeta Sijarto-Hajdukova (also known as Sister M. Elizabeth); to the Committee on the Judiciary.

S. 1998. A bill to authorize the Administrator, War Assets Administration, to convey the Tobyhanna Military Reservation to the Commonwealth of Pennsylvania, and for other purposes; to the Committee on Expenditures in the Executive Departments.

By Mr. YOUNG:

S. 1999. A bill for the relief of Lloyd F. Stewart; to the Committee on the Judiciary.

(Mr. ROBERTSON of Virginia introduced Senate bill 2000, to repeal the authority to assess certain owners of nonmilitary buildings situated within the limits of the Fort Monroe Military Reservation, and for other purposes; which was referred to the Committee on Armed Services and appears under a separate heading.)

(Mr. SPARKMAN introduced Senate bill 2001, to continue rent control until April 30, 1949, and for other purposes, which was referred to the Committee on Banking and Currency, and appears under a separate heading.)

By Mr. GURNEY:

S. 2002. A bill to amend the Canal Zone Code for the purpose of incorporating the Panama Railroad Company; and

S. 2003. A bill to amend the Canal Zone Code, and for other purposes; to the Committee on Armed Services.

By Mr. BALDWIN:

S. 2004. A bill for the relief of the Housing Authority of the City of Bridgeport, Conn.;

S. 2005. A bill relating to the disposition of permanent housing acquired or constructed by the United States; and

S. 2006. A bill authorizing contributions to local public housing agencies with respect to certain payments in lieu of taxes; to the Committee on Banking and Currency.

By Mr. MORSE:

S. 2007. A bill to reserve to the United States all oil, gas, coal, and other minerals contained in lands included within the Fort Reno Military Reservation, and for other purposes; to the Committee on Public Lands.

By Mr. THOMAS of Utah:

S. 2008. A bill to allow a deduction for income-tax purposes of premiums paid on national service life insurance and United States Government life insurance; to the Committee on Finance.

By Mr. JOHNSON of Colorado:

S. 2009. A bill to provide for the security of the United States through the development and construction of air weapons of advanced design, and for other purposes; to the Committee on Armed Services.

S. 2010. A bill for the relief of Mrs. Silvia Mapelli;

S. 2011. A bill for the relief of Giacomo Spano and his family; and

S. 2012. A bill for the relief of Frank Arnim, Jr.; to the Committee on the Judiciary.

By Mr. MYERS:

S. 2013. A bill for the relief of Sister Stefania Cuprys; to the Committee on the Judiciary.

By Mr. MURRAY (for himself and Mr. WAGNER):

S. 2014. A bill to establish effective rent control until June 30, 1950, and for other purposes; to the Committee on Banking and Currency.

REPEAL OF AUTHORITY TO ASSESS CERTAIN OWNERS OF NONMILITARY BUILDINGS AT FORT MONROE, VA.

Mr. ROBERTSON of Virginia. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill to repeal the authority to assess certain owners of nonmilitary buildings situated within the limits of the Fort Monroe Military Reservation, and for other purposes.

Some years ago the Senate passed a similar bill, but it included other matters, and did not pass the House. Fort Monroe is the only military reservation as to which the law requires specific charges to be made against civilians who use the reservation. The Secretary of the Army favors the repeal of the act of 1894, which requires him to impose such charges on civilians at Fort Monroe, in order that he may be free to treat all civilian users of military reservations alike.

There being no objection, the bill (S. 2000) to repeal the authority to assess certain owners of nonmilitary buildings situated within the limits of the Fort Monroe Military Reservation, and for other purposes, introduced by Mr. ROBERTSON of Virginia, was received, read twice by its title, and referred to the Committee on Armed Services.

CONTINUATION OF RENT CONTROL

Mr. SPARKMAN. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill to continue rent control. This bill seeks to amend the Housing and Rent Act of 1947, and would be known as the Housing and Rent Extension Act of 1948. Essentially, it would continue the programs of rent control,

limitations on construction for amusement or recreational purposes, and veterans' preference until April 30, 1949, and would continue the Office of the Housing Expediter to that date for the purpose of administering them. In addition, it clarifies the purposes of the Housing and Rent Act by adding a declaration of purposes, sets the rent agreed upon under the present 15-percent lease provision as the maximum rent for the effective period of the lease, but deletes the provisions removing housing acommodations so leased from rent control, gives the Housing Expediter the right to sue for overcharges if the tenant does not, strengthens the enforcement and eviction provisions by providing for criminal sanctions for willful violations of the act and by authorizing the Housing Expediter to conduct investigations and hearings, and provides for the allocation of materials or facilities in short supply to increase the supply of housing accommodations.

Under the present Rent Act, units on which landlord and tenant sign a voluntary lease for not more than 15 percent above the maximum rent, and which carry over until at least January 1, 1949, are decontrolled as of December 31, 1947. This means that should any tenant violate an obligation of his tenancy or otherwise terminate his lease, the unit is thereafter free from control. It is fairly evident that there would be tremendous pressure to void these leases so as to remove these units from all controls. This bill would amend the present act so as to continue to hold these units under rent control but to honor the 15-percent rent increase for as long as the lease exists.

This bill continues the local advisory boards with all the powers they now have to recommend to the Housing Expediter actions on decontrol, the adequacy of the general rent level, operations of the local rent office and individual hardship cases. It would continue to allow the Housing Expediter to exercise his judgment as to whether a local board recommendation has been properly substantiated and is in accordance with the provisions of the act.

This bill strengthens the enforcement provisions so as to give the Housing Expediter the right of treble-damage action against willful and flagrant violators and also to permit the Housing Expediter to refer to the Attorney General willful and flagrant violators for criminal action. This is a necessary amendment because the present provision of the act giving the tenant the right of treble damage has failed to cure violations. It is not working because tenants are more afraid of losing the roof over their heads than they are desirous of obtaining monetary damages. Experience shows that generally law-abiding landlords who always obey the law are still obeying but that the old violators are boldly overcharging and accepting bonuses and side payments. When they are caught, they simply make restitution and unless an injunction is obtained proceed to commit the same violations all over again.

This bill contains a restatement of the general allocation powers which were in the Second War Powers Act and the limited ones in the Veterans' Emergency Housing Act. The power in this bill, however, is to be used solely for the purpose of increasing the supply of housing accommodations. The bill thus provides that if a shortage of materials needed for an increased supply of housing accommodations exists or is likely to exist, the Housing Expediter may allocate such materials for housing construction.

There being no objection, the bill (S. 2001) to continue rent control until April 30, 1949, and for other purposes, introduced by Mr. SPARKMAN, was received, read twice by its title, and referred to the Committee on Banking and Currency.

PRINTING OF FIFTIETH ANNUAL REPORT OF SOCIETY OF DAUGHTERS OF THE AMERICAN REVOLUTION

Mr. JENNER submitted the following resolution (S. Res. 190), which was referred to the Committee on Rules and Administration:

Resolved, That the Fiftieth Annual Report of the National Society of the Daughters of the American Revolution for the year ended April 1, 1947, be printed as a Senate document.

HOUSE BILL REFERRED

The bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes, was read twice by its title, and referred to the Committee on Armed Services.

AMENDMENT OF PHILIPPINE REHABILITATION ACT OF 1946—CONFERENCE REPORT

Mr. BUTLER. Mr. President, I submit a conference report on Senate bill 1020, to amend the Philippine Rehabilitation Act of 1946, as amended, and I ask unanimous consent for its immediate consideration.

The PRESIDENT pro tempore. The conference report will be read for the information of the Senate.

The Chief Clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1020) to amend the Philippine Rehabilitation Act of 1946, as amended, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following: "$12,000,000"; and the House agree to the same.

HUGH BUTLER,
SHERIDAN DOWNEY,
ERNEST W. MCFARLAND,
GEO. W. MALONE,
Managers on the Part of the Senate.

JOHN M. VORYS,
WALTER H. JUDD,
JAMES G. FULTON,
JAS. P. RICHARDS,
MIKE MANSFIELD,
Managers on the Part of the House.

Mr. BUTLER. Mr. President, the conference report has to do with the Philippine rehabilitation bill which was passed by the Senate on July 25 last, before the close of the first session. The Senate made available for administrative purposes $16,000,000 of the funds appropriated. The House action reduced that amount to $8,400,000. Conferees were appointed, and the report is now in agreement on the sum of $12,000,000. I should like to have the report adopted.

The PRESIDENT pro tempore. Is there objection to the present consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

The conference report was agreed to.

NATIONAL DEFENSE—ADDRESS BY SENATOR LUCAS

[Mr. LUCAS asked and obtained leave to have printed in the RECORD an address delivered by him before the Women's Patriotic Conference on National Defense, at Washington, D. C., January 16, 1948, which appears in the Appendix.]

ADDRESS BY HON. CHARLES A. HALLECK BEFORE THE NATIONAL SMALL BUSINESSMEN'S ASSOCIATION

[Mr. WHERRY asked and obtained leave to have printed in the RECORD the address delivered by Representative CHARLES A. HALLECK, of Indiana, before the National Small Businessmen's Association, at the Wardman Park Hotel, Washington, D. C., on January 14, 1948, which appears in the Appendix.]

ADMIRAL NIMITZ' VALEDICTORY

[Mr. BRIDGES asked and obtained leave to have printed in the RECORD the final statement made by Fleet Adm. Chester W. Nimitz, United States Navy, and an editorial from the New York Herald Tribune of January 7, 1948, summarizing the context of Admiral Nimitz' statement, which appears in the Appendix.]

LABOR AND THE ST. LAWRENCE WATERWAY—ADDRESS BY MATTHEW WOLL

[Mr. BRIDGES asked and obtained leave to have printed in the RECORD an address on the subject, Labor and the St. Lawrence Waterway, by Mr. Matthew Woll, vice president of the American Federation of Labor, before the New England Project Conference at Boston, Mass., which appears in the Appendix.]

THE CAUSES OF INDUSTRIAL PEACE—ADDRESS BY CLARENCE FRANCIS

[Mr. SPARKMAN asked and obtained leave to have printed in the RECORD an address entitled "The Causes of Industrial Peace," delivered by Clarence Francis, chairman of the board, General Foods Corp., before the fifty-second annual congress of American industry, National Association of Manufacturers, at New York City, on December 4, 1947, which appears in the Appendix.]

OUR CONGRESS—EDITORIAL FROM THE NEW YORK DAILY MIRROR

[Mr. BALDWIN asked and obtained leave to have printed in the RECORD an editorial entitled "Our Congress," published in the New York Daily Mirror for January 12, 1948, which appears in the Appendix.]

WE MUST SAVE EUROPE WITHOUT LOSING AMERICA—ARTICLE IN THE NATIONAL EDUCATION ASSOCIATION JOURNAL

[Mr. FULBRIGHT asked and obtained leave to have printed in the RECORD an article entitled "We Must Save Europe Without Losing

America," published in the National Education Association Journal of January 1948, which appears in the Appendix.]

THE BATTLE OF THE FAMILY BUDGET—ARTICLE BY RICHARD L. NEUBERGER

[Mr. MORSE asked and obtained leave to have printed in the RECORD an article entitled "The Battle of the Family Budget," by Richard L. Neuberger, from the New York Times Magazine of January 11, 1948, which appears in the Appendix.]

CENSORSHIP THROUGH FEAR—ARTICLE BY WILLIAM WYLER

[Mr. TAYLOR asked and obtained leave to have printed in the RECORD an article entitled "Censorship Through Fear," by William Wyler, published in the December 1947 issue of the Screen Writer, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—EDITORIAL FROM THE DETROIT NEWS

[Mr. WILEY asked and obtained leave to have printed in the RECORD an editorial regarding the St. Lawrence seaway, from the Detroit News of January 5, 1948, which appears in the Appendix.]

TWO HUNDRED AND FORTY-SECOND ANNIVERSARY OF THE BIRTH OF BENJAMIN FRANKLIN

Mr. MARTIN. Mr. President, in the peaceful burying ground of historic Old Christ Church in the city of Philadelphia a simple flat stone marks the last resting place of an illustrious American patriot and statesman who was born 242 years ago tomorrow. The fading inscription on that stone recounts that here is buried all that was mortal of Benjamin Franklin, printer.

So deep was the humility, so sincere the simplicity, of this great man that his vast achievements in public service and his tremendous contributions to the welfare of human society were ignored in the epitaph he wrote for his grave, describing himself simply as "Benjamin Franklin, printer." But the light of his genius continues to illuminate the world. It shines more brightly with the passing years, and, therefore, on the anniversary of his birth, it is a sacred duty to recall, with proper tribute of homage and honor, the greatness of Benjamin Franklin, first citizen of Pennsylvania.

As much as any other man of his time he shaped and guided the destiny of our Republic in the struggle for American independence and in the troubled formative years of our country.

Of him it may be truly said, "He walked with kings, nor lost the common touch."

His giant intellect concerned itself with the simple as well as the more complex needs of his fellow man. He helped establish a nation of liberty and freedom on this continent—and he invented a household stove that added to the comfort and convenience of his fellow citizens.

He negotiated with Europe's greatest masters of statecraft and diplomacy on equal terms, yet he preached the virtues of thrift and industry.

His investigations into the laws of nature gave him first rank and fame among the scientists of his day—and he wrote a treatise on the Causes and Cure of Smoky Chimneys.

Every schoolboy is familiar with the kite-flying experiments by which he determined the nature of electricity, an achievement that opened a whole new realm of discovery and invention for human progress and betterment.

Into his philosophy he poured wisdom that stands unchallenged today to guide the affairs of men into the channels of right living.

Franklin's career as a benefactor of humanity was so diversified and his achievements so numerous that it is impossible to enumerate them all.

Throughout his life he held fast to the creed that he drafted at the age of 22, and which he entitled "Articles of Belief and Acts of Religion." In that creed he wrote:

I believe in one God, creator of the universe. That He governs it by His providence. That He ought to be worshiped. That the most acceptable service we render to Him is doing good to His other children. That the soul of man is immortal, and will be treated with justice in another life respecting its conduct in this.

By reason of its great importance, I should like to refer to an incident concerning the drafting of our Constitution. The adoption of our Constitution was one of the greatest accomplishments in all history. It brought a new birth of freedom, and meant that 8 years of suffering and hardship would not go without reward. The great men of the Constitutional Convention met day after day for 4 weeks and had not made any progress.

On the last morning of the fifth week there was heated discussion. They were about to adjourn without completing the great purpose for which they had met. It looked like failure, when Benjamin Franklin, the most mature and tactful man in the convention, arose. Addressing Gen. George Washington, President of the Assembly, he said:

Mr. President, the small progress we have made after 4 or 5 weeks' close attention and continual reasonings with each other, our different sentiments on almost every question, several of the last producing as many noes as ayes, is, methinks, a melancholy proof of the imperfection of the human understanding.

In this situation of this Assembly, groping, as it were, in the dark to find political truth, and scarce able to distinguish it when presented to us, how has it happened, sir, that we have not hitherto once thought of humbly applying to the Father of Light to illuminate our understanding?

I have lived, sir, a long time; and the longer I live the more convincing proofs I see of this truth, that God governs in the affairs of men. And if a sparrow cannot fall to the ground without His notice, is it probable that an empire can rise without His aid?

We have been assured, sir, in the Sacred Writings, that "except the Lord build the house, they labor in vain that build it." I firmly believe this; and I also believe that without His concurring aid we shall succeed in this political building no better than the builders of Babel; we shall be divided by our little, partial, local interests, our project will be confounded, and we ourselves shall become a reproach and a byword down to future ages. And, what is worse, mankind may hereafter, from this unfortunate instance, despair of establishing government by human wisdom and leave it to chance, war, conquest.

I, therefore, beg leave to move:

That hereafter, prayers imploring the assistance of Heaven and its blessing on our deliberations, be held in this Assembly every morning before we proceed to business, and that one or more of the clergy of this city be requested to officiate in that service.

From then on, history tells us, real progress began to be made in the framing and adoption of our Constitution. Gladstone asserted that this document was "the greatest piece of work ever struck off at a given time by the brain and purpose of man."

Thus, in the adoption of our Constitution we can almost trace the finger of Divine Providence. Its adoption laid the foundation for peace and prosperity, when it looked as if failure to agree upon a plan of government would result in misery and confusion.

Mr. President, I should like to mention another incident in the career of Benjamin Franklin which is worthy of thoughtful consideration in these critical times.

When the work of the Constitutional Convention had been completed and Franklin stepped into the courtyard of Independence Hall, he was greeted by a great multitude of citizens.

"What kind of government have you given us?" he was asked.

"A Republic, if we can keep it," Franklin replied.

There is patriotic inspiration and guidance in those words. On this notable anniversary they should remind all Americans to rededicate their lives to the perpetuation of the ideals and principles handed down to us by Franklin and the other revered founding fathers of our Nation.

Their deeds of patriotism, their lives of vision, courage, and sacrifice, point the way in which each of us can contribute, in large or small degree, toward carrying out the injunction of Franklin—to keep our Republic, not only for the greater glory of America, but as a beacon light of human liberty and justice throughout the world.

MEAT PRODUCTION

Mr. BUTLER. Mr. President, during the last few weeks I have been amazed at the way in which a bureaucratic, semicollectivist philosophy seems to be coming back in fashion. I refer to all the proposals we hear about restoring rationing and price controls and various other regulations covering meat. That is a controversy which I thought was settled by the election of 1946. I thought the American people at that time expressed a pretty clear preference for meat rather than for controls.

Now, apparently, we have the same question back with us. It is being said on all sides that the price of meat is too high. I do not know the basis for that statement. The price of meat is certainly higher than it used to be. So is the price of everything else. If the price of meat is too high, so are wage rates too high; so is the price of coal, the price of lumber, the price of steel, and the price of everything else. The farmer who produces meat must buy all these things in one form or another. He must have a price for his cattle and hogs sufficient to pay his costs of operation.

I speak to the Senate frankly in behalf of the livestock men—the producers of

the meat supply of the country. Their costs have gone up along with the prices they receive. Our State statistician at Lincoln, Nebr., for the Department of Agriculture has just supplied me with the average cost of producing beef in Nebraska within the last few months. That cost is at an all-time high. In October it cost $20.20 per hundred pounds of beef; in November, $19; in December, $20.70. That is the inflationary effect of present conditions on our level of costs. If we can get those costs down, we will get cheaper meat, but not otherwise.

Unfortunately, the people of this country have been told by the dominant political philosophy of the last 15 years to ignore realities and to expect something for nothing. They would like to have cheaper meat, and they would like to have more of it. These twin desires are natural, but they are incompatible with each other. Last year the people of the United States bought and ate far more meat per capita than they could ever afford to buy during the prewar period—but it was not cheap. If the price had not been well above prewar standards, so much meat would not have been produced. That is the hard economic reality which consumers must face.

Now our producers are threatened again with renewed talk of rationing and price controls. The mere fact that these suggestions are made has already done serious damage by discouraging the production we need. The meat supply for next fall and next year is being determined right now or will be within the next few months. Official talk about rationing and price controls will only discourage meat production, and make the shortage later on much worse.

But suppose controls should be adopted again, what will be the result? Will it increase the supply of meat? Of course not; it will decrease it. The only result will be to push the bulk of the meat business out of its normal processing and marketing channels and into the black market.

Consider the impossibility of enforcing such controls at the present time. The OPA and all the other enforcement machinery has been disbanded. Meat controls could not be enforced in 1946 by an organized army of Federal agents. What possible chance would there be to enforce them now with a makeshift group of temporary employees? We will have trouble setting up OPA machinery again, but the black marketeers will have no trouble setting up in business. Their machinery is already set up. If the OPA was the school for black marketeers in this country, new controls would be a postgraduate course.

Some may think controls can easily be enforced against the large packers. Perhaps they can, but the meat would not go to the large packing firms. In livestock marketing, the animals go to the highest bidder, with no questions asked. The highest bidder will be the black market. Nor is rationing the answer. Black market slaughter is just too easy. Any unused barn or shed will serve. From there the meat can be moved directly into channels for the consumer, short cutting the rationing machinery entirely.

Mr. President, I suggest that we stop trying to have our cake and eat it too. The price level has been raised far above prewar prices by the financial and monetary policies that have been followed by the administration during the past 15 years. Costs in every industry have increased by leaps and bounds. Reducing prices means reducing costs first, and that means reducing wages. That is something I have not heard anyone suggest.

If the advocates of this type of control legislation really mean what they say, I suggest that they have their measures brought to the floor for debate as promptly as possible so that we can get this question settled once and for all. In the meantime, I suggest that we have a moratorium on public statements urging meat rationing and price control. Talk of that sort is doing no good for the production of meat, and high-level meat production is the only really satisfactory solution to this problem.

EUROPEAN RELIEF NEEDS

Mr. YOUNG. Mr. President, many public officials, Members of Congress, newspaper editors, columnists, radio commentators, and many other prominent people of America, have made impressive arguments for European relief needs. Most of the arguments have dealt with the humanitarian side—the need of helping the starving and suffering peoples in Europe—and the need of saving western Europe from Communist domination for our own future security.

I wish at this time to commend former Governor Stassen and Secretary of Agriculture Anderson for the emphasis they have placed on another aspect of foreign aid. Governor Stassen is especially to be commended for being one of the first concerned about the need of maintaining future markets for farm products in Europe after assistance programs come to an end and Europe again has dollars with which to purchase our food.

Governor Stassen and Secretary Anderson correctly take the position that there can be no permanent prosperity in the United States, and particularly among farmers, unless such a market is retained.

Even now, because of a loss of European markets for some farm products, our Government, in order to maintain parity prices, purchased practically all the 1947 tobacco and peanut crops, together with large quantities of eggs, potatoes, and fruits which were in surplus.

While there has been Government price support of a few farm products, this Congress during the past year enacted unusual legislation to hold down the price of wheat, the most important of all food items. As a result of Government controls, the export price of wheat is lower in the United States than in any other nation of the world.

At this point in my remarks I ask unanimous consent to have printed as a part of my remarks a press release by the senior Senator from Minnesota [Mr. BALL], from the Fargo Forum, Fargo, N. Dak., under date of January 1, 1948.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

SAYS WHEAT "RIDER" AVERTED PRICE OF $5

WASHINGTON.—Senator BALL, Republican, of Minnesota, said Wednesday a wheat carryover rider inserted in the interim foreign-aid law recently enacted by Congress may have prevented wheat prices from climbing as high as $5 a bushel.

He referred to an amendment placed in the $540,000,000 foreign-aid statute by the appropriations committees of the Senate and House requiring that "exports not reduce our domestic carry-over below 150,000,000 bushels."

Mr. YOUNG. Mr. President, surely as a result of our large appropriations, and the effort American farmers are putting forth to meet the present food needs of Europe, the United States ought to have a high priority in the future markets of these countries, and, in my opinion, it is most important that both the executive department of our Government and the Congress of the United States at the present time negotiate with European countries to the end that we might retain as much as possible of these markets beyond the period the Marshall plan is intended to cover.

Mr. President, I ask unanimous consent to have inserted as a part of my remarks a portion of the testimony by Secretary of Agriculture Anderson before the Senate Committee on Foreign Relations on January 13, 1948, as reported by Robert J. Donovan of the New York Herald Tribune; and also a letter addressed by me to Gen. George C. Marshall, Secretary of State.

There being no objection, the testimony and letter referred to were ordered to be printed in the RECORD, as follows:

Secretary Anderson told the committee at a hearing on the aid program: "From the standpoint of our consumers, the effect of our proposed exports should be less noticeable than the effects of the exports in recent years. Our total food exports will actually be smaller than in other recent years, and as the program continues, there will be decreasing emphasis on scarce foods and increasing emphasis on more abundant foods."

Secretary Anderson emphasized that the ERP would have an important bearing on farm prosperity, and he warned the committee that "it is essential that farmers have a good market in Europe."

While he did not use the word "depression," Mr. Anderson stated the case in terms which left no doubt that loss of European markets would have serious consequences for American farmers.

INCREASED YIELD CITED

"As we have studied the question of what this program will mean to our farmers," he said, "we have had to ask ourselves what would happen if the economy of Europe were allowed to disintegrate and if it provided little or no outlet for United States farm products. That prospect would not be pleasant to contemplate."

Secretary Anderson reminded the committee that before the war a high percentage of American farm products was sold to Europe, and he summed up the problem for the future in these words:

"Our farmers are now producing a third more food and fiber than they were before the war. They have revolutionized farm production and the revolution is here to stay. Our farmers are not going to give up their new machines or their high-yielding varieties, their improved insecticides or their improved

methods of cultivation. We are going to have abundance of agricultural production, and we shall continue to need export outlets for some of our most important farm commodities."

Secretary Anderson conceded that ERP exports coming on top of domestic and other foreign requirements, "will continue temporarily the strain on our grain-producing areas." He said, however, that the program was "feasible from the standpoint of our own agriculture" and that the nation had "no practical alternative but to carry through a program of this magnitude."

JANUARY 10, 1948.

The Honorable GEORGE C. MARSHALL,
Secretary of State, Department of State, Washington, D. C.

MY DEAR MR. SECRETARY: Today when there are so many problems of such immediate and vital concern facing our Government, I am afraid that the importance of one long-range problem very closely related to future security and welfare is being overlooked.

For a long time I have been concerned over the future of our agricultural industry. The past great war created demands on our farms, and on our farmers, for agricultural production greater than ever before in history. The record reveals how well our farmers met that need and the even greater need that arose after the war, and that is now playing such a vital role in our crucial struggle to secure the peace.

Following World War I, and until the time that Hitler came to power in Germany, this country enjoyed a fairly good foreign market for agricultural products, particularly wheat and cotton. Then because of the self-sufficiency program adopted by the Axis Powers in preparation for war, we lost most of this market. As a result, we faced tremendous surpluses. This was at a time when our production of wheat was not much more than one-half the present level of production. This in combination with continued imports of large supplies of wheat at a time when we had these great domestic surpluses, led to extremely low prices. In fact, at one time wheat sold for less than 30 cents a bushel.

The effect of this was felt throughout our economy. In looking back, it has always been very evident that our Nation cannot prosper when agriculture is in a depression. The period of the 1930's is known to all. The tempo of our entire economy reached a dangerously low point. Industry closed down, unemployment was rampant, and measures for our national defense lagged at the very time that we were being forced into a world crisis because of the ambitions of the Axis dictators. Luckily, through the efforts and sacrifices of our allies, the United States was given time to recover and through a tremendous expansion of industrial and agricultural production, our defenses were built. If we had faced the Axis without this period in which to recover the results would have been disastrous.

To meet the needs of this emergency, farmers were asked to expand production until it reached the present high level. Now I see signs of a trend that is causing me grave concern. This year the Government, under the farm price support program, had to purchase practically all of the 1947 crop of tobacco and peanuts. The foreign countries were unable to purchase these commodities under our relief aid. With wheat production at a level 500,000,000 bushels greater than can be consumed in the United States, this same situation would exist in wheat and all major agricultural commodities if it were not for the foreign relief program financed by huge American appropriations that is providing a European market for our surpluses.

Europe has, historically, been deficient in food supplies, and many times in the past has been our greatest outlet for agricultural surpluses. I am now somewhat alarmed by the thinking of many Members of Congress and others high in Government positions. As evidenced by previous European programs, they are apparently striving to make Europe self-sufficient in food supplies even to the extent of endeavoring to establish new food sources in other parts of the world for farm commodities of which we normally have burdensome surpluses.

In my opinion, it is of the greatest concern to our future prosperity to maintain a prosperous agriculture. This, I believe, can only be accomplished by retaining large outlets in Europe. Because of the sacrifices of our people through tremendous relief appropriations, and because of the extreme efforts the American farmers have made to supply vital food necessities for Europe, I believe the United States is rightfully entitled to a high priority in future European markets. I believe it would be in the best interests of not only our farmers but the country as a whole if there was coordination of efforts toward this end by the State Department and the Agriculture Department. Therefore, I think it is highly desirable that the Department of State establish a division under one of the branches of the Department with the responsibility of looking toward future markets in Europe. This, I believe, could be established at little extra expenditure, since the Department already has agriculture attachés in the various embassies who could effectively work out a program in coordination with the Department of Agriculture.

On my two recent trips to Europe this summer I spent a large part of my time seeking information on this subject. I found that some agriculture attachés in some of the embassies were giving intelligent thought to the problem of future markets, but I regret to add others were completely indifferent to the problem.

Many Members of Congress apparently are totally unaware of the fact that if it were not for relief appropriations to Europe most farm products, and particularly wheat, would be in great surplus at the present time. Farm prices would be far below present levels and it is entirely possible that wheat would be selling for $1 a bushel. Once the relief appropriations are discontinued and unless we begin now to look for these markets, much of our agriculture will have to be supported by price-support program. This would entail great expenditures with the resulting difficulty of disposing of surpluses, or else we would face the problem of liquidating or greatly reducing our farm production.

I need not point out the dangers of this alternative. Our past experiences make them clearly evident. Suffice to say, industry and our whole economy would go into a tailspin and we would undoubtedly have a disastrous depression. In the interests of survival and national security, this must not happen. Never again in a future emergency will we be given an opportunity to prepare to defend ourselves.

I respectfully urge, Mr. Secretary, that the consideration of this problem be given early attention.

With kindest regards,
Sincerely yours,

MILTON R. YOUNG,
United States Senator.

CANCER—NEW JERSEY EDITORIAL CONTEST

Mr. REVERCOMB. Mr. President, at this time, when the thoughts of men and women are so filled and so concerned with the complex problems arising out of government and general human welfare, I ask Senators to pause and think specifically of the gallant fight being waged by some of our people against a disease that takes a great toll of lives from among our people. I speak of the disease of cancer, a malady which to this time has baffled men in their quest for a cure in all cases.

However, there can be no doubt that some headway toward success is being made. Cancer presents a high challenge to science and to medicine. It is a threat which can be successfully met only through general realization of its existence, and the wilingness of the people everywhere to be helpful in this great effort to eradicate a destructive disease.

This Government has recognized the existence of this growing menace to life, and in the last few years has made large appropriations to aid in the fight against it.

It is time that the people everywhere, the general public, shall, without fear, and with calmness and earnestness, realize and meet the situation.

While statistics show that 180,000 people die annually in this country from cancer, it is believed by many doctors that more than that number have their lives and their usefulness terminated by this disease. We are told that perhaps one-half of these need not die, because if the existence of the affliction is found in time, it is known that it can be cured.

In addition to the research being made with funds appropriated out of the Public Treasury, the American Cancer Society is spending from five to six millions of dollars yearly in research work to find the cause of this disease. When the cause of it is found, it is believed that its destructive result will be eradicated.

The New Jersey division of the American Cancer Society is recognized as a leader in the fight on cancer. The division is well organized, with active chapters in each county of the State. The success of the cancer-control program in New Jersey, now in its second full year of operation, is due to the cooperation of the medical profession and laymen, and to the complete support given by the press, radio, and citizenry of the State.

Realizing that thousands of lives could be saved from cancer if the public were educated to be alert to the cancer danger signals and to receive early diagnosis, the New Jersey division asked the press of the State to enter an editorial contest, thus insuring wide dissemination of news about cancer.

With the cooperation of the New Jersey Press Association, the contest resulted in awards to three daily newspapers and three weeklies. Award plaques were personally contributed by George E. Stringfellow, vice president of Thomas A. Edison, Inc., and president of the Cancer Society, New Jersey division. Mr. President, I do not know of any citizen in this land who has so unselfishly contributed more of his time and his means in the leadership to find a cure for this affliction than has George E. Stringfellow. I am glad at this time to pay this tribute to this outstanding citizen, and also to the State of New Jersey.

With the aid of the great press and radio of this country, I believe that within a short time a general and active interest can be aroused to even strengthen this fight against a bodily disease and to speed the day when a general cure for it will be found.

The six winning editorials appeared in six newspapers. The three daily newspapers which were chosen were the Union City Hudson Dispatch, the Paterson Evening News, and the Passaic Herald News; the three weeklies which were chosen were the Merchantville Community News, the Cranford Citizen and Chronicle, and the Maplewood News.

Mr. President, I ask unanimous consent that these editorials upon this important subject be made a part of my remarks.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Union City (N. J.) Hudson Dispatch of April 19, 1947]

CANCER DEATHS UP NEARLY 100 PERCENT; WHAT ARE YOU GOING TO DO ABOUT IT?

Every 3 minutes on the average, somebody in this country dies of cancer.

The death rate from cancer in New Jersey has increased nearly 100 percent in the past quarter century. It killed 168.5 per 100,000 in 1945 compared with 87.5 in 1920.

It is estimated that 17,000,000 Americans now living are doomed to die from cancer. This scourge is the greatest and cruelest killer of those from 35 to 55 years.

Cancer is No. 1 "malady murderer" in the country, only second to heart disease. In New Jersey in 1945 there were 7,077 who died of cancer, compared with an average of 3,107 from 1920 to 1924.

Cancer is killing 184,000 a year throughout the country—that's more than 200 times the number killed in the catastrophe at Texas City.

What are you going to do about it?

"What can I do about it?" you may ask.

You can help to raise the $12,000,000 to fight cancer during this month's campaign. The quota for New Jersey is $750,000, for Hudson County, $95,000, and for Bergen County, $77,000. Here's what your contribution would be used to accomplish:

1. Inform men, women, and children everywhere of the danger signals and urge people to consult a doctor immediately at any sign of cancer. Remember, one in three may be saved through early diagnosis and prompt treatment. Money spent to spread knowledge will help your doctor help you.

2. Provide better facilities for prevention, diagnosis, and treatment of cancer. Cancer treatment requires radium—X-ray equipment—skilled personnel. Money spent for these facilities will help your doctor help you.

3. Expand widely the scientific research attack now being conducted by the National Research Council in 90 scientific centers in the United States alone. Cancer research must expand its work in radioactive substances which, according to authorities, may open up a new world of possibilities. Research, it is hoped, may lead to more effective treatment and possibly even the elimination of cancer. Money spent on cancer research will help your doctor help you.

Remember, that 25 cents of every dollar you give will be used for research to discover the cause and cure of cancer; 15 cents will be used for a Nation-wide educational campaign, and 60 cents will be spent in New Jersey to aid in improving equipment and services in existing cancer clinics; to establish new clinics, to aid in establishing and maintaining State-wide tissue diagnostic services, for nursing service in homes, and many other activities.

It's up to you to decide what to do about stopping the scourge of cancer in New Jersey and throughout the country.

Make your contribution today.

[From the Paterson (N. J.) Evening News of April 18, 1947]

STOP A MINUTE AND GIVE THOUGHT TO THIS—ARE YOU DOOMED TO A HORRIBLE DEATH?

"Give To Conquer Cancer" is the slogan of the appeal for funds to battle this scourge through research, education, and service. The need is great. An estimated 184,000 persons will die of cancer in the United States this year, an average of one fatality every 3 minutes. No respecter of social position or age, cancer kills four times as many children as does infantile paralysis.

While cancer statistics are horrifying, there is a bright side—a side which has grown brighter since the first extensive effort was organized in 1945, and which will grow even brighter if the present appeal has the wide public support it merits.

With funds raised the last 2 years, 94 research projects have been financed and are being conducted by outstanding scientists. Three times as many projects await funds to be started. Facilities and expert personnel have been provided in numerous hospital clinics, which report many cures. The field army volunteers have been aided in their year-around education and service program. Knowledge is being spread that cancer is curable if the public can be made sufficiently alert to have regular physical examinations. At last progress is being made by the weapons of research, education, and service, weapons which can be put to full use only if everybody will give to conquer cancer.

As a duty, and as a measure of the personal happiness that come from assured health, we must give freely and gladly to save human lives, perhaps your life.

Seventeen million Americans now living are doomed to fall victims to the greatest killer of all time—cancer.

Chances are, based on present conditions, that one out of every two families in America will be bereaved from this cause.

There is one chance in eight that you will be a victim.

Every 3 minutes some American dies of cancer—504 every day, 184,000 every year.

And the rate is going up.

Yet cancer is not necessarily fatal.

Even on the basis of our present slight knowledge of this dread disease, one out of every three victims can be saved through early diagnosis and prompt treatment.

And some day the cause and the remedy will be found.

But the trouble is that we have done so little and spent such a slight sum against this most vicious of all enemies—the greatest and cruelest killer of all women between the ages of 35 and 55, and the second greatest killer of men.

We spent $317,000,000,000 from Pearl Harbor to VJ-day to win World War II. Our total dead were 280,000.

During the same period our country spent only $2,000,000 in the research fight against cancer—and the cost in lives for that period was 607,000.

Cancer has claimed more lives than all the wars the world ever has known.

These are the facts and figures which caused Congress and the President to designate April as Cancer Control Month.

Cancer can be combated—and someday can be conquered, medical men believe—by research, education, and service. The American Cancer Society's campaign is directed to those ends.

Whether the appeal is based upon cancer's economic waste, the personal misery it causes, or the family tragedies that result from it, no one can be deaf to a plea for funds to war upon it.

Won't you—as one of the eight who may fall victim or as a member of one of the two families which cancer will strike—do your part?

Police Commissioner Jack Stern is chairman of the Paterson Cancer Fund drive and responsible for the raising of the city's $40,000 quota. On the shoulders of Harold W. Hutchinson rests the responsibility of raising the county quota of $60,000 including Paterson's $40,000.

The Cancer Society has no paid organization and is aided only by the efforts of volunteer workers. There is great need for such workers and the News appeals to them to come forward.

Phone Mrs. Edwin Lee, Lambert 3-6686 and offer your services. Do it now.

Contributions may be sent to headquarters of the Passaic County Cancer Society in room 104 of the County Administration Building.

Have you contributed? Have you done your share or are you just one of those who don't care?

What are you willing to do?

[From the Passaic (N. J.) Herald News of April 30, 1947]

YOU CAN HELP IN THIS GREAT FIGHT

Bob Bremner was editor of the Passaic Daily Herald and a member of the Sixty-third Congress when Dr. Howard A. Kelly came to his bedside in a Baltimore sanitarium in 1914. A million dollars worth of tubed radium was packed into his shoulder.

"There is nothing more that medical science can do for you, Bob," said the great physician from Johns Hopkins.

"Let's talk about something more important—about my industrial safety bill," said the indomitable Scot who smiled at death. "My life hasn't been worth one-tenth of the effort put forth to save it. I am ready for the scrap heap but I feel the cutting and the doctoring has added to our knowledge of how best to fight cancer. The day is coming when science will conquer it. I would rather be with those who were in the fight than be one of those who reap the benefit."

Then Robert Gunn Bremner died, aged 39.

Hugh Lendrim was treasurer of the newspaper in those days. He loved Bob Bremner as though he were a younger brother. Bremner's long illness and cheerful fight impressed him deeply. When Mrs. Lendrim died of the same cruel malady, he provided in his will for the establishment of the Josephine Lendrim Clinic at Paterson General Hospital, where radium, X-ray, and surgery since then have saved many lives.

One of Paterson General's former patients, an elderly man from East Sixth Street, Clifton, was waiting in the Passaic YWCA lobby to greet Dr. George T. Pack, after the famous cancer surgeon concluded an address last year.

"Don't you remember me, Doctor?" he asked. "Perhaps you can't; there are so many. You saved my life 6 years ago when you cut away part of my tongue."

But a Passaic city employee who is now Dr. Pack's patient at Paterson General can't hope for that everyday miracle. Too much time went by. Medical science has not found the answer that Congressman Bremner hoped for 33 years ago.

When it is found, it will be due very likely to the research work which the American Cancer Society is supporting through grants of $3,500,000 to research laboratories and medical colleges. Many of our ablest scientists are engaged in that humanitarian study of cause and cure.

Passaic County Chapter of the society is appealing to the public this month for $60,000, of which Passaic is asked to contribute $18,000 and Clifton $6,000. The campaign will continue through May.

Passaic General Hospital, whose well-equipped cancer clinic received $4,678 for radium and equipment from the society, will be helped by this campaign. So will the

clinics at Barnert Memorial, Paterson General and St. Joseph's Hospitals. Special medications will be paid for; nursing service will be supported.

Cancer ranks second to heart disease among all causes of death. It is responsible for one death among every eight. All who reach middle age live within its shadow.

Harold W. Hutchinson, 150 Ellison Street, Paterson, is Passaic County chairman of the cancer campaign. Herman P. J. Hoffman, Administration Building, Hackensack, is Bergen County chairman. Henry C. Whitehead heads the campaign in Passaic, John C. Barbour in Clifton.

Your check, mailed today to any of these campaign directors, will help to speed the day when the malady that kills one out of eight will come under control.

[From the Merchantville (N. J.) Community News of April 17, 1947]

WE CAN THINK OF NO EXCUSE FOR DODGING THE CANCER DRIVE

As president of New Jersey Division, Inc., of the American Cancer Society, George E. Stringfellow has said:

It is the responsibility of the doctors to advise how, where and for what medical facilities, programs and services money shall be spent.

It is the responsibility of the laymen to raise the money and to administer the funds in accordance with sound business practices.

This arrangement would, it can be supposed, be generally accepted by laymen without argument. Still, leading laymen giving their time, effort, and money to the fight against cancer would be concerned in the expenditure of the fund, and there could be some who felt their wardenship included watching the medical end. But Mr. Stringfellow's plan is best.

This agreement seems necessary as well as wise. The public asked to contribute this month to the drive for funds to fight cancer should be assured that its money will be properly spent and not wasted by questionable experiments, medically or administrative.

With the question settled, there will be no excuse for the tightwad and the responsibility-dodger to evade an obligation through asking: "Who spends it, and how?"

Too many people find excuses for their selfishness when drives come along, by knowing something like one of the stories of Red Cross charging for doughnuts, or a snooty girl being rude to a soldier at a Red Cross post. Too many people expect the other fellow to give the share they owe to movements that contribute to national or local relief and welfare.

Most men or women would be offended if asked if they were inferior, or normal good citizens. Yet one falls short of being a normal good citizen if he doesn't contribute what his means permit toward every drive that is necessary to maintain the organized services for reducing suffering and saving lives.

It isn't necessary to repeat the object of this drive for a fund to combat cancer. It is a rare case, indeed, where one of us can't name a relative or friend or an acquaintance who has died of cancer. We don't like the pressure practiced in frightening people to contribute to a war chest with the reminder that they might be victims. Yet that is true.

But the fight is to save future generations. This will be done through having all the money necessary to keep the best scientists on full time in their researches, their experiments; in having plenty of money to buy what science requires for its work.

For the present, the gains in the battle against cancer are many. The constant crusade has made the average physician more cancer-conscious. Like the fight against tuberculosis, now so effective in widespread X-ray examinations, the family doctor is alert in watching for signs of cancer, the public is being educated to seek immediate medical advice where any ailment indicates a character that could point to cancer.

Cancer is being stopped now, and some day its elusive mysteries will be revealed. But today we should make it possible that the mother of the poorest child, the worker in a factory, the person of moderate circumstances, reluctant to turn to modest savings, should know there is a clinic nearby prepared to give them free examinations and treatment if necessary.

Our hospitals are helped in fighting cancer through the State drive. We can't raise too much money. Camden County should have a hospital department with no other interest than cancer.

As to contributing to the drive, we can add that the failure of a canvasser to call for a donation doesn't excuse nongiving. A contribution left at a bank or at any reliable store will reach the fund.

[From the Cranford (N. J.) Citizen and Chronicle of March 20, 1947]

A TERRIBLE TOLL

Did you know that one in every two families in Cranford will be struck by cancer?

This horrible disease will kill one in every eight persons now living here.

This is a fact not only locally but in every community in this wonderfully rich and beautiful land of ours—this land of wealth and luxury.

The American Cancer Society tells us this terrible toll of death will occur unless we do something about it. And the local chapter, which will conduct a drive for funds in April, tells us what we can do to help avert this appalling tragedy.

First, we can give—give every penny possible to the society's drive for funds so that the goal may be reached. Then we can pay heed to what they tell us about the danger of cancer.

One thing imperative is the need for early detection of the disease, because in this way, lives can be saved. At least one-third of the 17,000,000 Americans now living who are doomed to die of cancer, could be saved if the disease were detected in time and proper treatment given. So another thing that we can do is to become cancer conscious and see our doctors for a complete medical examination at least once a year.

The American Cancer Society points out that there are three acceptable methods of treating cancer—with surgery, radium, and the X-ray. Recognizing this fact, and with the knowledge that in many cases early cancer can be cured, we can face the threat of this scourge with courage and realism.

All the wealth in the world cannot save us from death but there is one way in which we can use our money to keep the grim specter of cancer from us—by putting it to work in research projects where scientists are trying to learn the cause of cancer and perfect a cure for it.

Remember: When you make a contribution to this cause, you are really helping to save the lives of many people right here in Cranford.

[From the Maplewood (N. J.) News of April 3, 1947]

ONE IN EIGHT WILL DIE

No matter how objective one may wish to be, there are times when a person's thoughts, feelings, and actions are influenced directly by his own experiences or by the experiences of those close to him. It is perhaps for that reason that we feel so strongly about the effort now under way, locally and throughout the Nation, to obtain funds with which to fight cancer. We have hated cancer for 18 long years, hated it since the Easter of 1929 when our own mother died of this cruel disease.

There has been progress in the battle against cancer in the intervening years, but not nearly so much progress as in other disease areas. A vast amount of scientific exploration still is necessary before it will be possible to have all the answers about causes, preventives, and cures. And a great amount of general education of the public at large is necessary in order to create an awareness of the disease and its death-dealing blows.

The American Cancer Society, which is leading the attack against cancer, presents these startling statistics:

Cancer strikes on the average one out of every two families.

Cancer is the greatest and cruelest killer of American women between the ages of 35 and 55.

Cancer is the second greatest killer of men.

One in every eight living Americans is destined to die of cancer.

And here are some Maplewood statistics:

Of a total of 209 deaths here in 1946 from all causes, 27 were from cancer. Only the various kinds of heart ailments exceeded this total, the heart figure being 74. Of the cancer deaths, 15 were of men and 12 of women; by age groups, there was one in the 35–44 class, three in 45–54; nine, 55–64; eight 65–74, and six 75–84.

Money in itself will not stop cancer, but the society, in its bid for at least $12,000,000 nationally, has a three-pronged program: Inform men, women, and children everywhere of the cancer danger signals in order to promote early diagnosis and treatment; provide better facilities for prevention, diagnosis, and treatment (effective treatment requires radium, X-ray equipment, and more skilled personnel); expand widely the scientific research attack now being conducted by the National Research Council.

The Maplewood committee's objective is to exceed the $8,900 subscribed by Maplewoodians last year. Since that is an average of considerably less than 50 cents per resident it should be an easy goal to reach. It should be easy to double that amount.

Mr. SMITH. Mr. President, I am very glad, indeed, that the distinguished Senator from West Virginia has made these remarks about a distinguished citizen of my State, Mr. George E. Stringfellow, and I am glad to join with the Senator in paying tribute to Mr. Stringfellow for his work in connection with cancer research.

BUDGET ESTIMATES FOR BUREAU OF RECLAMATION, INTERIOR DEPARTMENT

Mr. WHERRY. Mr. President, before suggesting the absence of a quorum, as a preliminary to taking up consideration of the unfinished business, I should like to ask unanimous consent to make a brief statement relative to reclamation and irrigation and power, as provided by the program of the Department of the Interior.

The PRESIDENT pro tempore. Without objection, the Senator may proceed.

Mr. WHERRY. Mr. President, never before in the history of our country has there been more general interest than exists today in the continuing program for the development of our natural resources by the Interior Department's Reclamation Bureau, through reclamation, power, and related projects, and the effort of the Corps of Engineers on river-and-harbor and flood-control projects.

Interest in the efficient and effective progress of these activities extends to almost every resident, both rural and urban, throughout the 17 so-called western reclamation States, but it is of almost

equal interest to the other States because of the great asset value to the Nation at large of a comprehensive and permanent conservation effort.

So that Congress and the general public may have for convenient reference a list of the construction appropriations proposed in the budget just submitted to Congress for the fiscal year beginning next July, I am requesting permission to insert in the RECORD herewith a list of the amounts approved by the Budget Bureau for the use of the Reclamation Bureau in the construction of irrigation works and multiple-purpose projects to develop our land and water power.

It is to be remembered, of course, that these are subject to review and alteration by the Appropriations Committees of Congress, and by the House and Senate, and that the estimates by the Budget Bureau are not necessarily binding.

Also, for the information of those who are interested in having a similar convenient list of construction estimates for flood-control and river-and-harbor work proposed to be carried on in the next fiscal year by the Corps of Engineers, I will say that such a list was published in the CONGRESSIONAL RECORD for January 12, 1948, on page 94, at the request of Representative ENGEL of Michigan.

It will be noted that the total amount of funds approved by the Budget Bureau for submission to Congress for construction activities of the Reclamation Bureau during the next fiscal year is $257,025,461. This figure is compared with an amount actually approved for the current fiscal year of $211,102,771.

The total proposed for the various reclamation projects in the Missouri Basin development program amounts to $58,325,000 for the Reclamation Bureau and $5,575,000 for other cooperating Department of the Interior units, making a grand total of $63,900,000. This is indicative of the advancement of many projects into the general-construction phase and is compared with a total during the current fiscal year of $33,407,110.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Nebraska?

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Bureau of Reclamation—Estimates of new appropriations for construction included in the budget for the fiscal year 1949—Project and amount

RECLAMATION FUND, CONSTRUCTION

1. Paonia project, Colorado	$471,000
2. Pine River project, Colorado	60,000
3. Boise project, Idaho, Payette division	750,000
4. Boise project, Anderson Ranch Dam	5,800,000
5. Lewiston Orchards project, Idaho	1,136,000
6. Minidoka project, Idaho	(1)

[1] On the Minidoka project, Idaho, the budget estimate proposes that the limitation on the amount available for surveys and preconstruction work in connection with the north side pumping division stated in the Interior Department Appropriation Act, 1947, be increased from $100,000 to $770,000.

RECLAMATION FUND, CONSTRUCTION—continued

7. Sun River project, Montana	$45,000
8. Tucumcari project, New Mexico	1,540,000
9. Rio Grande project, New Mexico-Texas	100,000
10. W. C. Austin project, Oklahoma	320,000
11. Deschutes project, Oregon	230,000
12. Owyhee project, Oregon	150,000
13. Ogden River project, Utah	34,000
14. Provo River project, Utah	1,200,000
15. Yakima project, Washington, Roza division	1,497,000
16. Riverton project, Wyoming	750,000
17. Shoshone project, Wyoming, power division	430,000
Total, reclamation fund, construction	14,513,000

RECLAMATION FUND, REHABILITATION AND BETTERMENT

The 1949 budget includes estimates for commencement of rehabilitation and betterment on the following completed projects in not to exceed the following amounts, payable from the reclamation fund:

1. Salt River project, Arizona	556,500
2. Yuma project, Arizona	500,000
3. Orland project, California	50,000
4. Bitterroot project, Montana	40,000
5. Milk River project, Montana	103,500
6. North Platte project, Nebraska-Wyoming	750,000
7. Humboldt project, Nevada	225,000
8. Carlsbad project, New Mexico	400,000
9. Hyrum project, Utah	48,000
10. Yakima project, Washington	151,000
Total, reclamation fund, rehabilitation and betterment	2,824,000
Total, construction and rehabilitation and betterment projects, reclamation fund	17,337,000

GENERAL FUND, CONSTRUCTION

1. Gila project, Arizona	3,000,000
2. Davis Dam project, Arizona-Nevada	24,000,000
3. Parker Dam power project, Arizona-California	260,000
4. Central Valley project, California	41,500,000
5. Kern River project, California	50,000
6. Colorado-Big Thompson project, Colorado	23,000,000
7. Hungry Horse project, Montana	9,850,000
8. Columbia Basin project, Washington	48,000,000
Total, general fund, construction	149,660,000

OTHER CONSTRUCTION PROJECTS

1. Fort Peck project, Montana	2,200,000
2. Missouri River Basin	[2] 63,900,000
3. Boulder Canyon project (Hoover Dam)	1,920,000
4. Boulder Canyon project (All-American Canal)	4,484,000

[2] This figure represents the lump sum estimated for the Missouri River Basin, fiscal year 1949. The break-down of this amount is set forth in the table which appears below.

OTHER CONSTRUCTION PROJECTS—continued

5. Colorado River front work and levee system	$1,160,000
Total, other construction projects	73,664,000
Grand total, 1949 estimates of new appropriations for construction	240,661,000
Estimated unobligated balance July 1, 1948, for use on construction projects in fiscal year 1949	[3] 16,364,461
Grand total of construction funds, fiscal year 1949	257,025,461

[3] The total estimated unobligated balance July 1, 1948, for construction is $20,321,056, of which $3,956,595 is for use on construction projects subsequent to fiscal year 1948, leaving $16,364,461 available for use on construction projects during fiscal year 1949.

Break-down of Missouri River Basin project program, fiscal years 1948–49

PHASE A—UNITS SELECTED FOR CONSTRUCTION

Angostura, S. Dak	$3,600,000
Bostwick, Nebr.-Kans	3,000,000
Boysen, Wyo	6,108,000
Belle Fourche, Wyo	550,000
Cannonball, N. Dak	950,000
Canyon Ferry, Mont	3,500,000
Cedar Bluff, Kans	3,600,000
Frenchman-Cambridge, Nebr	8,900,000
Glendo, Wyo	1,000,000
Grand River, S. Dak	1,800,000
Heart River, N. Dak	2,347,000
Kortes, Wyo	4,800,000
Moreau River, S. Dak	995,000
Narrows, Colo	2,000,000
Powder River, Wyo.-Mont	1,000,000
Region 6 headquarters, Montana	5,000
St. Francis, Colo.-Kans	2,000,000
Transmission lines	5,053,000
Yellowstone pumping, Montana-North Dakota	700,000
O. & M. during construction	50,000
Subtotal, phase A	51,958,000

PHASE B—UNITS BEING PREPARED FOR CONSTRUCTION

Bad River, S. Dak	15,000
Big Horn pumping, Wyoming	20,000
Columbus, Nebr	200,000
Grand Island, Nebr	500,000
Hardin, Mont	500,000
Jefferson River, Mont	100,000
Lower Marias, Mont	300,000
Middle Loup, Nebr	300,000
Missouri-Souris, Mont.-N. Dak	700,000
Montana pumping, Montana	50,000
North Dakota pumping, North Dakota	50,000
Oahe-James River, S. Dak	400,000
Rapid Valley, S. Dak	55,000
Shoshone extensions, Wyoming	100,000
South Dakota pumping, South Dakota	30,000
Sun River, Mont	50,000
Tongue River, Wyo	78,000
White River, S. Dak	30,000
Wind River, Wyo	20,000
Subtotal, phase B	3,498,000

PHASE C—CONTINUING WORK ON THE GENERAL PLAN OF DEVELOPMENT

Big Horn Basin, Wyo.-Mont	80,000
Cheyenne River, S. Dak	35,000

PHASE C—CONTINUING WORK ON THE GENERAL PLAN OF DEVELOPMENT—continued	
Clarks Fork, Wyo.-Mont.	$6,000
Garrison diversion, North Dakota	78,000
Helena Valley, Mont.	30,000
Judith River, Mont.	15,000
Kansas Basin, Colo.-Nebr.-Kans.	400,000
Little Missouri, N. Dak.	15,000
Lower Platte Basin, Nebr.	700,000
Nilan, Mont.	8,000
Niobrara Basin, Wyo.-Nebr.	200,000
North Platte Basin, Colo.-Wyo.-Nebr.	180,000
North Republican, Colo.-Nebr.	14,000
South Platte Basin, Colo.-Wyo.-Nebr.	300,000
Three Forks, Mont.	428,000
Upper Marias, Mont.	50,000
Wilson, Kans.	100,000
General:	
Power studies, region 6	$30,000
Reports staff, region 6	100,000
Subtotal, phase C	2,769,000
PHASE D	
For work in cooperation or in connection with the activities of the Corps of Engineers	100,000
Total, Bureau of Reclamation	58,325,000
Other Department of the Interior agencies:	
Bureau of Land Management	450,000
Bureau of Mines	150,000
Fish and Wildlife Service	425,000
Geological Survey	4,150,000
National Park Service	200,000
Office of Indian Affairs	200,000
Total, other departmental units	5,575,000
Total, Missouri River Basin project	63,900,000
Total program, Bureau of Reclamation	58,325,000
Less transfer to Denver office (included above)	4,560,000
Total obligations, Bureau of Reclamation	53,765,000

Appropriations to the Bureau of Reclamation for construction, fiscal year 1948

Fund or project:	*Amount*
Reclamation fund:	
Regular	$11,876,750
Supplemental	72,000
General fund:	
Regular	49,841,288
Supplemental	31,939,000
Fort Peck project, Montana	1,500,000
Missouri River Basin:	
Regular	17,000,000
Supplemental	6,400,000
Boulder Canyon project (Hoover Dam)	435,000
Boulder Canyon project (All-American Canal)	3,245,000
Colorado River front work and levee system	1,000,000
Total new appropriations	123,309,038
Unobligated balance for construction, fiscal year 1948	87,793,733
Total	[1] 211,102,771

[1] Of this amount, it is today estimated by the Interior Department that $20,321,056 will be carried into the fiscal year 1949 as an unobligated balance.

CALL OF THE ROLL

Mr. WHERRY. Mr. President, the Senate has now approached the point at which we are ready to take up the unfinished business, and I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Gurney	Murray
Baldwin	Hatch	Myers
Ball	Hawkes	O'Conor
Barkley	Hayden	O'Daniel
Brewster	Hickenlooper	O'Mahoney
Bricker	Hill	Overton
Bridges	Hoey	Reed
Brooks	Holland	Revercomb
Buck	Ives	Robertson, Va.
Bushfield	Jenner	Robertson, Wyo.
Butler	Johnson, Colo.	Russell
Byrd	Johnston, S. C.	Saltonstall
Cain	Kem	Smith
Capehart	Knowland	Sparkman
Capper	Langer	Stennis
Chavez	Lodge	Stewart
Connally	Lucas	Taft
Cooper	McCarran	Taylor
Donnell	McCarthy	Thomas, Okla.
Downey	McClellan	Thomas, Utah
Dworshak	McFarland	Thye
Eastland	McGrath	Vandenberg
Ecton	McKellar	Watkins
Ellender	McMahon	Wherry
Ferguson	Magnuson	Wiley
Flanders	Maybank	Williams
Fulbright	Millikin	Wilson
George	Moore	Young
Green	Morse	

Mr. WHERRY. I announce that the Senator from Oregon [Mr. CORDON] is necessarily absent on official business of the Committee on Public Lands.

The Senator from Nevada [Mr. MALONE] is absent on account of illness.

The Senator from New Hampshire [Mr. TOBEY] is absent on official business.

Mr. LUCAS. I announce that the Senator from West Virginia [Mr. KILGORE] is absent on public business.

The Senator from Florida [Mr. PEPPER] is absent by leave of the Senate.

The Senator from Maryland [Mr. TYDINGS], the Senator from North Carolina [Mr. UMSTEAD], and the Senator from New York [Mr. WAGNER] are necessarily absent.

The PRESIDENT pro tempore. Eighty-six Senators having answered to their names, a quorum is present.

PROMOTION OF FOREIGN RELATIONS BY INTERCHANGE OF PERSONS, KNOWLEDGE, ETC.

The Senate resumed the consideration of the bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotions of the interchange of persons, knowledge, and skill between people of the United States and other countries.

The PRESIDENT pro tempore. The immediate question now before the Senate is on agreeing to the first amendment of the committee, which the clerk will state.

The CHIEF CLERK. On page 2, line 5, after the words "Educational Exchange Act of", it is proposed to strike out "1947" and insert "1948."

Mr. SMITH. Mr. President, House bill 3342, the pending measure, which, according to its amended title, is "An act to promote a better understanding of the United States among the peoples of the world and to strengthen cooperative international relations," is the Voice of America program. This bill, which has been the subject of intensive study and considerable debate in the Congress and in its committees for a period of over 2 years, is an attempt to give legislative authority to certain activities that have been carried on by the State Department since the close of the war. Let me repeat that the bill represents an attempt to give legislative authority to certain activities which have already been carried on. It is really the consolidation of the activities of the State Department's Division of Cultural Relations, the Office of Inter-American Affairs and the so-called Office of War Information, which carried on during the war, and which aimed to provide an intelligent understanding of the status and progress of the war effort and of the war policies and activities of the Government. After the close of the war, it was felt advisable to continue these activities which aimed to explain the spirit and purpose of America to other nations of the world.

The so-called Mundt bill, which is the foundation of the present proposed legislation, passed the House of Representatives last June by a vote of 272 to 97. The Foreign Relations Committee of the Senate immediately took up the bill and reported it favorably shortly thereafter with certain amendments, but it did not come to a vote before the end of the first session of the Eightieth Congress. A Senate resolution was adopted, however, providing for the setting up of a special committee to investigate the whole matter and to cooperate with a corresponding committee of the House of Representatives in visiting Europe this past summer and reporting back to the Congress not later than February 1, 1948.

THE TRIP ABROAD

Following up the directive contained in the Senate resolution, the chairman of the Foreign Relations Committee, the Senator from Michigan [Mr. VANDENBERG] appointed as a subcommittee of the Senate Foreign Relations Committee, to make this study, the Senator from Kentucky [Mr. BARKLEY], the Senator from New Mexico [Mr. HATCH], the Senator from Iowa [Mr. HICKENLOOPER], the Senator from Massachusetts [Mr. LODGE], and the Senator from New Jersey [Mr. SMITH]—myself—as chairman. Acting with a corresponding committee appointed by the House of Representatives, composed of Representative MUNDT, chairman, and Representatives GORDON, JARMAN, JUDD, LODGE, MANSFIELD, and LAWRENCE SMITH, we visited the capitals of Europe together during the months of September and October. We made a careful study of the operation of the so-called information and educational program of the State Department in these various parts of Europe. The committee is now engaged in preparing a report, country by country, of the places visited and indicating more specifically than it is necessary to do at this moment, the situation as we found it in those countries. It is our hope and belief that the report, which will shortly be presented to the Congress, may be of aid

in bringing about a better understanding of the so-called information and educational exchange program, and may also be a helpful guide to the new administration being set up in the State Department to direct these activities.

Let me emphasize at that point, Mr. President, that a new administration is being set up in the State Department, with a new Assistant Secretary of State at its head, whose name has just been announced, and whose nomination will shortly come before the Senate Foreign Relations Committee for action.

Mr. President, I think it is fitting at this point in my remarks to acknowledge our appreciation to the War Department for its courtesy in extending to us the use of an Army plane—a C–54—with a most excellent and attentive crew, composed of the following members: Capt. R. W. Carroll, Capt. William E. Gregg, Master Sgt. Frank Sayho, Tech. Sgt. Theodore M. Lucas, Capt. Edward M. Rubich, Capt. Paul H. Pflug, Staff Sgt. William P. Truesdell, Staff Sgt. L. M. Harris, and Master Sgt. Steve Fedinick.

The party was in the immediate charge of Col. Paul Tombaugh, to whom we owe our thanks for the effective way in which the strenuous schedule was carried out.

The joint committee staff was made up on the House side of Mr. John Easton, of the House Foreign Affairs Committee; Messrs. Rewinkle and Ravendahl, of the State Department, and Mr. Morrell; on the Senate side, Mr. A. B. Hermann, administrative assistant of the chairman, and Henry Holthusen, of New York.

As chairman of the Senate group, I desire to express my acknowledgment to Chairman MUNDT and his colleagues of the House group and the appreciation of all of us on the Senate side for the effective way the Members of the House worked with us in our common endeavor to understand and make some contribution to our American foreign policy in dealing with this difficult subject.

I desire to add a word of personal appreciation of the fine assistance and counsel I have received from my colleagues in the Senate, and the opportunity that it gave us all to know each other better in taking a trip of this kind, joined as we were in our common interest to serve our country more effectively. While the Senator from Massachusetts [Mr. LODGE] did not actually accompany the party on the trip, he went to Europe independently last summer, and he has filed with the committee a separate and most important report containing his observations made from a somewhat different viewpoint.

The trip as a whole consumed nearly 2 months, and the committee or some of its members at least covered every capital in Europe except Yugoslavia, Albania, Russia, and the Irish Free State. We covered the important countries of western Europe, the Scandinavian countries, Germany, the so-called satellite countries behind the iron curtain, Turkey, Greece, Italy, Spain, and Portugal. We had the unique experience of feeling the comparative "atmospheres" of the free countries of western Europe, now included within the European recovery plan, and the "unfree" police states suffering in fear behind the iron curtain. We saw with our own eyes and experienced the pattern of the Communist infiltration. We felt the influence of misrepresentation, falsification, division, chaos, compromise, despair, and ultimate absorption.

We moved in the States where we could watch the liquidation of the opposition. We could feel the fear that was engendered in the peoples of these countries when the opposition leaders were seized and charged with treason. We arrived in Bulgaria just after Petkov had been murdered. We were in Rumania after Maniu had been imprisoned, but before he was tried and condemned to a life of solitary confinement. We were in Hungary after Nagy had been thrown out, and before Pfeiffer, with whom we conversed, had been compelled to flee for his life. We were in Poland and talked with Mikolajczyk before he was compelled to flee. And, of course, we knew before any of these incidents of the case of Mihailovich in Yugoslavia.

Mr. President, while we were experiencing these successive nightmares which we could hardly believe there was constantly brought to our attention the incessant falsification of our country and the charges that we in the United States had imperialistic designs on Europe; that the proposals of Secretary Marshall, now known as the Marshall plan, were a frantic effort to divert an inevitable American economic depression by unloading our surplus on Europe—were an attempt to give priority in the recovery of Europe to the German aggressors; that it was a plot to restore the military might of Germany as a United States instrument to dominate Europe; that the recovery program was clearly an act of imperialism to make all of Europe a dependency of the United States.

Perhaps because of these vivid experiences and these outrageous misrepresentations of the spirit and purpose of our country we were peculiarly sensitive to the fact that we were woefully inadequate as a nation, through our embassies and legations, to present our story. We did not have the means adequately to staff our representatives in the various countries of Europe with people equipped to contact the local press, to use the radio, properly to distribute such information agencies as our motion pictures; to aid our pitifully small libraries to meet the daily demands everywhere of people to know more about America and what America really did stand for. Coupled with all this, we found a real eagerness among natives with whom we talked to come to America and to exchange ideas with us, and to have our people come to Europe to tell those in Europe why and how America has become the great nation that she is.

CONCLUSIONS FROM THIS TRIP

Mr. President, I think I am justified in drawing certain conclusions from our trip, for my colleagues as well as myself. I have talked these matters over with them quite fully, and I should like to present our conclusions briefly:

First. The United States today is not understood in these countries, and our present service, acting through our embassies and legations, is wholly inadequate to make us properly understood. This does not mean boastful propaganda, but simply means telling the truth;

Second. The present hostile campaign by Russia, which has been intensified since the European recovery program has begun, makes it imperative that we make it clear to the people of these countries, as distinguished from their rulers, what we are trying to do for Europe and why we are trying to do it. The constant reiteration of lies and misrepresentations does have its effect and does leave questions in the minds of people who otherwise would be friendly to the United States. For example, in Czechoslovakia, which is slowly being absorbed by the Communist movement, the question was seriously asked of us whether we did intend to build up Germany industrially, so that she might become our instrument to control Europe.

The extent to which the official Soviet Government goes in its attacks against the United States and its motives is almost unbelievable to any American who respects honesty and truth.

To illustrate the viciousness of these attacks, I should like to cite several examples.

The first concerns a bitter attack made by Radio Moscow only a few days ago against the efforts of charitably minded Americans to alleviate starvation in the war-torn countries of the world.

I quote this Russian broadcast, which was sent out a few days ago over Radio Moscow in the German language to the German people:

> Only simple-minded people could have believed that American alms in the form of CARE parcels would fill the stomachs of the miners. These CARE parcels were advertised to an almost unbelievable extent by Anglo-United States propaganda which stated that the parcels contained 40,000 calories. Examination proved, however, that the parcels contained a multitude of various goods including toilet paper. Moreover, these parcels are being debited against Germany's account and in the future will have to be paid for in hard cash.
>
> Only American manufacturers are benefiting through the CARE parcels. According to reports in the German democratic press (Communist), American racketeers have made a profit of $15,000,000 already during the first months of the CARE parcel scheme. The CARE parcel system introduced into the Ruhr mines by the Americans is nothing else but the notorious sweated labor system designed to exploit the miners, and its perilous results are already becoming noticeable.

Here are further examples of this vicious propaganda:

To Germany, Radio Moscow said:

> No other name than "Hitlerite Anschluss" describes this Austrian federation hatched in Germany, this anti-Communist Catholic state designed to unite Bavaria and Austria and the western territories under the wings of the United States dollar and the Vatican cross. This federation displays only too blatantly the stamp "Made in the U. S. A.," which is born out by the fact that both Cardinal Spellman and the bank of Pierpont Morgan are showing unhealthy interest in it.

In Italian to Italy, Radio Moscow said:

> United States warmongers agree in supporting a military aggression against the Soviet Union. Some of them even want the United States to drop atom bombs on Soviet cities even now.

To the Czechs, Radio Moscow said:

The Marshall plan is not merely a plan for the economic and political enslavement of European countries by the United States. It is at the same time a plan to organize military strategic bases in Europe for United States imperialism, a plan to accumulate supplies of strategic raw materials for the United States with the help of European suppliers. United States expansionists circles demand that United States loans and deliveries to certain European countries be made only in exchange for certain territorial concessions.

In English to North America, Radio Moscow said:

The American bankers and monopolists have no desire to combat inflation for they need it as a weapon of attack on the wide masses. Indeed, New York business circles are already discussing what they call the need for a reserve army of four or five million unemployed which will help them to keep wages down and crush the efforts of the trade-unions defending the rights of the working peoples. All of these methods of plundering the United States masses are directly connected with the Marshall plan.

Mr. President, at this point in my remarks I should like to have printed in the RECORD as a part of my address excerpts from other broadcasts from Moscow, which further illustrate what Russia is saying about us. The ones which I have read are illustrative, but I feel that the others are important for the RECORD, to show the extent to which this program of vilification has been carried.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

[From the Washington Star of December 10, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in Persian to the Near and Middle East, said:

"The generous American help in dollars and armaments to international reaction has not had the desired results for United States imperialists. In the struggle between the forces of reaction and those of democracy, the latter have gained the upper hand, and are more and more strengthened. Hence the ruling United States circles are striving with greater obstinacy to weaken the people's resistance from within, and to sow the seeds of discord in the democratic camp.

"These objects must be realized by those statesmen, circles, and parties who are linked with imperialistic policy and foreign capital. Such parties and statesmen are ready to carry out without argument the orders of their overseas masters. Even if these orders run contrary to the interests of their countries they do not fail to obey like slaves."

[From the Washington Star of December 11, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in English to the United Kingdom, said:

"The Foreign Ministers Conference in London has been marked by a consistent effort of the Soviet delegation to reach a speedy European peace settlement. In fact it was the sincere desire of the Soviet delegation to reach an agreement which from the outset secured concerted decisions on certain questions of procedure in framing the German treaty. On the other hand, during the discussion of such crucial issues as the creation of a democratic government for the whole of Germany, the future peace conference, in German assets in Austria, the United States delegation, as a rule followed by Bevin and Bidault, took a stand that betrayed not the slightest desire to reach coordinated decisions. It is a stand aimed at causing a break-down in international cooperation."

[From the Washington Star of December 12, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in Persian to the Near and Middle East, said:

"The small Syrian Republic is passing through a severe economic crisis. Local industries are limiting their production and the workers are being deprived of employment and means of earning their bread. Public opinion in Syria places the responsibility for the situation on the shoulders of the United States monopolists.

"The Americans have filled the markets of that country with their goods. They are resorting to numerous intrigues and machinations to undermine the basis of the states. American diplomats arrogantly interfere in the internal affairs of the country, imposing their will on a Majlis of their own making, and support the reactionary circles which are resented by the nation."

[From the Washington Star of December 16, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in Polish to Poland, said:

"At the very beginning of the conference the Soviet delegation proposed a number of concrete and definite motions aimed at bringing about agreement on the most pressing matters pertaining to the postwar regime of Germany. It demonstrated to the whole world who really desires peace and who obstructs the agreement.

"The shouts and the conference is over, and the declaration of the United States papers that they have had enough of it equally betray the anger of the reactionary circles on both sides of the ocean with the fact that the Soviet proposals expose those who are trying to put the blame on others."

[From the Washington Star of December 17, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in English to the United Kingdom, said:

"The House of Representatives has just passed the bill on interim aid for Europe, after putting some anti-Communist and anti-Soviet amendments into it. These amendments leave no doubt that not only on that pretext of aid the United States means to interfere in the domestic affairs of European countries, but also that this United States interference is aimed at crushing the democratic movement of the peoples of Europe."

[From the Washington Star of December 18, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in English to North America, said:

"The Committee on Un-American Activities of the House of Representatives has demanded the death sentence for America's most popular stars, simply because they have espoused the lofty human ideals of peace, freedom, and democracy. If an actor does not further the idea of atomic war, he cannot find work in America today. If he opposes racial discrimination, he is prosecuted. If he refuses to devote his talents to anti-Soviet activity, he is threatened with imprisonment. All that is progressive and truly democratic in America has become seditious."

[From the Washington Star of December 20, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting to the Soviet Union, said:

"The wave of American tourists has transferred from Greece to Turkey to Iran. trans-Atlantic businessmen, sleuths, and corrupt journalists, singly and in parties, make interesting journeys through this country.

"It is not historical remains but oil which lures American imperialism to the Middle East. It is oil that is needed by contemporary American militarism. * * *

"Everywhere in the Middle East the traveler is struck by the potentialities of the future. Naturally this 'future' is described in the Stars and Stripes form of United States colonial domination over the countries of the East."

[From the Washington Star of December 21, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in German to Europe, said:

"The Soviet decision to abolish rationing and carry out a currency reform has found a wide echo in the world press. The great Soviet country which had borne the main burden of the war proved once more to the world that the Socialist economic system is immeasurably superior to the chaotic and predatory system of capitalism.

"The venal journalists, on the other hand, who are being kept by the reactionary monopolists in the United States, Britain, and other capitalist countries, have shown once more that they do not draw their money for nothing. They employed every means to distort the historic Soviet measure."

[From the Washington Star of December 22, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in Japanese to Japan, said:

"With the help of the Japanese Zaibatsu and militarists, the Americans have transformed Japan into a colony and a military base of the United States. Because of this, the United States adheres to its unilateral policy regarding the Japanese peace treaty. The American imperialists and the Japanese reactionaries, therefore, have started to slander the Soviet Union.

"In order to regain their power, the Japanese reactionaries, with the support of the American imperialists, are turning Japan into a colony of the United States and are wholeheartedly supporting American unilateral policy."

[From the Washington Star of December 23, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in Danish to Denmark, said:

"The various plans for setting up regional customs stations, the realization of which threatens the economic independence of European countries, are an important link in the schemes of the United States monopolists who wish to take posession of the European countries' economies.

"The (decision) to establish a Nordic customs union is also dictated by the interests of the United States monopolies and by the attempts of the monopolies to transform the Scandinavian countries into a customs-free dumping market for United States goods."

[From the Washington Star of December 24, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in Russian to the Soviet Far East, said:

"In his message to Congress, President Truman tried to conceal the imperialistic essence of the Marshall plan behind a variety of worthy formulas, and to represent that program as aid to the democracies of Europe.

"The struggle of the progressive elements of European countries which suffered from the war and the struggle for the preservation of the sovereignty and independence of these countries are declared by Truman to be opposition to the rehabilitation of Europe. We must not close our eyes to the fact, says the message, that the Communists are decisively opposed to any attempt to help Europe get back on her feet."

[From the Washington Star of December 30, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in French to Europe, said:

"The Voice of America (The United States short-wave broadcast) carries out the orders it gets from Wall Street and does not shirk at any method to carry them out. When King Dollar is in, the moral standards are out.

"The truth is a foreign notion to the Voice of America, in particular, and United States broadcasts in general. The United States wavelengths are almost entirely under the control of monopolist corporations. The class in power allows only reactionary journalists and commentators ready to write and read anything that pleases the 'boss,' to the mike. Progressive journalists hardly ever manage to broadcast."

[From the Washington Star of December 31, 1947]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting to the Soviet Union, said:

"Recently, on board the steamship *Russiya*, a group of Armenians arrived from the United States. They had emigrated from Russia 20 to 30 years ago. The stories of these living witnesses on life in the United States are full of tragedy. They speak about awful years during which they lived in Truman's golden America.

" 'Some of us made a fairly good living at times, but despite that, could never feel like human beings in the United States,' said an Armenian doctor, who has just returned from the United States.

" 'It is only here among the Soviet people that we begin to feel and experience real freedom and human life,' said an electrician who lived 46 years overseas."

[From the Washington Star of January 1, 1948]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in French to Europe, said:

"More than 2 years have elapsed since the end of the war against fascism. Where is peace today? The angels must be particularly saddened when they fly over the very Christian America and when they hear on the waves—so-called free—the choir of the warmongers which rival each other to find the most efficient means to exterminate men.

"But what does it matter? The American leaders have prepared impressive gifts for the European people: Antiworker laws in France, increases in the price of coal and railway fares, projects for a western German state, amnesty for the Fascists, and many things which I do not mention. It is not toward the star of Bethlehem but toward the dollar that certain 'kings' of western Europe turn their glances today, forgetful of national dignity and surrounded by the indignation of their people. It is not before the humble manger that they kneel but before the American association of industrialists."

[From the Washington Star of January 4, 1948]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in English to the United Kingdom, said:

"The formation of a provisional democratic government of Greece upset the whole reactionary camp from Athens to Washington. The growth and consolidation of the democratic forces of Greece, which is indicated by the failure of all the efforts of the Athens puppets to crush the democratic army in the guerrilla forces, reflects the deep and abiding love of the Greek people for liberty and independence.

"The Anglo-United States patrons of the Greek Fascists are in difficult straits. The actions of the Greek democrats expose the whole imperialist policy pursued by Britain and the United States in Greece."

[From the Washington Star of January 5, 1948]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in English to North America, said:

"It is known that the American reactionaries label as Communists all who refuse to bow to the almighty dollar, all who refuse to sell their Nation for a mess of pottage. All this further exposes the real aims of the American imperialists, who dream of clearing the road to world domination with the dollar and the atomic bomb.

"But the bosses of the Marshall plan overlook the will of the nations of Europe, who do not want to serve as pawns in the hands of others or sacrifice themselves for plans hatched on the other side of the ocean."

[From the Washington Star of January 6, 1948]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting to the Soviet Union, said:

"Wallace's election campaign undoubtedly leads to the salvation of the democratic forces in the United States, and it is greeted by all who favor democratic development in the United States and are sincere friends of peace * * *."

Moscow radio, broadcasting to the United Kingdom, said:

"Even before the announcement that Wallace was to stand for the Presidency, Government employees were discharged under Truman's loyalty order for sympathizing with Wallace and listening to his speeches, and as the election campaign gets going and the people's movement against the bipartisan policy continues to mount, fresh emergency measures against progressive-minded Americans may be expected."

[From the Washington Star of January 7, 1948]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in French to Europe, said:

"It is by now ancient history that corruption is rife in the United States administration, as well as in the political parties. Indeed, corruption in the United States has assumed truly American proportions, and this applies to Federal Government organs and private concerns.

"Volumes would have to be written to write even a brief outline of the dishonesty of American officials, many of whom have felt the heavy hand of the law and public opinion. But there are not a few United States statesmen whose nefarious activities are carried on behind the scenes, and of whose exploits little or nothing is known."

[From the Washington Star of January 8, 1948]

WHAT THE RUSSIANS ARE SAYING OF US

The Moscow radio, broadcasting in Russian to the Soviet Union, said:

"The countries treading along the American path are up to their eyes in postwar difficulties. Britain and France are going through a crisis, and even in the United States the approach of a crisis is becoming clearer. The Marshall plan is designed to delay the approach of a crisis and to convert the European countries into suppliers of raw materials for United States markets. It is designed to strangle the industries of Europe and to cast European countries into the abyss of poverty and unemployment."

Mr. SMITH. Mr. President, I proceed now to my third point:

I think it was the feeling of our entire group that, while there were shortcomings in the services that our missions had rendered during the last few years in the information field, nevertheless generally speaking, and realizing the limited resources at their command, they had done a distinctly creditable job and the limited personnel engaged in these operations was entitled to real gratitude and praise from us.

Fourth. I think we are agreed also that whatever expenditures have been made up to date for this service were fully justified, and that the necessary work to be done in these informational and educational fields must have far more extensive support than it has had in the past. We compared the amount spent by Great Britain for her information program, including the BBC broadcasts, and we discovered that, as against the meager $12,000,000 which we are spending this fiscal year, Britain is spending the equivalent in sterling of something like $40,000,000—between three and four times as much as we are. This is because Britain has discovered during the more than 10 years she has been carrying on this service, the vital importance of it in connection with the development of her foreign policy. We could not get the figures on Russian expenditures, but the evidence was clear on all sides that this kind of ideological warfare was the great big effort that Russia is making today. Estimating from the number of persons apparently employed, from the space occupied, and from the intensity of the radio programs, it probably would not be out of the way to guess that Russia is spending at least two or three times as much as Great Britain, which would mean that she is spending ten to fifteen times as much as the United States.

Fifth. I think we would all agree also that the critical times call for the highest possible type of personnel at all levels, and especially the key men who have to determine these fundamental policies.

Sixth. This brings us to a consideration of the organizational set-up. It was agreed, I think, by all of us that the over-all supervision of this important work must be in the Department of State, with our chiefs of missions in the various countries primarily responsible. But we were also agreed—and this agreement on our part is reflected in the Senate amendments to the bill which I will discuss presently—that there must be a distinct set-up, on the one hand, of the so-called informational service, which may conceivably have certain propaganda implications and may even become involved politically; and, on the other hand, we must set apart by itself the so-called educational exchange service which, if it is to be truly effective, must be objective, nonpolitical, and, above all, have no possible propaganda implications.

Seventh. We were agreed that there were geographical and cultural differences in the countries we visited, which would require variation in dealing with the informational and educational exchange programs in the various countries. This implies that there could not be one pattern set up in New York City, for example, which would be made universal for all of Europe. This would apply, of course, even more when we are dealing with other parts of the world, such as the South American areas and the Middle East and the Far East.

Eighth. We were agreed that the State Department had been wise in using the assistance of other Government agencies in handling certain phases of its work, and especially those phases which had to do with the giving of technical assistance to other countries, as, for example, the setting up of geological surveys, weather bureaus, and so forth.

Ninth. We were particularly agreed with the importance of using private American agencies to the maximum extent possible in everything having to do with the understanding of America abroad. I wish to emphasize especially the importance of using private American agencies to the maximum extent possible in everything having to do with the understanding of America abroad.

By these private American agencies, I mean our press service, our American periodicals, our motion pictures, and our private commercial radio service. We believe that every effort should be made to facilitate these services and to this end we even explored the possibility of ways and means by which it might be possible to enable these activities to expand through relieving them in some way of the embarrassment of foreign currencies which they received for their services, and which were not convertible. We did not find it possible to incorporate in the pending legislation any immediate provision that would take care of this matter, but we earnestly recommend that hearings be held on the subject, and that subsequent legislation be passed to make it possible for this type of private American service to be rendered more extensively.

Whether that should be in the form of introducing a bill, having hearings on it, and determining how this is to be brought about, is a matter for later consideration. I think our committee is agreed that some formula should be developed whereby the foreign currencies might be translated into dollars, so that the publications rendering this very important service can be given relief from their present dollar embarrassment.

Tenth. The committee feels that, while none of us wants to impose any type of censorship on the products of private American industry operating abroad, nevertheless there should be some way by agreement with the producers themselves to maintain the highest possible quality of production. What I mean by this is, for example, if we are sending motion pictures abroad reflecting American life, there should be a pride among the producers in reflecting the highest possible type of American life, and not send over some of the unfortunately cheap type of films which represent the regrettable, seamy side of the American character. It seems completely fitting that in this field of "who we are and why we are," we should reach a "standard to which the wise and honest can repair."

Eleventh. Every member of our committee is a strong supporter of the United Nations and what the Charter stands for. Consequently, we were particularly careful to consider whether any of the activities we were carrying on, or might carry on, would in any way conflict with the over-all international picture of the United Nations, which we want to keep in the forefront. I think we were agreed that our activities up to date fitted in with the United Nations plans, and, as we expand the work can be made to fit in even more, and that our activities are in entire consonance with UNESCO.

Our over-all conclusion is that this service has the great opportunity to reflect American life to the other peoples of the world, and, above all, American policies, and to these ends we firmly believe that the expansion of the service at this time is imperative.

The problem now before us is whether the pending legislation known in the House as the Mundt bill, with such amendments as the Senate committee has recommended, should be passed. As I stated in my opening remarks, this bill aims to give legislative authority for what have been the unofficial activities of the State Department since the end of the war. Year by year, the State Department has been compelled to ask for appropriations for activities which it felt were imperative, and yet which really had no legislative authorization. We have tried in the pending bill to bring all these activities into the "tent" of the State Department, and, in the interest of conformity, certain existing legislation is repealed, when and if this act takes effect.

Let me run through the bill, hurriedly, indicating its scope:

Title I gives the "short title, objectives, and definitions."

Section 1 gives the short title.

Section 2 declares the objectives and distinguishes clearly between, first, an information service to disseminate abroad information about the United States and its people—that is in one category; second, an educational exchange service to cooperate with other nations in (a) the interchange of persons, knowledge, and skills; (b) the rendering of technical and other services; (c) the interchange of developments in the field of education, the arts and sciences.

Mr. MILLIKIN. Mr. President, will the Senator yield?

Mr. SMITH. I shall be glad to yield to the Senator from Colorado.

Mr. MILLIKIN. First, I should like to congratulate the Senator on the very clear statement he is making on the pending bill.

Mr. SMITH. I thank the Senator.

Mr. MILLIKIN. There is one feature of the bill upon which he has touched which is of interest to me and to many people in the educational field. While I was home during the late summer, and since then by correspondence, I have had the benefit of the views of Dr. Cherrington, of the University of Denver. From information which he has given me it seems there is a good deal of opinion among leaders in the educational world that there should be a complete divorcement in organization, that the activity should not be taken out of the State Department, but within the State Department there should be a complete divorcement, from top to bottom, of the information service as distinguished from the educational exchange service. The Senator has emphasized that his bill takes some account of that point. As I understand, the whole activity will be headed by one person, and thus in both these fields we will present a single face to the world.

I should like to have the benefit of the Senator's observations on the reasons for that particular theory of the bill.

Mr. SMITH. I thank the Senator for particularly calling this matter to our attention, because that is one of the most important changes made by the Senate committee in the bill, as I shall point out later. Not only have we made this distinction between the information service and the educational exchange service in the statement of purposes, but we have also emphasized the point in title VI, establishing two advisory commissions instead of one; one commission to advise in the field of information which might be called propaganda, and the other in the field of educational exchange which might be called the purely cultural side. We have very fully discussed the matter which the distinguished Senator calls to our attention, and we felt that, as the State Department is set up at the present time, the logical composition of the work would be to have an Assistant Secretary of State in charge of public affairs. Under him would be two subassistants, one of whom would be directly charged with the informational side of the work, and the other directly charged with the educational exchange side. In the field of which the distinguished Senator is speaking we had in mind that it should be headed by educational men of outstanding ability who understand the whole educational exchange problem, and particularly the interchange of students, which is, we feel, one of the most important parts of the bill. It was felt that that was the logical set-up from the standpoint of the present State Department organization; and without making any radical change in the set-up, we felt this would be the best way to deal with it. I have had correspondence with Dr. Cherrington. I have discussed the matter with Dr. Conant and Dr. Dodds, of Princeton, who are very much interested in it; and I think I am correct in saying that they feel that the way we have set this up comes as near as anything can at the present moment to meeting their desires for the separation of the two services.

Mr. MILLIKIN. Mr. President, will the Senator yield?

Mr. SMITH. Yes.

Mr. MILLIKIN. I think the provisions of the bill for the separation of the two agencies beneath the top man are

thoroughly admirable. Dr. Cherrington told me just yesterday that there has been a recent meeting of the presidents—I think of our educational institutions—I think he said 600 of them were present—and that they still hope that the two agencies may be completely separated, each having its own head.

I would not offer any amendment to that effect, because I have confidence that the committee has made the best solution of the problem it could make. But it continues to emphasize the point that by heading both agencies with one man, there will be presented to the world one face, which could readily lend itself to the impression that the educational part and the informational part are really being intermingled and are intended to serve propaganda purposes. What would the Senator say is the answer to that particular criticism?

Mr. SMITH. I would hope that the man who has been suggested to set up the whole organization and to take both of these services under the same general tent in the State Department would be so proficient in his job that when he was dealing in the field of what we have heretofore called cultural relations—educational exchanges—he would be able to promote that part by itself, and would not try to steal the thunder of the other part for his own purposes. I think the man who is recommended and who probably will be appointed is of such caliber that he is capable of making that vital distinction.

Mr. MILLIKIN. Then I take it that the Senator from New Jersey believes that in the operations under the provisions of this bill, the top man will be able to make it clearly evident to the world which is information and which is on the educational side.

Mr. SMITH. I think I am safe in saying that we shall feel that we have failed in our purpose if that is not perfectly clear when the plan becomes operative.

Mr. MILLIKIN. Might there also be a reasonable assurance that if that objective is not met in practice, there would be general support for an amendment which would separate the two services from top to bottom within the State Department?

Mr. SMITH. Speaking for myself, Mr. President, I certainly would take that position if I felt that the situation was abused in the way the Senator from Colorado suggests it might be abused.

Mr. MILLIKIN. I thank the Senator.

Mr. SMITH. I thank the Senator from Colorado for bringing this matter to our attention, because it is one of the most important features of the bill.

Mr. President, in this connection I may say that in Great Britain these two services have actually been divided by not having the so-called cultural service under the foreign service at all. They think they may have to go back to giving it a foreign service coverage; but the British consul, so-called, is entirely independent of the whole BBC operation and all the informational program. I understand that they have been somewhat embarrassed because they have had to have parallel organizations in the field, and in certain areas the same person has had to serve both purposes, and so forth.

Mr. MILLIKIN. Mr. President, if the Senator from New Jersey will further yield, I should like to say something which seems to me to be obvious, and perhaps it should not be said, namely, that the information service must necessarily proceed on a current, day-to-day basis, according to the necessities of the international situation, whereas the other agency is dealing with what might be termed the verities, which have more permanence; and it would be a very bad thing if the world received the impression that we were mixing the two and were using the verities of our cultural life and were twisting them so as to serve temporary, day-by-day, information-service purposes.

Mr. SMITH. Mr. President, the Senator from Colorado is entirely correct, and I agree completely with the statement he has just made.

Continuing with the brief analysis of the bill, let me say that section 3 of title I relates the activities under this bill to the United Nations. Section 4 contains certain definitions.

Then we come to title II, entitled "Interchange of Persons, Knowledge, and Skills."

Section 201 of this title has to do with the exchange of students, teachers, and so forth. It contains an amendment aimed at protecting the United States from subversive activities. We inserted a provision of our own there, and it will be brought up presently among the amendments. It would change the language in such a way as to protect us against subversive activities by students entering this country.

Section 202 provides for the interchange between the United States and other countries of books, periodicals, and so forth.

Section 203 gives authority to provide for assistance to schools, libraries, and community centers abroad, and so forth.

Then we come to title III, which is headed "Assignment of specialists."

Sections 301, 302, and 303 provide the machinery for assigning specialists to other countries that are desirous of obtaining the services of persons having special scientific or other technical or professional qualifications. Mr. President, I may say that in connection with this part of the bill, Secretary Marshall tells me that today he has applications from all over the world, particularly from South American countries, for the assignment of specialists to help them with some of their jobs, and especially to give them the benefit of American techniques. Secretary Marshall feels unable to comply with such requests unless he has authority of this kind. Therefore I feel that this is a very important part of the bill.

Title IV relates to participation by Government agencies. Sections 401, 402, and 403 authorize the Secretary of State in carrying on the activities under this act to utilize the services, facilities, and personnel of other Government agencies. That means that if there are in the Interior Department, for example, personnel in some specialized fields who are carrying on specialized work, the State Department could call on that Department—or, for that matter, the Department of Agriculture or any other department—for help in carrying out this part of the purposes of the bill.

Title V has to do with disseminating information about the United States abroad. Sections 501 and 502 of this title cover the information through press, publications, radio, motion pictures, and other information media, and through information centers and instructors abroad. It should be noted especially under this heading that it is the sense of the Congress that the Secretary of State shall reduce Government information activities whenever corresponding private information dissemination is found to be adequate. This was a matter of a great deal of debate last summer, when the matter was up for consideration, and I think the Appropriations Committee considered it. We took great care to provide that the Secretary of State should reduce Government information activities whenever corresponding private information dissemination was found to be adequate. This is the spirit of the whole bill, namely, to incorporate private activities whenever they can be found to fill the need.

Mr. McCLELLAN. Mr. President, will the Senator yield to me?

Mr. SMITH. I am glad to yield.

Mr. McCLELLAN. In the committee amendments, I notice it is provided that the information which the Secretary of State will be authorized to provide to other countries may be made available to Members of Congress 15 days after it is released. I should like to ask why it is necessary to withhold such information from Members of Congress for 15 days after it is released to other countries.

Mr. SMITH. Let me say that the Senator from Minnesota [Mr. BALL] has an amendment which would slightly change this language, and I shall accept that amendment when it is presented. But the purpose was not to make Members of Congress wait 15 days. We said, "within 15 days." In other words, by this provision we would make sure that those who are handling the information cannot dally along with it, but must get it out promptly. This provision was inserted merely as a matter of convenience.

Mr. McCLELLAN. I am wondering whether there is any objection to making it possible for Members of Congress to receive the information, if they so desire, at the same time it is broadcast in foreign countries.

Mr. SMITH. I may say that we have discussed that matter at great length. If the Senator from Arkansas is suggesting that every Member of Congress should receive every one of these releases, I point out that he would simply be showered with a mass of material with which he could not possibly deal. But we drew up our ultimate amendment in such a way as to provide that, upon request, this information should be furnished as soon as practicable. Some of the material which goes abroad is disseminated from the embassies abroad, although it originates in the United States; and it would take some time to

get it back. But the Senator from Minnesota [Mr. BALL], who has made quite a study of this matter, brought an amendment to me last night. I think it will probably cover the points the Senator from Arkansas is raising. When our committee amendment is presented, if the Senator presents that amendment to our amendment, I think the point will be covered.

Mr. McCLELLAN. Such a provision may serve some useful purpose; but I cannot see why the Congress or Members of Congress, or any American citizen, so far as that is concerned, should not have the information, if it is available, at the same time it is released abroad. I cannot see any reason for withholding it for 15 days.

Mr. HATCH. Mr. President, will the Senator yield to me?

Mr. SMITH. I yield.

Mr. HATCH. If I am correct in my understanding, the 15-day period is really a period of limitation. We recognized that there were certain difficulties in making the information available immediately, such as those involved in transportation from abroad, translation sometimes, and things of that kind, but in no event should it be longer than 15 days.

Mr. McCLELLAN. I appreciate the statement. I wanted to emphasize the point, though. It occurs to me, with respect to information to be disseminated abroad, information which emanates from the State Department here, that there would be no excuse for withholding it from any Member of Congress or from the public for 15 days.

Mr. SMITH. I think that the kind of information of which the Senator speaks would be available here, but as a practical matter we send material abroad constantly, and we send a wireless bulletin which is made the basis of releases over there; sometimes the entire bulletin, sometimes part of it, being released. Sometimes a special article in the bulletin is adapted to local conditions, and I think that it would be difficult if we said literally that every document that goes out abroad, or every broadcast, must be given simultaneously to everybody here. It would be just a practical question of how best to do it. There was no disposition on the part of anyone to conceal the information. The whole spirit of the thing was to do it in the most practical way and without too many complications.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. McCLELLAN. I have just been handed a copy of the amendment which will be proposed by the Senator from Minnesota [Mr. BALL].

Mr. SMITH. I may say to the Senator that the printed copy was slightly changed, after I conferred with the Senator from Minnesota last night, but it is substantially the same, I think.

Mr. McCLELLAN. It is the desire of the committee to make information available as quickly as it is practical to do so, is it not?

Mr. SMITH. Absolutely, and to everybody, especially to Members of Congress; absolutely.

To continue, under title VI—and this is a very important title—there is provision for advisory commissions to formulate policies, sections 601, 602, and 603. This is a completely new title in the bill and takes the place of the former title VI. This title, as I said to the distinguished Senator from Colorado a few minutes ago, recognizes the sharp distinction now drawn in the bill between the Information Service, on the one hand, and the Educational Exchange Service on the other. It provides definitely for two commissions to advise with the Secretary of State as to the policies and programs to be adopted for the carrying out of the act. Now, if the Senators will visualize what I said to the Senator from Colorado a minute ago, they will see a new Assistant Secretary of State for Public Affairs; under him, as subassistants, one in charge of information, another in charge of educational exchange, and those subassistants have the advisory commissions in their special fields. Those commissions are composed of five persons each, appointed as provided in the bill.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. SMITH. I yield to the Senator from New Mexico. He was the author of the amendment, so I am glad to yield to him, that he may explain it.

Mr. HATCH. I merely wish to emphasize the fact that in the amendment we have completely separated the two, having one commission for the Educational Exchange Service, which is entirely independent of the Information Service.

Mr. SMITH. That is correct.

Mr. HATCH. That is in reality quite a step toward what the Senator from Colorado has in mind, and it is vastly superior to the House provision, which combined the functions in one commission.

Mr. SMITH. The Senator is quite right, and I am glad he emphasizes the point. One of the commissions is to be known as the United States Advisory Commission on Information; the other is to be known as the United States Advisory Commission on Educational Exchange.

I pass to title VII, appropriations, sections 701 and 702. This title covers the general authorization of appropriations to carry out the purposes of the act, and provision for the transfer of funds. I may say that there are no appropriation figures in the bill. There are no ceilings or anything of that kind. Authority is simply given for appropriations to meet the purposes of the act. The Department is required, of course, to bring in its broken-down budget and requests for appropriations each year.

Title VIII covers administrative procedures, sections 801, 802, and 803. This title gives certain specific authorities to the Secretary in carrying out the various titles of the act. I may say that in those sections provision is made for the employment of special committees to study special problems, as for example the moving-picture industry, which would be one; the way the radio can be best handled, and things of that kind. We thought we should provide for the appointment of special committees, with the advice, of course, of the two commissions set up in title VI.

Title IX, funds provided by other sources. This title has two sections, section 901 and section 902. I shall try to point out the difference between them. Section 901 provides for reimbursement to the Government of the United States, by others who have been benefited by the activities of the Department, of the cost of the service rendered. There are cases in which the Government makes its investment in helping other countries, or helping special projects somewhere, and this provides for reimbursement where that is done.

Section 902 provides for payment in advance by other governments for the expenses of any specific part of the program undertaken pursuant to the act. In these two provisions we take care of reimbursement for expenses paid by the governments, and payment in advance, when we require that before we undertake a project. There seems to be ample reasons for those distinctions.

Title X is entitled "Miscellaneous." Section 1001 provides for a loyalty check on personnel by the Federal Bureau of Investigation. That was incorporated by the Senate, modifying in certain respects the House provision on the same subject.

Section 1002 provides for the delegation of authority by the Secretary of State. Obviously he cannot perform all the functions himself.

Section 1003 provides for restricting information in the interest of the security of the United States. That is a provision written into the bill by the House, and the reasons for it are obvious.

Section 1004 provides for the repealing or superseding of certain existing acts, which I mentioned earlier. We are trying to bring in under the tent of the State Department, in one bill like this, all the activities of this nature being carried on under different pieces of legislation.

Section 1005 is a very important section. It provides for the utilization of private agencies. This is one of the most important sections of the whole bill, and provides, among other things, as follows:

> It is the intent of Congress that the Secretary shall encourage participation in carrying out the purposes of this act by the maximum number of different private agencies in each field consistent with the present or potential market for their services in each country.

That is a clear-cut statement of policy of the Congress to use private agencies to the maximum extent possible.

Section 1006 is a provision for terminating authority under the act by concurrent resolution of both Houses of Congress. If at any time Congress feels the act is not being properly administered, a concurrent resolution can bring it to an end.

Section 1007 protects veterans' preferences.

Section 1008 provides for reports to the Congress.

Section 1009 makes the act applicable to all international information activities and educational exchanges of the State Department. There again we have to cover two sections in order to bring these activities together, so there cannot be overlaps or conflicts.

Section 1010 covers the separability of provisions.

Finally, the title is amended, from the very cumbersome title which the bill had originally and which appears on the calendar, to the simple title, which will read as follows:

An act to promote the better understanding of the United States among the peoples of the world and to strengthen cooperative international relations.

Summing up the bill as a whole, it should be noted that the amendments which both the House and Senate incorporated in the original bill added certain safeguards in order to prevent the possibility of any abuse of powers granted by the bill and, as far as possible, to make clear the standards of service expected and the scope of authority of those charged with the responsibility. These safeguards are enumerated in the report of the committee accompanying the bill, but I am going to repeat them here, because this is a very important feature of the bill as drawn. There was criticism of some of the activities of the State Department in carrying on these different functions, and both the House and Senate felt that certain safeguards should be incorporated in the bill.

First. In addition to the usual investigation conducted by the Department of State, the FBI is required to investigate all personnel employed under the information program within 6 months. All new employees are also subject to FBI investigation. In other words, a person already employed must be investigated within 6 months, and new employees, before they can be taken on, are subject to report by the FBI.

Second. The Secretary of State will be required to use the services of private agencies for carrying on this program wherever practicable. I have already emphasized that point.

Third. The Secretary of State must also use the existing facilities of the Government to the fullest extent possible before setting up any new facilities.

Fourth. Reports must be sent to Congress twice a year on both activities and expenditures of this program, including appraisals of results of the program in foreign countries.

Fifth. The exchange of persons authorized by the bill must be on a reciprocal basis. This does not mean a literal 50-50 exchange of students, but the program must be a two-way street. The bill also provides for the speedy deportation of any alien who enters this country under this program and then engages in political activities.

Sixth. The legislation may be terminated by concurrent resolution of Congress.

Seventh. The two advisory commissions established by title VI are designed to assist this country in the formulation and recommendation to the Secretary, of policies and programs for the carrying out of this act. In addition, the commissions are to report semi-annually to the Congress on the recommendations made to the Secretary, but the committee wishes to stress also that the two commissions are not to be viewed primarily as policemen—as constituted they can be of great constructive value to the Secretary of State and the Congress in the best development of public-relations programs in the foreign relations of the United States.

Taking the special amendments made by the Senate, there were three special principal emphases; first, the simplification of the bill by simplifying the title and statement of purpose; and, second, as I have emphasized before two or three times, the definite separation of the Information Service from the Educational Exchange Service. This separation is clearly stated in section 2 of the bill and is clearly emphasized in title VI, which, as I stated before, provides for two separate advisory commissions covering both activities.

In this connection—and this is in answer to the question asked of me by the Senator from Colorado a moment ago—it is contemplated that the organization in the State Department, while it will have an Assistant Secretary of State covering the general field of public affairs, will also have two subassistants, one primarily charged with the Information Service as defined in the bill, and the other primarily charged with the Educational Exchange Service as defined in the bill.

Each of the subassistants, acting with the Assistant Secretary of State and with the Secretary of State himself, will be aided in determining policy and programs by the respective advisory commissions, and by any other special committees that may be set up under the authority of section 801 (6) of the bill. In other words, we have here given the widest range to obtain the advice of the highest caliber from the best people of this country in developing a policy which will represent the Voice of America abroad.

The third point emphasized by the Senate committee's amendments is the emphasis on the use of private agencies. All the way through the bill, as it reads today, the Secretary is charged with the responsibility of utilizing the services and facilities of private agencies through contractual arrangements or otherwise.

Furthermore, section 502 has been amended to read as follows:

In authorizing international information activities under this act, it is the sense of the Congress (1) that the Secretary shall reduce such Government information activities whenever corresponding private information dissemination is found to be adequate; (2) that nothing in this act shall be construed to give the Department a monopoly in the production or sponsorship on the air of short-wave broadcasting programs, or a monopoly in any other medium of information.

We want to emphasize particularly those two points, because the suggestion was made that the Department might lose its head and get into too wide a field and try to cover everything. We want to make it clear that it is the policy of Congress to use private agencies wherever they can be used to serve the purpose.

CONCLUSION

In conclusion, let me high-light a few points which I feel are important in connection with this legislation:

First. What do we mean by the Voice of America? From a technical standpoint the Voice of America is the international information program now being conducted on a limited scale by our State Department. It takes in our international short-wave radio programs directed to the countries of the world in some 24 languages. It includes some 59 American libraries, operated in half a hundred foreign countries. It encompasses our exchange-of-persons program with other countries under which American teachers and specialists in the sciences and arts go to these countries at their invitation to assist them, and under which we encourage students, teachers, and others to come to the United States to study and give us the benefit of their cultures. It includes also the daily informational service to our embassies throughout the world to keep them informed of the news from America, and to enable them to pass it on to any persons in foreign countries who wish to publish it or otherwise disseminate it. In short, the Voice of America is our own instrument for projecting a full and fair picture of the United States to the other nations of the world.

Second. This service, in the judgment of your committee, is of special importance now, because of the increasingly serious situation in Europe. Its importance is further enhanced in light of the efforts we have been making to relieve hunger in the war-ridden countries of Europe and the Far East as well. And it becomes of transcendent importance now that we are about to provide additional billions through the European recovery program—the so-called Marshall plan—in aid to these countries in our efforts to forestall chaos and prevent starvation abroad.

Third. It was our sincere hope that Russia and all the satellite countries would participate in this humanitarian effort. Russia has not only refused to do so, but Moscow has applied pressure on the satellite countries to prevent their participation. Russia has not only declined to join in this effort, but she has organized a consolidated propaganda service, with headquarters in Belgrade, in a concerted movement to destroy our European recovery program. This is all part of her plan to impose communism on Europe, for Russia well knows that communism can only thrive on chaos and human misery; that a happy, well-fed population does not turn to her type of dictatorship. The Moscow plan is to divide and then absorb.

Fourth. Our present Voice of America with its limited budget in the light of these new developments, is wholly inadequate to meet the needs of our country. It must be strengthened far beyond our previous conception of its size and scope. At the moment we are losing this war of words, and in order to make up for the ground that we have lost, we definitely need to take two steps:

(a) Pass the pending bill, which will give this program the needed legislative authority;

(b) Present to the respective appropriation committees of the House and Senate a revised emergency budget for the balance of this fiscal year, and a new

over-all budget for enlarged activities for the fiscal year 1948–49.

This legislation and these appropriations must obviously go hand in hand with the European recovery program, in order that the spirit and purpose of America in developing that program may be made clear to the peoples of the world.

Mr. President, before I close, and open the subject to questions, I should like to reflect some personal thoughts which have come to me in trying to reply to the question, "What do we all mean by the Voice of America?" Perhaps if I have criticized the service up to date I would say it was because the Voice had seemed to be too much a current voice. The Voice of America, to me, Mr. President, goes back into history. That is why our cultural-exchange program is so important. I like to think of the Voice of America in terms of the past, of our ancestors—and I am proud to say their blood is in my veins—who came to the tidewater land of Virginia, who came to the shores of New England, who later pioneered to the West and moved across this great country with the spirit of freedom, the spirit of truth, seeking truth, seeking release, people who came from every stock in Europe, in these countries which today are in difficulties. There is not a country in the so-called Marshall plan, I think I am correct in saying, that does not have stock in America. There is not a country to which the Voice of America may not appropriately be directed. America should interpret to these countries the part they played through their own people in making a consolidated whole here in this country where the divisions have been broken down, and where, through devoted effort, we have moved forward to a new and better vision of life as a whole.

Mr. President, I am thinking in terms of voices—not only the voices of today, but the voices of the past. I cannot help thinking of the voices in our colonial days. I cannot help thinking of the voices during the Revolution, those of George Washington, and Thomas Jefferson. The distinguished Senator from Pennsylvania [Mr. MARTIN] today paid a glowing and splendid tribute to Benjamin Franklin. The voices of those named, and those of others of our distinguished forebears are the voices of America. I want to have those voices heard abroad, because they come from the very stocks we are now trying to help, as some of their forebears came to us in the early days of our history.

Coming to the later stages of our history, we find the name of Abraham Lincoln. We can go further, to the voices of those who are today making America. We can think in terms of the voices of the boys who served in World War I and those who served in World War II, and who gave their lives in those wars. Those were voices of America.

Let me say to my colleagues, whether in the House or the Senate, that all the voices raised on the floor of these two Houses of Congress are voices of America today, and we are challenged to make those voices worthy to represent the America in which we believe.

So it is not a mere mechanical dollars and cents matter, merely the making of an appropriation, in order to have some machinery set up, it might be said, to advertise America. It is something much more profound than that. It is the giving of the spirit of America to the world, which needs it so profoundly today to raise it up from the despair in which it is now; to have the peoples of the world understand why we are interested in relief, why we are interested in a recovery program, and why we are willing to do what we now propose to do. It is because we feel in our hearts that we are the descendants of the ancestors of the very people who are suffering because they have not had the privileges we have had in America, in this great free country.

So I feel, Mr. President, that we should pass the bill before us, to give legislative authority which will make it possible for us to give this true picture to the world—to give the peoples of the world the truth. We should pass the bill so that whatever money is needed will be generously given in order to carry on the program. But we cannot stop there. The spirit of America is the voice of America, and every one of us has his responsibility to contribute to that voice.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks a number of editorials on this subject which have come to me from various parts of the country.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Brooklyn (N. Y.) Star-Eagle of November 14, 1947]

UNITED STATES VOICE NEEDED IN EUROPE TO COMBAT COMMUNIST LIES

The United States is losing a vital battle in Europe, one which is related intimately to the success or failure of the effort to save the Continent from economic collapse and from communism. This country is losing the fight to gain the confidence of the people of Europe, the people whose mood is desperate and whose sentiment is being captured by the adroit propaganda of Moscow.

All who are familiar with conditions in western Europe concede this to be the case. Russia has little to offer the nations in distress except words. Insofar as her own interests are concerned, Russia is making the best possible use of this weapon. They are not necessarily words of promise because Russia can promise virtually nothing that is tangible. Over the air and through the media of newspapers and other publications, Moscow sends a torrent of abuse and ridicule, all designed to impair the prestige of the United States and sow suspicion and distrust.

This technique, like so much that is characteristic of Moscow's methods, is a heritage from Hitler and follows a familiar and fairly sound line of reasoning. If sufficient mud is thrown, some of it is reasonably certain to stick. If a big lie is repeated with tireless insistence, it comes to be accepted eventually by the more credulous as truth.

Returning from two months in Europe, as chairman of a committee which studied the overseas information program, Senator H. ALEXANDER SMITH, of New Jersey declared that "if we are going to make the Marshall plan work we must see to it that the people of Europe know what we are trying to do." He adds that the invective that has been turned against the United States in these countries in the effort to force communism on western Europe "is so vicious as to be almost unbelievable to anyone who hasn't actually heard it."

Senator SMITH charges that Russia has organized a consolidated Communist propaganda service with headquarters in Belgrade in an effort to destroy the United States recovery program. There can be no doubt that this is true and that there is an imperative urgency that this conspiracy be defeated.

Former Under Secretary of State Sumner Welles has repeatedly emphasized the need of a truth campaign if the people of Europe are to have an honest concept of the American effort and the motives by which it is animated. Representative JOHN J. ROONEY, of Brooklyn, who speaks with the authority of first-hand knowledge, has also raised his voice for the need of a more adequate and eloquent Voice of America.

Senator SMITH has indicated that he will sponsor legislation providing for an expansion of this country's information service abroad. His hand will be strengthened materially by the American Federation of Labor's stand for the creation of a Deminform, or democratic information bureau, to combat the influence of the Cominform. Through one means or another the challenge of destructive Soviet propaganda must be met. Defeat in the war of words involves the danger of defeat in the whole war.

[From the Newark (N. J.) Evening News of November 14, 1947]

THE VOICE OF AMERICA

One of the most foolish economies put through in the first session of the Eightieth Congress was the 50-percent cut in an appropriation for the Voice of America broadcasts. These are the American radio broadcasts to Europe and the rest of the world carried out under the auspices of the Office of Information of the Department of State. The program is now operating on an annual budget of $10,000,000, an amount considered altogether inadequate in the light of the world responsibilities of the United States.

Official radio broadcasting is a new venture for us. Without doubt the programs beamed abroad could be much improved. But in 1946 the Department of State received 150,000 letters from foreigners who heard its broadcasts, and other evidence suggests that the audience is large, continuous, and substantial. The British Broadcasting Corp., which is official, has had much more experience in this field. It is convinced, through various checking devices, such as offering to communicate with relatives of those in eastern Europe, that broadcasting is an important adjunct to the effective conduct of foreign relationships.

That, too, is now the conviction of most Members of the Congress who went abroad during the recess. Senator SMITH of New Jersey, is cochairman of a congressional committee which investigated American broadcasts, as well as Russian propaganda, in Europe. He will ask the regular session of the Congress, meeting in January, to provide $5,000,000 supplemental appropriation for the Voice of America until June, when the present fiscal year ends, and will urge an appropriation of from $40,000,000 to $45,000,000 for the next fiscal year.

But Senator SMITH believed in the Voice of America broadcasts from the first. Other Republicans now are joining him in his effort to get increased support for a program designed to deliver the American message to Europe on the air, both west and east of the iron curtain. The Secretary of State, Mr. Marshall, has stressed the importance of the Voice of America to his long-range project for European relief. The Congress is going to insist that western Europe knows where help is coming from and the reasons for it.

So it looks now as if the Voice of America will be restored to its former strength and even fortified. The task of broadcasting the facts about American aid will, however, be

delicate. Mr. Marshall warns that we must not create resentment among the receiving nations. We should not "poison the gift." Russia will attend to that without assistance from us.

[From the New Brunswick (N. J.) Daily Home News of November 17, 1947]

LET VOICE OF AMERICA BE HEARD EVERYWHERE

Recently returned from Europe where he headed the Senate group of the congressional committee investigating the Nation's overseas information program, New Jersey's Senator H. ALEXANDER SMITH is vigorously supporting complete revision to expand the State Department's Voice of America program.

Senator SMITH describes the Voice of America program carefully, dispelling the popular illusion that it is nothing but a radio broadcast to a few countries. The Voice of America includes international short-wave radio programs sent to the whole world in 24 different languages. It includes 59 American libraries operated in some 50 countries. It includes the exchange of persons program, in which American teachers and scientists go to foreign lands to study, while exchange visitors come here to get to know the United States. It includes news service daily to all American embassies to be passed on to people in the lands where the embassies are located. As described by Senator SMITH, the Voice of America is "our own instrument for projecting a full and fair picture of the United States to the other nations of the world."

In his 2 months in Europe this summer, Senator SMITH found the Soviet Union defeating us decisively in a war of words. Too little and too late for us again. Senator SMITH says the United States must expand the Voice of America to disprove Russian propaganda and to let the people of the world know the truth about our own democracy and about our hopes and aspirations for world peace.

We concur with Senator SMITH in this. The success of our aid to Europe will be seriously jeopardized if we do not export the truth with the food, if we permit Russia to misrepresent us and our democracy to European peoples without being answered. Let the Voice of America ring out strong and brave and true to give new hope to freedom-loving peoples everywhere.

[From the Camden (N. J.) Evening Courier of November 18, 1947]

THE VOICE OF AMERICA TO BE TUNED UP AGAIN

Opinions and attitudes change frequently in this changing world.

A few months back there was vigorous opposition in Congress to the Voice of America—our short-wave radio information service to Europe. Its appropriation was cut in half and only by the skin of its teeth did it escape being abolished altogether.

Since that time a Senate-House committee, with Senator SMITH, of New Jersey, as co-chairman, visited 22 European countries in a study of economic and political conditions. Much of its attention was devoted to the propaganda and information services of America, England, France, and Russia.

The committee found that not only our radio voice but all our other information services were markedly inferior to Russia's and Britain's, and even below the French in some places. Fortunately, only Russia at present is spreading propaganda hostile to the United States.

At a time when we are about to spend many billions in aid to Europe, it is essential that Europe know from where and why the aid is coming. The committee has drawn up a report to that end, recommending that the activities of the Voice be greatly expanded and other information services extended.

Senator SMITH says he will ask an appropriation of forty to fifty million dollars for the Voice when the regular session of Congress convenes in January. Representative KARL E. MUNDT, of South Dakota, his co-chairman, will press for a $50,000,000 bill in the House.

"If we are going to make the Marshall plan work," SMITH says, "we must see to it that the people of Europe know what we are trying to do.

"The invective that has been turned loose against us—by Russia and her satellites—in their effort to force communism on western Europe is so vicious as to be almost unbelievable to anyone who has not actually heard it."

Secretary of State Marshall will be asked to present a detailed program to Congress for use of the Voice, of which he has been a consistent backer. This may include a personnel shake-up and a restriction of broadcasts to factual news and editorial comment from individual newspapers, to silence critics who claimed the Voice sometimes expressed unattributed opinions which were those of its own staff.

Indications are that America's voice soon will be heard again at full force.

Most Members of Congress have come to recognize they were wrong in turning down the volume control at the last session.

[From the Washington (D. C.) Post of November 19, 1947]

STRONGER VOICE

Almost without exception, Members of Congress who toured Europe this summer have come back convinced of the necessity for expanding our international information program. As Senator H. ALEXANDER SMITH, chairman of the Senate group investigating the program in operation, said in a radio broadcast last week: "We found in every country we visited that we are losing this war of words. Our own Voice of America is pitifully weak compared not only with the efforts of Russia and her Communist satellites but also with the efforts in the same field that are being made by friendly countries such as Great Britain and France."

In other words, if we are to overcome the deadly effects which endless repetition of slander and lies by the Moscow propagandists is bound to have, we must strengthen our facilities for making the truth known and strengthen them immediately with all the tools at our command. We hope that in light of these reports, Senator TAFT and others who have opposed a broadened information program will be persuaded to change their minds. Three steps are essential, in our view, to make American efforts more effective. The first is a deficiency appropriation to restore the cuts which limited the program for this fiscal year to $12,000,000. The second is to pass the Mundt bill, which will place our information activities on a permanent, businesslike basis. In this context we need to expand not only our radio broadcasts but also our libraries abroad, our daily overseas press bulletins, and our student exchange program. The third step is for the administration to appoint a man to direct our information program who is both an evangelist and an administrator who can command the confidence of Congress.

There is one danger which we hope Congress will avoid in augmenting the Voice of America. In their zeal to meet the attacks the Communists are making on us, some Members may be tempted to insist that we fight fire with fire. Nothing could do our cause more harm than to have our information program perverted into a mere anti-Communist crusade or a vehicle devoted solely to extolling our virtues as benefactors. Either of these courses would convince the people for whose minds we are contending that we too were merely engaged in propaganda. What our information program needs is facts, not invective or self-adulation. The objective truth can be just as devastating as Moscow's name calling, and far more effective.

[From Foreign Policy Bulletin of November 28, 1947]

HOW SHOULD UNITED STATES ANSWER SOVIET PROPAGANDA ABROAD?

In his Chicago speech of November 18, on the eve of his departure for the sixth session of the Council of Foreign Ministers which opened in London on November 25, Secretary of State Marshall raised an important question concerning American-Russian relations. This question is whether the United States should attempt to answer the "calculated campaign of vilification and distortion of American motives in foreign affairs" waged with increasing venom by Soviet officials and Communist groups elsewhere; and if so, in what form American answers should be couched. Should American spokesmen seek to match the vituperation of Mr. Vishinsky—or should they disregard words of abuse and limit themselves to pointing out the positive aspects of our way of life? Is it wise or not for this country to embark on a national Operation Backtalk like that launched against the Russians on October 28 by General Clay in the American zone of Germany—a program which, according to first-hand reports, shows signs of petering out?

WHAT IS GOOD UNITED STATES PROPAGANDA?

These questions reveal the need for determining the scope and content of American propaganda abroad. Many of the Congressmen who visited Europe during the past few months have returned convinced that this country must be more generous in its appropriations for the Office of Information in the State Department, now operating on the shoestring budget of $12,800,000 a year. But even should Congress heed the proposal of Representative KARL MUNDT, Republican, of South Dakota, that this sum be raised to $300,000,000 for 6 years (or $50,000,000 a year), administrators of the information program will still face many questions as to what constitutes an effective reply to the propaganda conducted by the Soviet Government and by Communist parties outside Russia. In seeking answers to these questions the following points might be considered:

1. Need to convince non-Russians

The object of American information services is not so much to convince the Soviet leaders, or even the Russian people (although any such byproduct of American propaganda would obviously be welcome), but to convince peoples outside Russia who for one reason or another find some appeal in Soviet arguments. Little is gained, in this respect, by mere denunciation of Soviet ideas and practices—especially since it is doubtful that American spokesmen can match the virulence of Mr. Vishinsky. What can be done is to demonstrate by our actions that the United States, within the limits of its capacity, is determined to help other peoples improve their lot.

2. One world—but many peoples

In addressing itself to peoples outside its borders the United States should bear in mind that, while technological progress in transportation and communications has truly led to the emergence of one world, vast differences persist in the traditions, historical backgrounds, and political, social, and economic development of the various peoples inhabiting this one world. American information services should be sufficiently flexible and differentiated to meet the special needs and interests of the particular nations to which they are addressed—and should not be limited to a few blanket formulas about the advantages of the free-enterprise system. To countries which, to begin with, do not possess the resources of the United States, and have been shattered by two world wars and a great depression, constant American emphasis on this concept sounds unrealistic, or patronizing, or both.

3. United States must not be identified with reaction

The success of Soviet propaganda is due primarily to the existence throughout the world of genuine political, social, and economic maladjustments which Communist propagandists skillfully exploit to denigrate democracy. It is therefore essential that American information services stress the need to correct these maladjustments by whatever methods seem most appropriate in a given country, provided political liberty, basic attribute of democracy, is preserved. An attitude of deprecation toward other systems simply because they are not like ours gives ammunition to Communist propagandists who claim that the United States intends to use its resources to stifle internal reforms in nations receiving American aid. It is of paramount importance that other peoples should have no cause to identify Washington's resistance to Russia and communism with support of reaction and resistance to all change abroad.

4. Facts are our greatest strength

All peoples, especially in Europe, have grown unutterably weary of propaganda and counterpropaganda. Our greatest strength lies in presenting factual information, as both the BBC and the OWI did during the war, when they won the confidence of listeners who defied Nazi terrorism to hear British and American broadcasts. In presenting information, it is wise to mention not only facts favorable to the United States, but also facts that are not so favorable. Other peoples have learned by hard experience that life is a mixture of good and evil, and that one cannot always expect a happy ending. When our propaganda attempts to give the impression that we are mercifully free of all the flaws we find in others, our admonitions are regarded as either naive or hypocritical. It would be much more effective to admit such faults and shortcomings as we may have, while pointing out our unremitting efforts to remedy them—as the President's Committee on Civil Rights has successfully done in its report. Wide circulation abroad of the findings and recommendations of this committee, which epitomizes some of the qualities the rest of the world particularly admires about Americans, would do far more to enhance the prestige of the United States than any amount of back talk at Russia.

Nor should the United States pretend that it alone among nations is above power politics. In one form or another power is always used in politics, whether national or international. Power is not of itself evil; what can be evil is the use one makes of power. What the world criticizes most about the United States is not that it uses its power too much, but that it has not yet developed a constructive foreign policy commensurate with the power at its command.

5. Faith—not fear—must be motive

American propaganda should be motivated not by fear of Russia, which is purely negative, but by positive faith in American ideas, and by concrete measures to carry them out in practice abroad such as the program of farsighted aid urged by Secretary of State Marshall. Every time we reveal fear of Russia we thereby weaken our own position in the eyes of the rest of the world. Nor should we, through fear, force on other peoples a choice between Russia and the United States, which for many of them would be suicidal.

6. Europe must have means for its own propaganda

The most effective propaganda, as the Russians have discovered, is directed not from outside, but from inside. For example, commendation of our aid to Europe sounds more gracious if offered by writers and radio commentators in countries receiving aid than if presented by ourselves. Europe, however, is greatly handicapped by the shortage of newsprint, which has reduced most European newspapers to four, and often only two pages. One of the most useful contributions the United States could make to the dissemination of information would be to make newsprint available to the countries of western Europe. Here, too, we might learn from the Russians, who have helped their neighbors in eastern Europe and the Balkans to obtain newsprint. More good words would be heard about the United States if Europeans who support the Marshall plan had a better opportunity to express their views directly to their own countrymen.

But, no matter how technically efficacious our propaganda may prove to be, we must always remember that words, written or spoken, have become devalued through overuse and overemphasis. Only actions can serve to revalue them. No matter how much money we spend on propaganda, the money will be wasted unless our actions abroad match our words. This means that we must do some hard thinking here about the basic concepts of our foreign policy, and develop greater understanding both of the world outside our borders and of our new role in world affairs.

VERA MICHELES DEAN.

[From the Des Moines Register-Tribune of December 3, 1947]

HOW ABOUT TELLING EUROPE THE PLAIN, UNVARNISHED FACTS?

One of the happy results of European visits by so many of our Representatives and Senators this fall was the almost universal discovery that the story of our kind of democracy and of our foreign policy was not being told adequately, probably not even well.

The first reaction to this has been a fairly common conviction that the Voice of America type of program under the auspices of the State Department needs great expanding. And this in turn raises the natural question what kind of job the international broadcasts have been doing with limited resources, and what kind of job they ought to do with substantially augmented resources.

Whenever some people talk about this part of our role as the world's greatest power, they use such phrases as "countering Communist propaganda" or "replying to Russia" or "defending ourselves against Soviet accusations." There is even an assumption in some quarters that, in order to get a fair hearing before the European world, we must conjure up some marvelously shrewd propaganda scheme. The inference of this is that we must somehow twist our story into an even more Machiavellian design than the Russians and other Communists have succeeded in doing, in putting the case for their philosophy.

The Register, frankly, is pretty doubtful about this approach. It is simply making the job hard. It is taking risks of outsmarting ourselves in the process. It implies the use of politically calculated and perhaps even faintly dishonest techniques.

We think there is a better way.

That way is simply to tell the world the truth—the whole truth, the unadulterated truth.

We have not seen in any detail the content of the Operation Backtalk which General Clay inaugurated in our zone of Germany a month or two ago. But our impression is that it was conceived partly in anger against Russian propaganda, and the latest reports are that it has already begun to fizzle. If it was largely propaganda, that is no wonder. Germans and Europeans generally are pretty well fed up on mere propaganda. They have been fed so much of it that they can smell it a half mile away.

During the war the British Information Service around the world took a different tack. It provided all the facts it could accumulate about everything imaginable affecting the British war effort—historical facts, political facts, economic facts. Some of these accumulations were not very complimentary to British history; some of them were not even very complimentary to the existing British Governments. But the result was that the British people and the British Governments sounded to observers as if they were human beings rather than incredible brass gods.

If we want the people of Europe to believe in us, to judge us fairly and dispassionately, we first have got to seem human to them. We have got to have our story told in such a way that we appear to be what we are, with many faults and many virtues. And the way to seem what we are is to tell our story straight, to tell it truthfully, but to tell it as completely as possible.

Certainly this takes money. The job needs to be adequately financed. It will be only a drop in the bucket relatively, anyway. We presume that Congress will shortly take care of that part of it.

Once the resources exist, we need to see that the whole project is affirmative and constructive—not defensive and incriminating. We would lose in a war of incrimination against communism; the Communists have far fewer scruples about undignified accusation and distortion than we. Why should we even stoop to this level, when it is not an effective technique anyway?

Why should we not, instead, tell Europe and the world precisely the reasons why our sudden acquisition of enormous economic power worries us? Why should we not confess frankly that we are feeling our way, that we don't have all the answers, and that we are doing our human best to live up to our responsibilities?

Why should we not say candidly that we haven't yet found the perfect economic system for every imaginable society, that unquestionably our system still has some weaknesses, that we are all too aware of them, that we are trying conscientiously to correct them?

Why should we not take the wind out of the Communists' sails by pointing out frankly the ways in which our democracy has not yet achieved the ideal, the ways in which we have improved its functioning so strikingly in the last generation or two, and the ways in which we hope to carry it ahead still further in the years ahead? Need we be ashamed of that?

This, and more, is a story that Europe could believe. It is a story that any reasonable human could have faith in. It is a story that would inspire confidence and hope.

Then, if our actions meanwhile give credence to our words, we will have measured up. If our actions do not, of course, then telling our story at all would be a waste of time.

[From the San Francisco Chronicle of December 13, 1947]

VOICE OF AMERICA'S AUDIENCE

There is an excellent chance that the United States, despite the Marshall plan, will lose its strategic fight in Europe unless it steps into the propaganda duel with enough intelligence and vigor to outwit the Russians at a game they play surpassingly well.

That we are running a poor second has been widely conceded—just how poor is startlingly illustrated in a pair of reports from the Continent.

The New York Herald Tribune, describing a typical American information organization in a European country, cites "a couple of mimeograph machines, a 2,000-volume library, and a few reels of documentary films," plus the beamed broadcasts of the Voice of America. The budget is $40,000 a year. The typical Soviet set-up consists of an elaborate network of personnel operating hundreds of libraries (to our one), and costing millions of rubles. Even the British, impoverished as they are, lay out $240,000 in

Czechoslovakia—just over 10 times what the American information budget cost.

The New York Times, in an interview with Senator LODGE, shows the comparative fruits of these ventures.

A wealthy, conservative French physician told LODGE: "Of course, we realize that medical science is way ahead in America of what it is in France, but then we also know that you have all those underprivileged people over there on whom your doctors constantly experiment."

A conservative French deputy told LODGE: "We know that you Americans are trying to build up Germany industrially faster than you want to build up France. The reason you do this is because you intend to have a war with Russia, and you want to get Germany into shape as your ally." Why would we fight the Russians? "Because Russia has taken away so much of your export trade."

So much for the Communist success in swaying some of the most stalwart people of France. So much for our dismal failure.

There is every indication that Congress will multiply by several times last year's pitifully inadequate information budget. But the words of the two conservative Frenchmen make admirably manifest the fact that dollars alone won't get us where we need to go. We can prate "Look how rich we are," a million times and it won't undo what's been done to the French mind, or the Polish mind, or the Italian mind, during these past 10 years. The task calls for a consummate amount of thought, skill, and understanding.

Consider your typical French physician, and what was happening to him between 1940 and 1945. Battered by ponderous forces that drove him to the brink of financial and physical ruin, his intellectual and psychological make-up could hardly survive unscarred. The mass cynicism that resulted from the war finds no parallel in the American experience, except possibly for the psychological ruin that lay strewn through the South at the close of the Civil War.

This is the culture most receptive to communism, and the Russians know it and have capitalized upon it. A measure of their success is the fact that the physician and the deputy, while no friends of Russia and certainly not in Soviet employ, are unconsciously playing the Russian game.

How do we win these people?

Not alone by the Marshall plan, as long as the gifts are accepted with grave suspicions of our motives.

Not by the broadcast of canned descriptions of Thanksgiving dinners in the United States, nor by mail-order catalogs reflecting the extent and variety of our luxuries, nor by querulous demands that the Europeans be more like us.

We have to talk their language, and the language they best understand is the assurance of security—freedom, to a drowning man, is less important than a rope.

The details of the task may well occupy the constant attention of a battery of earnest, intelligent information specalists for years to come, but the important thing now is for Congress to grasp the dimensions and the broad nature of the problem. That understanding must be applied to the terms of the Marshall plan, but further than that, to the creation of an information service that will, by slow degrees, transform a sea of cynicism into a reservoir of friendly understanding. That is the size of the job.

[From the Princeton (N. J.) Herald of December 17, 1947]

THE VOICE OF AMERICA

Americans who are worrying about what Russians are thinking of us for retaining our bases in the North Pacific must have experienced quite a shock if they listened to the recent radio broadcast which Senator SMITH made from Washington. The New Jersey Senator did not mince words in his forceful plea for recognition of the vital importance of the Voice of America in the new war that is going on in Europe.

"Russia has turned loose against us a propaganda machine of incalculable size and effectiveness," he declared. "No one can even estimate the resources that are being poured into it. It employs every kind of device of mass communication to din into the ears of the populations of every country of the world, the lies and distortions by which she hopes to keep the world in chaos and ultimately to control it. The grist for this gigantic propaganda machine comes direct from Moscow with almost every act of her government, and every speech by her representatives at the United Nations designed for propaganda value in the war of the ideologies."

Senator SMITH was cochairman of the Smith-Mundt committee which spent 2 months this past summer in Europe visiting all its countries except Russia, Yugoslavia, Albania, and Ireland, in an exhaustive investigation of the need for the expansion of our international information service. Reporting to the country on the results of that trip the Senator said that the invective "that has been turned loose against us by Russia and her satellite countries in their effort to force communism on western Europe is so vicious as to be almost unbelievable to anyone who hasn't actually heard it. We are accused of virtually every political and moral crime under the sun."

The Voice of America is the international program conducted by the State Department for which $12,000,000 has been appropriated for the current fiscal year. Even Great Britain, as the Senator points out, with governmental expenditures reduced to the barest minimum, spends $40,000,000 on a similar, but expanded program. Our information program consists of short-wave radio programs in approximately 24 languages, about 50 American libraries operated in as many foreign countries and its exchange of persons with other countries under which American teachers and specialists in the sciences and arts go to those countries at their invitation to assist them, while their students and teachers come to the United States. The program at present is wholly inadequate to meet the needs of our country in the face of existing conditions.

"My experiences and my observations on this investigating trip," said the Senator, "impel me to use every means at my disposal to try to let the American people know what is happening to us in Europe."

The Marshall plan which provides for an appropriation by the Congress of billions of dollars for the rehabilitation of European countries will fall tragically short of its objectives unless we organize an information program capable of combating the consolidated Communist propaganda service which aims to destroy our European recovery program.

Senator SMITH gained his information at first hand. Given ample opportunity to learn what is going on in Europe, he took full advantage of it and has reported his observations in language which leaves no room for doubt. It is inconceivable that Congress should fail to appropriate the necessary funds for America with its seeming wealth of resources, to tell her story to the world, that all nations may know what we are striving to do for the stricken peoples of Europe. It will be impossible to attain our objectives unless we can offset the Communist program of misrepresentation of which Senator SMITH has testified.

[From the Christian Science Monitor of December 19, 1947]

WORD AND DEED

Nothing is to be gained by exchanging cold war for hot words. But that is not the announced purpose of the new State Department policy to meet Russian propaganda with direct replies. If the policy is wisely carried out, it will aim at light, not heat. It will counter lies with facts, not Russian rhetoric with American declamation.

The Voice of America will be only one of the avenues of appeal to the peoples of the world—and especially, we must admit reluctantly, of Germany. But the congressionally snubbed Voice will be of key importance in the new program. Greatly increased appropriations will be necessary to make it a match for the strident blare from Moscow.

Most important of all are the actions with which the United States backs its words. Inflated speech, like an inflated economy, promises more than it delivers. But a people that means business in its support of world democracy can afford to advertise its motives as well as its acts.

[From the Watertown (N. Y.) Times of December 5, 1947]

WHERE OUR VOICE IS HEARD

Fighters for democracy lead a lonely life behind the iron curtain of communism. Yet they are not discouraged, for they know that powerful forces in the west are working with them. They know because of the Voice of America radio broadcasts. Stanislaw Mikolajczyk, the Polish peasant leader who recently fled from his country, has testified to this.

Mikolajczyk reports: "Poles hear that the Americans have not forgotten the people behind the iron curtain and still believe in the principle that freedom and democracy cannot be divided into spheres of influence. Freedom and democracy must be shared by all if peace is to reign over the world and mankind is not to be drowned by chaos."

Unfortunately these words, that mean so much to believers in democracy abroad, carry little weight with Congressmen here at home. The cost of the Voice of America broadcasts is a small price to pay for the lives men are risking to fight Communist oppression. Such services toward freedom cannot be bought on the open market. Congress should forget politics and throw full aid behind this Voice, bringing hope to freemen from a friendly people.

[From the Watertown (N. Y.) Times of December 22, 1947]

GETTING THE TRUTH TO EUROPE

Every American who has visited Europe of late has returned convinced that there must be a vast increase in America's information service. The most recent is John G. Cowles, the Minneapolis publisher. "We need a competent, hard-boiled organization in Europe to get the people the facts about the United States and about Russia," he says.

The inflation in Russia and the devaluation of the Russian ruble presented a rare opportunity to show the people of Europe what they could expect under Communist domination. Yet we fell down flat owing to the inadequacy of both our information service and broadcasting facilities.

We did the same thing when the Big Four Conference broke up in London. The Russians broadcast all over Europe that the western democracies opposed the union of Germany into a single nation. Newspapers in the Soviet zone in Russia were filled with extracts from Molotov's speeches. Apparently there was no real effort on the part of our authorities to have the truth presented in newspapers in western Germany.

We are about to embark on the Marshall plan. The Russians have twisted and distorted the purpose of that plan and may now be depended upon to take up the task with renewed zeal. We must counteract this but we cannot do it unless our information service is greatly expanded.

It is one of the most important matters facing the regular session of Congress.

[From Collier's magazine of December 27, 1947]

GIVE AMERICA A REAL VOICE

The United States State Department's propaganda service, first called the Voice of America, then formally christened the Office of Information and Educational Exchange, had tough sledding during the year or so in which it was under the supervision of William Benton, Assistant Secretary of State for Public Affairs, who recently resigned that post.

For all the tough sledding, the Voice of America idea is a good one. The idea is that, since Russia is flooding much of the world with the falsest kind of anti-United States propaganda, we should crack back with fair, factual, and vigorous propaganda of our own. The Voice attempts to do that, but is pretty seriously handicapped at present because Congress last summer granted it only $12,400,000 for a year's work instead of the $31,000,000 the State Department requested.

All of which impels us to urge that the Senate pass H. R. 3342 at its earliest convenience.

H. R. 3342 is a bill, passed by the House last July, to make the Office of Information and Educational Exchange permanent, and to put it in charge of a wide variety of United State propaganda services—radio programs beamed in strategic directions, library and information offices in many countries outside the iron curtain, documentary films on various aspects of American life, and so on.

Representative KARL E. MUNDT, Republican, South Dakota, who led the initial congressional attack on some of the Voice's misplays, is a strong backer of this plan to tune up, tone up, and generally strengthen the Voice. MUNDT urges that we spend some $50,000,000 a year on these efforts to funnel into other people's minds our side of the argument between democracy and communism.

Such an expenditure seems to be a reasonable one, only provided the agency is run by realists and businesslike executives, with dreamers, phonies, and tinhorn tub thumpers ruled out.

We have a mighty story to tell about this country, to a world which knows only fragments of that story. Let's get busy and tell it.

[From the Louisville Courier-Journal of January 4, 1948]

ONLY WAY TO OFFSET RUSSIAN PROPAGANDA IS TO ANSWER IT—INDICATIONS ARE NOW THAT PLANS ARE AFOOT TO DEVELOP MACHINERY TO DRILL THE TRUTH INTO EUROPE

(By Leland Stowe)

The answer to Soviet propaganda is simple. The answer is really to answer it. But we can't possibly hope to counteract the most highly developed propaganda organization in today's world merely with occasional statements by Secretary Marshall, the President, and a few others.

Even when Molotov and Vishinsky have spells of silence, the Soviet-Communist propaganda mills grind steadily onward with great effectiveness, day in and day out. Yet the same nation which perfected advertising into a near science and invented the almighty public-relations man has left the world field, politically speaking, almost completely free for the last 2½ years to Moscow's experts.

One cheering item for the new year is that Uncle Sam gives promise of finding his voice at last—and of using it consistently, with some boldness and imagination. Under Secretary of State Robert A. Lovett revealed this when he announced a decision "to meet Russian misstatements and distortions with direct replies." This decision appears to be a constructive byproduct of the otherwise dismal Big Four failure in London. Top American policy makers evidently got tired of watching Molotov and his colleagues run away with the propaganda ball.

BUSINESSES DO IT

So the year 1948 should see the United States begin to act something like a $200,000,000,000 concern.

Can any organization with an annual income of approximately $200,000,000,000 afford to spend less than $50,000,000 to present its case and its goods to hundreds of millions of potential customers? You wouldn't think there could be the slightest question about this. After all, scores of America's biggest corporations spend proportionately far more than this each year—just to get the facts about their products and what they are doing before the public, here and abroad.

To the richest and most powerful nation in the world, $50,000,000 a year, both to make available all pertinent facts about its activities and to prevent the spread of false conceptions about its policies, ought to be an indispensable investment.

CONGRESSMEN "EXPOSED"

But until very recently, a majority in our Congress insisted that the United States of America had no need of a respectable and strong public-relations instrument. Last June Congress refused to appropriate some $33,000,000 a year (out of a budget of as many billions of dollars) for the United States Information Service and the Voice of America overseas broadcasts. Congress cut the requested funds down to a niggardly $12,800,000 for this fiscal year. On the world's fiercely competing ideological markets, Congress rated the facts and truth about America as being worth no more than a ragged shoestring.

Since then, nearly 200 Congressmen have visited Europe and been personally exposed to the high-pressured anti-American propaganda war being waged by the Soviets and Communist Party machines throughout the Continent. They discovered that the outside world is a lot different from Washington and Kalamazoo. They learned that a lot of things which Congressmen and most Americans take for granted can be made to look alarmingly different when served to foreign publics with a neat Communist twist or with calculated omissions.

Suddenly a good many of these traveling Congressmen became angry and alarmed at the distortions and libels of Uncle Sam which they encountered. Representative KARL MUNDT, of South Dakota, had fought all along for an Uncle Sam-sized information service in and to foreign lands. Today, prospects for his bill are greatly strengthened. In the coming session, he will seek an appropriation of $50,000,000 a year for the next 6 years. Thanks to the tremendous activities and the tactics of Soviet-Communist propaganda, there seems a fair chance that America's voice, both by radio and printed material, will be raised to something more than an adolescent's shrill squeak.

This explains Lovett's announcement about direct replies to Soviet propaganda. It could be made only because a fair number of American politicians are beginning to catch up with some of the harsh facts of our postwar era. But there can be no adequate, persistent answer to Moscow's vast propaganda offensive unless the bulk of American voters became equally aware of the extremely vigorous competition which confronts us and western democratic principles in Europe and Asia. In the realm of governmental information and international public relations, the American people must grow up fast. In these respects, and as of today, Uncle Sam's team is far behind Uncle Joe's.

A WASTE OF BREATH

If it isn't worth $50,000,000 a year for America's case to be heard accurately and read accurately by hundreds of millions of people overseas, then the United States might as well crawl into its shell like a turtle—and leave the world field to uncontested Soviet propaganda. For Americans to denounce communism, yet refuse to provide the means to repudiate a constant barrage of Communist assertions and misstatements, has been both a waste of breath and lack of elemental common sense. When you are assaulted by mud-splashers the first thing to do is turn on a good garden hose. In these times, the Office of Information in the State Department can and should function as a powerful garden hose; not a trickle, but a pounding, unceasing stream of clear water.

What could a $50,000,000 information hose do? Molotov's London speech, which broke up the Conference, offers an enlightening example. When Lovett spoke of misstatements, distortions, and falsehoods, he undoubtedly had this speech in mind. But although Marshall and Bevin replied to it and spiked many an assertion, they did not begin to answer Molotov as he could be answered. Restudying this speech, you can see what opportunities Washington has missed until now for lack of detailed direct replies. Here are samples:

1. Molotov accused the western Allies of "hidden reparations and economic privileges" in western Germany. To brand the accusation as false is only a half measure. What about the enormous hidden reparations and economic privileges amassed by the Soviets in the eastern European countries? Washington possesses thousands of columns of hard facts on this. An adequate United States Information Service could deluge Europe with such facts.

2. Molotov charged Anglo-Americans with buying up whole concerns in Germany. Marshall and Bevin declared this absolutely false. But why stop there? Every informed person knows that the Soviets have been steadily buying controls of quantities of enterprises in Hungary, Rumania, and other satellite countries for more than 2 years. An alert information service, sufficiently expanded, would present Europeans with a long and confirmed list of such actions.

3. Molotov claimed that western Germany's whole economy was in a state of dependency on other countries, especially the United States of America. What about the economic dependency of every Soviet satellite nation? The facts are all available—but millions of Europeans will never know them unless Washington leads in presenting them, alongside Molotov's charges.

MOLOTOV WIDE OPEN

In his denunciation of the western Allies Molotov left himself wide open to direct replies, well documented, on most of the sweeping accusations he made. The General Marshall-Bevin retort was "We're not doing that." It would have been far more effective, in public-relations terms, if they had added, "But this is precisely what you are doing."

Foreign ministers can't talk forever. They cannot answer the Niagara of Soviet propaganda with a host of unanswerable facts in a half-hour speech.

The only way to reply crushingly and tellingly to a vast propaganda machine is through a large and well-organized mechanism for information. The Soviets will continue to win the propaganda war until America refuses to let its voice be smothered by the opposition's sheer weight, plus its own indifference and lack of political awareness.

[From World Report of January 6, 1948]

REPORT ON THE VOICE OF MOSCOW—RUSSIA'S WAR OF WORDS AGAINST AMERICA

The "cold war" is entering a new phase.

Soviet propagandists are trying—in some cases successfully—to convince the world that America is expansionist, aggressive, a warmonger out to dominate the world.

United States officials think the time has come to tell the world that Russia is the

guilty party. The Voice of America, if Congress approved, is to reply vigorously to the Voice of Moscow.

In the following survey, World Report analyzes the problem the American Government is up against in combating Russian propaganda.

In the "cold war" between Russia and the United States, Radio Moscow is a major weapon. It assumed the offensive early and has hammered away at America's conduct and intentions early and late.

Until recently, Radio Moscow has had things pretty much its own way. Soviet diplomats, like V. M. Molotov and Andrei Vishinsky, have provided it with scorching ammunition against America. Russian newspapers, under direct control of Soviet officials, daily provide additional ammunition.

Lately, however, Radio Moscow has begun to notice international competition. A smaller, less experienced instrument, the Voice of America, has demanded attention in Moscow. Apparently the Voice of America finally has got under the skin of Soviet propagandists.

The episode began with the Voice of America broadcast reports that Russian consumers were doing some panic buying in Moscow. Stores were closing to avoid having their shelves stripped of goods. There were rumors of changes in prices and in the value of the ruble.

A few days later the Soviet Government announced its drastic devaluation of the currency. Ruble devaluation of 90 percent was an official admission that inflation in Russia had reached critical heights.

What annoyed Moscow was that the press in America and in western Europe generally interpreted the currency devaluation as evidence of economic crisis inside Russia. The Voice of Moscow says it is nothin of the kind. The capitalist press, according to Moscow, is reacting with "fury and lies" to conceal the economic crisis that grips the United States.

Finally, said Radio Moscow, "This anti-Soviet chorus was joined by the New York radio station of the State Department's Voice of America, whose lying broadcasts have on more than one occasion incensed the working people of our country."

To American officials, the significant point in this statement is the admission that the Voice of America reaches Russian workers.

In the past, the Voice of America has had difficulty reaching Russian listeners. First broadcasts, a few months ago, were feeble. They were criticized by the American Embassy in Moscow as inadequate. Attempts by the State Department to improve the programs were handicapped by congressional opposition and a cut in appropriations.

Other efforts to inform Europeans of American aid and of America's side of the argument with Russia did not seem to be getting very far. Congressmen who visited Europe last summer complained that Europeans heard much of an occasional shipment of Russian grain, but heard little or nothing of continuous shipments of American wheat and coal. Some Europeans, usually friendly to America, seemed to be impressed by Moscow's repeated statements that the United States was imperialistic.

There is no evidence that Soviet propaganda has won many in western Europe to Russia's cause. There is evidence, however, that the Voice of Moscow has helped to make Europeans suspicious of America.

Success of the Voice of America in annoying Soviet propagandists is thus significant. Internal difficulties in Russia, combined with Communist set-backs in France, may now handicap Radio Moscow in influencing western Europe.

TO REPLY TO RUSSIA

Exactly how the Voice of America will seize this opportunity remains to be determined. Thus far, the Voice of America has ignored repeated attacks by Moscow on American intentions. Now, however, high officials in the State Department say the time has come to correct misinformation, distortions, and outright lies broadcast by the Voice of Moscow.

Answering Soviet attacks on the United States can be a full-time job. A limited sample of Moscow broadcasts for one recent week gives an idea of what is involved.

To British listeners, the Voice of Moscow attacks the Marshall plan, blames the failure of the London Conference of Foreign Ministers on the western powers, says American prosperity is at an end, explains what is back of anticommunism in the United States and warns the British that the dollar is growing strong at the expense of the pound sterling.

The Marshall plan, according to Moscow, is "an instrument for swelling the profits of United States and European monopolies by still further tightening the screws on the laboring population of western Europe." In other words, if the Labor government in Britain supports the Marshall plan, it does so at the expense of its principal supporters, the British workers.

Western diplomats at London wanted the recent Conference to fail, Radio Moscow explains, because they "wanted to pursue a policy for dismembering Germany to the bitter end, and transform the western zones into colonies for German imperialists." Thus, Moscow ignores Anglo-American statements urging a united Germany, warns British labor to beware of imperialism.

"The color has gone out of United States prosperity," Moscow broadcasts to England. "Indeed, the sinister signs of an approaching crisis have become so evident that they can no longer be concealed." To left-wing members of the Labor Party in Britain, this view may reinforce their earlier fears that the Labor government ought to get closer to Russia, divorce itself from America.

Lovers of liberty in England are advised by Moscow that the United States is engaged in "a police onslaught on the elementary democratic rights of the United States people." Anticommunism in America, it is explained, is a "campaign undertaken to justify a policy of external expansion."

To Britons worried about the stability of the pound sterling, Moscow says that the British-American deal on western Germany puts financial policy in American hands, and "the pound follows the wake of the dollar."

Germans come in for special attention by the Voice of Moscow. They are told that America wishes to dismember Germany permanently. They are also advised that American charges about Russia taking reparations out of Germany are designed to conceal huge American takings. Thus, according to Moscow, "almost the entire German production" of textiles is seized by the United States. Exports of German coal are made "at such low profit for the Germans that they depend on loans which only the United States can make. Thus, western Germany is coming under United States capitalism."

Soviet propagandists, however, do not say one thing to Russian audiences and the opposite to listeners abroad. The propaganda line is substantially the same both at home and abroad.

RADIO MOSCOW'S LINE

Russians, day after day, learn from the Voice of Moscow that the United States "has embarked on a new, openly expansionist policy directed at establishing world domination," that "United States monopolistic capital * * * is endeavoring under the guise of aid to enslave European countries," that Wall Street looks upon Greece as an appetizer and now wants "to gobble up France," that oil is the only reason for American concern with the Middle East and that America's own economic crisis has now reached the point where "millions of men, including war veterans, are unable to find any occupation."

Many members of the United States Congress now think that Russian statements of this sort ought to be answered. The likelihood is that the current Congress will encourage the Voice of America to speak up.

A major problem, however, is how the United States can offset Russian propaganda without getting the United States Government deep into the propaganda business.

In America, if not in Russia, Government statements are not always accepted by the public at face value. Only the other day, a Voice of America broadcast to China drew criticism because it played down the view of Lt. Gen. A. C. Wedemeyer that Washington ought to go to the aid of Nationalist China.

Some Europeans, furthermore, are weary of propaganda. Austrians, for example, say they want neither Russian nor American propaganda.

Methods that a reinforced Voice of America will use in answering Moscow are still to be determined. They probably will be the subject of controversy in and out of Congress.

So long as the cold war between Russia and America continues, however, it is generally agreed that there is a job for the Voice of America to do. Its busiest time may come during the next few months, while the United States Congress debates—and the Voice of Moscow attacks—the $17,000,000,000 program for helping western Europe.

[From the Washington Star of January 9, 1948]

INFORMATION PROGRAM BOOST

The varying fortunes of the State Department's Voice of America radio program have taken a decided turn for the better as a result of two new developments. The first was the unanimous approval by the Senate Foreign Relations Committee of a bill to provide basic legal authority for the broadcasts. The second was the appointment of George V. Allen, now Ambassador to Iran, as Assistant Secretary of State for Public Affairs.

The bill reported by the Senate committee is a substitute for the Mundt bill which passed the House last year. The proposed legislation reflects the views of the joint committee which toured Europe the past summer and found urgent need of a well-considered and well-rounded foreign-information program. It will provide the statutory authority which the existing program lacks and which Representative TABER, of New York, insists on as a prerequisite to further appropriations. The measure would set up two advisory commissions, appointed by the President, to recommend general policies governing broadcasting and exchange of students between this country and other nations. Passage of this authorization would pave the way for consideration of appropriations to effect the program. Opposition to the information plan has dwindled noticeably as a result of first-hand observations by the congressional travelers.

Mr. Allen is a good choice as successor to William Benton, who had a number of congressional critics. The youthful diplomat (he is only 44) is a career man in the State Department with a background of newspaper experience after graduation from Harvard. He proved to be an intelligent and resourceful Foreign Service officer in difficult wartime assignments. There is good reason to believe that his appointment will meet with approval at the Capitol and elsewhere and that the lagging foreign-information program will derive a real lift from his leadership.

[From the New York Times of January 9, 1948]

TO TELL THE AMERICAN STORY

The quick and unanimous action of the Senate Foreign Relations Committee in reporting out a bill to authorize an information program overseas, and predictions that

money will be appropriated for an expanded service, are welcome indications that Congress at last is aware of the necessity of telling abroad the American story.

Words are an important weapon in the cold war into which the United States has been forced. No more short-sighted action was taken in the first session of the Eightieth Congress than that which halved the requested $20,000,000 for an already curtailed program. There are predictions now that $5,000,000 is to be voted immediately to expand the radio service—the Voice of America programs—and that the full program of information and student exchange may be granted as much as $50,000,000 for the fiscal year beginning July 1.

The change of attitude in Congress can be traced directly to the gathering by many of its Members during the summer recess of some first-hand information for themselves. All, or nearly all, of those who went to Europe and saw for themselves how this country's acts and motives were being distorted came back convinced that action must be taken to give people of other lands facts and explanations. It is not enough to hold good intentions. Others must be convinced that the intent is good.

The revitalized program, as envisioned in the Senate bill drawn by the subcommittee headed by Senator SMITH of New Jersey, seems to us to be an improvement not only over the old program but also over the Mundt bill that was passed by the House at the first session. It divorces the information program and the student-exchange program—to free the latter from any propaganda taint—and sets up separate five-member committees to advise the new Assistant Secretary of State in charge of the program. The nomination of George V. Allen, a career diplomat with a newspaper background, for that post gives promise of an able administration. The sooner the expanded program can be put into effect the better. Too much time already has been lost through delay and misunderstanding of the need.

[From the New York Herald Tribune of January 9, 1948]

THE INFORMATION PROGRAM

With the White House announcement that George V. Allen will be appointed Assistant Secretary of State in charge of our information and cultural program, this troubled area of our policy bids fair to take on new force and direction. Mr. Allen, who is not to be confused with George Allen, of Missouri, former jester at the White House court, is a career diplomat, looking back at 44 upon a record which includes early newspaper work, service in the State Department at Washington, and participation in some of the major wartime conferences. His latest position, as Ambassador to Iran, has given him first-hand experience in a region where the conflict of propagandas and the war of ideas is crucial.

Mr. Allen's appointment coincides with a disposition on the part of Congress to face realistically the need for a foreign-information program. The Congressmen who visited Europe last summer returned with a heightened appreciation of how necessary it is to counter the anti-American propaganda of the Soviets, as well as to spread understanding of our own life and ideals. Even JOHN TABER, who in other respects seems to have learned little, may possibly have regretted his earlier lead in reducing appropriations for this purpose to a bare minimum.

At the close of the last regular session, the House approved a bill authorizing the Office of International Information and Educational Exchange, and the Senate Foreign Relations Committee gave its sanction Wednesday to a similar bill. Though neither of these carries appropriations, the prospects for a supplemental grant, and an adequate budget for the next fiscal year, have been considered favorable. Mr. Allen's nomination should greatly help the cause.

[From the Camden (N. J.) Courier-Post of January 12, 1948]

UNITED STATES INFORMATION SERVICE

Expansion of America's information service abroad is indicated by two actions of the past week—unanimous approval by the Senate Foreign Relations Committee of Senator SMITH's bill for a revitalized program, and appointment of George V. Allen as Assistant Secretary of State to supervise the service.

Allen, who has been Ambassador to Iran and is thoroughly familiar with a part of the world where our information service is vitally important, is a brilliant young career diplomat and a former newspaperman. His nomination gives promise of an abler administration than the service has had in the past.

Senator SMITH's measure corrects several flaws in the Mundt bill, which passed the House at the last session, and is supported by numerous former critics of the information service whose views were changed during their summer visits to Europe. The radio Voice of America now appears likely to get an added $5,000,000 appropriation almost immediately, with perhaps as much as $50,000,000 to be granted for the whole information and student-exchange program for the next fiscal year.

Congress is right in realizing how essential our information service is to combat foreign propaganda, and Senator SMITH is to be commended for having been a leader in bringing many of his colleagues around to that realization.

[From the Washington Post of January 12, 1948]

TELLING THE WORLD

One of the most hopeful auguries of the new session of Congress is the manner in which action has been expedited to put the foreign information program on a sound basis for the future. Last week the Senate Republican Policy Committee gave the green light to the Senate version of the Mundt bill as one of three pieces of "must" legislation for January. Later, at the instigation of Senator SMITH, the Foreign Relations Committee reported the bill out with only a minor change over what already had been passed by the House last session. There is every indication that with the support of newly won converts in the Senate the bill shortly will become law.

In addition to providing the basis for expansion of Voice of America broadcasts, libraries and other facets of the information program, the Mundt bill also goes into another significant aspect of our cultural relations—the interchange of students, teachers, and technical materials and the assignment of specialists to other countries on request. These activities must be considered a complement to the program of advertising America. In a concession to educators, the Senate committee included an amendment establishing two separate advisory committees of private citizens, one for informational and the other for educational activities. Providing that the separation is not carried to the point of handicapping operations at field levels, the establishment of these committees should make for more public understanding and support.

The crucial importance of an immediate effort to broaden the various parts of the information program is illustrated by the noticeable increase in Russian propaganda since the advent of interim aid and the Marshall plan. This propaganda has become more and more vicious. If the world is to have a fair and accurate picture of what we are doing, if our motives are not to be misconstrued and turned against us in the minds of the very people we are trying to help, then we shall have to use every means at our command for propagating the truth. Passage of the Mundt bill itself, of course, does not assure the funds necessary to do the job. But it is the first step in what many Members of Congress have rightly come to regard as an inescapable choice. The second equally essential step will be to vote the money for an adequate program, both in a deficiency appropriation and in next year's budget.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. FULBRIGHT. I should like very much to congratulate and commend the Senator from New Jersey upon his very excellent address, and particularly his last remarks, with regard to the real purpose and significance of the legislation.

I should like to ask the Senator from New Jersey if he would be willing to consider an amendment which I believe would carry out specifically what I believe is stated to be the intention of the committee in its comment on page 10 of the report, in which it says:

> It is not intended that these two Commissions have authority over the Board of Foreign Scholarships or the United States National Commission for UNESCO.

The reason why it seems to me the amendment may be appropriate is because of the very broad provision in section 1009. Therefore the amendment, I believe, would be appropriate on page 17, line 21, to add, after the word "Act," the words "*Provided, however*, That the Commission created by this section shall have no authority over the Board of Foreign Scholarships or the program created by Public Law 584 of the Seventy-ninth Congress enacted August 1, 1946, or the United States National Commission for UNESCO."

In other words, I believe that amendment simply carries out what the committee states is its intention, and makes it clear. The reason, I believe, arises not from the section on page 17, that is, section 601, but from the very broad terms of section 1009, which states that—

> All provisions in this act regulating the administration of international information activities and educational exchanges provided herein, shall apply to all such international activities under jurisdiction of the Department of State.

I think that certainly would leave room for doubt. I may say that in the long run I think it is very likely that all these programs may be merged. But in the short term I think it may be very confusing, because, as the Senator well knows, even when we pass this act, there will still be a major obstacle in procuring the money. I should not like to see the program now started under Public Law 584 held up or interfered with for any reason, because that board has been appointed and has started to function. I am worried about the possible interpretation of section 1009, and I suggest the amendment for the consideration of the Senate.

Mr. SMITH. The Senator has reference, I believe, to the so-called surplus property realizations abroad, to be used for educational purposes.

Mr. FULBRIGHT. Yes.

Mr. SMITH. Under the law known as the Fulbright Act.

Mr. FULBRIGHT. That is correct.

Mr. SMITH. In answer to the Senator, I will say that it is clearly the intention, as stated in our report, not to give any authority over these boards. Unless some of my colleagues see some objection to the amendment suggested by the Senator from Arkansas, I should be glad to accept his amendment interpreting what we mean by this section.

Mr. FULBRIGHT. I offer the amendment with that understanding.

Mr. SMITH. I do not know whether it is now in order.

Mr. FULBRIGHT. I will offer it at the appropriate time.

Mr. SMITH. The Senator from Arkansas has submitted his amendment, which I take it will lie on the table until the appropriate time arrives for its consideration.

The PRESIDING OFFICER. The amendment submitted by the Senator from Arkansas will lie on the table and be printed.

Mr. LODGE. Mr. President, as one member of the subcommittee, I should like to pay my tribute to the work which was done by the chairman, the Senator from New Jersey [Mr. SMITH], who worked so hard and so faithfully on this bill. The other members of the subcommittee, the Senator from New Mexico [Mr. HATCH], the Senator from Kentucky [Mr. BARKLEY], and the Senator from Iowa [Mr. HICKENLOOPER] all made valuable contributions.

Certainly the bill as it is now is in much better form than it was when it came over from the other branch. It meets the needs of the situation in a more practical and complete way.

However, I think the Senator from New Jersey will agree with me when I say that the bill is only a beginning, insofar as United States public relations abroad are concerned. There has been a good deal of talk to the effect that if Congress would only pass this bill all our troubles would be over. To my mind, Mr. President, there could be no more false doctrine than that. We can pass all the bills we want to, and we can vote hundreds of thousands of dollars in appropriations; but unless there is energetic, intelligent, and imaginative administration we shall not really hold up our end in the great debate which is going on over the world and in which we, whether we like it or not, are one of the two principal participants.

That means, of course, that there must be an intelligent administration of the Office of Public Information. I understand that Mr. Allen, the new appointee, is a very able man, from whom we can expect great things. But as the Senator from New Jersey has said, the Voice of America is not limited to one little bureau in the State Department. The Voice of America is the President of the United States. The Voice of America is the Secretary of State. The Voice of America is the United States ambassador in every country. They are the ones who are going to be listened to and noted by people the world over. It is up to those who administer this act and who carry out the expenditure of funds always to bear in mind that the conduct of public relations is not a little incidental clerical activity. In the days in which we are now living, it is the armor in which strategy and economics are clothed. If the European recovery program known as the Marshall program is not conducted with due and intelligent regard to the matter of public relations, it will not do a great deal of good.

Let me repeat what I said at the outset. I congratulate the Senator from New Jersey for the fine and useful work which he has done in connection with this bill.

Mr. SMITH. I thank the Senator.

Mr. THOMAS of Utah. Mr. President, I wish to associate myself with this bill. For a long time I have been in favor of what it provides for. In fact, I had something to do with bringing out previous bills on this subject.

Psychological warfare is very, very old. It is almost as old as war itself. Even in an organized sense, it is almost as old. We know something about the use of the Voice of America in warfare, because it is spectacular, and because it has brought great results. Propaganda has always been an arm of the State, especially in despotic countries, where the one who has the power must always maintain it by keeping himself before the populace, whether it be a mob or whether it be a thoughtful group.

Mr. President, there are many things in this bill. The reaffirmation of the exchange of students is one. The fact that America is not ashamed to talk about herself is another. The fact that we may be made conscious, as we should always be in a democracy, that the voice of that democracy is in reality the voice of all the people, is another factor. I am sure that those who become spokesmen for our people will reflect that voice as time goes on.

Today I wish to do what I think ought to be done in relation to the Voice of America. We have been talking a great deal about the Marshall plan and about relief and aid for Europe. In spite of what anyone says, I am still a believer in the fact of one world. I have been such a believer for a long time. It makes no difference whether the world is divided in two politically. The economic entity, the geographical entity, and the fact of unity is always there, and we come back to it. I therefore wish today, if I can, to attempt to bring a spirit of universality into what we are talking about, and especially in regard to these plans.

I believe that in presenting the voice of America we shall have to present it to the whole world, because there has been a realinement of the world. World conditions and the relationships between nations make it impossible to spend all our time in our discussions on any one country or any one group of countries, or any one part of the world when we discuss world policies.

First of all, few have noticed that the Truman doctrine and the Marshall plan, in reality, have their origin in what we have done in the Far East. China was told to put her own house in order before she could depend upon future aid, and Japan is now looked upon as the very center of American activity and policy of that phase of the Truman doctrine, which stands for the support of peoples attempting to remain free of economic controls and political dominations.

With Congress having before it resolutions which call for the admission of Hawaii and Alaska as States, Japan becomes more of a neighbor than ever. Our administration, as trustee of the former Japanese islands of the Pacific, makes us an actual administrator of territory which was formerly controlled by Japan and a close neighbor to nations and peoples who, until the immediate present, have been considered far off.

Our first treaty with Korea, which was completely forgotten when the Japanese annexed that land, seems now, as far as our responsibility there is concerned, to have again come to life, and Korea looms large and we stand today as we always have, in theory, for the independence and territorial integrity of China.

Our tasks will not be easy. They will be many times harder than they have ever been unless we properly orient ourselves to the basic values of our various friendships and responsibilities in Asia, and without prejudice and without hate, evaluate honestly who are and who must be our friends if even a semblance of peace is maintained in the Eastern Hemisphere.

Our new relations with the Philippines, the recasting of controls in Indonesia, in Indochina, and Siam; the continued development, in their individual national responsibility, of the commonwealth states in the Pacific, are all contributing factors in our policy and our plans. In a way, Australia and New Zealand are now as close to us as is Canada.

I call to the attention of the Senate today the fact that we talk about the "iron curtain," and the fact that the eastern part of Europe is far from us, and we speak of the need of uniting western Europe against what might be trouble from the east. Those who point out and emphasize the two-worlds idea have completely forgotten that if Alaska should be made a State, or even with Alaska a Territory, we are separated from Russia on the west by merely a few miles. The way to the heart of the United States, from a strategic standpoint, by many enemies situated in the middle of Europe or in Asia, is, of course, by way of the Pacific. Geography has made it that way, and by reason of travel by air we are so close to Russia that she is one of our very nearest neighbors.

The new India, whether united or divided into parts, has given us an entirely new relationship, one which will test the ability of our diplomatists to evaluate new conditions and work in accordance with them, and test executive understanding and leadership in carrying on our new responsibilities in that part of the world. To the thoughtless, they seem to be few, but they seem great in number to those who know the strivings of the people of all Asia to meet the challenge given them by a mere reading of the political concepts of the west and the free intercourse with our missionaries.

A reminder of a single event will make my point. When William J. Bryan was

in India he left this thought, and it never died. No matter, he said in effect, how much you may dislike Britain, never forget that you should be forever grateful to her, for she gave you the English language, in which the concepts of liberty have been expressed.

Mr. President, I wonder if those few words Bryan said back in 1907 or 1908, are not in complete harmony with the words of the Senator from New Jersey in closing his statement on the pending bill. If the words of liberty were essential to the Indian people, and if what has taken place in India since that time does not prove that the words of liberty are essential to a people, then, of course, we may lose sight entirely of all that the Senator from New Jersey has said, and that which we have stood for as a nation may become merely a doctrine having no effect around the world. We know it has an effect, and we have such implicit faith in the democratic processes, coupled with the educational processes, that once these ideas gain root in the hearts and minds of men they never come out, because they are related to the eternal strivings of man himself and of man's soul for lasting and eternal liberty.

Great as these factors are, however, the responsibility for seventy-odd-million Japanese, functioning under a new constitution sponsored by us, and, when the time for peace actually comes, introduced to the world as an American-directed product, our biggest and greatest task is, of course, Japan herself.

Almost a century has passed since Commodore Matthew Perry anchored his tiny squadron of small vessels in Tokyo Bay. Faced with this impressive display of power the Japanese were forced to accept their first modern treaty. This treaty served to "open" Japan to the west and exposed her to western idealism, western realism, European and American ways. In almost a decade from the time of the first treaty students from Japan had arrived in America and the teacher-student relationship was begun. In the late summer of 1945, again an American, this time a soldier, led the spearhead of the greatest concentration of armed strength the world has ever know into Tokyo Bay. From a turret of the flagship *Missouri* flew an American flag of 31 stars—Commodore Perry's flag of an earlier day. On the deck below, Gen. Douglas MacArthur received the imperial surrender. Japan had been "opened" for a second time and exposed again to western idealism, realism, and practices. It is hoped that this second opening will renew an even firmer student-teacher relationship.

We now know only too well what dire consequences sprang from the earlier contact between our country and Japan. Japan followed with zeal all she thought represented best the strength of the West, our military and naval habits. Two or three centuries of Shogunate and military single-willism, plus the fact that her constitution was set up by a revolutionary government, proved to be factors so strong that even the new constitution and the new leadership could not overcome the habits and the thought of the past. Perry's visit was conceived in a mixture of American self-interest and American good will, but it was the first link in a chain of events that led to the acme of the world's use of force to combat force at Hiroshima and Nagasaki.

I emphasize that point of self-interest, because it has come back into the vocabulary of those who are constantly talking and asking questions about the Marshall plan.

Having emerged from the long slumber of centuries of hermit-like seclusion, the Japanese grasped eagerly at the new material techniques of the west. It is inevitable that the learner should attempt to imitate his teacher and, like so many students, the imitation was accepted and indulged in without, of course, attempting to interpret completely that which was imitated. The Japanese learned the west's techniques, learned them well and applied them ruthlessly, testing their new-found strength in a series of wars spaced almost regularly at 10-year intervals—the Chinese-Japanese War of 1895, the Russian-Japanese War of 1905, the World War of 1915, the Manchurian incident of 1931, and finally in 1941 the Second World War. The peoples of the west followed this strange spectacle of growing power in the Orient, first with amusement, then with surprise, then awe, and finally, after the rape of Nanking, with either indignation or terror and horror. It was a hideously fascinating spectacle. From an island base, rich in natural beauty, but wretchedly poor in the substance of power and scarcely larger than New Mexico, the Japanese reddened the map of Asia in ever-widening arcs until at the pinnacle of their military success their empire encompassed an area equal to that of continental United States.

This, then, was the end result of a seemingly insignificant naval visit more than 90 years ago. What can we expect from the "second" opening of Japan, carried out under such strikingly different circumstances? As you know, it required almost 4 years of devastating war, appalling sacrifices of American lives, and an immense united effort to pry loose the Japanese from their conquests, and to force them once again back into the confines of their homeland. But now the arrogant alien boot no longer echoes in war-torn China. The Japanese Fleet is at the bottom of the sea. Flattened beyond recognition are many of the great cities of Japan where the abundance of Asia and what she could secure from the west had been fashioned into deadly instruments of aggression.

We have won at tremendous cost this second opportunity to "open" Japan. We had to pool our courage, our skill, our intelligence, and our imagination in a common undertaking of unbelievable magnitude. Our responsibility is not merely to make the victory that finally came a vindication of our technology, but even more a triumph of a way of life based upon decent ideals, a fulfillment of American democracy, and its dream of human freedom.

But are we equal to this new task? Can we meet the challenge of the second opening of Japan, and in a larger sense the challenge of the peace, with a trust in the strength of the atomic bomb? No; we need something more. Will we retain the war-forged spiritual unity and the determined will to achieve, now that the objective is to construct, rather than to destroy? Can we supply the needed leadership to the world, when the basic requirement is no longer guns but mechanisms of peace and ideals?

Mr. President, I cannot help but pause for a moment to point out that the problems of peace are so much more difficult than the problems of war, and to point out that, throughout the ages, man had been perfectly happy to unite at all times for war, but has refused to unite for peace. Way back in the days of the Greek dramatists and poets, Sophocles, I believe it was, had one of his heroines wail the lines:

> When, oh when, will men cease to unite for destruction and unite for the building and the bringing of peace?

That question is still unanswered, Mr. President. That question may be answered by the Voice of America moving out into the whole world, because we will not, we dare not, we cannot move into the world's sphere and talk about America and not also talk about peace, good will, educational relationships with one another and, above all things, governments built upon understanding.

Our capacities to wage the war were admittedly unsurpassed. Our capacities to lead the peace are presently undergoing careful scrutiny in many parts of the world. Japan must have no cause for losing faith in her teacher.

Although we share the control of Japan with our Allies, the circumstances of the war have projected America into a position of primary responsibility. Our task bids fair to challenge all of our capabilities, which can become successful only on a cooperative basis, and cooperation never succeeds unless there is a fusion of common ideals and common characteristics. Have I thereby set the stage for an impossible contingency? Is there anything in the way of ideals common between us and our former enemy? If our answer is to be generated by hate, it will be definitely "No." However, through a study of history and what has actually taken place, without our being against Japan just because we are for some other country, we can discover many common ideals and aspirations. If it had not been for these common ideals and aspirations, the peace, as it did come in Japan, would never have occurred. The atomic bomb, despite the Emperor's reference to it, and again admitting that it was a contributing factor, was not the basic factor which brought about the surrender and, with it, the complete trust on the part of our former enemy that America would honor every promise she made.

How did it happen that a country and a people who have been credited with being individually and collectively self-sacrificing, and still having an army of 4,000,000 men trained and equipped, who had never shot a bullet at an enemy, surrendered unconditionally, and still realized that what they were doing could be done with honor? It could not have been from a fear of a call for more sacrifice. It must have been from trust. And how was it, despite the fact that many leaders

of our Government justified the use of the bomb on the score of military necessity, and knew little about what had gone on since the very days of Pearl Harbor in attempting to bring about a complete surrender where guerrilla warfare could be avoided, that armies scattered over almost half a globe could be returned without piecemeal fighting and disorder? Something must have been going on, because a people of over 70,000,000 could not be converted overnight by the destruction of a comparatively small city, after larger cities had been destroyed without affecting their spirit.

It is because I believe that a future successful building of Japan depends upon an appreciation of the ideals which will go into that building that I am going to attempt to point out what can be accomplished by reference to what has already been accomplished. If the same spirit can control the future in the same way that it got control of the hearts and minds of the Japanese people in the past, we can build hopefully, and under our tutelage Japan can become a leader of Asia in developing national solidarities and peaceful international activities to such an extent that the rebirth of the new Japan will affect the lives of the millions and millions of other peoples in Asia.

When I say that, I do not in any sense condone a single act of the Japanese Government in bringing about war with America. Time and time again in talking to the Japanese I have repeated one theme, namely, that the government led by Matsuoka and Tojo had actually become apostate, that these leaders turned their backs upon the fundamentals of their greatest leaders, and that the acceptance of their theories would lead to Japan's utter destruction.

We remember that after Pearl Harbor the Japanese Government instituted a monthly celebration in honor of the Pearl Harbor victory. The idea of apostate leadership struck me so forcibly that I wrote one or two magazine articles and developed the first of what became my messages to the Japanese people. I pointed out in December 1941 that never in the world's history had a nation of 70,000,000 people deliberately moved to its own destruction to the extent that I called it national suicide. I was, of course, an American; and Pearl Harbor outraged me even more, I think, than anyone else, because it seemed proof positive that wicked forces in Japan had completely gotten control of the finer thinking of the great men I used to know. I was so convinced that the destruction of Japan was certain that I started my appeals directly to the Japanese people. The OWI institutionalized my messages, and they were sent regularly up until January 1, 1946. All the time I stressed one theme, namely, an appeal to the Japanese people to overthrow their false leaders and to return to the teachings of Meiji Tenno and his associates.

I make that point at this time, Mr. President, because I do not know of any other case in history when people have given up in the way that the Japanese people gave up; and I make this point particularly in view of their constitution and the controls which existed among them and the fact that a Japanese general in the field was completely autonomous and completely independent from the government at home, and could do whatever he wished to do. Mr. President, do you think that a Japanese general in charge of troops, who had learned year after year to live on the land in China, could have been made to surrender unless he had been convinced that surrender was the proper thing for his people? Of course, he could not.

People do not understand, they do not realize, how the Japanese mind worked and how the Japanese institutions worked. Let me give one incident. I was appointed chairman of a Senate committee to try to do something for our own men who had been captured in foreign countries. We had an extremely interesting little request that came to us. The Japanese had allowed their prisoners to send home to their parents postal cards saying, for the most part, that the prisoners were well. But those postal cards were undated. Some of the parents said they had received word of the death of one of their boys, and then later on had received one of the postal cards from the boy himself saying that he was well and happy. The parents wanted to know if we could not bring it about so that the boys could date the postal cards they sent. I made that request on the part of our people through generals.

It is realized that the request had to go through Spain and through Russia at that time, in order to reach Japan. The Japanese people replied immediately saying they had no objection to the boys dating their postal cards, but that we should know they could not control the generals in the field, and if the generals who were responsible for the prisoners said that no dates should be allowed on the postal cards, the Japanese Government could do nothing about it. I mention that to emphasize the fact that the universal surrender came even among armed forces that knew they were completely autonomous and could act for themselves. I mention it also to show the type of thinking that goes on in another great country. Japan replied to our request immediately, but it took months for us to get the answer. Why? The answer was held up in one of the countries through which we had to communicate. Why was it held up? It was held up because it was deemed unimportant. "Why should any parent be interested in his son after he has once entered the Army?" There are nations in the world who still do not have what we call a dog tag, that is, an identification tag, for their soldiers. They do not keep track of the soldiers. They bid the boys good-by when they leave, and if they come back they welcome them, but there is no communication, for the most part, especially in time of war. The boys are expendable, to use an expression which we developed, and they remain expendable all the time. Therefore, it should be emphasized over and over and over again that the surrender came as a result of a reasoned appeal; it came as the result of a conviction.

In war, therefore, we have an illustration of the strength of the very thing we are trying to do now in peace. As time moved on we were thus in a strong position to be able to explain what was meant by unconditional surrender, and ultimately we were able to unite the Japanese people in the thought that it was not necessarily the aim of America to destroy their basic institutions. We repeated that surrender with honor was obtainable, if it were lived up to in honor, and thus came the unheard of surrender, with almost universal respect for what the Emperor had done.

The convincing of our own people of the necessity of avoiding anarchy in Japan was not an easy task. I call to mind now one radio program I was on, in which the great man with whom I carried on a discussion maintained that anarchy in Japan would be welcomed. Think of it, Mr. President. But in the midst of the war we were so full of hate that we were going to exterminate peoples. That is what was said. In war, if you want to take enemies, you had better tell the enemies you are going to treat them right when you take them, or you will not take them; because if any soldier boy knows he is going to be exterminated when he surrenders, of course he will fight to the last ditch, regardless of anything.

It seems to me that when we realize what we did by psychological warfare in World War I, in bringing about a continued reasoned appeal to the people of the old Austro-Hungarian Empire, and broke it up, not by guns or bullets or bombs but by reasoned appeal, we should never have lost sight of our chance. Incidentally, we did not lose sight of it, for never once did the psychological warfare of our Army and Navy cease throughout the war, and it brought tremendously great results.

Calculate if you can the loss of life to our boys, and the millions of dollars of destruction that we would have had to fight through, if we had not secured the type of surrender we did. Get out the map of China. It is unnecessary to go to the South Sea islands, but just get out the map of China and figure out how far the Japanese troops were scattered over that country. Consider that they were turned into guerrillas, and think how many American boys would have lost their lives chasing down those guerrillas, if we had not brought about the type of surrender we did. My point is that the surrender had to be organized, and was not an impulsive thing resulting from the destruction of Hiroshima and part of Nagasaki.

I go back to Germany, and I go back now to our discussions in the State Department. The Senator from Georgia [Mr. GEORGE] and I, with five or six others, took part every Saturday morning in those discussions. Time after time it was pointed out, and I could not help pointing it out, because I knew, that when Hitler fell there would then be nothing to pin to. As early as 1934 Hitler destroyed both the German Constitution and the German Government by breaking the first rule of politics and government, by taking unto himself not only the Constitution but also the Government; so that when Hitler came to an end there was nothing at all with which one could negotiate. We had a little

chance, because an admiral claimed to be a successor of Hitler, but we did not embrace that opportunity of giving unity to the German people. We let the opportunity go; probably we had to. But the answer of the experts was always the same, "We will have the German people, and we can deal with them."

Mr. President, it is impossible to deal with a people, utterly impossible. We may be able through the Voice of America to appeal to the people, to appeal to individuals, teaching them better habits, a better outlook, a better history, but there is no technique that has ever been devised in the history of government or in the history of politics which makes it possible for forty or fifty or sixty million people to carry on negotiations with anybody. It just cannot be done. We knew that. We knew that was going to happen in Germany, and now we know the result of letting it happen the way it did because we are spending, as every one who thought about it knew that we would spend. The minute an enemy is defeated, then his conqueror must feed him. That is not a rule of life, that is not a rule of war, that is not a rule of law; it is a fact that has followed. The victor must either kill or starve his vanquished foes, or feed them; and to kill or starve them is not the American way.

We are paying now for the fact that Hitler did not know his political science in 1934, or he would never have done what he did. At that time, when Hitler assumed complete control and autonomy, I was at the University of Berlin. I was talking with the various professors there about what he might do. No one who was trained in government could conceive that Hitler would possibly do what he did; but he did it, and much of our trouble comes from the fact that there was no continuity in authority, no way for those people to speak for themselves. Had there been, we probably could have brought about the type of surrender that was brought about in Japan.

The American people should be grateful beyond words not only because of the number of boys whose lives were saved, not only because of the property that was saved, but because we have a chance to make a real beginning in building constructively upon a foundation that is already established. The Japanese Nation has been a unit for generations, so much of a unit that probably that made our task tough. Literacy in Japan is very high. When the war started, there were more electric-light bulbs per capita in Japan than there were in the United States. She has not been a backward country. I am frequently asked whether my messages got to the Japanese people. "How could they?" I have been asked. Radio sets are very cheap; the Japanese people had as many as we had, and they knew how to work them.

One thing about a newly awakened people getting new devices, and one thing which is extremely interesting, is that they work such devices to death once they begin to understand them. I have gone into Japanese hut after Japanese hut and have seen two, three, and four clocks, not one of them going. Those who live in the huts found what the time was in other ways. But it was the style for everyone to have one or more clocks, so the people obtained as many as they could.

With respect to radio messages which we sent to the Japanese, those messages were heard. We received replies sometimes so quickly as to startle us. We received one reply from the Japanese Government to the messages we sent near the end of hostilities, in the form of an action which took place within a week after the first message from us went out. The replies were picked up as far west as Portugal in Europe. We can get to the people of the world by radio, and I am glad we are headed toward an attempt to do so now.

If the Japanese leaders had succeeded in convincing their people that Japan should fight as the last machine gunner fought at Iwo Jima or Okinawa to utter destruction, who can figure how long it would have taken our soldier boys to have burned and blasted out of China and other places of Asia all of the Japanese who were there.

All during the war, both in our own country and in Japan, not much was publicly said and not much was quoted that went out in our psychological warfare. But if what was said had not been very effective, why was so much attention paid in replying? If the Japanese people did not hear what the OWI sent out under the name of Senator THOMAS, why did the Japanese radio go to the trouble to try to belittle and abuse all that Senator THOMAS stood for? At any rate, the results did come out as I maintained from the very beginning were possible. My and the OWI's 5 years' work may be completely marked off as having been useless, but the results remain. I have stressed this point because I believe that the future success of American and Japanese cooperation in bringing stability to Asia depends entirely upon our being able to appreciate common viewpoints from which we can operate and through which there will be joint agreement. The surrender is proof that it can be done.

In the messages to Japan I took the stand that modern Japan was at her very best in thought and in action during the days of the Meiji era, when such men as Admiral Togo and General Nogi were the instructors of the present Emperor. I knew both Togo and Nogi. I knew their lives and I knew their ideals, and I knew what the present Emperor had been taught as a boy. I knew also Admiral Nomura. He, too, had become an instructor of the princes in the peers school. I knew his philosophy about the world and what the result would be if Japan and America should fight. I knew that the present Emperor and his little brother, Prince Chichibu, had both been taught that friendship with America was of prime importance for the success of Japan, and that if Japan went to war it would end with the destruction of the Japanese prestige in the world. It was because of this knowledge that I had such faith in the effectiveness of the two messages which some of us urged President Roosevelt to send directly to the Emperor before Pearl Harbor. I knew these boys could never forget these teachings. To an extent, therefore, I knew that my appeal to the Japanese people would also bear fruit if any of my words got to the Emperor. I know now that they did. Have we not in the basic teachings of the necessity of friendship with America, which was drilled into the mind of the present Emperor as a child, a key to the position of the future Japan in the world? Is there throughout all of Asia another nation with the educational system which, when properly cleansed of propaganda, can unite a people as Japan was united for evil? Can this not be turned to good purposes with lasting effect if the good purposes are based upon truth?

That Japan can achieve national solidarity we all know and admit. That she has been a good and constructive member of the community of nations in the past we also know. To anyone who wishes to understand the schemes of national planning which Russia, Germany and Italy later followed, he should study the antecedents of those schemes tried in the development of Japanese nationalism from 1868 down to 1900. Thus we have a people who have been schooled and who can be united to deal with; a people, too, who have been united at times for good quite as much as they have been for ill. When one realizes the whole history of the development of nationalism all over the world, one is not surprised that a people such as the Japanese, who consciously were imitating others, did at times take more seriously the written word and what was being done in the world than a people who were not conscious of imitating. Give the Japanese people and Japanese nationalism an honest psychoanalysis and that which has occurred in their land can be explained on the basis of what had occurred in other lands. Japan's acceptance of the Axis theory of Mussolini and Hitler makes the strutting of Matsuoka today seem the comic-opera stuff it was. But Japan's leaders, like Matsuoka, were not the only people in the world, although they acted the part more ridiculously, who fell for the strutting.

Look at the Japanese soldiers' record in the Boxer War. Note the respect which Nogi and Togo both had for noncombatants in the Russo-Japanese war, where General Nogi, during the battle of Port Arthur, sacrificed brigade after brigade rather than let his fire reach defenseless persons, women and children and noncombatants. Then read an Italian writer's thesis written after the First World War in defense of horrible warfare and translate that into Japanese and have it accepted literally by a people who were admittedly following, what we know today, were false leaders and you have an explanation of the Japanese change of character and what took place at Nanking and other atrocity centers. The philosophy of warfare took a terrific change after the last war. Writers began putting forth the ideas of horrible warfare and the more horrible the more quickly it was to be over. The sad part about that attitude is that when people get an idea from someone else and not from their own experience and translate that idea into their own langage and into their own way of behaving, horrible warfare becomes beastly warfare, and there

is much of the last war that has to be characterized as low-down, beastly warfare. Thus we see that the seeds which matured in the destruction of Pearl Harbor had their beginnings in the Western Hemisphere.

Japan is a nation that definitely wants to be led in world affairs. She needs the association of an honest mind and teacher. The Japanese people have never once lost the student attitude. I do not mean by that that the nation and culture of Japan is devoid of much that is their own, because they are not. But I do want to leave with the Senate the thought that every act of Japan since the arrival of Admiral Perry and the decision of the Japanese leaders to take upon themselves western ways has been an act of following and not of leadership. As long as Japan had the leadership of Great Britain under the Anglo-Japanese alliance, she had a constructive leadership. I am not advocating an American-Japanese alliance, but the war has put us in a position of either being good neighbors, of assuming the teacher-student attitude, or of completely withdrawing and allowing friendships to be sought in less helpful centers, as they were when Japan looked to Italy and Germany as friends and broke with their former allies, the British, and her association with us.

Now if there is to be the student-teacher position plus good neighborliness, because the good-neighbor policy must work east and west as well as north and south, we have an obligation to perform. If we will do our part there is no doubt in my mind but that Japan will do hers.

It is important that we have clearly in mind what it is that the United States proposes to accomplish in Japan. Our objectives are not secret. They have been stated clearly and firmly many times. They are objectives that are entirely in harmony with the purposes of the United Nations. They were endorsed by all the major allies at Potsdam. What we desire is the full demilitarization of Japan and the removal of obstacles which thwart democratic activities in Japanese society. At the same time we will allow the Japanese people every opportunity to resume a peaceful and respectable place in the world.

I said before that the primary responsibility for the success or failure of the Allied objectives rested with the United States—that the future of Japan would be determined largely by our actions. There is, however, also a clear limitation on our responsibility. We cannot create democracy in Japan, for democracy, as General MacArthur has said, and as we all know, "is a thing largely of the spirit." General Marshall, echoing the ideals of Lee, which he undoubtedly planted in his heart as a youth at the Virginia Military Academy, has defined it in a way that Jefferson would applaud, and at the same time realize that his teachings were as much a part of American leadership today as he hoped they would be when he wrote that he and Adams would yet look down from heaven with joy at the fulfillment of this great dream. Marshall's words should be taught to every school boy and girl in America, should be translated and made part of the education of each youth in Japan. These are his words:

> I realize that the word "democracy" is given many interpretations. To the American Government and citizens it has a basic meaning. We believe that human beings have certain inalienable rights—that is, rights which may not be given or taken away. They include the right of every individual to develop his mind and his soul in the ways of his own choice, free of fear and coercion—provided only that he does not interfere with the rights of others. To us a society is not democratic if men who respect the rights of their fellow men are not free to express their own beliefs and convictions without fear that they may be snatched away from their home and family. To us a society is not free if law-abiding citizens live in fear of being denied the right to work or deprived of life, liberty, and the pursuit of happiness.

Surely I will be excused for a moment's diversion to say what I have said so many times, that the outstanding characteristic in our world leadership in the world war is that our great generals and admirals are statesmen first and military geniuses second. If this is not a complete proof of the American ideal of citizen soldiery, I do not know what else it may be. An almost day-to-day association with our Secretaries of War and the Navy during the war period gave me a renewed appreciation of the basic idealism which underlay their acts.

Democracy is a way of life a long time in the building. Our legitimate objective, and the most we can hope to accomplish, is to establish and permit to grow in Japan those conditions under which democracy can flourish. At the same time, we must remain on guard against a revival of forces which, just a short time ago, were calling for a hundred years war against us and crashing planes in mad suicidal dives on our naval vessels. Let us make no mistake; militarism in Japan is not a mere surface phenomenon involving a few generals and admirals. It is more a manifestation of imitation of evils found in the West and the tragedy which befalls a people who cast off decent ideals to follow apostate leadership.

The work of the occupation has fallen into three main categories: Demilitarization, political and social reorientation, and economic reconstruction. In considering each of these it is important to remember that the actual task of administering the policies has rested largely with the Japanese Government, operating under the authority and supervision of the supreme commander for the Allied Powers.

The most tangible result is seen in the demobilization of Japanese military power. Within a very short time after the surrender, forces in the homeland were completely disbanded and armaments production was brought to a halt. When the Japanese had completed these assignments, they were ordered to dissolve their war and naval ministries. Then came the return of the pioneers of Japanese expansion—the 6,000,000 civilians and soldiers scattered in outposts throughout the Pacific and in Asia. This tremendous job of repatriation was completed by the end of 1946 except for large numbers of Japanese prisoners still held by the Russians. Still another phase of demilitarization has been the war-crimes trials. These have been conducted with justice. In addition to the major criminals still undergoing trial in Tokyo, scores of other Japanese have been made to answer for the flagrant atrocities they committed against the helpless during the war. These trials received full publicity in Japan so that the ordinary people may know to what depths of wickedness their military descended.

Of course, the complete destruction of Japan's current ability to wage war is not in itself perpetual insurance against a revival of military power. In the long run the prevention of militarism must depend upon the further growth of the democratic idea among the Japanese people. It is at this point in allied policy that the problem of demilitarization merges with the larger questions of political and social reorientation and economic reconstruction.

What we should attempt in these fields is the establishment of an environment in Japan which will predispose the people of that country to a peaceful revolution of tremendous consequence. We should introduce in a few years the nonmaterial aspects of hundreds of years of western culture—the fruits of the renaissance, political liberalism, Christian humanism—in short, all those ideals and spiritual values which have tempered the material advance of the west. But in addition to that, the oldest of all Chinese learned culture, based as it was upon a deep and appreciative study of the Chinese classics, should be revitalized and brought to life under the auspices of teachers who have accepted the theory of the dignity of the individual and the notion of the processes of government which spring from an acceptance of the principle of inherent right in the individual and above all the great principle that governments are instituted not for their own perpetuation nor their own good, but for the people they represent.

Mr. President, time after time in the hearings on the European relief bill questions were asked by various Senators, as to why we cannot bring this about, or bring that about. The answer is easy. No other government on earth fully accepts the notion that a government is merely the agent of the people. Political parties in every government I know of where the democratic processes have been working incidentally, are professional affairs, and those political parties succeed, and the men in them derive their livelihood, only when they control government. One could not convince an Italian, a Frenchman, or a citizen of any other country that when government speaks it speaks for the benefit of the people. They know that it speaks for the benefit of the party in power, and the self-perpetuating will of those people. In America, where political parties are sentimental, and where we continually have accidents in politics in every State in the Union, it is difficult for us to see that there is a difference. It was extremely interesting to attend the Oxford debate the other night and find one of the young debaters, a boy who was probably only a sophomore in college, being introduced as a man who will be put forth by his party as a candidate for a seat in Parliament. Already

he had adhered to a given party in Great Britain, and that is where he will stay as long as he lives. His success in his political life will not depend upon that which he does for the Government of Great Britain, but it will depend upon that which he can do for the party which he joins. If he becomes a great leader he will be moved from one constituency to another in order to preserve himself in his party position. If that practice were followed in America, being alined with the Democratic Party, if the Democratic Party could persist I could have a life job. But it does not work that way in America. All the alinement in the world will not keep the independent voter from jumping fences and sidewalks and voting as he pleases.

That is the fundamental difference. Even when we make comparisons with the mother of parliaments, the country which gave us most of our institutions, we find that the difference is so great that it is exceedingly difficult even for United States Senators to understand. They ask an ambassador on the stand the question, "Why can you not bring it about so that in France, Italy, Holland, or Denmark, the people will react in a certain way?"

It will take a long time, Mr. President. The Voice of America may bring about such changes. That is one of the tasks which we have to do if our type of life is to persist in the world.

To bring about the desired reorientation of Japanese society, every phase of Japanese life must be affected. The initial targets already aimed at are the feudal components of the social structure and elements in public life which had championed totalitarianism. These impediments to freedom had to be uprooted and swept into obscurity before any constructive measures could be undertaken. Therefore, thousands of persons in government, business, education, and public information were screened. Scores of Japanese with militaristic leaning have already been excluded from public life. Furthermore, the thought-control police—the dreaded Kempei-tai—have been abolished and the fanatic patriotic societies, such as the Black Dragon, have been dissolved.

State Shintoism, chief perpetrator of the imperial divinity concept, has been abolished. This is not the great revolution which many writers have stressed. The Shinto religion, even in my day, was a religion without a theology, without a hierarchy, and even without a system of morals, excepting for the influence which those priests who did read and who understood the Chinese classics might have accepted. Ancestor worship alone had little state significance until it was pointed out to the Japanese by westerners that it was not necessary for the whole nation to become Christian, as was the plan, in order that nationalism might properly be accepted, since thoughtlessly, it had been pointed out that nationalism, as a state ideal, had developed only in Christian countries. The scheme was for the crown-prince to become a Christian and that when he succeeded to the emperorship the transition would be easy. At this time it was pointed out that, if Shinto were made to stand for the concept of the divine right of kings, as evolved in the west, Shintoism could become a state religion and be made into a political concept to develop the theory of national patriotism. The Mikado cult has ceased to operate in the realm of mysticism. The emperor, Hirohito, has been humanized and placed both constitutionally and in practice on a level comparable with that of King George of England. In my day the Mikado cult, as a political necessity, had not become so universally accepted that those few teachers, who talked about the development of the Japanese Constitution and compared the Emperor's political position with that of the King of England, were interfered with. I remember one debate in Parliament where this was openly done and, while the member of Parliament was chided because he was reminded of the fact that the constitution carried the provision of the inviolability of the Emperor, it did not seem then archtreason to discuss the point.

While the effect of these preliminaries were spreading through Japan the Japanese Government was pushed into a series of actions designed to establish a basis for genuine democracy. Restrictions on political, civil, and religious liberty came to an end and thousands of political prisoners—potential leaders of a new Japan—were released. The notoriously brutal Japanese police received a reschooling in practices of common decency and courtesy. New textbooks in geography, history, and morals cast Japan in an entirely different light for the pupils of the elementary and secondary schools.

The press, the radio, and the screen all experienced a new freedom. They ceased to be the mouthpiece of officialdom and their liberty was limited only for the interest of Allied objectives.

One of the most far-reaching changes concerned the women of Japan whose position in society had long been backward. They were granted legal equality. This change cannot be marked off as a purely theoretical one as some critics have sought to do. That the women will exercise their new rights is indicated by the first election after the establishment of the occupation. They constituted 67 percent of all voters. They elected 38 of their sex to the House of Representatives. One of my own students, who wrote his master's thesis in the middle twenties on the subject, The Introduction of Women's Suffrage in Japan, became one of the leaders in this movement. My point in mentioning this is to show that there are thousands in great movements in Japan who are prepared to assume leadership in many fields in bringing about Japan's great social and political changes. The universities of our country are all represented in these fields.

The trends toward political, economic, and social democracy set in motion by General MacArthur's directives culminated in the new constitution promulgated on November 3, 1946. Much ill-informed criticism has been directed at this constitution. There are those who say that the document is alien to the Japanese character, that in allowing it to be promulgated General MacArthur has provided the shell of democracy without the substance. The fact remains, however, that the document is one of the most democratic fundamental laws ever devised. It conforms in every respect to the most advanced concepts of the political, economic, and social responsibilities of government. That it is un-Japanese does not destroy its basic purpose. Almost everything that we attempt in Japan at this time might be labeled un-Japanese, since we are attempting to reform and redirect Japanism, not to preserve it intact. MacArthur himself has clearly stated that the constitution, however liberal, does not of itself create democracy. However, what it does do is to provide the legal structure within which democracy can develop. That is all that any constitution could do. That is all that we intend to do. The process of giving substance to a fundamental social concept is something which can be undertaken only by the people who live under it. The task is a timeless one, and we shall not know soon with what degree of success the Japanese will discharge it. Knowing the Japanese and knowing that the seeds of democratic thought are already there, I am convinced that democracy has taken genuine root in Japan and that it will endure. All are impressed by the recent Japanese elections. A preponderance of moderate candidates was elected, and the national Government is now headed by a Socialist, who is a Christian, Tetsu Katayama, whose views follow those of the British Labor Party. His cabinet is of a coalition type and it contains a considerable conservative element.

The political and social progress of Japan during the 2 years of the occupation has been very impressive. In the long run, however, it is likely that the final test of our policies will take place in the economic field. If we fail there, democracy will not stand in Japan. Let us not forget that the advance of totalitarianism in Europe was built largely on the promise to end the economic chaos into which the various nations had fallen.

The great family trusts—the so-called Zaibatsu—have been dissolved and large land holdings have been divided. Responsible trade-unions have been encouraged. The motive behind these measures is to break up excessive concentration of wealth in impoverished Japan and to diversify economic power and responsibility.

There are some problems of the Japanese economy that are beyond the control of the Japanese themselves. Consider for a moment that the arable land in Japan now available to feed a population of between seventy and eighty million people is equal to slightly more than one-half the farm acreage of the State of Illinois. We must face the fact that Japan does not and cannot produce sufficient food. The prospects for any significant increase in agricultural production in the foreseeable future are exceedingly remote. As a matter of fact, in the absence of large imports of fertilizers there is more likely to be a drop in output. Then remember that Japan's major cities

were destroyed. Familiar as the Japanese are with overnight destruction, such as the Tokyo earthquake and the fire of '23, the Osaka and Aomori fires, and the volcanic eruptions, yet the destruction of her cities on a scale greater and more extensive than the destruction in any country in Europe makes it too much for us to expect them not to have greater economic consequences.

It is clear that Japan's sole hope of maintaining even a tolerable standard of living depends upon the redevelopment of peaceful foreign trade. Until this can be done, the United States must advance essential food supplies. It is hardly necessary to stress that if widespread starvation takes place in Japan, not only would our democratic objectives be defeated, but the security of the occupation itself would be placed in costly jeopardy. The Japanese authorities have been prodded into developing the most equitable distribution of food supplies. Beyond this the responsibility rests with the people of the United States and with their Congress to make available basic assistance until economic recovery reaches the point where Japan is once again self-sustaining.

At present three factors hamper Japan's recovery: The economic breakdown and exhaustion within Japan; the failure of the Allies to settle finally the reparations problem; and the barriers to free Japanese trade in the world markets. In each of these instances only initial corrective measures have been taken.

Regardless of what the Japanese themselves do, however, we must recognize that ultimately the tempo of Japanese recovery is intricately related to allied policy on the questions of reparations and foreign trade. The principle of compensating the victims of Japanese aggression with a part of Japan's productive capacity is recognized by all the Allied Powers. But it is imperative that the Japanese be advised as quickly as possible on the precise terms of the reparations settlement. Until this is done they cannot go forward with their recovery plans. In the case of foreign trade, the Japanese have been permitted some private trading. But this is only a partial solution. Japan must be able to purchase essential nonstrategic raw materials freely abroad and to sell finished products in the world markets. This may run counter to the views of some selfish interest in the Allied Nations, but the alternatives are a continuous drain upon the taxpayers of the United States or mass starvation in Japan. These are the inescapable realities of the situation.

But, regardless of the distress caused by bad economic conditions, Japan must be guided from that most fatal of all premises, that feeding the people must come first, social, and political reforms after. That is the fallacy to which Italy has sunk with such fatal results to the good and well-being of that great people. My plea is that political, social, and economic upbuilding go hand in hand, for they are related.

The destruction of Japan was so complete, her defeat so colossal, and her governmental changes so revolutionary, that there is no other way out for Japan, except to attempt to be a good student and a good neighbor. Common sense, therefore, is the only guide Japan need follow. But pure common sense will not see us through in our end of what must be a bargain. We must appreciate our student. No teacher is successful if he has no sympathy for or appreciation and comprehension of his student. To know Japan, therefore, to understand her basic ideals, to appreciate both the good and the bad of her characteristics, becomes our prime essential. We must cease to be satisfied with following the policy of rather ill-trained unsympathetic experts either in Asia or Europe.

Economically, Japan has always been dependent upon our trade. In the future that will be the case more than ever. The invention of nylon and its universal acceptance by the ladies of the world may bring upon the Japanese silk industry an economic repercussion from which it cannot recover. Both nylon and war must be overcome. But Japan's success economically is more certain than it has ever been if she can remain free from the destructive burdens of a terrible taxation which was necessary to maintain her unnatural armaments. Thus Japan economically faces the new world with skill, abundance of labor, organizational ability, a knowledge of knowing how to work together, and a craftsmanship unexcelled. Given these factors, plus a halfway decent market, she will succeed. Whether she will have that market depends upon us. We shall have to do some adjusting there. Japan's skill in meeting the demands of consumers in almost any line was, we remember, so much a factor before the war that those who judged war entirely on the basis of economic competition felt that she and her selling abilities must be destroyed. Thus, if we become her sponsor and her economic ally in raising her own standard of living and helping her to get her goods into the markets of the world, she will become a profitable ally, not only to us but to the whole world.

Socially, Japan must of necessity work for the raising of standards in the rest of Asia, or else she will be overcome by lower standards, if the thesis that poverty anywhere affects the living standards everywhere is true. If we have really learned that war anywhere is the concern of all everywhere, then Japan can join enthusiastically with us in attempting to arrange her economy so that her standards will contribute to the betterment of the standards throughout the world.

The Japanese money system is, of course, completely destroyed. But the Japanese people have been used to a stable currency, and that can be assured them again by association with us. Her yen should be pinned to our dollar.

Politically, we need not fear a return to any philosophy at all which is distasteful to our American democratic ideals, if we will but give the Japanese people a chance again to read and study about Washington and Lincoln and the other American leaders that every Japanese schoolboy studied during the development of the Japanese school system. The war was carried on by Japanese leaders who were utterly false to world thought and to the Japanese traditions that were accepted by the majority of the Japanese people a generation and a half ago.

So Japan can again be brought into the sisterhood of nations, with the Rising Sun as a token of a restoration of an old aspiring, an old striving, which was crushed by the rise in the world of a false doctrine based on the notion of a single will in a state under the leadership of dishonest, ill-trained, overambitious Hitlers, Mussolinis, Matsuokas, and Tojos.

Under the old theory, the Emperor of Japan owned all the land and all the people, and was father of all. Those concepts were taken from the theories put into the Chinese characters. The people in a paternal sense were never forgotten. They had no rights, but they needed no rights because the Emperor was all-benevolent. That was theory. Today Japan has a constitution based upon our own American notion that governments exist for the benefit of the people; that governments themselves have no rights, but that the rights belong to the people; that the property is the property of the people; and that the governments use the property only for the people's benefit and for public use. In this picture the Emperor is a guardian, therefore, of the people's property and the people's well-being. That, too, is theory. It is the key to American-Japanese cooperation. Leadership in Japan will, no doubt, come from the people inspired by these ideals, and the Emperor will be an interpreter of the people's aspirations. We should think that through as we consider the whole of Asia, and we should consider whether it is an exaggeration to say that the making of the new Asia will undoubtedly occur under Japanese leadership. The culmination of the American revolution is not yet complete, but it is surely on the way.

This is what I said in 1943:

> The after-war world will be a world with the center of interest shifted away from the Western Hemisphere to the East. Asia, like Europe, is allied with distant powers and is divided within. Yet the preponderance of Asiatic populations will throw the center of gravity to the Eastern Hemisphere. Since the beginning of time, Asia has been a world problem. Now it is the world problem. The conflicts in which the four major allies—Russia, China, the United States, and Great Britain—are fighting are Asiatic conflicts. But long after Asia will have ceased to be a theater of military operations it will be predominant; for the three greatest social, political, and economic revolutions—the Chinese, the Indian, and the Russian—are essentially Asiatic.

Our fundamental concept of democracy and our religious and political recognition of the dignity of the individual and his inherent rights are necessary to the solving not only of Europe's problems but also of Asia's. Our belief in the rights of revolution gives us confidence in the face of change. With faith, then, in our idealism, the world will go forward as it follows American leadership.

If my prediction is true, the place for Japan in the fulfillment of that prophecy is plainly seen when we catch the spirit

of her new constitution. Our whole success depends upon our being able to keep the thought of the leadership in Japan in harmony with what we said in our psychological warfare, and to build the future Japan upon what we told the Japanese were their own ideals, as taught to them during the best part of the Meiji era, their greatest period.

Mr. President, I have felt justified in doing the two things I have done in my rather long consideration of this bill. First of all, the theories behind the bill are as essential to our success and as much in keeping with our own self-interest in the expansion of American ideals in the rest of the world as is any other thing we may suggest. In the second place, no matter what we think, no matter what we do, no matter how we act, we have with us all the time the problems of Asia, which to a certain extent we have forgotten because Asia has not been in the headlines lately. That is a very good sign, Mr. President, because things are moving fairly well so far as concerns Japan and the part of Korea for which we are presently responsible. Comparatively speaking, things in those parts of the world are moving along fairly well. But never can any American fail to realize, Mr. President, that a peaceful Europe will bring to us no peace at all unless we have a peaceful Pacific and a peaceful Asia. Our real neighbors, our real responsibilities, are to be found in the lands to the west of us, across the Pacific rather than in the lands across the Atlantic. The answer to the question of to what extent our Army and Navy must be expanded is to be found in the lands lying to the west of us, across the Pacfic. However, the average person in the United States does not realize that that is the case.

Therefore, Mr. President, I add this final thought to the fine sentiment presented by the Senator from New Jersey at the close of his speech, when he stated that American stock had its roots in and stemmed from practically every one of the 16 countries for which we are trying to do something under the Marshall plan. Of course, more of our American stock has come from Europe than from Asia; nevertheless, a considerable part of it has come from Asia. It is obvious that we are responsible for the new birth, the new life, and many of the revolutions which have occurred in that part of the world, because those developments have occurred under the leadership of our thought. So it is that we must see to it that those great revolutions succeed properly, if we are to have peace and contentment for ourselves and for the world.

The PRESIDING OFFICER (Mr. STENNIS in the chair). The question is on agreeing to the first committee amendment, which is, in section 1, on page 2, line 5, to strike out "1947" and insert "1948."

The amendment was agreed to.

Mr. MORSE. Mr. President, I wish to commend the distinguished Senator from New Jersey [Mr. SMITH] for the great leadership he has given to the course of the measure pending before the Senate of the United States, and, because I understand a record vote will not be taken on the bill, I desire to make myself of record in support of it.

I call the attention of the Senate to the fact that in the Seventy-ninth Congress we had a similar controversy before the Senate over similar legislation, except the way was much more difficult then than the Senator from New Jersey has found it to be in this instance. But it is rather interesting, Mr. President, to go back to that debate in the Seventy-ninth Congress, when it was my task to lead on this side of the aisle the fight for the retention of what was then the foreign branch of our OWI, then being conducted under the very able leadership of Elmer Davis, and note the course of the argument, and the pleas which were made at that time in support of the proposition that if we were really going to accomplish the great objectives which we have in Europe as far as winning the peace is concerned, the then Voice of America, known as the Foreign Branch of OWI, should not be hamstrung by the Congress of the United States. By a very close vote, it will be recalled, we won that battle in the Seventy-ninth Congress.

It is interesting to note, however, the great change that has come over the thinking of the Congress since that year, with the result that now we have this very sound piece of legislation, so well handled by the Senator from New Jersey, bearing out, I think, some of the very points that were made in the debate in the Seventy-ninth Congress, when we pleaded with the Congress not to make the mistake of closing off or shutting down the appropriations for a public relations program in Europe, because, as we predicted, if we do not maintain that program, then movements in Europe contrary to the best interest of America are bound to take root.

In closing these remarks, I again wish to thank the Senator from New Jersey, and point out in the RECORD that what we are doing today seems to me to be taking a step that ought to have been taken with much greater vigor and greater spirit back in the Seventy-ninth Congress.

Mr. SMITH. Mr. President, the kind words of the Senator from Oregon are very much appreciated by the Senator from New Jersey.

Mr. HATCH. Mr. President, will the Senator from New Jersey yield to me?

Mr. SMITH. I yield.

Mr. HATCH. I rise to say a few words in connection with the remarks made by the Senator from Massachusetts, who paid a high and well-deserved tribute to the chairman of our subcommittee, the Senator from New Jersey [Mr. SMITH]. It happens that originally there were just two members of that subcommittee, the Senator from New Jersey [Mr. SMITH] and myself. Later there were added to the subcommittee the Senator from Kentucky [Mr. BARKLEY], the Senator from Iowa [Mr. HICKENLOOPER], and the Senator from Massachusetts [Mr. LODGE]. Our work was not all performed at home, but it took us into nearly all the European countries and then back home again. I want to say, Mr. President, that, under the leadership of the Senator from New Jersey, I never saw any group of men work with greater singleness of purpose or with a stronger desire to bring out the best bill possible in the light of everything we had to consider. I am glad to pay this tribute to the Senator from New Jersey.

I may say, Mr. President, I was tremendously impressed by the remarks of the Senator from New Jersey as he concluded his eloquent address by referring to the voice of America as a voice of all the great Americans of the past and of all the great Americans of the future, and saying that the voice of America must include all that has been said of our ideals and purposes and way of life, by those who are dead and gone, and by those who live today. Mr. President, I know that he agrees with me that to that voice of America should also be added not only the voices of the present and the voices of the past, but also the voice of the future; for the voice of America as she looks down the years in the future is the hope of all the downtrodden and oppressed peoples of the world. The voice of the future in America must remain the voice of the past and the voice of the present, a strong voice declaring the rights of freeemen, the freedom of the individual, the rule of law and order, things for which the countries of the Old World are so desperately praying and yearning. So we must project to that part of the world our best hopes for the future, that the other countries of the world may remain strong, free, and independent nations. All the rights, freedoms, and high principles combined, of the past, the present, and the future, constitute the strong and mighty voice of America.

In working on the pending bill we have tried to lay the foundation upon which adequate appropriations may be made, so that the voice of America hereafter, as it speaks to the world, shall be as strong and as mighty as is America herself.

I shall not take further time except to say that in the light of all the things we had to consider, including the probable attitude of the House of Representatives, we have brought forth the best bill we were able to present, and with the amendments which will be agreed upon today, I think for the present at least the bill will answer its purposes.

Mr. President, I wish to say that I was very much interested in noting yesterday an editorial in the Washington Post on the subject of a suggestion made by our colleague the senior Senator from Wisconsin [Mr. WILEY]. The suggestion had to do with the air-mailing of copies of American newspapers overseas as a vital part of our foreign-information program. I ask unanimous consent that the text of the editorial be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

READING MATTER

Senator WILEY expressed a commendable thought in calling for greater numbers of

American newspapers and magazines to be flown abroad, and we hope that the Nation's publishers, not the State Department, will act upon it. Our foreign-information program, and, indeed, the Marshall plan itself, can have no more important adjunct than the spread of American reading matter. The situation now is that, aside from the limited American publishing operations in foreign cities and the relatively few copies sent by air from this country, American periodicals are a month or 6 weeks old when they reach libraries and reading rooms abroad. Our disadvantage in the ideological struggle is thus obvious; Moscow papers can be had in almost any European capital the next morning.

The ideal solution for this problem would be for American newspapers and magazines either to set up editions published in Europe and Asia or to band together and promote a commentary service for distribution abroad. Perhaps, also, the idea might be considered of encouraging the kind of overseas editions which were put out during the war by several of our newspapers and magazines. Under this arrangement all copy would be written, edited, and set in type in this country, but the actual printing would be carried on abroad by means of lightweight printing plates flown from the United States.

But one or the other of these ideas would take time, and Senator WILEY'S suggestion could be carried out immediately. There is a place in his picture, moreover, for book publishers, for American books are desired almost universally. Universities in Germany and Japan, for example, have received practically no American textbooks and technical material since before the war. To place such material in their hands now could be to acquire an inestimable asset in cementing friendship and spreading American ideas.

Every man in these perilous days must be his own Marshall plan according to his ability, as Mr. Drew Pearson has demonstrated so well and so admirably with his Friendship Train project. In the battle we are waging, food for men's minds is no less imperative than food for their stomachs. What must be guarded against, however, is the suggestion of Government subsidization; this would be a double-edged weapon, for it would give the Kremlin a weapon in their ideological war on America by demonstrating the same tie-in between press and state that Russia has.

Mr. SMITH. Mr. President, I should like to express my deep appreciation of the kind words of the Senator from New Mexico, and to thank him for having added the voice of the future to the voices of the past and of the present. I should like further to pay tribute to him for the wonderful assistance he has given us all in the consideration of the bill, and the special point that he emphasized, not only every time we met together, but which he also emphasized the other day when, to my regret, I was not present on the floor of the Senate, that in dealing with foreign relations, politics is forgotten. The reason why our committee was successful this summer, in my judgment, was because we never even thought of politics. We were Americans working together, trying to find an American policy to accomplish an American purpose, and I thank God I have been able to be associated with men who had that view in approaching this subject.

Mr. President, I shall be glad to continue with the consideration of the committee amendments to the bill.

The PRESIDING OFFICER. The clerk will state the next amendment of the committee.

The next amendment was, on page 2, after line 7, to strike out section 2, as follows:

SEC. 2. The Congress hereby declares that the objectives of this act are to enable the Government of the United States to promote mutual understanding between the people of the United States and of other countries, which is one of the essential foundations of peace, and to correct misunderstandings about the United States in other countries. The means to be used in achieving these objectives are—

(1) the interchange of persons, knowledge, and skills;

(2) the rendering of technical and other services to other countries on the basis of mutual cooperation;

(3) the dissemination abroad of public information about the United States, its people, and the principles and objectives of its Government; and

(4) the dissemination abroad of public information about the United Nations, its organization and functions, and the participation of the United States as a member thereof.

And in lieu thereof to insert the following:

SEC. 2. The Congress hereby declares that the objectives of this act are to enable the Government of the United States to promote a better understanding of the United States in other countries, and to increase mutual understanding between the people of the United States and the people of other countries. Among the means to be used in achieving these objectives are—

(1) an information service to disseminate abroad information about the United States, its people, and policies promulgated by the Congress, the President, the Secretary of State and other responsible officials of Government having to do with matters affecting foreign affairs;

(2) an educational exchange service to cooperate with other nations in—

(a) the interchange of persons, knowledge, and skills;

(b) the rendering of technical and other services;

(c) the interchange of developments in the field of education, the arts, and sciences.

The amendment was agreed to.

The next amendment was, on page 3, after line 20, to insert a new section, as follows:

UNITED NATIONS

SEC. 3. In carrying out the objectives of this act, information concerning the participation of the United States in the United Nations, its organizations and functions, shall be emphasized.

The amendment was agreed to.

The next amendment was, on page 4, line 2, to change the section number from 3 to 4, and in line 6, after the word "agency", to strike out "in the executive branch."

The amendment was agreed to.

The next amendment was, on page 4, in section 201, line 18, after the word "skill" to insert "and shall wherever possible provide these interchanges by using the services of existing reputable agencies which are successfully engaged in such activity", and on page 5, line 4, after the name "United States" to strike out "If the Secretary finds that any person from another country, while in the United States pursuant to this section, is engaged in activities of a political nature or in activities not consistent with the security of the United States, the Secretary shall promptly report such finding to the Attorney General, and such person shall, upon the warrant of the Attorney General, be taken into custody, and promptly deported." and insert "The persons specified in this section shall be admitted as nonimmigrant visitors for business under clause 2 of section 3 of the Immigration Act of 1924, as amended (43 Stat. 154; 8 U. S. C. 203), for such time and under such conditions as may be prescribed by regulations promulgated by the Secretary of State and the Attorney General. A person admitted under this section who fails to maintain the status under which he was admitted or who fails to depart from the United States at the expiration of the time for which he was admitted, or who engages in activities of a political nature detrimental to the interests of the United States, or in activities not consistent with the security of the United States, shall, upon the warrant of the Attorney General, be taken into custody and promptly deported pursuant to section 14 of the Immigration Act of 1924 (43 Stat. 162, 8 U. S. C. 214). Deportation proceedings under this section shall be summary and the findings of the Attorney General as to matters of fact shall be conclusive. Such persons shall not be eligible for suspension of deportation under clause 2 of subdivision (c) of section 19 of the Immigration Act of February 5, 1917 (54 Stat. 671, 56 Stat. 1044; 8 U. S. C. 155)."

The amendment was agreed to.

The next amendment was, on page 7, in section 301, line 8, after the word "any", to strike out "person" and insert "citizen of the United States."

The amendment was agreed to.

The next amendment was, on page 7, in section 302, line 18, after the word "Any", to strike out "person" and insert "citizen of the United States."

The amendment was agreed to.

The next amendment was, on page 8, in section 303, line 9, after the word "Any", to strike out "person" and insert "citizen of the United States."

The amendment was agreed to.

The next amendment was, on page 9, in section 401, line 6, after the word "with", to strike out "their" and insert "the"; in the same line, after the word "approval", to insert "of the President."

The amendment was agreed to.

The next amendment was, on page 9, line 7, after the word "agencies", to strike out "whenever the Secretary shall use the services, facilities, or personnel of any government agency for activities under authority of this act, the Secretary shall pay for such performance out of funds available to the Secretary under this act, either in advance, by reimbursement, or direct transfer. In utilizing the Government agencies, it is the sense of the Congress (1) that the best available and qualified Government services, facilities, and personnel shall be sought, in order to insure professional

competence and avoid duplication; and (2) that the Secretary shall consult the appropriate technical agencies of the Government concerning any activity authorized by titles II, III, and IV of this act which comes within the competence of such agencies."

Mr. WHERRY. Mr. President, I offer an amendment which I send to the desk and ask to have stated. My amendment is in lieu of the committee amendment on page 9, line 7.

The PRESIDING OFFICER. The amendment offered by the Senator from Nebraska will be stated.

The CHIEF CLERK. On page 9, in lieu of the matter proposed to be stricken out by the committee amendment in lines 7 to 20, inclusive, it is proposed to insert the following:

Whenever the Secretary shall use the services, facilities, or personnel of any Government agency for activities under authority of this act, the Secretary shall pay for such performance out of funds available to the Secretary under this act, either in advance, by reimbursement, or direct transfer. The Secretary shall include in each report submitted to the Congress under section 1008 a statement of the services, facilities, and personnel of other Government agencies utilized in carrying on activities under the authority of this act, showing the names and salaries of the personnel utilized, or performing services utilized, during the period covered by such report, and the amounts paid to such other agencies under this section as payment for such performance.

Mr. WHERRY. Mr. President, the amendment is self-explanatory. I ask that my amendment be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nebraska to the committee amendment on page 9, line 7.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. THOMAS of Utah. Mr. President, may I ask whether the amendment suggested by the Senator from Arkansas [Mr. FULBRIGHT] has been agreed to?

The PRESIDING OFFICER. No; it has not been agreed to.

Mr. SMITH. I will say to the Senator from Utah that the amendment has not yet been reached.

The PRESIDING OFFICER. The next committee amendment will be stated.

The next amendment was, on page 10, in section 403, line 14, after the word "through", to strike out "the" and insert "any appropriate"; in the same line, after the word "agency", to strike out "with appropriate legislative authority"; in line 17, after the word "agencies", to insert a comma and "and shall not enter into the performance of such services to any foreign government where such services may be performed adequately by qualified private American individuals and agencies and such qualified individuals and agencies are available for the performance of such services"; and on page 11, line 12, after the word "assignments", to strike out the semicolon and "(4) that such services shall not be undertaken for a foreign government if, in the opinion of the head of the Government agency, such services will impair the fulfillment of domestic responsibilities of that agency; and (5) that the Department shall invite outstanding leaders in the United States, both within and outside the Federal Government, in the various fields of activity covered by this title, to review and extend advice on the Secretary's policies in rendering technical and other services to another government pursuant to this title."

The amendment was agreed to.

The next amendment was, on page 11, after line 21, to strike out:

TRAINING

SEC. 404. Any Government agency, at the request of the Secretary, is authorized to provide to citizens of other countries, and to citizens of the United States going to other countries in connection with the carrying out of this act, technical and other training within the fields in which such agency has competence, or to provide for such training through State and local governmental agencies or private institutions and organizations.

The amendment was agreed to.

The next amendment was, on page 12, after line 5, to strike out:

INTERCHANGE OF SPECIALIZED KNOWLEDGE AND SKILLS

SEC. 405. A Government agency, at the request of the Secretary, is authorized to promote the interchange with other countries of scientific and specialized knowledge and skills, within the fields in which such agency has competence, through publications and other scientific and educational materials.

The amendment was agreed to.

The next amendment was, on page 12, after line 12, to strike out:

INTERDEPARTMENTAL COORDINATION

SEC. 406. In order that the activities of Government agencies authorized by titles II, III, and IV of this act may be effectively coordinated and interdepartmental relationships as authorized by this act may be clearly defined, the Secretary may establish upon direction of the President an interdepartmental committee to advise the Secretary on the development and administration of these activities.

The amendment was agreed to.

The next amendment was, on page 13, in section 501, line 4, after the word "abroad", to strike out "all such press releases and radio scripts shall, in the English language, be made available to press associations, newspapermen, radio systems and stations in the United States, and to Members of the Congress of the United States, upon request, within 15 days after release as information abroad." and insert "On request, representative samples or specific individual press releases and radio scripts shall be made available in the English language for examination at the Department of State by representatives of press associations, newspapers, magazines, radio systems and stations, and be made available to Members of Congress, within 15 days after release as information abroad."

Mr. BALL. Mr. President, I offer the amendment to the committee amendment, which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment offered by the Senator from Minnesota will be stated.

The CHIEF CLERK. On page 13, in the committee amendment, beginning with the word "on" in line 9, it is proposed to strike out through and including line 16, and insert in lieu thereof the following:

Any such press release or radio script, on request, shall be available in the English language, at the Department of State, at all reasonable times following its release as information abroad, for examination by representatives of United States press associations, newspapers, magazines, radio systems and stations, and, on request, shall be made available to Members of Congress.

Mr. BALL. Mr. President, I have discussed the amendment with the Senator in charge of the bill, and I think it is agreeable to him.

Mr. SMITH. Mr. President, I accept the amendment.

Mr. HATCH. Mr. President, what is the limitation proposed in the Senator's amendment?

Mr. BALL. We simply say, "at all reasonable times." I could not figure out what the 15-day limitation meant.

Mr. HATCH. I did not understand the Senator's amendment. As I now understand, the amendment provides that such releases shall be made available at all reasonable times.

Mr. BALL. Yes.

Mr. HATCH. That is satisfactory.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Minnesota [Mr. BALL] to the committee amendment on page 13, beginning in line 9.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 13, in section 502, line 20, after the word "Secretary", to strike out "shall encourage and facilitate by appropriate means the dissemination abroad of information about the United States by private American individuals and agencies, shall supplement such private information dissemination where necessary, and," and on page 14, line 5, after the word "information", to strike out the semicolon and "(3) that the Department shall invite outstanding private leaders of the United States in cultural and informational fields to review and extend advice on the Government's international information activities; and (4) that all printed matter, films, broadcasts, and other materials in the fields of mass media shall, when disseminated by the Government, be identified as to Government or private source."

The amendment was agreed to.

The next amendment was, on page 14, after line 12, to strike out:

TITLE VI. ADVISORY COMMISSION TO FORMULATE POLICIES

FORMULATION OF POLICIES

SEC. 601. There is hereby created a United States Information and Educational Exchange Advisory Commission (hereinafter in this title referred to as the "Commission") to be constituted as provided in section 602. The Commission shall formulate and present to the Secretary of State the policies to be

followed and adhered to in connection with the interchange of persons, knowledge and skills, the assignment of specialists, the preparation and dissemination of information about the United States, its people and its policies, and the carrying out of the other provisions of this act.

MEMBERSHIP OF THE COMMISSION, GENERAL PROVISIONS

SEC. 602. (a) The Commission shall consist of 11 members, not more than 6 of whom shall be from any one political party, as follows: (1) Nine members to be appointed by the President, by and with the advice and consent of the Senate, and (2) the Secretary of State or such officer in the State Department as may be designated by such Secretary.

(b) The members of the Commission shall represent the public interest, but of the persons appointed under clause (1) of subsection (a) of this section, one shall be selected from among educators, one from among individuals formerly in active service in the armed forces of the United States, one from representatives of labor, one farmer, one from the newspaper business, one from the motion-picture industry, one from the radio industry, and three from persons having general business experience. All persons so appointed shall be persons of national reputations in their respective fields. No person holding any compensated Federal or State office shall be eligible for appointment under clause (1) of subsection (a) of this section.

(c) The term of each member appointed under clause (1) of subsection (a) of this section shall be 3 years except that the terms of office of such members first taking office on the Commission shall expire, as designated by the President at the time of appointment, three at the end of 1 year, three at the end of 2 years, and three at the end of 3 years from the date of the enactment of this act. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor is appointed shall be appointed for the remainder of such term. Upon the expiration of his term of office any member may continue to serve until his successor is appointed and has qualified.

(d) The President shall designate a chairman and a vice chairman from among members of the Commission.

(e) The members of the Commission shall receive no compensation for their services as such members but shall be entitled to reimbursement for travel and subsistence in connection with attendance of meetings of the Commission away from their places of residences.

(f) The Commission is authorized to adopt such rules and regulations as it may deem necessary to carry out the authority conferred upon it by this title.

(g) The Commission is authorized, without regard to the civil-service laws and the Classification Act of 1923, as amended, to appoint and fix the compensation of such clerical assistants as may be necessary in carrying out the provisions of this title.

RECOMMENDATIONS AND REPORTS

SEC. 603. The Commission shall meet not less frequently than once each month and shall from time to time prepare and transmit to the Secretary and to the Congress its recommendations for carrying out the various activities authorized by this act, and shall submit to the Congress a quarterly report of all programs and activities recommended by it under this act and the action taken to carry out such recommendations.

And to insert:

TITLE VI—ADVISORY COMMISSIONS TO FORMULATE POLICIES

SEC. 601. There are hereby created two advisory commissions, (1) United States Advisory Commission on Information (hereinafter in this title referred to as the Commission on Information) and (2) United States Advisory Commission on Educational Exchange (hereinafter in this title referred to as the Commission on Educational Exchange) to be constituted as provided in section 602. The Commissions shall formulate and recommend to the Secretary policies and programs for the carrying out of this act.

MEMBERSHIP OF THE COMMISSIONS; GENERAL PROVISIONS

SEC. 602. (a) Each Commission shall consist of five members, not more than three of whom shall be from any one political party. Members shall be appointed by the President, by and with the advice and consent of the Senate. No person holding any compensated Federal or State office shall be eligible for appointment.

(b) The members of the Commission on Information shall represent the public interest, and shall be selected from a cross section of professional, business, and public service backgrounds.

(c) The members of the Commission on Educational Exchange shall represent the public interest and shall be selected from a cross section of educational, cultural, scientific, technical, and public-service backgrounds.

(d) The term of each member appointed under subsection (a) of this section shall be 3 years, except that the terms of office of such members first taking office on each Commission shall expire, as designated by the President at the time of appointment, two at the end of 1 year, two at the end of 2 years, and one at the end of 3 years from the date of the enactment of this act. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor is appointed shall be appointed for the remainder of such term. Upon the expiration of his term of office any member may continue to serve until his successor is appointed and has qualified.

(e) The President shall designate a chairman for each Commission from among members of the Commission.

(f) The members of the Commissions shall receive no compensation for their services as such members but shall be entitled to reimbursement for travel and subsistence in connection with attendance of meetings of the Commissions away from their places of residence, as provided in subsection (6) of section 801 of this act.

(g) The Commissions are authorized to adopt such rules and regulations as they may deem necessary to carry out the authority conferred upon them by this title.

(h) The Department is authorized to provide the necessary secretarial and clerical assistance for the Commissions.

RECOMMENDATIONS AND REPORTS

SEC. 603. The Commissions shall meet not less frequently than once each month during the first 6 months after their establishment, and thereafter at such intervals as the Commissions find advisable, and shall transmit to the Secretary a quarterly report, and to the Congress a semiannual report of all programs and activities carried on under the authority of this act, including appraisals, where feasible, as to the effectiveness of the several programs, and such recommendations as shall have been made by the Commissions to the Secretary for effectuating the purposes and objectives of this act and the action taken to carry out such recommendations.

Mr. FULBRIGHT. Mr. President, I offer an amendment to the committee amendment in section 601.

The PRESIDING OFFICER. The amendment to the committee amendment offered by the Senator from Arkansas will be stated.

The CHIEF CLERK. On page 17, at the end of line 21, in the committee amendment, it is proposed to insert the following proviso:

Provided, however, That the commissions created by this section shall have no authority over the Board of Foreign Scholarships or the program created by Public Law 584 of the Seventy-ninth Congress, enacted August 1, 1946, or the United States National Commission for UNESCO.

Mr. FULBRIGHT. Mr. President, I have discussed this amendment with the Senator from New Jersey [Mr. SMITH].

Mr. SMITH. Mr. President, I have discussed the amendment with the Senator from Arkansas. We feel that it is appropriate, because it is distinctly the purpose of the bill to exclude the other activities to which the Senator has referred. There is no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the committee amendment on page 17, line 21.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. WHERRY. Mr. President, I offer an amendment to section 702, on page 20, beginning in line 8. After the word "Secretary", I move to strike out the word "may" and insert in lieu thereof "shall", to comply with the amendment adopted earlier on page 9.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nebraska.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The next amendment was, on page 20, after line 19, to insert the following subhead:

THE SECRETARY

The amendment was agreed to.

The next amendment was, on page 22, line 5, after the word "create", to insert "with the approval of the Commission on Information and the Commission on Educational Exchange."

The amendment was agreed to.

The next amendment was, on page 24, in section 901, after line 6, to insert:

ADVANCE OF FUNDS

SEC. 902. If any other government shall express the desire to provide funds, property, or services to be used by this Government, in whole or in part, for the expenses of any specific part of the program undertaken pursuant to this act, the Secretary is authorized, when he finds it in the public interest, to accept such funds, property, or services. Funds so received may be established as a special deposit account in the Treasury of the United States, to be available for the specified purpose, and to be used for reimbursement of appropriations or direct expenditure, subject to the provisions of this act. Any unexpended balance of the special deposit account and other property received under this section and no longer required for the purposes for which provided shall be returned to the government providing the funds or property.

The amendment was agreed to.

The next amendment was, on page 25, line 3, after "Sec. 1001", to strike out "No citizen or resident of the United States, whether or not now in the employ of the Government, may be employed or assigned to duties under this act unless the Director of the Federal Bureau of Investigation, after such investigation as he deems necessary, certifies that in his opinion such individual is loyal to the United States and that such employment or assignment to duties is consistent with the security of the United States: *Provided, however,* That any present employee of the Government, unless an unfavorable report as to such employee is rendered sooner by the Federal Bureau of Investigation, may, without such certification, be employed or assigned to duties under this act for the period of 6 months from the date of its enactment. This section shall not apply in the case of any officer appointed by the President by and with the advice and consent of the Senate." and in lieu thereof to insert "No citizen or resident of the United States, whether or not now in the employ of the Government, may be employed or assigned to duties by the Government under this act until such individual has been investigated by the Federal Bureau of Investigation and a report thereon has been made to the Secretary of State: *Provided, however,* That any present employee of the Government, pending the report as to such employee by the Federal Bureau of Investigation, may be employed or assigned to duties under this act for the period of 6 months from the date of its enactment. This section shall not apply in the case of any officer appointed by the President by and with the advice and consent of the Senate."

The amendment was agreed to.

The next amendment was, on page 26, after line 7, to strike out:

SEPARABILITY OF PROVISIONS

SEC. 1002. If any provision of this act or the application of any such provision to any person or circumstance shall be held invalid, the validity of the remainder of the act and the applicability of such provision to other persons or circumstances shall not be affected thereby.

The amendment was agreed to.

The next amendment was, on page 26, line 15, to change the section number from 1003 to 1002.

The amendment was agreed to.

The next amendment was, on page 26, line 23, to change the section number from 1004 to 1003.

The amendment was agreed to.

The next amendment was, on page 27, line 4, to change the section number from 1005 to 1004.

The amendment was agreed to.

The next amendment was, on page 27, line 20, to change the section number from 1006 to 1005, and in line 23, after the word "agencies", to insert "including existing American private publications."

Mr. BALL. Mr. President, I offer the amendment to the committee amendment, which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment offered by the Senator from Minnesota will be stated.

The CHIEF CLERK. On page 27, line 21, after the word "utilize", it is proposed to strike out down to and including the word "publications" in line 23, and insert in lieu thereof the following: "to the maximum extent practicable, the services and facilities of private agencies, including existing American press, publishing, radio, motion picture, and other agencies."

Mr. BALL. Mr. President, the purpose of the amendment is to make it very clear that in conducting these activities, particularly the informational activities, the State Department is to utilize, to the maximum extent practicable, by contract or otherwise, the facilities and services of private agencies in the field. One reason why I am offering the amendment is that since this bill was scheduled for consideration in the Senate I have received word that the State Department is considering going back to its old practice of itself programing all its short-wave broadcasts. During our hearings on the State Department appropriation bill last year it was brought out very clearly that such a plan costs several times what it would cost if the services were contracted for. Somehow when the Government attempts to do that kind of news writing and broadcasting, it means three or four employees for every one employed by private agencies in the field. I know that the subcommittee of the Committee on Appropriations which handles the State Department appropriation would not want to go back to the old system, under which the State Department had a huge staff of people in New York doing all the programing, or nearly all the programing, for short-wave broadcasts. I wish to make very clear in this bill the intention of Congress, namely, that the Department shall utilize to the maximum extent practicable the facilities of private agencies. I realize that there are some broadcasts to critical areas which the State Department itself may have to program. However, to the maximum extent practicable, it should utilize the facilities of private agencies in this field.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. BALL. I yield.

Mr. WHERRY. I have a memorandum given to me by the junior Senator from Wyoming [Mr. ROBERTSON] who, I am satisfied, has seen the amendment of the Senator. He wished to have me ask the Senator whether, in carrying out the provisions of the act under the terms of the Senator's amendment, the Secretary will give consideration to using the facilities and services of all regularly licensed international short-wave stations on an equal basis.

Mr. BALL. I will say to the Senator that I believe that in that field we must leave discretion with the State Department to contract with whatever private agencies in the field it feels can do the best job for the program. I would not attempt to say, either in the legislation or here on the floor, that the Department should contract in one way or another, or should or should not contract with a certain agency.

Mr. WHERRY. The Senator's amendment provides that such use of private facilities shall be made to the greatest extent practicable. In reality that probably covers what the Senator from Wyoming had in mind.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. BALL. I yield.

Mr. MORSE. I find myself in complete agreement with the Senator's amendment. However, for purposes of clarification, am I correct in my understanding that in making use of private facilities—and I think they should be used—the State Department will retain necessary discretion to protect public funds in case any private agency should seek to make a charge for its facilities which the State Department might find to be unreasonable in comparison with what the State Department itself could do in sending the program across the air waves?

Mr. BALL. Of course the State Department always has such authority. However, I may say that all the testimony we took last year indicated that if the Department can find a private agency to do the job, it is always much cheaper than to have the Department itself do the job.

Mr. MORSE. I think that is true. I simply did not want to leave in the RECORD the impression that the congressional intent was that no matter how much the private agency sought to charge the Government, the Government would have to use such agency rather than the State Department.

Mr. BALL. I am very glad that the Senator has made that point, because there is certainly no such intention. The price will be subject to negotiation. The State Department does not have to sign a contract with anyone.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. BALL. I yield.

Mr. HATCH. As I understand the Senator's amendment, I believe that what it does is to make it perfectly clear that the Secretary shall use private agencies to the maximum extent practicable. Is that the language?

Mr. BALL. That is the language.

Mr. HATCH. I think the Senator from New Jersey will agree that that is the purpose of the bill itself, and that there is no particular objection to that language.

Mr. SMITH. That is correct. I talked it over last night with the Senator from Minnesota, and he has just spelled out in the amendment what we had in mind in the amendment to this section we had previously recommended. I have no objection to the amendment. I hope it will pass.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Minnesota [Mr. BALL] to the committee amendment on page 27, line 21.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

Mr. BALL. Mr. President, do I correctly understand that the amendment which I offered as a substitute for the committee amendment was agreed to?

The PRESIDING OFFICER. That is correct. The clerk will state the next amendment.

The next amendment was, on page 28, after line 4, to strike out:

OFFICE OF INFORMATION AND EDUCATIONAL EXCHANGE

SEC. 1007. Nothing in this act shall be construed to authorize the establishment of any new Government agency; except that for the purpose of carrying out the provisions of this act the Secretary is hereby authorized to establish in the Department of State an office to be known as the Office of Information and Educational Exchange.

The amendment was agreed to.

The next amendment was, on page 28, line 14, to change the section number from 1008 to 1006, and in the same line, after the word "Act," to strike out the comma and "or under any provision thereof."

The amendment was agreed to.

The next amendment was, on page 28, after line 17, to insert a new subhead as follows:

VETERANS' PREFERENCE ACT

The amendment was agreed to.

The next amendment was, on page 28, line 19, to change the section number from 1009 to 1007.

The amendment was agreed to.

The next amendment was, on page 28, line 23, to change the section number from 1010 to 1008.

The amendment was agreed to.

The next amendment was, on page 29, line 6, to change the section number from 1011 to 1009.

The amendment was agreed to.

The next amendment was, on page 29, after line 10, to insert a new section, as follows:

SEPARABILITY OF PROVISIONS

SEC. 1010. If any provision of this act or the application of any such provision to any person or circumstance shall be held invalid, the validity of the remainder of the act and the applicability of such provision to other persons or circumstances shall not be affected thereby.

The amendment was agreed to.

Mr. BALL. Mr. President, that completes the committee amendments, does it not?

The PRESIDING OFFICER. That is correct.

Mr. BALL. I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 6, line 18, to strike out the word "or" and insert in lieu thereof the word "and."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Minnesota.

The amendment was agreed to.

Mr. BALL. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. It is proposed, on page 7, line 12, after the word "serving" and the period, to insert "No person shall be assigned for service to or in cooperation with the government of any country, unless (1) the Secretary finds that such assignment is necessary in the national interest of the United States, or (2) such government agrees to reimburse the United States in an amount equal to the compensation, travel expenses, and allowances payable to such person during the period of such assignment in accordance with the provisions of section 302, or (3) such government shall have made an advance of funds, property, or service as provided in section 902."

Mr. KNOWLAND. Mr. President, I wonder if we might have an explanation of the amendment.

Mr. BALL. I should like to explain both this amendment and the one just agreed to substituting the word "and" for the word "or" in line 18 on page 6. That is an amendment to section 203, which authorizes the Secretary "to assist schools, libraries, and community centers abroad, founded or sponsored by citizens of the United States." Then it goes on to say "or serving as demonstration centers for methods and practices employed in the United States."

There is no restriction whatever on who founds them or sponsors them. I think the word "and" should have been used instead of the word "or" in the original draft of the bill. I think the Senator from New Jersey agrees with me.

The whole title, as it now stands, would permit the Secretary to assign technical experts from our Government to foreign governments to an almost unlimited extent, with our Government bearing the whole cost. It seemed to me that in the great majority of cases—and I think the Senator from New Jersey, after consulting the State Department, found that was true—the foreign government does reimburse our Government. I wanted some restriction on the Secretary's right to assign personnel to other governments and to have us bear the total cost only when he finds it is in the national interest to do so. It will give the Appropriations Subcommittee some check on this particular section of the bill.

Mr. SMITH. I am glad to accept that amendment, and the other amendments offered by the Senator from Minnesota, and I wish to thank him for what I think is a great contribution to the improvement of the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Minnesota.

The amendment was agreed to.

Mr. BALL. Mr. President, before the bill is passed, I should like to make one or two remarks.

We went through quite a controversy on the floor last year and in our committee when we authorized continuance of this activity in the State Department, even though it was not authorized by law. In reading Time magazine for January 12, 1948, I was struck by an article on page 13, which reads as follows:

Though no one said so openly, the sponsors of "journals-for-export"—

They were referring to proposals that American publications be exported directly to some of these countries as part of the national program—

were moved by the American's abiding distrust of Government-controlled news. If they needed grounds for their distrust, they now had a good example.

Three weeks ago the United States press headlined the testimony of Lt. Gen. Albert Wedemeyer before the Senate Appropriations Committee. Wedemeyer, whose report on China had been suppressed by Secretary George Marshall, roundly endorsed immediate economic and military aid to the Nationalist Government of Chiang Kai-shek.

But the United States Information Service's bulletins to China (framed by the State Department) sounded quite different. In its account of the China hearings, USIS gave a niggling 17 lines to Wedemeyer, a fat 68 to Willard Thorp and William Walton Butterworth, Jr., State Department apologists for the United States indecisive China policy. USIS painstakingly reported that Wedemeyer had called Generalissimo Chiang Kai-shek "a benevolent despot"; it did not add that Wedemeyer also declared that Chiang was "a fine character" and "the logical leader of China today," who needed United States help and should get it. Nothing was said to China, either, about Wedemeyer's recommendation of military aid.

Few United States correspondents in China were surprised at USIS's slanting of the news. USIS headquarters in Shanghai, run by big, beefy Bradley Connors, had consistently trimmed its sails to the State Department's anti-Chiang clique. From Nanking, Time correspondent Fred Gruin reported:

"Since July there have appeared in the United States press many powerful opinions favoring aid, including speeches by Thomas E. Dewey, statements by Representative WALTER JUDD, former Secretary of State James Byrnes, and former Ambassador to France William C. Bullitt.

"So far as USIS is concerned, these do not make news fit to print. Of 66 United States editorials on China which were distributed by USIS, 59 were anti-Chiang and anti-United States aid. The hostile New York Herald Tribune was quoted 11 times, the New York Times, guardedly sympathetic, only 3 times."

Mr. President, I will admit that I have not had time to check with the State Department as to the authenticity of that story, but since there has been no denial from the State Department I assume it is reasonably accurate. I think that kind of deliberate slanting of the news to reflect, not the voice and policy of America, or even the Government of the United States, but the voice of a little clique in the Information Service in the State Department, is a danger which has disturbed a great many members of this service in connection with the whole information program. It was taken over, as we all know, from the OWI. There were far too many Communists and fellow-travelers in that agency from the beginning. I am afraid that some are still there, and that probably the gentlemen responsible for this kind of vicious slanting of news of the developments in the United States regarding China are some holdovers from that fellow-traveler group in OWI, or else some other fellow-travelers who have been brought in by that group.

I say to the Senator from New Jersey that when the Committee on Foreign Relations considers the nomination of the Assistant Secretary to head up this program he will be asked about it and what

his policy will be. In my opinion, the supervisors who are responsible for this kind of distortion and complete slanting of news in contradiction to the policy adopted by the Congress and by the Government of this country should be dismissed from this activity. They have no place in it.

I do not believe, Mr. President, that a democratic country can possibly compete in lies with a dictatorship. We have freedom of speech, and the lies always catch up with us. We cannot control what our people or any other people in the world believe in the way of information. The only kind of propaganda with which a democratic country can possibly get anywhere is the truth. The policy of the State Department, in my opinion, should be constantly to put the emphasis on telling peoples all over the world the truth, even when it may hurt the feelings of some persons in the State Department who do not seem to agree with what the people of America think.

Mr. SMITH. Mr. President, in connection with what the distinguished Senator from Minnesota has just said, as far as I am concerned, as chairman of the subcommittee, it will be my purpose to request the Committee on Foreign Relations to ask the appointee who is to have charge of this work to confer with us regarding the policies to be carried on in conducting this important office.

So many things have been brought to our attention that it would not be fair to a new incumbent not to confer with him regarding the information service, the educational exchange service, and many other matters which have been brought to the attention of the committee and which should be considered in connection with the policy in conducting those offices in the future. So far as I am concerned, it will be my recommendation that we confer personally with the appointee before his appointment is confirmed.

Mr. FULBRIGHT. Mr. President, since the Senator has raised the question with reference to consulting with the new head of the agency, I should also like to recommend to the members of the Committee on Foreign Relations that they consider and perhaps advise with him on the question of how to make more efficient the organization he will head, because a bill designed to achieve a purpose similar to that of the part of this bill relating to the exchange of persons, was passed in the Congress over a year and a half ago, but the Department has been exceedingly slow in implementing it. I have particular reference to the Office of Financial Policy and Development, which seems to be bogged down and quite unable to take action.

So, with the passage of this bill, with which, as the Senator knows, I am thoroughly in accord, I hope the committee will try to do something to improve the administration of these matters within the State Department. Of course, I do not need tell the Senator that the State Department has been one of the most difficult departments of the Government to reorganize. The present Secretary of State is the third Secretary of State who has promised to reorganize it and streamline it, but nothing of that sort has been done thus far.

In view of the magnificent effort which I consider this bill to represent, I hope the Senator from New Jersey will now give some attention to seeing to it that after the bill is passed, something will happen in the State Department.

Mr. SMITH. Mr. President, I thank the Senator from Arkansas for his comments. Personally, I feel that they are very much in order.

Mr. BARKLEY. Mr. President, I do not wish to delay a vote on the bill, and I shall not do so; but I do not care to have the vote come without my saying just a word or two in its support.

I happen to be one of the Members of the Senate who were appointed as a subcommittee and who traveled all over Europe in an effort to learn what our information service was doing there, what it had been doing, what it needed, and what was the result of the reduction made necessary by the reduction of the appropriation. I concur in the statement which has been made by the Senator from New Jersey, namely, that not only in the consideration of the proposed legislation but in all the investigations which occurred abroad, never a shadow of politics entered the picture in any form. I was, as were all of us, impressed by the pitiful inadequacy of our present service in some of the countries. It is an anomally that any country has to engage in propaganda or in the dissemination of information in order to counteract misinformation constantly fed to people by any other country supposed to be friendly. That is a new development in international relationships, and it is a very disturbing development.

Nevertheless it is a fact—and we have to deal with facts—that in various parts of Europe and other parts of the world an organized, concentrated effort is indulged in on the part of government, at great expense and great display, to misrepresent the motives of the United States Government as a government, to distort everything that is said in and by the United States Government, to utilize every episode which occurs in this country, as an evidence of our alleged depravity, of our alleged selfishness, of our alleged imperialistic desires, and also to misrepresent the kind of life the American people lead.

In those countries we found a yearning for the truth. Their people hunger for information about the way the people of the United States live—about our school system, about our agricultural system, about our social system, about our cities, about our country generally, and all the things that make up what we have come to call the American way of life. They are anxious for it; and notwithstanding the inadequacy of our service in many of those countries especially, which I need not mention by name, it has been difficult to persuade the people there that the things said about us are true; and whenever there has been an opportunity for the people themselves to learn at first-hand and on the ground, by any sort of demonstration, that they are not true, they have leaped at the opportunity to obtain that information.

So it would be most unfortunate if we did not accept the responsibility of educating them and informing them about our Nation, about our people, about the way we do things, and about our democracy and our political and social institutions. This bill authorizes the appropriations necessary to do that. I hope that when the appropriations come along, after the bill is passed, after the authority has been granted, they will be adequate to do the job which is so essential at this period of our great world leadership, which we have not sought so much as it has been thrust upon us.

So, Mr. President, I am happy to join in the passage of the bill, and to have added my feeble efforts in its construction and in the obtaining of the information upon which it is based.

I wish to compliment the Senator from New Jersey [Mr. SMITH] for his untiring and diligent and intelligent efforts directed toward bringing about the enactment of a bill which would be workable and at the same time would not trespass too much upon any theories we have heretofore entertained in regard to the functioning of a government in the matter of giving the world information about ourselves and our people.

The PRESIDING OFFICER (Mr. KNOWLAND in the chair). The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H. R. 3342) was passed.

The title was amended so as to read: "An act to promote the better understanding of the United States among the peoples of the world and to strengthen cooperative international relations."

The bill as passed is as follows:

Be it enacted, etc.,

TITLE I—SHORT TITLE, OBJECTIVES, AND DEFINITIONS

SHORT TITLE

SECTION 1. This Act may be cited as the "United States Information and Educational Exchange Act of 1948".

OBJECTIVES

SEC. 2. The Congress hereby declares that the objectives of this Act are to enable the Government of the United States to promote a better understanding of the United States in other countries, and to increase mutual understanding between the people of the United States and the people of other countries. Among the means to be used in achieving these objectives are—

(1) an information service to disseminate abroad information about the United States, its people, and policies promulgated by the Congress, the President, the Secretary of State and other responsible officials of Government having to do with matters affecting foreign affairs;

(2) an educational exchange service to cooperate with other nations in—

(a) the interchange of persons, knowledge, and skills;

(b) the rendering of technical and other services;

(c) the interchange of developments in the field of education, the arts, and sciences.

UNITED NATIONS

SEC. 3. In carrying out the objectives of this Act, information concerning the participation of the United States in the United Nations, its organizations and functions, shall be emphasized.

SEC. 4. When used in this Act, the term—

(1) "Secretary" means the Secretary of State.

(2) "Department" means the Department of State.

(3) "Government agency" means any executive department, board, bureau, commission, or other agency of the Federal Government, or independent establishment, or any corporation wholly owned (either directly or through one or more corporations) by the United States.

TITLE II—INTERCHANGE OF PERSONS, KNOWLEDGE AND SKILLS

PERSONS

SEC. 201. The Secretary is authorized to provide for interchanges on a reciprocal basis between the United States and other countries of students, trainees, teachers, guest instructors, professors, and leaders in fields of specialized knowledge or skill and shall wherever possible provide these interchanges by using the services of existing reputable agencies which are successfully engaged in such activity. The Secretary may provide for orientation courses and other appropriate services for such persons from other countries upon their arrival in the United States, and for such persons going to other countries from the United States. When any country fails or refuses to cooperate in such program on a basis of reciprocity the Secretary shall terminate or limit such program, with respect to such country, to the extent he deems to be advisable in the interests of the United States. The persons specified in this section shall be admitted as nonimmigrant visitors for business under clause 2 of section 3 of the Immigration Act of 1924, as amended (43 Stat. 154; 8 U. S. C. 203), for such time and under such conditions as may be prescribed by regulations promulgated by the Secretary of State and the Attorney General. A person admitted under this section who fails to maintain the status under which he was admitted or who fails to depart from the United States at the expiration of the time for which he was admitted, or who engages in activities of a political nature detrimental to the interests of the United States, or in activities not consistent with the security of the United States, shall, upon the warrant of the Attorney General, be taken into custody and promptly deported pursuant to section 14 of the Immigration Act of 1924 (43 Stat. 162, 8 U. S. C. 214). Deportation proceedings under this section shall be summary and the findings of the Attorney General as to matters of fact shall be conclusive. Such persons shall not be eligible for suspension of deportation under clause 2 of subdivision (c) of section 19 of the Immigration Act of February 5, 1917 (54 Stat. 671, 56 Stat. 1044; 8 U. S. C. 155).

BOOKS AND MATERIALS

SEC. 202. The Secretary is authorized to provide for interchanges between the United States and other countries of books and periodicals, including government publications, for the translation of such writings, and for the preparation, distribution, and interchange of other educational materials.

INSTITUTIONS

SEC. 203. The Secretary is authorized to provide for assistance to schools, libraries, and community centers abroad, founded or sponsored by citizens of the United States, and serving as demonstration centers for methods and practices employed in the United States. In assisting any such schools, however, the Secretary shall exercise no control over their educational policies and shall in no case furnish assistance of any character which is not in keeping with the free democratic principles and the established foreign policy of the United States.

TITLE III—ASSIGNMENT OF SPECIALISTS

PERSONS TO BE ASSIGNED

SEC. 301. The Secretary is authorized, when the government of another country is desirous of obtaining the services of a person having special scientific or other technical or professional qualifications, from time to time to assign or authorize the assignment for service, to or in cooperation with such government, any citizen of the United States in the employ or service of the Government of the United States who has such qualifications, with the approval of the Government agency in which such person is employed or serving. No person shall be assigned for service to or in cooperation with the government of any country unless (1) the Secretary finds that such assignment is necessary in the national interest of the United States, or (2) such government agrees to reimburse the United States in an amount equal to the compensation, travel expenses, and allowances payable to such person during the period of such assignment in accordance with the provisions of section 302, or (3) such government shall have made an advance of funds, property, or services as provided in section 902. Nothing in this Act, however, shall authorize the assignment of such personnel for service relating to the organization, training, operation, development, or combat equipment of the armed forces of a foreign government.

STATUS AND ALLOWANCES

SEC. 302. Any citizen of the United States, while assigned for service to or in cooperation with another government under the authority of this Act, shall be considered, for the purpose of preserving his rights, allowances, and privileges as such, an officer or employee of the Government of the United States and of the Government agency from which assigned and he shall continue to receive compensation from that agency. He may also receive, under such regulations as the President may prescribe, representation allowances similar to those allowed under section 901 (3) of the Foreign Service Act of 1946 (60 Stat. 999). The authorization of such allowances and other benefits and the payment thereof out of any appropriations available therefor shall be considered as meeting all the requirements of section 1765 of the Revised Statutes.

ACCEPTANCE OF OFFICE UNDER ANOTHER GOVERNMENT

SEC. 303. Any citizen of the United States while assigned for service to or in cooperation with another government under authority of this Act may, at the discretion of his Government agency, with the concurrence of the Secretary, and without additional compensation therefor, accept an office under the government to which he is assigned, if the acceptance of such an office in the opinion of such agency is necessary to permit the effective performance of duties for which he is assigned, including the making or approving on behalf of such foreign government the disbursement of funds provided by such government or of receiving from such foreign government funds for deposit and disbursement on behalf of such government, in carrying out programs undertaken pursuant to this Act: *Provided, however,* That such acceptance of office shall in no case involve the taking of an oath of allegiance to another government.

TITLE IV—PARTICIPATION BY GOVERNMENT AGENCIES

GENERAL AUTHORITY

SEC. 401. The Secretary is authorized, in carrying on any activity under the authority of this Act, to utilize, with the approval of the President, the services, facilities, and personnel of the other Government agencies. Whenever the Secretary shall use the services, facilities, or personnel of any Government agency for activities under authority of this Act, the Secretary shall pay for such performance out of funds available to the Secretary under this Act, either in advance, by reimbursement, or direct transfer. The Secretary shall include in each report submitted to the Congress under section 1008 a statement of the services, facilities, and personnel of other Government agencies utilized in carrying on activities under the authority of this Act, showing the names and salaries of the personnel utilized, or performing services utilized, during the period covered by such report, and the amounts paid to such other agencies under this section as payment for such performance.

TECHNICAL AND OTHER SERVICES

SEC. 402. A Government agency, at the request of the Secretary, may perform such technical or other services as such agency may be competent to render for the government of another country desirous of obtaining such services, upon terms and conditions which are satisfactory to the Secretary and to the head of the Government agency, when it is determined by the Secretary that such services will contribute to the purposes of this Act. However, nothing in this Act shall authorize the performance of services relating to the organization, training, operation, development, or combat equipment of the armed forces of a foreign government.

POLICY GOVERNING SERVICES

SEC. 403. In authorizing the performance of technical and other services under this title, it is the sense of the Congress (1) that the Secretary shall encourage through any appropriate Government agency the performance of such services to foreign governments by qualified private American individuals and agencies, and shall not enter into the performance of such services to any foreign government where such services may be performed adequately by qualified private American individuals and agencies and such qualified individuals and agencies are available for the performance of such services; (2) that if such services are rendered by a Government agency, they shall demonstrate the technical accomplishments of the United States, such services being of an advisory, investigative, or instructional nature, or a demonstration of a technical process; (3) that such services shall not include the construction of public works or the supervision of the construction of public works, and that, under authority of this Act, a Government agency shall render engineering services related to public works only when the Secretary shall determine that the national interest demands the rendering of such services by a Government agency, but this policy shall not be interpreted to preclude the assignment of individual specialists as advisers to other governments as provided under title III of this Act, together with such incidental assistance as may be necessary for the accomplishment of their individual assignments.

TITLE V—DISSEMINATING INFORMATION ABOUT THE UNITED STATES ABROAD

GENERAL ANTHORIZATION

SEC. 501. The Secretary is authorized, when he finds it appropriate, to provide for the preparation, and dissemination abroad, of information about the United States, its people, and its policies, through press, publications, radio, motion pictures, and other information media, and through information centers and instructors abroad. Any such press release or radio script, on request, shall be available in the English language at the Department of State, at all reasonable times following its release as information abroad, for examination by representatives of United States press associations, newspapers, magazines, radio systems, and stations, and, on

request, shall be made available to Members of Congress.

POLICIES GOVERNING INFORMATION ACTIVITIES

SEC. 502. In authorizing international information activities under this Act, it is the sense of the Congress (1) that the Secretary shall reduce such Government information activities whenever corresponding private information dissemination is found to be adequate; (2) that nothing in this Act shall be construed to give the Department a monopoly in the production or sponsorship on the air of short-wave broadcasting programs, or a monopoly in any other medium of information.

TITLE VI—ADVISORY COMMISSIONS TO FORMULATE POLICIES

SEC. 601. There are hereby created two advisory commissions (1) United States Advisory Commission on Information (hereinafter in this title referred to as the Commission on Information) and (2) United States Advisory Commission on Educational Exchange (hereinafter in this title referred to as the Commission on Educational Exchange) to be constituted as provided in section 602. The Commissions shall formulate and recommend to the Secretary policies and programs for the carrying out of this Act: *Provided, however,* That the commissions created by this section shall have no authority over the Board of Foreign Scholarships or the program created by Public Law 584 of the Seventy-ninth Congress, enacted August 1, 1946, or the United States National Commission for UNESCO.

MEMBERSHIP OF THE COMMISSIONS; GENERAL PROVISIONS

SEC. 602 (a) Each Commission shall consist of five members, not more than three of whom shall be from any one political party. Members shall be appointed by the President, by and with the advice and consent of the Senate. No person holding any compensated Federal or State office shall be eligible for appointment.

(b) The members of the Commission on Information shall represent the public interest, and shall be selected from a cross section of professional, business, and public service backgrounds.

(c) The members of the Commission on Educational Exchange shall represent the public interest and shall be selected from a cross section of educational, cultural, scientific, technical, and public service backgrounds.

(d) The term of each member appointed under subsection (a) of this section shall be three years, except that the terms of office of such members first taking office on each Commission shall expire, as designated by the President at the time of appointment, two at the end of one year, two at the end of two years, and one at the end of three years from the date of the enactment of this Act. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor is appointed shall be appointed for the remainder of such term. Upon the expiration of his term of office any member may continue to serve until his successor is appointed and has qualified.

(e) The President shall designate a chairman for each Commission from among members of the Commission.

(f) The members of the Commissions shall receive no compensation for their services as such members but shall be entitled to reimbursement for travel and subsistence in connection with attendance of meetings of the Commissions away from their places of residences, as provided in subsection (6) of section 801 of this Act.

(g) The Commissions are authorized to adopt such rules and regulations as they may deem necessary to carry out the authority conferred upon them by this title.

(h) The Department is authorized to provide the necessary secretarial and clerical assistance for the Commissions.

RECOMMENDATIONS AND REPORTS

SEC. 603. The Commissions shall meet not less frequently than once each month during the first six months after their establishment, and thereafter at such intervals as the Commissions find advisable, and shall transmit to the Secretary a quarterly report, and to the Congress a semiannual report of all programs and activities carried on under the authority of this Act, including appraisals, where feasible, as to the effectiveness of the several programs, and such recommendations as shall have been made by the Commissions to the Secretary for effectuating the purposes and objectives of this Act and the action taken to carry out such recommendations.

TITLE VII—APPROPRIATIONS

GENERAL AUTHORIZATION

SEC. 701. Appropriations to carry out the purposes of this Act are hereby authorized.

TRANSFER OF FUNDS

SEC. 702. The Secretary shall authorize the transfer to other Government agencies for expenditure in the United States and in other countries, in order to carry out the purposes of this Act, any part of any appropriations available to the Department for carrying out the purposes of this Act, for direct expenditure or as a working fund, and any such expenditures may be made under the specific authority contained in this Act or under the authority governing the activities of the Government agency to which a part of any such appropriation is transferred, provided the activities come within the scope of this Act.

TITLE VIII—ADMINISTRATIVE PROCEDURES

THE SECRETARY

SEC. 801. In carrying out the purposes of this Act, the Secretary is authorized, in addition to and not in limitation of the authority otherwise vested in him—

(1) In carrying out title II of this Act, within the limitation of such appropriations as the Congress may provide, to make grants of money, services, or materials to State and local governmental institutions in the United States, to governmental institutions in other countries, and to individuals and public or private nonprofit organizations both in the United States and in other countries;

(2) to furnish, sell, or rent, by contract or otherwise, educational and information materials and equipment for dissemination to, or use by, peoples of foreign countries;

(3) whenever necessary in carrying out title V of this Act, to purchase, rent, construct, improve, maintain, and operate facilities for radio transmission and reception, including the leasing of real property both within and without the continental limits of the United States for periods not to exceed ten years, or for longer periods if provided for by the appropriation Act;

(4) to provide for printing and binding outside the continental limits of the United States, without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111);

(5) to employ, without regard to the civil-service and classification laws, when such employment is provided for by the appropriation Act (i) persons on a temporary basis, and (ii) aliens within the United States, but such employment of aliens shall be limited to services related to the translation or narration of colloquial speech in foreign languages when suitably qualified United States citizens are not available; and

(6) to create, with the approval of the Commission on Information and the Commission on Educational Exchange, such advisory committees as the Secretary may decide to be of assistance in formulating his policies for carrying out the purposes of this Act. No committee member shall be allowed any salary or other compensation for services; but he may be paid his actual transportation expenses, and not to exceed $10 per diem in lieu of subsistence and other expenses, while away from his home in attendance upon meetings within the United States or in consultation with the Department under instructions.

GOVERNMENT AGENCIES

SEC. 802. In carrying on activities which further the purposes of this Act, subject to approval of such activities by the Secretary, the Department and the other Government agencies are authorized—

(1) to place orders and make purchases and rentals of materials and equipment;

(2) to make contracts, including contracts with governmental agencies, foreign or domestic, including subdivisions thereof, and intergovernmental organizations of which the United States is a member, and, with respect to contracts entered into in foreign countries, without regard to section 3741 of the Revised Statutes (41 U. S. C. 22);

(3) under such regulations as the Secretary may prescribe, to pay the transportation expenses, and not to exceed $10 per diem in lieu of subsistence and other expenses, of citizens or subjects of other countries, without regard to the Standardized Government Travel Regulations and the Subsistence Act of 1926, as amended; and

(4) to make grants for, and to pay expenses incident to, training and study.

MAXIMUM USE OF EXISTING GOVERNMENT PROPERTY AND FACILITIES

SEC. 803. In carrying on activities under this Act which require the utilization of Government property and facilities, maximum use shall be made of existing Government property and facilities.

TITLE IX—FUNDS PROVIDED BY OTHER SOURCES

REIMBURSEMENT

SEC. 901. The Secretry shall, when he finds it in the public interest, request and accept reimbursement from any cooperating governmental or private source in a foreign country, or from State or local governmental institutions or private sources in the United States, for all or part of the expenses of any portion of the program undertaken hereunder. The amounts so received shall be covered into the Treasury as miscellaneous receipts.

ADVANCE OF FUNDS

SEC. 902. If any other government shall express the desire to provide funds, property, or services to be used by this Government, in whole or in part, for the expenses of any specific part of the program undertaken pursuant to this Act, the Secretary is authorized, when he finds it in the public interest, to accept such funds, property, or services. Funds so received may be established as a special deposit account in the Treasury of the United States, to be available for the specified purpose, and to be used for reimbursement of appropriations or direct expenditure, subject to the provisions of this Act. Any unexpended balance of the special deposit account and other property received under this section and no longer required for the purposes for which provided shall be returned to the government providing the funds or property.

TITLE X—MISCELLANEOUS

LOYALTY CHECK ON PERSONNEL

SEC. 1001. No citizen or resident of the United States, whether or not now in the employ of the Government, may be employed or assigned to duties by the Government under this Act until such individual has been investigated by the Federal Bureau of Investigation and a report thereon has been made to the Secretary of State: *Provided, however,* That any present employee of the Government, pending the report as to such

employee by the Federal Bureau of Investigation, may be employed or assigned to duties under this Act for the period of six months from the date of its enactment. This section shall not apply in the case of any officer appointed by the President by and with the advice and consent of the Senate.

DELEGATION OF AUTHORITY

SEC. 1002. The Secretary may delegate, to such officers of the Government as the Secretary determines to be appropriate, any of the powers conferred upon him by this Act to the extent that he finds such delegation to be in the interest of the purposes expressed in this Act and the efficient administration of the programs undertaken pursuant to this Act.

RESTRICTED INFORMATION

SEC. 1003. Nothing in this Act shall authorize the disclosure of any information or knowledge in any case in which such disclosure (1) is prohibited by any other law of the United States, or (2) is inconsistent with the security of the United States.

REPEAL OF ACT OF MAY 25, 1938, AS AMENDED

SEC. 1004. (a) The Act of May 25, 1938, entitled "An Act authorizing the temporary detail of United States employees, possessing special qualifications, to governments of American Republics and the Philippines, and for other purposes," as amended (52 Stat. 442; 53 Stat. 652), is hereby repealed.

(b) Existing Executive orders and regulations pertaining to the administration of such Act of May 25, 1938, as amended, shall remain in effect until superseded by regulations prescribed under the provisions of this Act.

(c) Any reference in the Foreign Service Act of 1946 (60 Stat. 999), or in any other law, to provisions of such Act of May 25, 1938, as amended, shall be construed to be applicable to the appropriate provisions of titles III and IX of this Act.

UTILIZATION OF PRIVATE AGENCIES

SEC. 1005. In carrying out the provisions of this Act it shall be the duty of the Secretary to utilize, to the maximum extent practicable, the services and facilities of private agencies, including existing American press, publishing, radio, motion picture, and other agencies, through contractual arrangements or otherwise. It is the intent of Congress that the Secretary shall encourage participation in carrying out the purposes of this Act by the maximum number of different private agencies in each field consistent with the present or potential market for their services in each country.

TERMINATION PURSUANT TO CONCURRENT RESOLUTION OF CONGRESS

SEC. 1006. The authority granted under this Act shall terminate whenever such termination is directed by concurrent resolution of the two Houses of the Congress.

VETERANS' PREFERENCE ACT

SEC. 1007. No provision of this Act shall be construed to modify or to repeal the provisions of the Veterans' Preference Act of 1944.

REPORTS TO CONGRESS

SEC. 1008. The Secretary shall submit to the Congress semiannual reports of expenditures made and activities carried on under authority of this Act, inclusive of appraisals and measurements, where feasible, as to the effectiveness of the several programs in each country where conducted.

REGULATORY PROVISIONS TO APPLY TO ALL INTERNATIONAL INFORMATION ACTIVITIES AND EDUCATIONAL EXCHANGES OF STATE DEPARTMENT

SEC. 1009. All provisions in this Act regulating the administration of international information activities and educational exchanges provided herein, shall apply to all such international activities under jurisdiction of the Department of State.

SEPARABILITY OF PROVISIONS

SEC. 1010. If any provision of this Act or the application of any such provision to any person or circumstance shall be held invalid, the validity of the remainder of the Act and the applicability of such provision to other persons or circumstances shall not be affected thereby.

JUSTICE DOUGLAS AND THE DEMOCRATIC PARTY

Mr. EASTLAND. Mr. President, I call the attention of the Senate and the country to an article in the column headed "Matter of Fact," which appeared today in the Washington Post, the article being written by Joseph and Stewart Alsop, and entitled "From Cloister to Convention." I am going to read excerpts from the article, and make some comments about the conditions existing in this country, and in particular in the Southern States. The article states:

The peculiar, intermittent courtship between American politics and Justice William O. Douglas has entered a new and more decisive phase. The leaders of the northern Democratic organizations have sent word to Justice Douglas that the party's 1948 vice presidential nomination is his for the taking.

The message was carried, sometime ago, straight from a leaders' meeting in New York to Douglas' chambers in the gloomy cloisters of the Supreme Court. The executive director of the Democratic National Committee, Gael Sullivan, was the messenger. Douglas did not welcome this political annunciation, and has given no subsequent sign of his intentions. But the Democratic leaders feel that if President Truman eventually asks Douglas point blank to be his running mate, the Justice will be forced to accept.

There is, of course, no sort of guaranty that the leaders' message to Douglas will thus be followed up by any request from the White House. As far as President Truman personally is concerned, the choice of his companion on the ticket is still officially open. This will no doubt be asserted by the President himself. Yet, whatever the President may say will not detract from the singular interest of the episode described above.

There are, first of all, the circumstances of the leaders' decision. The New York get-together was held under the informal chairmanship of Edward J. Flynn. It is reported to have been attended by delegates from the satrapies of Ed Kelly and Jake Arvey in Illinois, David Lawrence in Pennsylvania, Frank Hague in New Jersey, and one or two more. In short, the same principalities and powers were assembled that took the lead in 1944 in rejecting both James F. Byrnes and Henry A. Wallace and in conferring the Vice Presidency on Harry S. Truman.

The debates of the satraps were, rather naturally, not formally recorded. Yet it is known that two major points were generally agreed upon.

Point 1 was that Truman would need a running mate linked to the New Deal, rather than a conservative, in order to win this year.

Point 2 is the important one.

Point 2 was that the nomination of such a running mate would arouse bitter opposition in the southern wing of the Democratic Party, but that the North possessed the votes to impose a northern choice on the convention. In both these points the practiced political eye will read much that is significant.

Mr. President, it is true that the North will have the votes at the national convention to impose upon that convention the candidate for Vice President they desire, but it is not true that, because Mr. Kelly and Mr. Arvey and Mr. Hague get together they can elect their Vice Presidential candidate. In fact, the Democratic electors of the southern wing of the party will not follow Mr. Hague's direction, and will not vote for any candidate for Vice President who we think is inimical to the welfare of our people and whose philosophy of government would be to destroy our social institutions.

Mr. President, I serve notice now, and I think I can speak for the people of one sovereign Southern State when I say it, that we are not going to support any candidate for Vice President who is forced upon us by the convention, if we do not choose to support him, that that is a question which will be determined by our Presidential electors according to the Constitution of the United States. Because a candidate is strong on the East Side and pleases Boss Flynn is not persuasive with us. The Democratic electors of the South will not sacrifice our people upon the cross of political expediency. And this goes for Mr. Justice Douglas, as well as any other candidate who is nominated by the northern Democrats against our will and over our protests.

Mr. President, I think it is a shameful thing that politicians like those named would attempt to put the Supreme Court of the United States in politics. The episode referred to, if it happened—and my information is that it did—will cause the people to think that every decision of Mr. Justice Douglas is swayed by political considerations. It destroys the judicial atmosphere so necessary for confidence in a court. Our people are tired of politicians who plan and plot and politicalize the highest court of this country, and I think the people, not only of the South but of the Nation as a whole, will resent it.

Mr. President, I ask unanimous consent that the whole article may be placed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MATTER OF FACT

(By Joseph and Stewart Alsop)

FROM CLOISTER TO CONVENTION

The peculiar, intermittent courtship between American politics and Justice William O. Douglas has entered a new and more decisive phase. The leaders of the northern Democratic organizations have sent word to Justice Douglas that the party's 1948 Vice-Presidential nomination is his for the taking.

The message was carried, some time ago, straight from a leaders' meeting in New York to Douglas' chambers in the gloomy cloisters of the Supreme Court. The executive director of the Democratic National Committee, Gael Sullivan, was the messenger. Douglas did not welcome this political annunciation, and has given no subsequent sign of his intentions. But the Democratic leaders feel that if President Truman eventually asks Douglas point blank to be his running mate, the Justice will be forced to accept.

There is, of course, no sort of guaranty that the leaders' message to Douglas will thus be followed up by any request from the White House. As far as President Truman personally is concerned the choice of his

companion on the ticket is still officially open. This will no doubt be asserted by the President himself. Yet, whatever the President may say will not detract from the singular interest of the episode described above.

There are, first of all, the circumstances of the leaders' decision. The New York get-together was held under the informal chairmanship of Edward J. Flynn. It is reported to have been attended by delegates from the satrapies of Ed Kelly and Jake Arvey in Illinois, David Lawrence in Pennsylvania, Frank Hague in New Jersey, and one or two more. In short, the same principalities and powers were assembled that took the lead in 1944 in rejecting both James F. Byrnes and Henry A. Wallace and in conferring the Vice Presidency on Harry S. Truman.

The debates of the satraps were, rather naturally, not formally recorded. Yet it is known that two major points were generally agreed upon.

Point 1 was that Truman would need a running mate linked to the New Deal, rather than a conservative, in order to win this year. Point 2 was that the nomination of such a running mate would arouse bitter opposition in the southern wing of the Democratic Party, but that the North possessed the votes to impose a northern choice on the convention. In both these points the practiced political eye will read much that is significant.

The northern leaders' insistence upon a New Dealer again underlines the fundamental change that has come over these great political organizations in the last 16 years. In the days before Roosevelt, these organizations were the conservative element in the Democratic Party. They relied on petty favors to hold the mass of their voters in the precincts, and in Washington were glad enough to take a right-wing line.

Now, however, the mass vote of the big cities can only be attracted by progressive personalities and programs. The leaders of the Democratic organizations privately cherish the wholly conservative opinions which they have always held. But they must give the voters the programs and personalities they want because their power depends upon it.

Their attitude was admirably summed up by one of the hard-boiled henchmen of the Kelly-Arvey organization, at the conclave which chose the able Paul Douglas as the Democratic senatorial nominee in Illinois. Douglas was rejected for the governorship nomination, which went to Adlai Stevenson, because he had fought the organization too hard in the past. The organization men could not bear the thought of Douglas passing out the jobs in Springfield, but could just bring themselves to support him for the Senate. The hard-boiled henchman in question put the general view very simply:

"I hate the — — guts of the — — —, but I'm for him because maybe he can win."

As the foregoing remark suggests, the progressivism of the northern satraps is in fact strictly confined to major candidates and party platforms. It is strikingly absent from their approach to the real business of government.

Hence result such oddities as Edwin J. Flynn's support of Commissioner Edmond Hanrahan for the chairmanship of the Securities and Exchange Commission. There is here a certain amusing irony. Justice Douglas, whom Flynn wants for the Vice Presidency, was once the fighting leader of the SEC, while Hanrahan is favored for the SEC chairmanship by precisely the business interests whom Douglas once fought. This kind of thing is the source of the curious split personality of the Truman administration.

Yet even progressivism in word and conservatism in deed is enough to inflame the feelings of the southern Democrats. The southerners will shortly be aroused into a fury of indignation by a strong Truman message on antidiscrimination legislation. They are sore as bears already. Although Justice Douglas is personally popular with many of them, the southerners will like no choice imposed by the North.

In this matter, as in so many others, President Truman's position recalls the plight of the Light Brigade. Wallace to the left of him, O'Daniel to the right of him, volley and thunder.

Mr. MORSE. Mr. President, I ask unanimous consent to have published in the body of the RECORD at this point a great speech delivered by a great American in Chicago recently at the dinner given in honor of a great liberal in American political history, John Peter Altgeld, of Illinois. The speech was delivered by a great Justice of the United States—Supreme Court Justice William O. Douglas.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

John Peter Altgeld is probably unknown to most Americans. He seldom figures in our history textbooks. Few adults or school children identify him with the great human causes which have shaped the American character. His name has not yet become, as it should, a symbol of the clean, powerful force which we call American idealism.

He has, indeed, been an "eagle forgotten." But as Vachel Lindsay nobly said of him, "To live in mankind is far more than to live in a name." Altgeld does, I believe, "live in mankind." It was the cause of mankind which he pleaded. Though his name may no longer be identified with the issues which he espoused, their vitality in the years which followed him reflect the courage and faith with which he embraced them. Moreover, those who would not have seen eye to eye with him on many of the contentious issues of his era nevertheless gain inspiration from the character of his advocacy.

He feared no man. As a lawyer, his clients did not cause him to stand mute when his conscience urged him to speak out. As a politician, he did not follow the safe course of indecision or of ambiguous pronouncement when his instinct for justice told him to meet an evil head-on. As a private individual, he did not turn his back and withdraw to the ease and comfort of his wealth when the victims of an industrial system cried out against its inhumanities.

The powerful social forces of his age moved him to action. He was blunt, outspoken, and at times indiscreet. Edgar Lee Masters once said that perhaps "his weakness was that he hated the bad so much that it obscured his love of the good." He certainly made up in daring what he may have lacked in discretion. His was the frontal attack—he stormed the walls of the enemy at high noon; he did not delay in order to infiltrate their fortress at midnight. He was, indeed, an expendable. The heat of his zeal, the tremendous demands of his nervous energy consumed him in a brief and hectic 55 years.

He lost almost every major cause he pleaded. But those were the skirmishes and the battles which were mere episodes in a larger and more far-flung campaign. His failures caused new recruitments. A full generation later men who never knew his name were summoned by the ideas which he had generated or espoused. They marched to great victories of which he perhaps had never even dreamed.

His activities were, in the main, restricted to Illinois. But the ideas which he represented spread throughout the land as seed travels on the great airways of the world. His platform power was potent, though his spoken word was carried by the tongues of men, not by the magic of radio. The issues of which he spoke later became national issues. Millions became advocates of his lost causes. A generation unborn at his death witnessed victory in the war of which his lost battles were a part.

One who follows a trail through the wilderness may not know who first laid it out, who blazed the trees that mark its course. The pioneer who went ahead and marked the trail may, like Altgeld, be unsung. Those who later come to know its rigors—the crags which it mounts and the treacherous lowlands which it skirts—will want to pay tribute to him who first dared walk it. As Irving Dilliard said, the State of Illinois paid such a tribute in a literally inspired way in 1941 when it chose Altgeld Hall as the name of the building to house its distinguished college of law. Such monuments to his name do more than honor him. They help insure that his ideas continue as potent forces in our national life.

Altgeld came to maturity during the days of our robber barons. The great industrial and financial strength of the East had won a war and had grown stronger in the process. A large productive capacity, a huge reservoir of capital awaited new ventures. Men of vision saw untold opportunities in the exploitation of the western two-thirds of the continent. Parrington has described the beginning of this gilded age in pungent terms:

"A passionate will to power was issuing from unexpected sources, undisciplined, confused in ethical values, but endowed with immense vitality. Individualism was being simplified to the acquisitive instinct. These new Americans were primitive souls, ruthless, predatory, capable; single-minded men; rogues and rascals often, but never feeble, never hindered by petty scruple, never given to puling or whining—the raw materials of a race of capitalistic buccaneers. * * * The romantic age of Captain Kidd was come again, and the black flag and the gospel banner were both in lockers to be flown as the needs of the cruise determined. With all coercive restrictions put away the democratic genius of America was setting out on the road of manifest destiny. * * * It was an anarchistic world of strong, capable men, selfish, unenlightened, amoral—an excellent example of what human nature will do with undisciplined freedom. In the gilded age freedom was the freedom of buccaneers preying on the argosies of Spain."

Banker, industrialist, builder, and speculator were the driving forces in that tremendous undertaking. Some maintain that, at least in days of peace, the job never could have been done so fast any other way. However that may be, it is clear that it was extravagant in its cost, inhuman in its methods, corrupt in its influence.

The agrarian groups were exploited by the mercantile and industrial interests. A scourge of poverty and want—10 percent interest and 10-cent corn—swept the farms. Out of such stuff grew the Granger movement and later the Populists and other groups bent on reform.

Jungle warfare was the technique that fashioned the trusts. Big business rose out of the ruins which it had made of little business.

The newly acquired wealth became, in part, a slush fund to corrupt legislatures, to purchase favors from public officers. The Credit Mobilier scandal and the whisky tax frauds were typical.

The Nation had just rid itself of chattel slavery, renouncing for all time the idea that men could be bought and sold and exploited like cattle. But it seemed to many that the Nation was on the verge of embracing a form of industrial slavery, which in its consequences was almost as vicious as the slavery which had just been abolished.

The great industrial projects of that age required men as well as capital for their execution. But, in the eyes of the promoters, men were as fungible as the ties of the railroad tracks which spanned the continent.

There was at least some effort to protect the capital placed in the ventures and to give it rights against the day of loss and failure. But there was little or no effort made to compensate for the arms and legs and eyes and lives of human beings that went into these great industrial undertakings. Workmen's compensation laws, employers' liability laws were still in the future. There were only a few who talked of social justice.

Many workers, living in company towns, were beholden as in feudal days to a master; and this time their master was a corporation.

Child labor was widespread. Long hours of work obtained for men and women alike. Unhealthy and unsanitary conditions of work were found on every hand. The 8-hour day was a radical idea. Trade unions were sabotaged. Collective bargaining was still largely a dream.

The claims of stockholders and bondholders against enterprises had long been recognized. But there was no similar recognition of the claims of labor. Workers had no right to work; they had no claim to a fair wage.

Men struck for more wages—so that they might live decent lives, so that they might raise sturdy sons. Strikebreakers were brought in; and the poorly organized strikers were usually defeated. A great industrialist handled his strike with these words: "There is nothing to arbitrate. The workers have nothing to do with the amount of wages they shall receive."

The reaction was severe. There were probably some men of violence on the scene who would destroy the system that gave birth to the new industrial oligarchy. But men of good will—zealots and reformers—were also pilloried as anarchists. So were those who only protested against the chains of their new slavery.

There were riots and bombs. Violence begat violence. Troops—Federal troops—were called out to enforce injunctions issued by Federal courts. These were injunctions not only to protect property but to keep plants open and to outlaw strikes. He who defied the injunction went to jail. He was in contempt of court.

A great restlessness swept the country. There was a depression in the early nineties and millions were unemployed. They swept over the Cascades and the Rockies on the move to Washington for currency reforms, for a public works program. Some stole trains and were jailed. So were the hitchhikers who rode the boxcars. Strikers, too, were jailed. Contempt of court became a weapon in industrial warfare. It was a powerful weapon. It alined the forces of government—the courts, the marshals, the troops—on the side of industry and against the workers. Government was there not to adjudicate the justness of the claims, not to mediate nor to arbitrate the disputes, but to crush and suppress those who protested against the injustices of the new industrial era.

These issues were injected into local and national politics. A distinguished line of muckraking journalists, starting with Henry Demarest Lloyd, emerged and wrote in words that all could understand an indictment against the age of plunder and exploitation.

Antimonopolists pressed their reforms. Those who protested against the great and uncontrolled power of industry often advanced as their cure-all the socialization of business. Many good people were alarmed. Mr. Justice Brewer, who severely criticized Altgeld, was of the view that "the cry for socialism comes largely from the dissipated, the lazy, the dishonest." Men stood condemned as un-American whose programs of reform were not more radical than the vision of our own Tennessee Valley Authority and Grand Coulee. The specter of socialism did indeed stalk the land. Mr. Justice Holmes, writing in 1897, observed that "when socialism first began to be talked about, the comfortable classes of the community were a good deal frightened"; in fact, the fear of socialism "influenced judicial action both here and in England." Many in high places believed that this society of ours was headed for a pitched battle along class lines.

It is easy in retrospect to draw a false picture of an age merely by emphasizing the extremes which history has recorded. The sketch of the gilded age which I present may suffer that defect. But whether it does or not, I think it fair to say that this is the view Altgeld had of the era. The enormous injustices which he saw violated his sense of social justice. He first wrote and spoke his protests; then he moved to action, giving and expecting no quarter.

As Governor of Illinois he put through a law aimed at sweatshops, at the employment of children who were under 14, and at the employment of women over 8 hours daily or more than 48 hours a week. The latter provision was held unconstitutional on grounds which reflected the dominant political philosophy of the age—that it violated both the employer's and the worker's freedom of contract. He put through a law in aid of collective bargaining, which made it a crime to dismiss an employee because of membership in a labor union, and thus sowed one of the first seeds out of which the National Labor Relations Act grew a generation or more later. He inaugurated a system of mediation and arbitration of labor disputes. He put through a law that outlawed limitation of production, price fixing, pooling agreements, and other restraints of trade. He got an inheritance tax law passed. He was offered $500,000 if he would sign a bill which would tighten the hold of the traction and other utility interests on the State. He vetoed the bill, stating it was a "flagrant attempt to increase the riches of some men at the expense of others by legislation." Thereafter he campaigned for public ownership of utilities.

He protested vigorously against the use of Federal troops to break strikes. He resisted the use of the injunction in industrial disputes. As Harry Barnard graphically shows, it was Altgeld who coined the phrase "government by injunction" and drove home at every opportunity the oppression which that practice fostered. The Norris-LaGuardia Act, passed in 1932, thus can trace its ancestry to him.

As governor he put his influence behind the development of a strong, progressive university. He feared that monopoly capital might spawn its own seats of learning and dominate the minds of men as well as their bodies. He also knew that the character of a university is a "force that creeps silently over the land, and by day and by night molds the sentiment of men." He therefore wanted a university which would represent the great common people of this country, which would be the friend and the helper of the toiling masses, of those people who do the work of the world.

He well knew the workings of the judiciary because he had been a judge. So when he saw rulings of courts which seemed to him prejudiced and partisan, which tipped the scales against the common man and in favor of the vested interests of that day, he cried out in protest. In 1893 he said, "The men who administer the laws are human, with all the failings of humanity. They take their biases, their prejudices, with them onto the bench. Upon the whole, they try to do the best they can; but the wrongs done in the courts of justice themselves are so great that they cry to heaven." He saw the corrupt use of wealth extending its influence so far as to create judges who do its bidding.

Altgeld knew what we are apt to overlook or forget, that the procedural safeguards of the Bill of Rights were designed to protect the citizen against the tyranny not only of legislatures and of executives, but of judges too. He knew that power could be abused, whether it was industrial power or judicial power. He knew his history and had read those chapters which reveal that even courts sometimes show a callous disregard for human rights. Their robes do not always conceal their tyranny. The framers of the Constitution, knowing that, designed the constitutional requirement of a fair trial to protect the accused, not only against the police and the prosecutors, but against the judges as well. All these things Altgeld knew; and that is perhaps why, as Charles A. Madison says, "He was harshest on judges who abused the spirit of our laws to the hurt of the people."

When Altgeld became governor four of the men found guilty in the Haymarket riots had been hanged. Three were still in prison. Altgeld reviewed their cases and granted them pardons. The pardon was for him a simple, uncomplicated act. For as he told Brand Whitlock, he knew he was "merely doing right." He felt that way because in his judgment "those fellows did not have a fair trial." Unfair attitudes of both judge and jury had, in his view, infected the trial.

The reaction was violent as Altgeld knew it would be. He at once experienced what many before and after him experienced—that he who calls for the application of the Bill of Rights to unpopular minorties, as well as to the other groups of the community, often becomes himself suspect. Thus when Altgeld insisted that even anarchists were entitled to due process of law, he was dubbed an anarchist. But a man whose devotion to our system of government was so great that he did not want it to become the tool of a capitalist oligarchy was not even remotely related to the anarchists. He was merely seeking to apply the philosophy of Jefferson to the work-a-day world of the nineties—due process of law for every man, whatever his race or creed or political faith; social justice for those at the bottom, as well as those at the top, of the economic pyramid.

But the label stuck. Then came the bitter years. He lost both his wealth and his health under the pressures of his enemies. The man who had the courage to adhere to the spirit of our Bill of Rights and extend its benefits to a despised and hated minority was hounded to his death by powerful influences bent on his destruction. Yet I am confident it will be recognized as true 100 years from now, as it is increasingly recognized today, that of those on the public stage in that era it was Altgeld who brought the brightest honor to the democratic ideal.

Some issues survive all ages. But most of them have a habit of being redefined in the special context of the next generation. Hence this review of the issues which drew Altgeld's fire has relevancy here only as a reflection of his philosophy. It is that philosophy which remains a vital factor in American life, though the issues which gave it content have been resolved or forgotten. Altgeld's philosophy has relevance to current American problems in at least two respects.

First. Altgeld placed human beings higher than the dollar in the national scale of values. A nation's industrial plant represents not only the daring of capital and the imagination of executives, but the blood and sweat of men. The men and women who compose a nation are its greatest natural resource—greater than its mines or forest or rivers. The nation is healthy only if its people are strong. The state must concern itself with their economic disasters. For the greater share of their troubles is due not to laziness but to economic forces beyond their control. There is in most men a lively sense of decency, of good will, of fraternity. The poor have those instincts, as well as those blessed with more worldly goods. The powers of government should be directed to protect them in their struggle to survive and in their efforts to live in dignity and to share the fruits of freedom.

Altgeld felt with Cardinal Manning that even a starving man had the right to eat. And he thought it was an insult for those who "started in life with good brains, good training and excellent advantages and who are now well-housed, well-clothed, and well-fed, who know nothing about the actual conditions or wants of the poor" to lecture them on "laziness or shiftlessness."

We will be wise if we carry that philosophy into the world problems which confront us today. There are active bidders for the good will and support of the common people of the world. There are emissaries of totalitarian regimes in the capitals of the world, bargaining with bags of wheat for the souls of men. They are our competitors; but we need not emulate their example.

The victims of war in Europe and Asia need and ask our aid. But these people must not be treated as if they can be purchased with the dollar. We must not manage this great crisis of democracy as if it were an auction; as if the peoples of the world were on the block and going to the highest bidder. The sensitiveness of people increases with their suffering. The peoples of the world have suffered beyond our comprehension. If we so manage this crisis as to leave the impression that our standards are mercenary, we will have generated a revulsion to our system which may well be irreparable.

As a result of their struggles all peoples of the world are closer together. Their common interests have made them parts of something which is bigger than their own country. That is true of us, too. We have wider horizons, greater obligations. So when we come to the aid of the distressed people of the world, we act not out of charity alone but in answer to a responsibility to support in peace the ideal for which we were willing to wage a war.

Someway, somehow, we must let the peoples of the world know that. We must reach behind the facade of ministers and cabinets and commissions and let the common people feel our warm handclasp. We must let them know that we understand their suffering. We must make sure they know that our desire is not to make them our satellites but to meet them as equals in a world where standards of decency and justice prevail.

My remarks are not directed to agencies of government. I refer more particularly to the role which all groups—civic, cultural, and religious—can play in keeping close ties with the peoples of the world. Behind even the iron curtain of eastern Europe are human beings whose thirst for freedom is as great as our own. We must manage to let them feel the warmth of our understanding and friendship. We must not let them become the forgotten people of the world. They must know that their problems are our concern too, that we respect their worth as human beings, that they also are part of the brotherhood which we have come to symbolize in the world. Governments may be imposed on these people. But the people themselves are the ultimate source of political power in every state. The pattern of an enduring peace will be found only in their hopes and aspirations.

Altgeld once said that "All great reforms, great movements, come from the bottom and not the top." That is true in the international as well as the national field. Thus it is doubly important that we do not lose the link which we have with all peoples whose dream is political, intellectual, and religious freedom.

Second. There is another current problem to which Altgeld's philosophy is relevant. On the domestic scene his courage and steadfastness of purpose are needed for protection of the civil liberties of our people.

We are apt to leave that task to the faraway court in the State or National Capital. Those courts, by their examples, exert a great influence. But the great percentage of the grist is found in the lower courts. A more accurate measure of the vitality of our Bill of Rights is not in the sporadic rulings of our highest tribunals but in the day to day attitudes of the lower courts. Moreover, it is not in the courts alone that the strength of our civil liberties is to be ascertained. The executive and legislative branches of government also have responsibilities for enforcement of the Bill of Rights. The administration of the voting booths, the habits of the police in law enforcement, the nature of the city's ordinances—these all are indices of the vitality of the Bill of Rights in the life of the community. So is the attitude of the community. For an indifferent community, like a misguided one, will surely breed disrespect for the standards embodied in the Bill of Rights.

We may never reach perfection in our practice of the ideals of the Bill of Rights. But there is no earthly reason why with education and organization it cannot become an increasingly potent force in the every-day lives of our people. The extent of a community's respect of the human rights of all of its citizens is in fact the measure of its progress in civilization. Altgeld broke the trail—making it easier for every man of conscience who followed.

The creation of a healthy community attitude is not the exclusive task of any one group. The task starts in the homes, in the schools, and in the churches. But city and State officials, editors, lawyers, and other groups of citizens have an important share of the responsibility. I remember recent instances where tyrannical judges sitting in local courts rode roughshod over the civil liberties of defendants charged with crime. In one case it was a doctor, in another an editor who thundered personal disapproval and started campaigns to rid their cities of those oppressive practices. They were indeed the ones that alerted the local bar associations and caused civil-liberties committees to be formed to patrol the local scene.

These are not always easy steps to take. When Altgeld insisted that even anarchists were entitled to due process of law, he himself was labeled a subversive influence. That will often be said today when one insists that the safeguards of the Bill of Rights be extended to all groups, including any minority group in our midst that may be at the whipping post or the subject of temporary hysteria.

Yes; it takes courage to stand between an unpopular minority and the community, insisting that our Bill of Rights was designed for the protection of all people whatever their race, creed, or political faith. The lawyer may feel uneasy when it seems that important clients may slip away because of his attitude. The editor may be tempted to stand mute by reason of the views of important advertisers. Even the clergyman may be under pressure to hold his tongue because of the influence of some of his parishioners.

But those who are devoted to the democratic ideal expressed in our Bill of Rights will take the direct and daring course. Once they are sure of their facts and know they are doing right they will, like Altgeld, espouse the cause of the victims of ignorance, prejudice, or passion. They, too, may be pilloried or cursed. But institutions become great by the greatness of the men who champion them, by the greatness of the advocacy that defends them. A people indifferent to their civil liberties do not deserve to keep them, and in this revolutionary age may not be expected to keep them long. A people who proclaim their civil liberties but extend them only to preferred groups start down the path to totalitarianism. They emulate either the dictatorship of the right or the dictatorship of the left. In doing this they erase a basic distinction between our system of government and totalitarianism.

To allow that to happen is to lose by default. Far better to lose pleading the cause of decency and of justice. Then we win greatness even in defeat, and leave behind a rich heritage for those who later rebuild on the ashes of our lost hopes. But there will be no failure if we adhere steadfastly to our faith. For the goal of people of all races is toward a system which respects their dignity, frees their minds, and allows them to worship their God in their own way. None has yet designed an article of political faith more suited to those ends than our own Bill of Rights.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDING OFFICER (Mr. KNOWLAND in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

ASSISTANT SECRETARY OF THE NAVY—NOMINATION CONFIRMED

Mr. WHERRY. Mr. President, as in executive session, I ask that the Senate now proceed to the consideration of the nomination of Mark Edwin Andrews, of Texas, to be Assistant Secretary of the Navy.

The PRESIDING OFFICER. Is there objection to the present consideration of the nomination? The Chair hears none, and the nomination is confirmed.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith of the confirmation.

LICENSING OF COMMODITY SHIPMENTS TO EUROPE

Mr. WHERRY. Mr. President, I learn from a release which came to me today that on January 15 the Department of Commerce issued an order that beginning March 1, 1948, all commercial shipments of commodities to Europe will require individual validated licenses. The Department of Commerce made that announcement yesterday through its Office of International Trade. I do not wish to comment at this time on the order, but I ask unanimous consent that it be printed at this point in the RECORD, as a part of my remarks.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

Beginning March 1, 1948, commercial shipments of all commodities to Europe will require individual validated licenses, the Department of Commerce announced today through its Office of International Trade.

All European countries are included in a new country group which will include all of the countries of continental Europe, the British Isles, Iceland, Turkey, the U. S. S. R., all Asiatic possessions of the U. S. S. R. and Turkey, Portugal, including the Azores and Madeira, Tangier, Spain, and all Spain's colonial possessions, and the Mediterranean islands.

The new procedure will require individual validated licenses for all shipments to these countries, but it does not affect those licensing regulations applicable to specified destinations within countries, such as the arrangements for shipments of gift packages.

There will be no change in the forms and procedures required for obtaining licenses for shipments of goods on the positive list. The positive list is a list of commodities in short supply for which export licenses are required to all destinations.

Department of Commerce officials emphasized that the new regulation does not mean that an embargo will be placed on any particular goods going to particular countries. They explained further that it is the policy of the United States Government to foster a healthy and stable trade relationship which can contribute to a balanced and expanding world economy. The new licensing policy has been established, it was stated, to insure a careful programing of the supply of essential goods to areas of greatest need, and to limit the shipment of commodities which can make no contribution to world recovery.

Mr. WHERRY. Mr. President, I wish to state that the step now being taken by the Department of Commerce, as set forth in the release to which I have just referred, was recommended last August by the Senate Small Business Committee. If that policy had been adopted at that time, I am quite satisfied that the acute situation now confronting us in regard to various commodities and articles in short supply, such as petroleum and steel, would not exist.

Mr. TAFT. Mr. President, will the Senator yield?

Mr. WHERRY. I am glad to yield.

Mr. TAFT. Would not the adoption of that policy at the time when it was advocated by the Senate committee also have materially lessened the black markets, or the gray markets, in regard to the handling of these products for which export licenses were issued?

Mr. WHERRY. That is the second point I was about to make, and I thank the Senator from Ohio for making part of my speech for me. It certainly would have done that, and I agree in toto with what the distinguished Senator from Ohio has said.

Mr. TAFT. I thank the Senator.

THE OIL SHORTAGE IN THE UNITED STATES

Mr. WHERRY. Mr. President, today there has come over the wires a report that the Secretary of Commerce has announced that the total exports of petroleum products for the first quarter of 1948 will be 12,000,000 barrels, or 480,000,000 gallons, and that these exports go to approximately 76 countries.

Although we welcome the news that the exports in the first quarter of 1948 are not being increased, and that news will be of great interest domestically, nevertheless, it does not bar the way to further exports to foreign countries. At the same time, I wish to call the attention of the Senate to the fact that there is a shortage of these products, and it is plaguing many sections of the United States at this time. I am quite satisfied that if it is not alleviated it will continue to cause discomfort and in some places suffering before the winter is over. I also point out that we were told recently, at another of our subcommittee hearings, that we must expect shortages of gasoline beginning next May. As one whose only interest arises through his connection with the investigations conducted by the Small Business Committee, which is a nonpartisan committee, I should like to call attention to some of the investigations we have made, what we have found, and what we feel should be done by way of improvement, unless conditions are to become worse instead of better. If the hour were not so late I should like to make a complete statement at this point for the RECORD, because I think it is a matter which deserves deep attention and consideration. However, by reason of the lateness of the hour I shall ask that my remarks be printed in the RECORD instead.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. SALTONSTALL. As a Senator from New England, a section of the United States which is vitally interested in the subject under discussion, I should be very much interested to hear what the Senator had in mind to say—if not the complete statement, then a summary of what the committee intends to do respecting the situation in the very near future, particularly in relation to fuel oil for New England, or what can be done by the Department.

Mr. WHERRY. The conclusions I have reached are to be found on page 10 of the statement I hold in my hand. I will act upon the suggestion made by the distinguished Senator from Massachusetts and state that on page 10 of the recommendations which I have to make, I call attention to the severe shortage now existing. The testimony is that we have ample sources of crude oil in the country to supply all our needs if we can get the crude to the places where it is needed.

For that reason it is going to be very necessary that there be a reconsideration of the policy which has been followed of sending steel from the United States, such as I described in the beginning of my remarks, to the Saudi Arabia oil field. If we can get the tubular pipe-line material into the sections of this country where it is needed we can provide not only transportation for fuel oils, but for natural gas as a heating fuel, and thereby get to the people of America, within the next year, fuel oil and natural gas, and alleviate fuel shortages in the future. It is my belief that commitments respecting steel exports should be reviewed with that idea in mind.

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. LUCAS. Am I correct in my understanding that there is no actual shortage of oil, but that the question is one of transportation, and a question of obtaining the proper facilities to produce oil?

Mr. WHERRY. I may say to the distinguished Senator from Illinois that that was the testimony up until last week. There is now apparently developing a shortage of gasoline, for the reason that the oil companies have used oil for the making of lower grades of petroleum products. That will cause a shortage of gasoline early in the spring. Up to now, however, the testimony of the oil industry itself and of the various departments has been that the question is one of transportation, and not a question of production of crude oil.

I believe the Senator from Illinois will recall that the committee invited him to be present at some of the hearings held in Chicago. The Senator at that time may have been obliged to attend some other committee meetings and could not attend the hearings held in Chicago. In June of this year in Chicago we held a series of meetings at which 258 independent oil men stated they had been cut off from all their supply of fuel oil. The testimony given by the independent oil men was that those who furnished oil to them said they had no fuel oil. When the suppliers of the independents went to their sources of supply for fuel oil and asked about fuel oil, the answer was always given, "We do not have the transportation." So I am quite satisfied that up until now, at least, the difficulty has been a question of transportation, not only of tank cars and tankers, but carrying lines between oil fields and points of distribution.

About the time of the hearings to which I have just referred, as I think the distinguished Senator from Illinois will recall, announcement was made of a commitment made by the Department of Commerce in the amount of 480,000 tons of steel, for the most part various sizes of steel pipe line, which was to be sent to Saudi Arabia upon the theory that Saudi Arabia was a part of world producing fields, and that if petroleum could be produced there and furnished to the Continent it would save the situation.

From the hearings we have had, however, it has been pointed out very definitely that it is not a question of production abroad; 330,000 tons of steel will build a pipe line, which will provide only transportation, and during the 3 years it will take to build it tanker transportation will have to be depended on. Oil will have to be carried until 1951 by tankers.

The Department of Commerce, after the protest referred to, did consider that question, and at that time did reduce exports for the fourth quarter for that particular project to 20,000 tons. But the commitment, I am satisfied, on the long-range period, still exists.

I hope that in light of what has been found, not only by the Small Business Committee, but from other sources of information, even from the Departments further consideration will be given by the Department of Commerce to this huge export of tubular goods out of the United States. The country is behind, in the matter of sinking wells, by 67,000 wells. That includes wildcat wells, as well as wells which should be sunk in proven fields. Had those wells been sunk, we could have kept up production, and the situation would undoubtedly have been much better than it is now.

Mr. President, once again I repeat that the shortage has resulted from lack of transportation.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. SALTONSTALL. What is the latest evidence before the Senator's committee on the subject of the surplus Navy tankers, and the tankers which were under the control of the Maritime Commission?

Mr. WHERRY. I think I can state to the Senator that the only thing we investigated was the T–2 type tankers. I think the testimony is undisputed that so far as the tanker situation is concerned worldwise, the situation is serious. Mr. Ball, Director of the Oil and

Gas Division, first told the committee that there was not sufficient tanker service, but later said there was. He has now said that he feels that if all the tankers are finally put into service which it has been claimed will be, they will possibly be ample. The difficulty is that T–2 tankers have been taken out of coastwise trade domestically. They have gone into world-wide transportation, and that has resulted in lack of domestic transportation.

For example, the committee protested to the President relative to the sale of the 100 United States T–2 tankers by the Maritime Commission to foreign nations and nationals, which I suppose the distinguished Senator from Massachusetts had in mind when he asked his question. Thirty-one of the tankers were firm commitments, which I imagine could not have been changed without a great deal of embarrassment to the administration, because the contracts had been made. Yet 83 of those tankers are being transferred to foreign governments, and will soon be flying foreign flags. They have been taken outside American jurisdiction and cannot operate in coastwise traffic. After they are once sold to a foreign government and sail under a foreign flag, of course, we do not have anything to say with respect to where they shall go.

Twenty-nine of the first 31 of those tankers on the trips made by them prior to their last trips, brought oil from the Gulf Coast to seaport points along the New England coast, in which the Senator from Massachusetts is vitally interested. Since then other tankers have been conditioned. It is our contention that we do not have enough tankers, that we are short of tankers, and that the further sale of tankers to foreign nations should be stopped.

It is the contention of the Interior Department that whether the tankers are carrying petroleum here or carrying petroleum in other parts of the world they are carrying petroleum, and that if petroleum is carried by tanker from Saudi-Arabia it will result in relieving the demand for oil at some other place. I suppose on a world-wide basis, which of course is very general, it would be very difficult to attack that conclusion. But I do say that the impact which the sale of these tankers has had upon the domestic economy is now being felt by way of acute shortages along the Atlantic coast.

Mr. McMAHON. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. McMAHON. The Senator knows that on June 3 of this year there were over 100 tankers that could have been bought by the major oil companies for $2,000,000 apiece, and the Senator knows that there were bids in for 8 of them, I believe. Is not that true?

Mr. WHERRY. In June of this year, according to the testimony, as I recall—I would have to refresh my memory—there were not on file a sufficient number of applications of United States citizens to indicate that they would take up the tankers that were offered for sale. I agree with that.

Mr. McMAHON. That is correct. If the major oil companies had bought those tankers and put them into operation——

Mr. WHERRY. At that time.

Mr. McMAHON. At that time, when they were offered for sale by the Government, there would not be any shortage of transportation.

Mr. WHERRY. But at that time the oil was being hauled by chartered tankers of the Maritime Commission, instead of tankers purchased for that purpose. The oil companies testified they were not in the transportation business, and that the tankers, which have now been sold, although they were not owned and were not purchased by those companies, were hauling oil for those companies to the people in Connecticut, as chartered boats; and I want to continue that charter; I think it is a good thing. I say now that when the charter expires—and I think it will expire in January—the Maritime Commission should have the right to continue chartering boats. There are many reasons for that. There is the question of labor. There is the question of knowing how to conduct the business. I am not sure about this, but I understand that one of the big reasons why they tried to stop the tankers being sold to foreigners was the fact that some of the companies carrying oil to foreign ports could get cheaper personnel than they could get in the United States. That was brought out in the evidence. But if the distinguished Senator from Connecticut would care to go through the hearings, I am quite satisfied he would find the question he asked was answered as I have answered it; I say to the distinguished Senator that in the Gulf-coast region oil has backed up, I think nearly 10,000,000 barrels over what it was a year ago, because there are not the transportation facilities with which to carry the oil.

Mr. McMAHON. Mr. President, will the Senator yield?

Mr. WHERRY. I will also say that the reserves on the east coast, including Maryland and New Jersey, and right on up into the Senator's territory, have been depleted in nearly the same degree.

Mr. McMAHON. Mr. President, will the Senator yield?

Mr. WHERRY. Yes; I am glad to yield.

Mr. McMAHON. It is my information that all the tankers laid up in the fleet will be out by the middle of February, with the exception of two. As the Senator knows, they would have been out before this, except that, first, the major oil companies did not buy them when they should have bought them. They saw oil burners being sold by the hundreds of thousands, and, unfortunately, the industry did not take steps to buy the tankers and put them into service. That is observation No. 1. Observation No. 2——

Mr. WHERRY. Just a moment. I have the floor.

Mr. McMAHON. I thought the Senator yielded to me.

Mr. WHERRY. I yielded to the Senator, but he has made an observation. Now, I should like to say, in reply to his observation, that the burden the Senator suggests be imposed upon an independent oil company which is dependent upon tankers, whether chartered or owned, to go out and buy tankers for transportation, is one thing. As the Senator has suggested, if the United States citizens' applications had been on file last June and if the companies had not depended upon the chartering provided for in the proposed legislation, to permit them to haul under a charter, what he has said would be correct; but I say also to the Senator that no commitments were made to any foreign country in June of this year; not one. The only time when a foreign commitment was made was in September, when it was brought out by the Maritime Commission that they had prorated the tankers around, after American dollars became short, and they could not pay for the transportation in Europe. Then they started to make these firm commitments, which, indeed, were not firm, and as late as September of this year there were 161 United States citizens' applications on file. They had no consideration, and I think every one of those foreign sales attempted to be made under the War Shipping Act was made illegally. That is what I think about it.

Mr. McMAHON. Mr. President, will the Senator yield further?

Mr. WHERRY. I yield.

Mr. McMAHON. As I said, all but two of the tankers will be in service by February 15. The delay in putting them in service has been caused by the fact, as the Senator knows, that they have had to be strapped. Due to a breaking in the middle of a couple of them on the east coast, it has been necessary to make this repair on all of them for safety's sake. I have it on very good authority, I will tell the Senator, even though we get everyone of those tankers but two into operation, that, because of a shortage of oil, we shall still have a shortage on the east coast that will not be solved this winter or next winter, or probably the winter thereafter, and we are probably going to have a shortage of gasoline for the next 3 years.

Mr. WHERRY. In respect to that observation, I should like to have the Senator read the report of the Small Business Committee which made its investigation since June. If he will just read it, he will find it is the testimony of all the companies, it is the testimony of the agencies, including Mr. Ball, Director of the Oil and Gas Division of the Interior Department, upon whom the Secretary of Commerce depends for his statistics, that there has been no shortage of oil, that it is a question of transportation. The only time any testimony has been offered that we are now approaching a shortage of oil came within the past 10 days, when Mr. Ball, at a later meeting, stated that the situation has changed, that it is not only a question of transportation, but now a shortage of oil is beginning to develop.

Mr. McMAHON. I will say to the Senator that the truth or the untruth of that assertion of Mr. Ball's will be fairly proved at the end of February or early March, when all the tanker fleet and all the capacity will be in operation, and I say to the Senator—and I have made

something of a study of the matter—that I am convinced we shall still, unfortunately, have a shortage due to a lack of supplies of oil.

Mr. WHERRY. I am not arguing that point at all. The Senator is confirming my statement. Certainly we are going to have a shortage of oil. We are going to have a shortage of oil because we have not had the transportation, for one thing. We are going to have a shortage of oil because we have not the wells. We are 67,000 wells behind in production.

Mr. McMAHON. Well, that is it; we are going to have a shortage even though we solve the transportation problem.

Mr. WHERRY. But it is only now, after the horse is out of the barn, after there has been a failure in transportation, and after the authorities have failed to give the allocations of steel to produce the wells, that they come up against this shortage of oil. I think it is with the absolute purpose of inviting rationing of petroleum products in this country, if the Senator wants to know what I think about it. I did not rise to discuss the former report I made, but the distinguished Senator says he knows something of the situation. I am glad he does, but he has not read the oil report, or he would not have said what he did state. Not only are the recommendations available, but the complete testimony is available

Mr. McMAHON. Mr. President, will the Senator yield?

Mr. WHERRY. Yes. Certainly I yield. I always yield to the Senator.

Mr. McMAHON. With all due deference to the magnificence and eloquence and great accuracy of the report that comes from the Senator's committee—and I have not read it——

Mr. WHERRY. That is what I thought.

Mr. McMAHON. I sat for about 10 hours one day listening to this story, over in the Interstate and Foreign Commerce Committee. As a result of that meeting of that committee, we did something about it.

Mr. WHERRY. What date was that?

Mr. McMAHON. Oh, I think that was probably about a month ago.

Mr. WHERRY. It was after the Special Committee to Study Problems of American Small Business made their report to the Senate.

Mr. McMAHON. In any event, without in any way wishing to detract from the magnificent work the Senator's committee did, or its report, all I can say to the Senator is that it is my opinion, based upon the evidence I have heard, that there is going to be a shortage of the product. I certainly hope that that is not going to be the case, but I think we make a mistake when we say that transportation, and transportation alone, is the cause, because the transportation problem is going to be solved, I am told, in the middle of February.

Mr. WHERRY. Will the Senator state who told him that?

Mr. McMAHON. Yes; Mr. Ball and the Maritime Commission.

Mr. WHERRY. Yes; Mr. Ball. Now, Mr. Ball is only with the Oil and Gas Division of the Department of the Interior. The testimony of Colonel Johnson, who probably knows more about transportation than anyone else in Washington, or in the United States, will inform the Senator just the contrary.

Mr. McMAHON. No; I do not think so.

Mr. WHERRY. That is his evidence. That is the evidence.

Mr. McMAHON. I do not think so. I think the Senator is talking about the situation when he took this evidence some weeks ago.

Mr. WHERRY. Mr. President, the Senator can, if he cares to, review the testimony. If the Senator will just read the record he will find that there is a shortage of oil, caused by a lack of transportation; and now, after the horse is out of the barn, of course, there is a shortage; and now the shortage is blamed on something else. I agree with the Senator there is a shortage, and there is going to be a shortage, and in the spring of this year the supply of gasoline will be the shortest it has been in a long time.

Mr. McMAHON. Mr. President, will the Senator yield?

Mr. WHERRY. I shall be glad to yield, if the Senator wants to add something constructive to this debate. If he does not, I shall refuse to yield.

Mr. McMAHON. Of course.

Mr. WHERRY. The Senator has not read the record.

Mr. McMAHON. I have not read the record, because it has not yet been printed.

Mr. WHERRY. After attending one hearing for 10 hours, the Senator is now an expert.

Mr. McMAHON. Oh, no.

Mr. WHERRY. He is an authority on transportation and on oil.

Mr. McMAHON. No.

Mr. WHERRY. And the basis for the meeting the Senator attended, the evidence relied on, was the evidence which we have gathered over the United States since last June, in innumerable hearings, evidence brought out from all the agencies and industry itself.

Mr. McMAHON. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Connecticut?

Mr. WHERRY. Yes; I am glad to yield to him.

Mr. McMAHON. There is no point in our disputing the question as to who has the greatest basis in fact for the opinions which he is voicing. I think the Senator ought to know that a subcommittee of the Committee on Interstate and Foreign Commerce has held many hearings on this subject. Let me point out to the Senator also while we are on the subject, that this shortage basically is caused by the fact that in the year 1947 this astounding thing occurred: We consumed, and are now consuming, at the rate of 586 gallons per capita a year. During 1940 we consumed at the rate of 325 gallons per capita. I think the Senator will agree that there has never been, in the entire history of the oil business, the stupendous increase in consumption which has occurred during the past 12 months. I think we can agree on that statement.

Mr. WHERRY. Certainly, I agree to that. Anyone knows that there has been an increase in petroleum consumption. He can find that out without looking at the record. Such increase has been brought about by the increased sale of oil burners, and by the 101 uses to which petroleum has been put. The amount of money in circulation is also a factor. The same is true of power, and many other things. I agree with the Senator that there is an increase in the domestic use of petroleum products; but the fact that we are producing as much this year as we produced in 1940 does not solve the problem. What we want to do is to produce enough in this country to have a supply which is equal to the demand. If we are to do that, we must have steel to build pipe lines. We must have steel to build tank cars. We must have steel in the proved producing fields to bring in new oil wells. Also we must provide pipe for wildcatters to enable them to bring in 60,000 wells which we do not have today.

Mr. McMAHON. I agree.

Mr. WHERRY. Then we are agreed on that point. I shall be glad now to insert the remainder of my remarks as a statement. I think I have pretty well covered the subject.

I have attempted to do this in the service of a committee which has worked hard. I have no quarrel with the subcommittee of the Committee on Interstate and Foreign Commerce. We have gone to any town where the independent oil dealers have asked us to go. We have done a great deal of work in processing claims. The theory which the Senator is advancing, of a pool to allow the big companies to supply hardship cases, would bypass every independent oil operator in the United States. If that is what the Senator wants, very well; but I am not for it. So long as I am chairman of the Small Business Committee, we will continue to work for the interests of small business and the interests of consumers.

Mr. McMAHON. Mr. President, will the Senator yield for one observation?

Mr. WHERRY. I yield.

Mr. McMAHON. I appreciate what the Senator has said about the bypassing of independent dealers.

Mr. WHERRY. That is taking place in the Senator's own State. Today we processed a claim involving an attempt to take oil out of a pool and furnish it to another dealer in the Senator's own State, and thereby bypass the independent dealer who has been the normal distributor. Not only is the independent dealer bypassed, but the customers whom that dealer has built up over the years are bypassed. They have no opportunity to get oil unless they beg the major company to furnish it to them.

That is the kind of service which our committee is giving to independent operators throughout the country. It is the kind of service which they must have. It is the kind of service which will keep them in business. I have worked for 5 years on the Small Business Committee, and I shall continue to work to preserve the small businessman.

Mr. McMAHON. I am delighted to hear of the Senator's devotion.

Mr. WHERRY. The Senator can come over to our committee and render a much greater service than by helping the big companies bypass the independent dealers.

Mr. McMAHON. Only today I issued a statement in which I said that unless there were some relief for the independent dealers, if a plan to squeeze them out of business was to be used, then there was nothing for Congress to do except to go to allocation and control.

Mr. WHERRY. Mr. President, I ask that the remainder of my statement be printed in the RECORD at this point as a part of my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WHERRY IN CONNECTION WITH OIL SHORTAGE AND ACTIVITIES OF THE OIL SUBCOMMITTEE OF THE SENATE SMALL BUSINESS COMMITTEE

Mr. President, may I call to the attention of the Senate today a situation, the seriousness of which we are all aware, but about which the administration and the responsible executive agencies are closing the door after the horse is out of the barn.

I refer, gentlemen, to the shortage of fuel oil and other petroleum products which is plaguing many sections of the country at this time, and which will continue to cause suffering and discomfort throughout the balance of the winter.

And beyond that, gasoline will be short in the spring.

The Oil Subcommittee of the Senate Small Business Committee, of which I am chairman, has been investigating problems of oil supply and distribution since June 1947. Since that time, this committee has repeatedly called the attention of Government officials and of the public and the press to situations which were brewing in the oil industry and to related problems which would affect the supply of oil in the immediate months to come.

In August and September of 1947, the Oil Subcommittee conducted hearings throughout the Middle West, investigating complaints of small businessmen in the oil industry; independent producers, distributors, and dealers who are faced with a variety of problems in securing oil for distribution.

Again and again in its investigations the subcommittee was faced with the complaint that development of new oil resources and the building of pipe lines was greatly hampered by the lack of steel.

Better utilization of tank cars for the transportation of oil also became a major project for the Oil Subcommittee, based upon its findings that cars were in desperate short supply and that steel was not available to build sufficient new ones.

The Oil Subcommittee has sought the cooperation of the Office of Defense Transportation and of major oil companies and tank-car companies to require that tank cars be used to their full capacity; that hoarding and banking of tank cars be discontinued; that unloading and turn-around time be speeded up; and that truck transports be substituted for tank cars on short hauls.

While in the midst of Midwest hearings in September 1947, the Oil Subcommittee learned that the Department of Commerce was about to issue an export license to the Trans-Arabian Pipe Line Co. to build a pipe line across Saudi-Arabia, which would eventually require 480,000 tons of steel, principally welded pipe—pipe for which the oil industry in the United States had been begging for years—not to mention the needs of other industries.

On September 23, I protested the licensing of steel pipe for the Saudi-Arabian pipe line and called the attention of the Secretary of Commerce to the fact. I quote from my letter to him of that date:

"Shortages of critical steel in this country have made it impossible for many American businessmen to plan production on a sound basis. The lack of water-well casing and water pipe in the farm and grazing areas of the Nation is acute and may well affect food production. There is a very serious possibility that homes will be cold and businesses forced to operate at reduced levels of operation this winter because of the shortage of steel pipe with which to transport heating oil and gas. Development of new oil resources and the construction of pipe lines in this country have been hampered by the shortage of pipe and tubular goods."

On October 9 the Oil Subcommittee called a hearing with high officials of the Government, including Mr. Forrestal, Secretary of National Defense; Mr. Lovett, then Acting Secretary of State; Mr. Averell Harriman, Secretary of Commerce; Mr. W. John Kenney, Under Secretary of the Navy; and representatives of the Army-Navy Petroleum Board, all of whom participated in the decision to approve 480,000 tons of steel for the Saudi Arabian pipe line.

At the request of the participants, this meeting was a closed session, due to the implication that national defense considerations had played a part in the decision to approve the shipments. Out of this meeting came the answer that the development of the Saudi Arabian pipe line was in the national interest, and in the opinion of our Secretary for National Defense, "was more important than the development of any oil resource in the United States or the Western Hemisphere."

The subcommittee has proved to its satisfaction in subsequent open hearings that either these high officials of our Government were misled in information presented to them, or there is something afoot in our policy-making branch of Government that is neither healthy nor in the best interests of our national welfare.

Not satisfied with the equivocal outcome of its initial inquiry on the Saudi Arabian pipe deal, the Oil Subcommittee pursued the question with other Government officials involved in the decision to develop the project, and also with representatives of the independent oil producers, who have a large stake in and much to lose by the shipment of critically needed steel pipe away from this country.

Mr. Max Ball, Director of the Oil and Gas Division of the Department of the Interior, which Division and agency has the especial responsibility for protecting the interests of the oil and gas industry in this country, reported to the Oil Subcommittee on October 15 that he had voted against the licensing of pipe for Saudi Arabia pipe line on July 14, 1947.

But in the intervening weeks between then and September 22, when the license had been approved, Mr. Ball reversed his opinion on the grounds that the pipe line would make the Saudi Arabian oil more accessible, and would relieve a serious shortage of tanker transportation for carrying that oil from the Persian Gulf to the Mediterranean.

It is interesting to note here that the Secretary of Commerce, who has the last word in deciding upon an export license, made his decision at the Cabinet level and not upon the advice of his own Office of International Trade. That office had the courage to tell him that the shipment of 480,000 tons of steel, or any sizable portion of that export per quarter, could not be justified with regard to the domestic economy. Other Government agencies—the Housing and Home Finance Agency and the Office of Defense Transportation also refused to go along with the Department of Commerce's action.

Their objections were of little avail.

The Maritime Commission, which agency should know more about the tanker situation than any other Government agency, was not asked for advice on the Saudi Arabian pipe deal.

When the Oil Subcommittee continued its investigation to find out the true situation with respect to tankers, it found the Maritime Commission busily engaged in selling 100 United States fleet tankers to foreign nations and nationals, in what I believe to be a violation of the law.

Counter to the claim that we must build a pipe line for Middle East oil because of a tanker shortage, valuable tankers have been sold to foreign nations who may or may not transport oil to American ports, and who cannot operate in coastwise traffic in the United States, according to the law.

It was clearly indicated in testimony given by Maritime Commission officials that instructions to sell these tankers had come from the White House upon advice of the State Department.

The sales were still further supported by an opinion of the Attorney General on December 9, which validated 83 of the tanker sales. Seventeen of the allotment were saved for sale to United States citizens.

To the average person, the story of oil supply and distribution would ordinarily seem very remote from a Saudi Arabian pipe line and the sale of tankers to foreign nations. Unfortunately it is as involved as most of our international policies are these days.

The ridiculousness of the situation is that the Oil Subcommittee has found that the building of a Middle East pipe line does not mean increased supplies of oil, simply improved transportation. Furthermore, the pipe line cannot be built for 3 years and in that time the oil must still be shipped by the same number of tankers that have been required right along. A pipe line built with that steel in this country would be put into active use carrying oil to homes and to industry.

World-minded Government officials, it seems, have given too little consideration to the critical and immediate shortages in our own country.

The general impression has also been created by Government officials that oil resources in the United States have been stripped, and for that reason it was most advisable for us to develop Middle East fields.

The oil industry as well as representatives of the Bureau of Mines have told the Oil Subcommittee otherwise.

Sixty-seven thousand more oil wells could have been drilled by the oil industry since the war, had the oil-drilling equipment been available.

One hundred and seventy to one hundred and eighty trillion cubic feet of natural gas are available in this country.

Recovery of oil from shale is only in its infancy. One pilot plant, experimenting with processes, is in operation at this time by the Bureau of Mines; 92,000,000,000 barrels of oil is presently estimated as recoverable from shale in this country.

When we think that Germany fought the recent war on oil in a large measure recovered from shale, from coal, and from natural gas we can realize how far behind the times we are in the development and utilization of our natural resources.

Government officials have repeatedly told this committee that the "cream" has been taken from the oil fields in the United States. A perfect refutation of that is the new oil field which has just been opened in west Texas, covering an area of 800 miles. At this moment 886 barrels per day are being taken out through a ⅜-inch pipe. When brought into full production, this field will be one of the largest developments in recent years.

This shows what American ingenuity can accomplish—even hampered by lack of materials.

Steel pipe and tubular goods are needed to bring this oil, and oil from other fields in the United States, to points of distribution. Instead, it is the apparent attitude of Government officials that our steel should be hurried off to Saudi Arabia, rather than devoted to our own hemisphere.

As to the advisability of the development of a Saudi Arabian pipe line, we have only to study the Arabian-Palestine situation and the Greek and Iran difficulties.

Information has reached me that work on the western end of the Saudi Arabian pipe line has been stopped and work can only be done on the eastern end—a possibility which was discussed with our Defense and State Department officials in the committee's October 9 closed session.

As to the need for tankers in domestic transportation, we have only to read the newspaper accounts of the fuel-oil shortage along the east coast, particularly in the Northeastern States.

From all over the country the Senate Small Business Committee has received complaints and appeals for assistance in serious oil shortages. As the heating season has progressed, the committee has held emergency hearings and consultations with the oil industry and with independent dealers to negotiate emergency shipments of fuel oil and gasoline, where it is necessary to keep families warm, and municipal services running.

In these negotiations, the Oil Subcommittee has attempted to work out solutions to shortage problems, which would result in distribution of oil through smaller independent dealers in proportion to that distributed through company-owned outlets of the major oil-producing companies. Thus, in its emergency assistance, the Oil Subcommittee has sought to restrain monopolistic practices in the oil industry.

Since early summer, then, the Oil Subcommittee has been warning the public; has been proclaiming the oncoming oil shortage; has been trying to prevent the "giving away" of critical materials needed for the production and transportation of oil.

The subcommittee has been trying to effect improved use of tank-car facilities and to promote the more equitable distribution of petroleum and petroleum products by major oil companies to independent distributors and dealers—these small businessmen who through the years have served normal channels of trade.

A report issued by the Senate Small Business Committee on December 18 emphasized these efforts, and called attention to other recommendations by the Oil Subcommittee.

Through all of the warnings and evidence produced by the almost continuous hearings of the Oil Subcommittee over the past 6 months, the responsible Government agencies seemed to have their eyes averted.

On January 15 the Secretary of Interior, Mr. Krug, called a meeting with representatives of industry to discuss voluntary distribution agreements, in accordance with the new Economic Stabilization Act.

Now that the oil emergency is well advanced, I am glad to see that the Interior Department is moving to step into the breach.

In a letter to the National Petroleum Council on setting up this meeting with industry, Secretary Krug has now indicated a need for action in the field of distribution of petroleum and its products. Reference is made to Senate Small Business Committee findings, and to a similar need for action with respect to the allocation of transportation and equipment.

In subsequent releases, Secretary Krug has stated that a return to wartime controls over petroleum are necessary. This is what I mean by closing the door after the horse is out of the barn.

A solution to the immediate oil emergency, which has been suggested by representatives of industry and representatives of State coordinating committees who have met with the Department of Interior, has been what is called a hardship pool of oil, whereby major oil companies would supply needy cases which have been screened by the State committees.

This is what I call a consumers' hardship pool, and although it may serve consumer needs which we all desire, it will also distribute the oil exclusively through major oil company outlets.

This is a phase of the oil shortage which the Senate Small Business Committee has been fighting and will continue to fight. The smaller, independent businessman in the oil industry has the right of survival, the right to the customers which he has developed over the years, and the right to his share of the Nation's natural resources.

My purpose in this description of the activities of the oil subcommittee is to show the disinclination on the part of executive agencies to profit by the hearings and investigations conducted by a Senate committee, or to be forewarned of national emergencies in time to take preventive action.

We are in the midst of a heating oil crisis today, because Government agencies have not taken precautions to safeguard our domestic supplies, our transportation facilities, or provide the means for the development of new oil resources.

And let me warn you today that when the weather lightens and the use of cars and motor transportation increases, you will hear loud complaints on the lack of gasoline—for business purposes, for family use, and recreation.

We have ample sources of crude oil in this country to supply all of our needs.

The stumbling blocks and limitations in production and distribution of petroleum products are the problems which must be overcome.

We must make sure that the inordinately large exports of oil to Canada or any other foreign country are reduced to normal.

We must watch that foreign-aid oil needs are kept at a minimum and that they are satisfied from sources of oil outside this hemisphere so long as domestic demand exceeds supply.

We must be alert that foreign-aid needs are not disguised under the heading of military requirements.

We must insist that shipments of steel pipe and tubular goods in export be granted only with full consideration being given to domestic needs for these products;

We must see that United States tankers are retained for domestic transportation insofar as the need exists;

We must assure that tank car facilities are used efficiently and that exports of steel are so handled to permit sufficient new tank and freight cars to be constructed;

We must reveal and correct practices in the oil industry which are smothering independent business and affecting the flow of petroleum products from originating fields, and through the various stages of distribution until its delivery to the customer.

During the war we were spurred on by the warning phrase, "too little, too late." It seems to me this is equally appropriate today. If the proper effort were applied to solve such problems as the oil shortage before they reach emergency proportions, there would be no need even to propose the distasteful step of government control and regulation.

ADJOURNMENT TO MONDAY

Mr. WHERRY. I move that the Senate adjourn until Monday next at 12 o'clock noon.

The motion was agreed to; and (at 5 o'clock and 29 minutes p. m.) the Senate adjourned until Monday, January 19, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 16 (legislative day of January 14), 1948:

DIPLOMATIC AND FOREIGN SERVICE

The following-named persons, now Foreign Service officers of class 3 and secretaries in the diplomatic service, to be also consuls general of the United States of America:

William H. Beach, of Virginia.

Frederik van den Arend, of North Carolina.

Walter J. Stoessel, Jr., of California, now a Foreign Service officer of class 5 and a secretary in the diplomatic service, to be also a consul of the United States of America.

DEPARTMENT OF COMMERCE

John R. Alison, of Florida, now holding recess appointment, to the position of Assistant Secretary of Commerce.

POST OFFICE DEPARTMENT

Vincent C. Burke, of Kentucky, to be First Assistant Postmaster General, Post Office Department, vice Jesse M. Donaldson, appointed Postmaster General.

COLLECTOR OF CUSTOMS

Bernice Pyke, of Cleveland, Ohio, to be collector of customs for customs collection district No. 41, with headquarters at Cleveland, Ohio. (Reappointment.)

UNITED STATES ATTORNEYS

Frank E. Flynn, of Arizona, to be United States attorney for the district of Arizona. (Mr. Flynn is now serving in this office under an appointment which expired October 2, 1947.)

William W. Hart, of Illinois, to be United States attorney for the eastern district of Illinois. (Mr. Hart is now serving in this office under an appointment which expired October 1, 1947.)

Leslie E. Given, of West Virginia, to be United States attorney for the southern district of West Virginia. (Mr. Given is now serving in this office under an appointment which expired October 2, 1947.)

UNITED STATES MARSHALS

John J. Barc, of Michigan, to be United States marshal for the eastern district of Michigan. (He is now serving in this office under an appointment which expired November 4, 1947.)

Jack R. Caufield, of Oregon, to be United States marshal for the district of Oregon. (Mr. Caufield is now serving in this office under an appointment which expired October 28, 1947.)

Leland Stanford Finney, of Virginia, to be United States marshal for the western district of Virginia, vice John White Stuart, deceased.

Edney Ridge, of North Carolina, to be United States marshal for the middle district of North Carolina. (Mr. Ridge is now serving in this office under an appointment which expired October 1, 1947.)

CIRCUIT COURTS, TERRITORY OF HAWAII

Willson C. Moore, of Hawaii, to be fourth judge of the First Circuit, Circuit Courts, Territory of Hawaii. (Judge Moore is now serving in this office under an appointment which expired December 27, 1947.)

Albert M. Cristy, of Hawaii, to be second judge of the First Circuit, Circuit Courts, Territory of Hawaii. (He is now serving in this office under an appointment which expired December 27, 1947.)

Cable A. Wirtz, of Hawaii, to be circuit judge of the Second Circuit, Circuit Courts, Territory of Hawaii. (Judge Wirtz is now serving in this office under an appointment which expired December 27, 1947.)

UNITED STATES PUBLIC HEALTH SERVICE

The following-named candidates for appointment in the Regular Corps of the Public Health Service:

To be assistant nurse officers (equivalent to the Army rank of first lieutenant), effective date of acceptance:

Mary E. Ingle
Mary Matula
Elizabeth J. Haglund
Genevieve T. Piette
Frances C. Wickham

To be junior assistant nurse officer (equivalent to the Army rank of second lieutenant), effective date of acceptance:

Mary Ellen Deady

IN THE ARMY

The following-named persons for appointment in the Regular Army of the United States, in the grade of second lieutenant and arm or service specified, with dates of rank to be determined by the Secretary of the Army, under the provisions of section 506 of the Officer Personnel Act of 1947:

Samuel T. Rhodes, Infantry.
Andrew J. Roach, Quartermaster Corps.
Robert K. Weaver, Infantry.

IN THE COAST GUARD

The following-named officers of the United States Coast Guard to be rear admirals:

Gordon T. Finlay, to rank from December 30, 1947.

Wilfrid N. Derby, to rank from December 31, 1947.

Edward H. Smith, to rank from January 1, 1948.

William K. Scammell, to rank from January 2, 1948.

Earl G. Rose, to rank from January 3, 1948.

Eugene A. Coffin, to rank from January 4, 1948.

Joseph E. Stika, to rank from January 5, 1948.

Halert C. Shepheard, to rank from January 6, 1948.

The following-named officers of the United States Coast Guard to be captains:

Floyd J. Sexton
Gordon W. MacLane
John E. Whitbeck
Charles T. Henley, Jr.
John N. Heiner
John Trebes, Jr.
Joseph Greenspun
Louis W. Perkins
Raymond T. McElligott
Louis B. Olson
Charles W. Dean
Roderick S. Patch
Harold G. Bradbury
Arthur G. Hall
Norman C. Manyon
Frederick C. Hingsburg
Paul K. Perry
Norman H. Leslie
Albert M. Martinson
Raymond J. Mauerman
George E. McCabe
Lee H. Baker
Charles W. Harwood
Severt A. Olsen
Joseph S. Rosenthal
Frank M. Meals
Thomas Y. Awalt
Alfred C. Richmond
Walter R. Richards
Roy L. Raney
Russell E. Wood
Clarence H. Peterson
James A. Hirshfield
Joseph D. Conway
Frank T. Kenner
George C. Carlstedt
John Rountree
William W. Kenner
Stephen P. Swicegood
Henry C. Perkins
Charles W. Thomas
Frank A. Leamy
John H. Byrd
Beckwith Jordan
Niels S. Haugen
Harold S. Berdine
Clarence C. Paden
Donald G. Jacobs
Carl E. Guisness
George W. McKean
William J. Austermann
Gaines A. Tyler
Ira E. Eskridge
Christopher J. Sullivan
Harry W. Stinchcomb
Paul B. Cronk
Harold C. Moore
Richard M. Hoyle
Stanley J. Woyciehowsky
Kenneth K. Cowart
Rutherford B. Lank, Jr.
Dale R. Simonson

CONFIRMATION

Executive nomination confirmed by the Senate January 16, 1948:

DEPARTMENT OF THE NAVY

Mark Edwin Andrews to be Assistant Secretary of the Navy.

SENATE

MONDAY, JANUARY 19, 1948

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

O God, we turn to Thee in the faith that Thou dost understand and art very merciful.

Some of us are not sure concerning Thee; not sure how Thou dost reveal Thy will to us; not sure that it is possible for us to know, in every decision, just what Thou desirest Thy servants to do. But if we could say, "This is what God wants us to do," none would vote against it, and how much time and temper and money would be saved.

Make each one of us willing to yield himself to Thee in prayer and obedience.

Come and deliver us, O Holy Spirit, for we have no hope in ourselves. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 19, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. IRVING M. IVES, a Senator from the State of New York, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. IVES thereupon took the chair as Acting President pro tempore.

ATTENDANCE OF A SENATOR

HARLEY M. KILGORE, a Senator from the State of West Virginia, appeared in his seat today.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Friday, January 16, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

NOTICE OF HEARING ON NOMINATION OF CABLE A. WIRTZ TO BE CIRCUIT JUDGE OF SECOND CIRCUIT, CIRCUIT COURTS, TERRITORY OF HAWAII

Mr. WILEY. Mr. President, on behalf of the Committee on the Judiciary, and in accordance with the rules of the committee, I desire to give notice that a public hearing has been scheduled for Tuesday, January 27, 1948, at 10:30 a. m., in the Senate Judiciary Committee room, room 424, Senate Office Building, upon the nomination of Cable A. Wirtz, of Hawaii, to be circuit judge of the Second Circuit, Circuit Courts, Territory of Hawaii. Judge Wirtz is now serving in this office under an appointment which expired December 27, 1947. At the indicated time and place, all persons interested in the nomination may make such representations as may be pertinent. The subcommittee consists of the Senator from Kentucky [Mr. COOPER], chairman; the Senator from Oklahoma [Mr. MOORE]; and the Senator from Nevada [Mr. MCCARRAN].

NOTICE OF HEARING ON NOMINATION OF ALBERT M. CRISTY TO BE SECOND JUDGE OF FIRST CIRCUIT, CIRCUIT COURTS, TERRITORY OF HAWAII

Mr. WILEY. Mr. President, on behalf of the Committee on the Judiciary, and in accordance with the rules of the committee, I desire to give notice that a public hearing has been scheduled for Tuesday, January 27, 1948, at 10:15 a. m., in the Senate Judiciary Committee room, room 424, Senate Office Building, upon the nomination of Albert M. Cristy, of Hawaii, to be second judge of the First Circuit, Circuit Courts, Territory of Hawaii. He is now serving in this office under an appointment which expired December 27, 1947. At the indicated time and place, all persons interested in the nomination may make such representations as may be pertinent. The subcommittee consists of the Senator from Kentucky [Mr. COOPER], chairman; the Senator from Oklahoma [Mr. MOORE]; and the Senator from Nevada [Mr. MCCARRAN].

NOTICE OF HEARING ON NOMINATION OF WILLSON C. MOORE TO BE FOURTH JUDGE OF FIRST CIRCUIT, CIRCUIT COURTS, TERRITORY OF HAWAII

Mr. WILEY. Mr. President, on behalf of the Committee on the Judiciary, and in accordance with the rules of the committee, I desire to give notice that a public hearing has been scheduled for Tuesday, January 27, 1948, at 10 a. m., in the Senate Judiciary Committee room, room 424, Senate Office Building, upon the nomination of Willson C. Moore, of Hawaii, to be fourth judge of the First Circuit, Circuit Courts, Territory of Hawaii. Judge Moore is now serving in this office under an appointment which expired December 27, 1947. At the indicated time and place, all persons interested in the nomination may make such representations as may be pertinent. The subcommittee consists of the Senator from Kentucky [Mr. COOPER], chairman; the Senator from Oklahoma [Mr. MOORE]; and the Senator from Nevada [Mr. MCCARRAN].

NOTICE OF HEARING ON NOMINATION OF VINCENT C. BURKE TO BE FIRST ASSISTANT POSTMASTER GENERAL

Mr. LANGER. Mr. President, I wish to give notice of a hearing on the nomination of Vincent C. Burke to be First Assistant Postmaster General, to be held in the committee room of the Senate Committee on Post Office and Civil Service a week from tomorrow at 10 o'clock in the morning.

MEETING OF COMMITTEE DURING SESSION OF THE SENATE

Mr. CAIN. Mr. President, I ask unanimous consent that the Rent Subcommittee of the Committee on Banking and Currency be permitted to sit in a hearing this afternoon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT OF SECRETARY OF TREASURY ON STATE OF THE FINANCES

A letter from the Secretary of the Treasury, transmitting, pursuant to law, a report on the state of the finances of the Federal Government for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Finance.

SPECIAL ASSISTANTS, DEPARTMENT OF JUSTICE

A letter from the Attorney General, transmitting, pursuant to law, a report showing the special assistants employed during the period from July 1, 1947, to December 31, 1947, under the appropriation "Compensation of Special Attorneys, etc., Department of Justice" (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

REPORT OF FEDERAL TRADE COMMISSION

A letter from the Chairman of the Federal Trade Commission, transmitting, pursuant to law, the thirty-third annual report of that Commission for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Interstate and Foreign Commerce

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate by the Acting President pro tempore and referred as indicated:

A petition of sundry citizens of the State of Florida, praying for the enactment of the so-called Townsend plan, providing old-age assistance; to the Committee on Finance.

A paper in the nature of a petition, from the State Committee of the Liberal Party of New York State, relating to the control of in-

flation; to the Committee on Banking and Currency.

Petitions of sundry members of the Adult Council, Henry Street Settlement Anti-Inflation Council, and the Madison House Vladeck Tenants' League, all of the lower east side, New York City, N. Y., praying for the reestablishment of price controls; to the Committee on Banking and Currency.

A resolution adopted by the Mothers' Club of Public Schools 84 and 8, Long Island City, N. Y., favoring statehood for Hawaii and Alaska; to the Committee on Public Lands.

A letter in the nature of a memorial from the Council of American Master Mariners, of New York, N. Y., signed by Thomas W. Sheridan, secretary, remonstrating against the enactment of legislation providing for the construction of the St. Lawrence seaway; ordered to lie on the table.

LETTERS FROM UNITED STATES CITIZENS TO RELATIVES ABROAD

Mr. WILEY. Mr. President, I have in the past made a number of suggestions of methods by which American citizens can help in an adequate information program overseas. I am grateful for the many kind comments which I have received on my suggestions, as well as for the constructive criticisms from newspapers and others. At this time I ask unanimous consent that there be printed in the RECORD some further suggestions which I have along this general information line.

As will be noted from my present and previous comments, my purpose in making these suggestions is to prevent our information program from becoming just one more bureaucratic operation involving vast expenses to the Government, and not accomplishing the results intended by Congress. I was glad to vote for the Voice of America bill, but I believe that the big question in connection with this legislation, as with so many other bills, is as to how it will be administered. Will it be done efficiently, economically, in cooperation with private news gathering and distributing agencies, or will it fail, as so many other high-minded projects have failed, because of bureaucratic maladministration?

I want American newspapers and American citizens to make their fullest contributions to our overseas publicity program, rather than have some Government propaganda mill here in Washington try to do the job alone.

Mr. President, at the last meeting of the Senate the senior Senator from New Mexico [Mr. HATCH] presented for the RECORD an editorial from the Washington Post, which brought out an idea about which I have thought a great deal, namely, that we must see to it that in the utilization of the press, the radio, and other instrumentalities, we do not find ourselves in the position of subsidizing them, because that would give Russia an opportunity to say, "You see, this is just a propaganda machine operated and paid for by the United States Government."

Mr. President, I ask unanimous consent that a statement prepared by me entitled "United States Citizens Should Write 'Liberty Letters' to Relatives Abroad as Part of Information Program" be printed in the RECORD following my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

UNITED STATES CITIZENS SHOULD WRITE LIBERTY LETTERS TO RELATIVES ABROAD AS PART OF INFORMATION PROGRAM

Supplementing my suggestions of December 4 and 10, I believe that every United States citizen who has relatives or friends in foreign countries has a responsibility to constitute himself, or herself, a one-man or one-woman agency for the purpose of spreading abroad the truth about America.

There is no single better medium of publicity than in the letters that come straight from the hearts of millions of American citizens of foreign birth or of foreign ancestry to the folks in the land of birth of their fathers or the foreign land of their own birth. These letters can become a flood of liberty correspondence which will really ring the bell, the liberty bell, behind the iron curtain.

The following points might be stressed in such a program:

REPORTING OUR AID

1. American citizens writing abroad should write about true conditions in America, stressing the many blessings that we enjoy in this land of freedom, the comforts, the conveniences, as well as stressing the aid that we have already extended abroad for the noblest of humanitarian purposes—both as individuals and as a Nation.

2. They should ask questions from their relatives in order to determine just what misinformation must be counteracted, what false stories are being told about America. Then these untruths should be squarely antidoted in the Americans' letters.

3. Supplementing the correspondence, Americans writing abroad might include newspaper clippings or magazine articles whenever possible. If necessary, these clippings and articles may be from foreign-language papers and magazines. Of course, such papers and magazines should be themselves of unimpeachable loyalty and integrity to our country.

MAGAZINE SUBSCRIPTIONS

4. Americans should take out newspaper and magazine subscriptions wherever possible, if necessary, to foreign-language publications here and send these subscriptions abroad. From time to time inquiry might be made as to whether or not the papers are being actually received or read, in order that they might not simply go unread or confiscated by some government. Wherever possible, encouragement should be given so that foreign folks will reciprocate the Americans' courtesy by perhaps sending clippings or whole issues or subscriptions to their papers to us. In this way we can get an idea of what is written in their press, and they can get an idea of what is written in our press. At the same time, we will avoid making the mistake of constantly giving and never seeking anything in return. This constant giving serves to cheapen our own gift, which is not fully respected and appreciated, simply because it is a one-way and free gift. On the other hand, if foreign folks got in the habit of reciprocating our courtesies they, in turn, would more highly prize the things that we send to them.

BEING WELL INFORMED OURSELVES

5. Americans should make sure when they write abroad that they themselves are adequately informed about our country and about all that it means to the world. This means that it is up to us to know the basic documents of our own land, the basic meaning of our freedoms, and the meaning of our way of life as contrasted with the totalitarian way of life.

Every American letter going overseas can become a message of liberty and an inspiring challenge to foreign people. It can be a means of closer and warmer understanding of the United States and of what we are trying to do in the fields of foreign and domestic policy. Years ago liberty letters to relatives abroad swelled the floodtide of immigration here. Today such letters can swell the wave of democracy—the wave of the future—throughout the world.

REPORT OF A COMMITTEE

The following favorable report of a committee was submitted:

By Mr. FLANDERS, from the Committee on Banking and Currency:

S. 1842. A bill to amend the Second Decontrol Act of 1947; with amendments (Rept. No. 826).

PERSONS EMPLOYED BY COMMITTEES WHO ARE NOT FULL-TIME SENATE OR COMMITTEE EMPLOYEES

The ACTING PRESIDENT pro tempore laid before the Senate reports for the months of September, October, and November 1947, from the chairman of a certain committee, in response to Senate Resolution 319 (78th Cong.), relative to persons employed by committees who are not full-time employees of the Senate or any committee thereof, which were ordered to lie on the table and to be printed in the RECORD, as follows:

SPECIAL COMMITTEE INVESTIGATING THE NATIONAL DEFENSE PROGRAM
UNITED STATES SENATE,
January 1948.

To the Senate:

The above-mentioned committee hereby submits the following report showing the names of persons employed by the committee who are not full-time employees of the Senate or of the committee for the month of September 1947, in compliance with the terms of Senate Resolution 319, agreed to August 23, 1944:

W. Harold Lane, 1436 North Inglewood, Arlington, Va., Bureau of Internal Revenue; annual rate of salary, $7,102.20.

O. BREWSTER,
Chairman.

SPECIAL COMMITTEE INVESTIGATING THE NATIONAL DEFENSE PROGRAM
UNITED STATES SENATE,
January 1948.

To the Senate:

The above-mentioned committee hereby submits the following report showing the names of persons employed by the committee who are not full-time employees of the Senate or of the committee for the month of October 1947, in compliance with the terms of Senate Resolution 319, agreed to August 23, 1944:

W. Harold Lane, 1436 North Inglewood, Arlington, Va., Bureau of Internal Revenue; annual rate of salary, $7,102.20.

O. BREWSTER,
Chairman.

SPECIAL COMMITTEE INVESTIGATING THE NATIONAL DEFENSE PROGRAM
UNITED STATES SENATE,
January 1948.

To the Senate:

The above-mentioned committee hereby submits the following report showing the names of persons employed by the committee who are not full-time employees of the Senate or of the committee for the month of November 1947, in compliance with the terms of Senate Resolution 319, agreed to August 23, 1944:

W. Harold Lane, 1436 North Inglewood, Arlington, Va., Bureau of Internal Revenue; annual rate of salary, $7,102.20.

O. BREWSTER,
Chairman.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. IVES (for himself and Mr. BALDWIN):

S. 2015. A bill to amend and extend the maximum rent provisions of Public Law 129, Eightieth Congress, and for other purposes; to the Committee on Banking and Currency.

(Mr. LODGE introduced Senate bill 2016, to authorize the Secretary of the Army to accept enlistments of aliens in the Regular Army, which was referred to the Committee on Armed Services, and appears under a separate heading.)

By Mr. LANGER:

S. 2017. A bill granting a permanent civil-service status to certain persons whose names were passed over in making appointments from civil-service registers prior to World War II, and for other purposes; to the Committee on Post Office and Civil Service.

S. 2018. A bill for the relief of Satish Chandra Mondol; and

S. 2019. A bill conferring jurisdiction on the Court of Claims to hear, determine, and render judgment on the claim of Armand Gregoire against the United States; to the Committee on the Judiciary.

By Mr. DOWNEY:

S. 2020. A bill for the relief of Jong Ah Ying; and

S. 2021. A bill for the relief of Jesus T. Esteva and his family; to the Committee on the Judiciary.

By Mr. BROOKS:

S. 2022. A bill for the relief of Robert E. Cryor; to the Committee on the Judiciary.

(Mr. TOBEY (by request) introduced Senate bill 2023, to provide for the national defense, to protect the national security, and to promote the general welfare of the United States by providing for the effective distribution of materials and facilities, and for other purposes, which was referred to the Committee on Banking and Currency, and appears under a separate heading.)

(Mr. FLANDERS introduced Senate bill 2024, to provide for the allocation of meat, which was referred to the Committee on Banking and Currency, and appears under a separate heading.)

By Mr. HILL (for himself and Mr. SPARKMAN):

S. 2025. A bill for the relief of the families of certain merchant seamen who lost their lives in an airplane crash; to the Committee on the Judiciary.

(Mr. McCARRAN introduced Senate bill 2026, to provide for a temporary increase in compensation for employees of the Board of Education of the District of Columbia, which was referred to the Committee on the District of Columbia, and appears under a separate heading.)

By Mr. BUCK (by request):

S. 2027. A bill to amend an act entitled "An act to regulate the practice of the healing art to protect the public health in the District of Columbia," approved February 27, 1929, as amended;

S. 2028. A bill to amend the law relating to the possession, carrying, and acquisition of pistols and other dangerous weapons in the District of Columbia, and for other purposes;

S. 2029. A bill to amend section 11 of an act entitled "An act to regulate barbers in the District of Columbia, and for other purposes";

S. 2030. A bill to provide that compensation of members of the Alcoholic Beverage Control Board of the District of Columbia shall be fixed in accordance with the Classification Act of 1923, as amended; and

S. 2031. A bill defining and regulating the practice of the profession of engineering and creating a Board of Registration for Professional Engineers in the District of Columbia; to the Committee on the District of Columbia.

S. 2032. A bill to provide priorities for veterans in the occupancy of Government residential property; to the Committee on Banking and Currency.

S. 2033. A bill to amend the act entitled "An act to authorize an increase of the number of cadets at the United States Military Academy and to provide for maintaining the corps of cadets at authorized strength," approved June 3, 1942 (56 Stat. 306); and

S. 2034. A bill to increase the number of midshipmen allowed at the United States Naval Academy from the District of Columbia; to the Committee on Armed Services.

By Mr. GURNEY:

S. 2035. A bill to provide for government, relief, economic rehabilitation, reorientation, and reeducation in occupied areas in foreign countries, and for other purposes; to the Committee on Armed Services.

By Mr. TOBEY (by request):

S. J. Res. 173. Joint resolution to continue until July 1, 1949, the authority of the maritime commission to sell, charter, and operate vessels, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BUCK (by request):

S. J. Res. 174. Joint resolution to create a Committee on Capital Clearance for the District of Columbia; to the Committee on the District of Columbia.

ENLISTMENT OF ALIENS IN THE REGULAR ARMY

Mr. LODGE. Mr. President, I introduce for appropriate reference a bill to authorize the Secretary of the Army to accept enlistments of aliens in the Regular Army, and I ask unanimous consent that an explanatory statement by me together with the bill may be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The bill introduced by the Senator from Massachusetts will be received and appropriately referred, and, without objection, the bill and explanatory statement will be printed in the RECORD.

The explanatory statement presented by Mr. LODGE is as follows:

STATEMENT BY SENATOR LODGE

I am introducing a bill "to authorize the Secretary of the Army to accept enlistments of aliens in the Regular Army" and ask that it be referred to the Committee on Armed Services. Reasons for introducing such a bill are as follows:

1. Due to the failure of the voluntary recruiting system to attract a sufficient number of men, we are at present between 60 percent and 70 percent short of the minimum strength of five divisions which the Army requires in combat ground troops, not counting occupation forces.

2. There is no published plan to make up this difference. The only manpower plan which is proposed, in addition to the continuation of voluntary recruiting, is universal military training and this will, at least initially, have an adverse effect on the question of getting sufficient personnel for a standing army, because about 80,000 officers and enlisted men would be needed to put it into operation. There is also reason for believing that universal military training may discourage voluntary enlistments, although the expectation of its enthusiastic proponents is that many young men, after having been in the Army for a while, will like it so well that they will want to stay for 3 years more.

3. Unless we are prepared to return to selective service, which is indeed a last resort, this leaves two methods for bringing the combat Army up to strength.

4. One method is to increase the number of civilian employees in the Army so as to relieve the soldiers of as many noncombat duties as possible, thereby enabling them all to serve in combat units.

5. The other method is to recruit aliens for occupation duty. In connection with this proposal it should be said:

A. That it will fill up the gaps which the present system of voluntary recruiting is unable to fill;

B. That it will relieve the very bad condition which is caused by the policy now being forced on us by circumstances of sending 18-year-old boys to Germany. I am told reliably, Mr. President, that to many of these boys this is such a demoralizing experience that they will never get over it. Moreover, it is not possible to send the older men to replace the 18-year-olds because they have all served their time abroad and it would not be fair to them to send them back.

C. There are many young men of Polish, Czech, anti-Nazi German, Russian, Byelorussian, and other stocks who would gladly serve. There is no doubt that such men could be obtained and that they would be loyal and efficient soldiers. Such troops could certainly be used to garrison occupied areas such as Germany, Austria, Trieste (Korea, Japan, and the Pacific islands).

D. Their number should be limited—say 50,000 at the start, and in any case never more than 15 percent of our total Army.

E. After 5 years of service—a most thorough screening period—the alien would be eligible for American citizenship. We should get some fine and useful citizens as a result of this process.

F. This also offers a partial solution to the problem which is presented by the displaced persons in that it would enable the entrance of certain selected persons into the United States after satisfactory military service.

G. Although the Secretary of the Army has a technical power to take this step today, I believe that such an important step should not be taken on a technical basis but with the deliberate approval of Congress.

6. It has been said that perhaps the Russian Government might not like it. Insofar as that argument is concerned, it seems superfluous to say that our efforts to please the Russians have not been crowned with success and that the Soviets are sure to vilify us no matter what we do. Having already compared our President with Hitler, it is hard to see what there is left for them to say. Moreover, they have not criticized the French Foreign Legion and could not consistently criticize us for recruiting aliens. There are, in fact, plenty of reports that they have done the same thing.

7. Although it is not an exact parallel, it is interesting to note that Britain in her zone in Germany has eased her manpower problem by using Danish, Norwegian, and Belgian units.

8. It should be noted that we ourselves are at present employing non-American citizens to guard our supplies, etc., in Germany so that no new principle would be established.

9. Transcending all these arguments, however, is the fact that there are millions of people the world over who look to the United States as the guardian of democracy. It is only right that the young and able-bodied men among these people should have the privilege of helping us carry the torch. For many reasons, they cannot put their own armies into the field. But their young men can help, and should be enabled to do so. We may well recall the help which Lafayette, Kosciusko, Steuben, and Pulaski rendered in the War of the Revolution and which their descendants gave in the Civil War. It may also be remembered that the United States Army has had successful experience in organizing units of foreign troops. Both the

Indian scouts and the Philippine scouts were in this category.

10. It can in any case not be denied that the failure of the voluntary recruiting system leaves us with the alternative of either adopting conscription, hiring more civilians, or enlisting aliens for occupation duty. Conscription is a desperate last resort. The hiring of civilians will probably not greatly affect the total, and, in any event, would not cure the present evil of exposing our 18-year-old soldiers to demoralizing influences in occupation areas. This leaves the alien soldier as the best solution.

11. If we do nothing, we shall have an Army which is not prepared for war. Without a combat army to seize and hold bases neither our Navy nor our Air Force can give us a balanced armed force which is immediately ready to fight. Earlier this year I offered an amendment to a bill providing for 70 air groups. No one is a stronger believer in that branch of the service than I am. But modern war is a balanced affair between the three branches of land, sea, and air. We must be ready now because we are told that in the war of the future there will be no time to prepare. As General Eisenhower has said, the issue may well be decided in the first 60 days.

The bill (S. 2016) to authorize the Secretary of the Army to accept enlistments of aliens in the Regular Army, introduced by Mr. LODGE, was read twice by its title, referred to the Committee on Armed Services, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Secretary of the Army, under such regulations as he may prescribe, is authorized until June 30, 1950, to accept original enlistments in the Regular Army from among qualified aliens not less than 18 years of age nor more than 35 years of age for an enlistment period of not less than 5 years for service outside the continental United States, its territories and possessions.

SEC. 2. Provisions of law prohibiting the payment of any person not a citizen of the United States shall neither apply to aliens who enlist in the Regular Army under the provisions of section 1 of this act nor to their dependents and beneficiaries.

SEC. 3. So much of section 2 of the act approved August 1, 1894 (28 Stat., ch. 179, 216; 10 U. S. C. 625), as amended, as reads "; and in time of peace no person (except an Indian) who is not a citizen of the United States, or who has not made legal declaration of his intention to become a citizen of the United States, shall be enlisted for the first enlistment in the Army" is hereby suspended until June 30, 1950.

ALLOCATION AND DISTRIBUTION OF CERTAIN MATERIALS AND FACILITIES

Mr. TOBEY. Mr. President, by request I introduce for appropriate reference a bill to provide for the national defense, to protect the national security, and to promote the general welfare of the United States by providing for the effective distribution of materials and facilities, and for other purposes, and I ask unanimous consent that a letter dated January 16, 1948, addressed to me by William Averell Harriman, Secretary of Commerce, may be printed in the RECORD, together with the bill.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred, and, without objection, the letter presented by the Senator from New Hampshire, together with the bill, will be printed in the RECORD.

The letter presented by Mr. TOBEY was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF COMMERCE,
Washington, D. C., January 16, 1948.

The Honorable CHARLES W. TOBEY,
United States Senate, Washington, D. C.

DEAR SENATOR TOBEY: At the hearing on January 14, 1948, before your committee, you requested that I send to you a draft of a proposed bill which was intended to carry out the recommendations made by the President with respect to allocations. A draft of such a bill is attached.

In substance this draft is similar to the proposed bill which was transmitted on December 8, 1947, to the chairman of the Joint Committee on the Economic Report. Some deletions have been made by reason of the enactment of the joint resolution of December 30, 1947 (Public Law 395, 80th Cong.), which makes unnecessary certain provisions contained in the earlier draft. Thus the provisions for continuing of allocation powers over railroad facilities and equipment and for continuing export controls, and the provisions limiting immunity under the antitrust laws, all contained within Public Law 395, are no longer in this draft. In addition, the new draft includes fuels and nitrogenous compounds suitable for the production of nitrogenous fertilizer materials within the listed items over which complete allocation powers, including rationing, would be granted.

Fuels were included at the request of the Department of the Interior, and the nitrogenous compounds were included as result of the studies of our Office of Materials Distribution, which feels that the granting of this power would assist materially in the production of needed supplies of fertilizers.

I appreciate very much your interest in this matter as well as the productive discussion of these questions which took place when I appeared before your committee.

Sincerely yours,

W. A. HARRIMAN,
Secretary of Commerce.

The bill (S. 2023) to provide for the national defense, to protect the national security, and to promote the general welfare of the United States by providing for the effective distribution of materials and facilities, and for other purposes, introduced by Mr. TOBEY (by request), was read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That this act may be cited as the "Priorities and Allocations Act of 1948."

FINDINGS OF FACT AND DECLARATION OF POLICY

SEC. 2. (a) Certain materials and facilities continue in short supply at home and abroad as a result of the war. There is a danger that these scarce materials and facilities will not be available for essential purposes at home and abroad, and that the demand for these scarce materials and facilities will result in further inflationary rises in prices. These inflationary price increases and maldistributions of scarce materials caused by war and its aftermath are impeding, and unless corrected will continue to impede the free flow of commerce among the several States and with foreign nations. Voluntary cooperative efforts, which must be assisted and encouraged by the Government, will help to eliminate or reduce the effects of these scarcities, but these voluntary efforts alone will not be sufficient to protect the United States from the effects of the scarcities. The continued exercise of certain limited emergency powers is required to complete the orderly reconversion of the domestic economy from a wartime to a peacetime basis, to protect the health, safety, and welfare of the American people, to promote the national defense, to aid in preventing inflationary price increases, and to support the foreign policy of the United States.

(b) The Congress hereby declares that it is the general policy of the United States to continue emergency wartime controls of materials and facilities to the extent necessary for the following purposes:

(1) to protect the domestic economy from the injury which would result from adverse distribution of scarce materials and facilities which basically affect industrial or agricultural production or the cost of living or where adverse distribution would result in failure to fulfill requirements essential to the domestic economy, or would contribute to inflationary price rises;

(2) to promote production at home and abroad of materials critically needed in the United States which basically affect industrial or agricultural production or the cost of living or where inadequate supplies of such materials are resulting in failure to fulfill requirements essential to the domestic economy, or are contributing to inflationary price rises;

(3) to make available materials and facilities to countries in need consistent with the foreign policy of the United States; and

(4) to aid in carrying out the foreign policy of the United States.

PRIORITIES AND ALLOCATIONS

SEC. 3. In order to effectuate the policies set forth in section 2 of this act, subsections 2 (a) (1) and 2 (a) (2) of the act of June 28, 1940 (54 Stat. 676) as amended by the act of May 31, 1941 (55 Stat. 236) and as further amended by the Second War Powers Act 1942 (56 Stat. 177), are amended to read as follows:

"SEC. 2 (a) (1) (A) In order to carry out the policies set forth in section 2 of the Priorities and Allocations Act of 1948, the President may, in his discretion, assign priority to deliveries under any contract or order over deliveries under any other contract or order, and he may require acceptance of and performance under such contracts or orders in preference to other contracts or orders for the purpose of assuring such priority, whenever the President finds that either of the following circumstances exists:

"(i) The prompt filling of the contract or order is needed to bring about an early increase, or prevent a substantial reduction or break-down, in the production of a material or facility, at home or abroad, which is critically needed in the domestic economy and which basically affects industrial or agricultural production or the cost of living, or

"(ii) The head of the agency designated by the President for this purpose certifies that the prompt filling of the order is of high public importance and essential to carrying out the foreign policy of the United States, especially foreign-aid programs; and the head of the appropriate agency designated by the President to act under paragraph (B) or (C) certifies that proposed action will not have an unduly adverse effect upon the domestic economy of the United States.

"(B) Whenever the President in his discretion determines that a shortage in the supply of any of the materials or facilities listed below is interfering or may interfere with the fulfillment of the over-all requirements for the defense of the United States and for carrying out the foreign policy of the United States or is resulting in an adverse distribution of the material or facility which is causing or threatens to cause a failure to fulfill requirements essential to the domestic economy or which will contribute to inflationary price increases, the President may allocate such material or facility (and the facilities needed for its production) in

such manner, upon such conditions and to such extent as he may deem necessary or appropriate in the public interest and to carry out the policies set forth in section 2 of the Priorities and Allocations Act of 1948, and he may assign priority to deliveries of such material or facility under any contract or order over deliveries under any other contract or order, and may require acceptance of and performance under such contract or order for the purpose of assuring such priority, in order to carry out such policies:

"(i) Tin and tin products, except for the purpose of exercising import control of tin ores and tin concentrates; antimony; cinchona bark and quinidine, when held by any Government agency or after acquisition (at any time) from any Government agency, either directly or through intermediate distributors, processors, or other channels of distribution, or when made from any materials so acquired; and nitrogenous fertilizer materials and nitrogenous compounds suitable for use in the production of nitrogenous fertilizer materials; and fuels;

"(ii) Iron and steel, including rolled, forged, cast, and drawn products, for the purpose of limiting the less essential uses and of assuring, by the use of priorities and set-asides, availability for the most essential of the other uses;

"(iii) Grain and grain products; rice and rice products; dried beans and peas; fats and oils of vegetable, animal, or marine origin (including oil-bearing materials, fatty acids, margarin, soap, and soap powder); livestock and poultry and their products; milk, and its products.

"(C) Whenever the President in his discretion determines, after a public hearing held upon reasonable notice, including publishing a notice in the Federal Register, copies of which shall be sent to the President pro tempore of the Senate and the Speaker of the House of Representatives, and after such investigation as he may deem appropriate, that a shortage in the supply of any other material or facility which basically affects industrial or agricultural production or the cost of living is interfering or may interfere with the fulfillment of the over-all requirements for the defense of the United States and for carrying out the foreign policy of the United States, or is resulting in an adverse distribution of such material or facility which is causing or threatens to cause a failure to fulfill requirements essential to the domestic economy or which will contribute to inflationary price increases, the President may allocate such material or facility, in such manner, upon such conditions, and to such extent as he may deem necessary or appropriate in the public interest and to carry out the policies set forth in section 2 of the Allocations and Priorities Act of 1948, this authority being limited, however, to restricting the less essential uses and assuring, by the use of priorities and set-asides, availability for the most essential uses; and he may assign priority to deliveries of such materials and facilities under any contract or order over delivery under any other contract or order and may require acceptance of and performance under such contract or order for the purpose of assuring such priority, in order to carry out such policies.

"(D) Whenever the President deems it necessary, in order to carry out the policies set forth in section 2 of the Priorities and Allocations Act of 1948, he may restrict and control inventories of any scarce material which basically affects industrial or agricultural production or the cost of living, so as to carry out such policies, without regard to the requirements of paragraphs (B) and (C) above, and in so doing he may establish specific inventory limits for different classes of persons and different materials.

"(E) Discrimination against orders or contracts to which priority is assigned or for which materials or facilities are allocated under this act or under any regulation or order issued under this act, either by charging higher prices for such orders than for other generally comparable orders, or by imposing different terms and conditions for such orders than for other generally comparable orders, is prohibited.

"(F) The President may issue such rules, regulations, and orders as he may deem necessary to carry out this subsection 2 (a) (1), and any such rules, regulations, and orders may contain such classifications and differentiations and may provide for such adjustments and reasonable exceptions as in the President's discretion are necessary or proper to carry out the policies set forth in section 2 of the Priorities and Allocations Act of 1948.

"(2) This section 2 (a) as amended (including the amendments made by title III of the Second War Powers Act, 1942, and section 3 of the Priorities and Allocations Act of 1948) shall be in force until March 31, 1950, except that the Congress, by concurrent resolution, or the President may designate an earlier time for the termination of any power, authority, or discretion under such section 2 (a) as amended. The amendments to such section 2 (a) (1) made by section 3 of the Priorities and Allocations Act of 1948 shall not be construed to limit or restrict the authority conferred by Public Law 24, Eightieth Congress, approved March 29, 1947, or Public Law 395, Eightieth Congress, approved December 30, 1947."

EXEMPTION FROM ADMINISTRATIVE PROCEDURE ACT

SEC. 4. Section 2 (a) of the Administrative Procedure Act, as amended, is amended by inserting after "Sugar Control Extension Act of 1947" the following:

"Section 2 (a) of the act of June 28, 1940 (54 Stat. 676) as amended; Public Law 24, Eightieth Congress;"

ADMINISTRATION

SEC. 5. (a) The President may exercise any part or all of the power, authority, and discretion conferred on him by this act through such existing department agency, Government corporation, or official of the Government, as he may direct.

(b) Each officer or agency to which the President delegates any of the powers, discretion, and authority conferred by this act shall make a quarterly report, within 30 days after each quarter, to the President and to Congress of its operations under this act. Each such report shall contain a statement of the controls which it exercised under this act during the quarter, and detailed information as to the manner in which the controls were exercised and the effects of the controls. Each such report shall contain a statement of the facts and reasons for the continuance of each of the controls exercised during the quarter.

APPROPRIATIONS

SEC. 6. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the purposes of this act, including the employment of personnel for the purpose of rendering of assistance and encouragement to voluntary cooperative action on the part of various segments of the public. Any funds appropriated pursuant to the authority of this section, section 9 of the act of December 30, 1947 (Public Law 395, 80th Cong.), may be expended without regard to the Civil Service Act and rules.

MISCELLANEOUS

SEC. 7. Title XV, section 1501 of the Second War Powers Act, 1942, is amended to read as follows:

"SEC. 1501. Titles I, II, IV, V, VII, and XIV of this act and the amendments to existing laws made by such titles shall remain in force only until March 31, 1947. After the amendments made by any such title cease to be in force, any provisions of law amended thereby shall be in full force and effect as though this act had not been enacted."

SEPARABILITY

SEC. 8. If any provision of this act, or the application of such provision to any person or circumstances shall be held invalid, the validity of the remainder of the act, and the applicability of such provision to other persons or circumstances shall not be affected thereby.

SALARY INCREASE FOR DISTRICT OF COLUMBIA TEACHERS

Mr. McCARRAN. Mr. President, I introduce for appropriate reference a bill to give a temporary cost-of-living salary increase to the school teachers of the District of Columbia, and I ask unanimous consent that the bill, together with an explanatory statement of the bill by me, may be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The bill introduced by the Senator from Nevada will be received and appropriately referred, and, without objection, the bill, together with an explanatory statement, will be printed in the RECORD.

The bill (S. 2026) to provide for a temporary increase in compensation for employees of the Board of Education of the District of Columbia, introduced by Mr. McCARRAN, was read twice by its title, referred to the Committee on the District of Columbia, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That all employees whose compensation is prescribed by the act entitled "An act to fix and regulate the salaries of teachers, school officers, and other employees of the Board of Education of the District of Columbia, and for other purposes," approved July 7, 1947, shall receive additional compensation at the rate of $1,000 per annum, during the period covered by this act as provided in section 2; except that any such employee shall be paid only such additional compensation as will not cause his aggregate compensation to exceed the rate of $8,000 per annum.

SEC. 2. This act shall take effect as of January 1, 1948, and shall terminate at the end of the first month thereafter in which the index of the cost of living for the District of Columbia as reported by the United States Bureau of Labor Statistics shall be equal to or lower than it was on January 1, 1943.

The explanatory statement presented by Mr. McCARRAN was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR M'CARRAN ON TEACHERS' PAY BILL FOR THE DISTRICT OF COLUMBIA

I have just introduced a bill designed to give a temporary cost-of-living salary increase to the school teachers of the District of Columbia.

The aim and intent of this bill is justice. I am aware that the salaries of teachers in the District of Columbia have been increased in recent years. I am proud that I took a substantial part in securing that increase. But the real wages of these deserving men and women is less today than it was 5 years ago, in spite of the dollar increase which they have received; and 5 years ago, the woeful inadequacy of teachers' salaries here in the Nation's Capital led the Congress to take action for the correction of a situation which nearly everyone agreed demanded correction.

It was in 1943 that I introduced the bill to give Washington's teachers a temporary salary increase to help meet the rising cost of living until we could pass legislation to bring their salaries more nearly in line with what they ought to get. I was happy to sponsor that bill, and to lead the fight for its enactment. It was enacted; and subsequently,

after several years of effort, we were able to secure enactment of permanent legislation revising the salary scale for employees of the Board of Education of the District of Columbia.

That permanent legislation, however, went little if any beyond the increases granted earlier, on a temporary basis. But the cost of living continued to go up in the meantime, and has not halted.

The bill which I have introduced would grant additional compensation to Washington teachers at the rate of $1,000 per year, except that such additional compensation, or any portion of it, would not be paid if the result would be to raise the aggregate rate of compensation above $8,000 per year.

This increased compensation would be effective as of January 1, 1948, and would continue until the cost-of-living index for the District of Columbia, as reported by the United States Bureau of Labor Statistics, gets back down to the level it occupied on January 1, 1943.

THE WORLD PROBLEM WE FACE—ADDRESS BY JOHN COWLES

[Mr. CAPPER asked and obtained leave to have printed in the RECORD an address entitled "The World Problem We Face," delivered by John Cowles, of the Minneapolis Star and Tribune, which appears in the Appendix.]

THE FOOD SITUATION IN THE AGRICULTURAL WEST—LETTER FROM GERALD GORDON

[Mr. CAPPER asked and obtained leave to have printed in the RECORD a letter addressed to him by Mr. Gerald Gordon, secretary-manager of Associated Industries, Topeka, Kans., in which he gives information as to the food situation in the agricultural West, which appears in the Appendix.]

SHIPMENTS OF HEAVY INDUSTRIAL EQUIPMENT TO RUSSIA—LETTER FROM CHARLES K. MORRILL

[Mr. LODGE asked and obtained leave to have printed in the RECORD a letter from Charles K. Morrill, county commander of the AMVETS of Essex County, Mass., relating to shipments of heavy industrial equipment to Russia, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—LETTER FROM SOUTHWORTH LANCASTER

[Mr. SALTONSTALL asked and obtained leave to have printed in the RECORD a letter on the subject of the St. Lawrence seaway, by Mr. Southworth Lancaster, traffic manager of the Boston port authority, published in the Boston Sunday Herald, January 18, 1948, which appears in the Appendix.]

AID TO EUROPE—COMMODITY CREDIT CORPORATION SCHEDULES OF INVENTORIES AND DELIVERIES

[Mr. SALTONSTALL asked and obtained leave to have printed in the RECORD a letter written by Ralph S. Trigg, Deputy Administrator, dated December 31, 1947, enclosing schedules of inventories held by the Commodity Credit Corporation as of October 31, 1947, and schedules showing deliveries to cash-paying foreign governments, for the fiscal year 1947 and the quarter ending September 30, 1947; which appears in the Appendix.]

THE FREEDOM TRAIN

[Mr. HILL asked and obtained leave to have printed in the RECORD a letter by Miss Patti Bees, entitled "Why I Want to See the Freedom Train," from the Montgomery Advertiser and Journal, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—EDITORIAL FROM THE DETROIT NEWS

[Mr. WILEY asked and obtained leave to have printed in the RECORD an editorial entitled "Read it Carefully, Senators!" from the Detroit News of January 18, 1948, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—EDITORIAL COMMENT

[Mr. AIKEN asked and obtained leave to have printed in the RECORD editorials relating to the St. Lawrence seaway, one from the Brattleboro Daily Reformer of January 14, 1948, another from the Rutland Herald of January 13, 1948, which appear in the Appendix.]

HIGH TAX ON BIG INCOMES HELD HURTING PRODUCTION—ARTICLE BY FRANCIS P. DOUGLAS

[Mr. THYE asked and obtained leave to have printed in the RECORD an article entitled "High Tax on Big Incomes Held Hurting Production," by Francis P. Douglas, published in the Sunday Star, Washington, D. C., on January 18, 1948, which appears in the Appendix.]

THE JEWISH WAR VETERANS OF THE UNITED STATES

[Mr. BROOKS asked and obtained leave to have printed in the RECORD a résumé of the history and objectives of the Jewish War Veterans of the United States of America, which appears in the Appendix.]

DOUBLE HARNESS FOR THE ST. LAWRENCE—ARTICLE FROM THE NEW YORK TIMES MAGAZINE

[Mr. AIKEN asked and obtained leave to have printed in the RECORD an article entitled "Double Harness for the St. Lawrence," from the New York Times magazine of January 18, 1948, which appears in the Appendix.]

COOPERATIVE HOUSING VENTURE PAYS OFF—ARTICLE BY EARL ARONSON

[Mr. BREWSTER asked and obtained leave to have printed in the RECORD an article entitled "Cooperative Housing Venture Pays Off," by Earl Aronson, from the Washington Post of January 18, 1948, which appears in the Appendix.]

THE COST OF FOREIGN AID—ARTICLE BY FRANK C. WALDROP

[Mr. WHERRY (on behalf of Mr. ROBERTSON of Wyoming) asked and obtained leave to have printed in the RECORD an article with respect to the cost of foreign aid, by Frank C. Waldrop, published in the Washington Times-Herald, January 18, 1948, which appears in the Appendix.]

THE CALENDAR

Mr. WHERRY. Mr. President, in view of the fact that the calendar was called last week, I shall ask unanimous consent that the call of the calendar be dispensed with today. The intention is to call the calendar a week from today, and I will ask Members of the Senate to take notice of this announcement.

Mr. WHERRY subsequently said: Mr. President, during the morning hour it was announced that it was our intention to proceed with the call of the calendar a week from Monday, after morning business shall be concluded. I ask unanimous consent to dispense with it today.

I also ask unanimous consent that when the calendar is called a week from today, which is the regular procedure, the Senate begin with Calendar No. 863, where the call of the calendar was ended on January 12.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The order was reduced to writing, as follows:

Ordered, That on Monday, January 26, 1948, at the conclusion of morning business, the Senate proceed to the consideration of bills on the calendar to which there is no objection, beginning with Order No. 863.

CALL OF THE ROLL

Mr. LODGE. Mr. President, the Senator from Vermont [Mr. FLANDERS], who is about to address the Senate, has a message that is of very great interest to all of us. Therefore, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. Will the Senator from Massachusetts withhold his suggestion until the conclusion of the morning business? It is about concluded.

Mr. LODGE. Certainly.

Mr. WHERRY. It is our hope that on Wednesday we shall take up for consideration the civil-service retirement bill. I am not so sure that that can be done, but I think Senators can rely on this statement, at least, that on Wednesday it is our hope to make that bill the unfinished business, recess until Friday, and have the bill taken up for consideration on that day.

Mr. JOHNSTON of South Carolina. To what bill is the Senator referring?

Mr. WHERRY. The civil-service retirement bill. Also, I should like to repeat the announcement made earlier, that it is not our intention to dispense with the calling of the legislative calendar a week from today, but it is the intention to call it for the consideration of bills to which there is no objection, and then to proceed with consideration of the St. Lawrence seaway bill, if it meets with the approval of the Senate.

The ACTING PRESIDENT pro tempore. There are no resolutions coming over from a previous day. The morning business is concluded.

The absence of a quorum has been suggested. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Hayden	O'Conor
Baldwin	Hickenlooper	O'Daniel
Barkley	Hill	O'Mahoney
Brewster	Holland	Overton
Bricker	Ives	Pepper
Bridges	Jenner	Reed
Brooks	Johnston, S. C.	Revercomb
Buck	Kem	Robertson, Va.
Bushfield	Kilgore	Russell
Butler	Knowland	Saltonstall
Byrd	Langer	Smith
Cain	Lodge	Sparkman
Capper	Lucas	Stennis
Chavez	McCarran	Stewart
Connally	McCarthy	Taft
Cooper	McClellan	Taylor
Downey	McFarland	Thomas, Okla.
Dworshak	McGrath	Thomas, Utah
Eastland	McKellar	Thye
Ecton	McMahon	Tobey
Ellender	Magnuson	Tydings
Ferguson	Malone	Umstead
Flanders	Martin	Vandenberg
Fulbright	Maybank	Watkins
George	Millikin	Wherry
Gurney	Moore	Wiley
Hatch	Morse	Williams
Hawkes	Murray	Young

Mr. WHERRY. I announce that the Senator from Minnesota [Mr. BALL] and the Senator from Iowa [Mr. WILSON] are necessarily absent.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from Oregon [Mr. CORDON] is necessarily absent on official

business of the Committee on Public Lands.

The Senator from Wyoming [Mr. ROBERTSON] is absent on official business.

Mr. LUCAS. I announce that the Senator from Rhode Island [Mr. GREEN], the Senator from North Carolina [Mr. HOEY], the Senator from Colorado [Mr. JOHNSON], and the Senator from Pennsylvania [Mr. MYERS] are absent on public business.

The Senator from New York [Mr. WAGNER] is necessarily absent.

The ACTING PRESIDENT pro tempore. Eighty-four Senators having responded to their names, a quorum is present.

Mr. FLANDERS obtained the floor.

Mr. HOLLAND. Mr. President, will the Senator from Vermont yield to me?

Mr. FLANDERS. For how long?

Mr. HOLLAND. About 5 minutes.

Mr. FLANDERS. I yield.

ONE HUNDRED AND FORTY-FIRST ANNIVERSARY OF THE BIRTH OF ROBERT E. LEE

Mr. HOLLAND. Mr. President, because of the serious times through which we are passing, I think it may be worth while to ask the Senate to remember for just a few minutes that today is the birthday anniversary of Gen. Robert E. Lee, a great Virginian, a great southerner, and a great American. I hope the Senate will permit me to speak for a few minutes in commemoration of the one hundred and forty-first birthday anniversary of General Lee. I do not wish to speak of his military prowess, or of any quality which would mark him as peculiarly a product of any one State or section; but because of the nature of the trials with which our Nation is now beset, I feel that it is appropriate to speak of him as an outstanding American, and as one from whose life we may all gain inspiration and learn lessons which will help us better to face the problems with which we are now confronted.

I feel that there have been too many memorial addresses seeking simply to express the viewpoint of the speaker. Therefore, I have three brief quotations from others.

The first quotation is from a letter written by General Lee himself after the War Between the States to Governor Letcher, the war Governor of Virginia. I quote briefly:

> The duty of its citizens, then, appears to me too plain to admit of doubt. All should unite in honest efforts to obliterate the effects of the war and to restore the blessings of peace. They should remain, if possible, in the country; promote harmony and good feeling, qualify themselves to vote and elect to the State and general legislatures wise and patriotic men, who will devote their abilities to the interests of the country and the healing of all dissensions. I have invariably recommended this course since the cessation of hostilities and have endeavored to practice it myself.

Mr. President, it seems to me that at this particular time, when the differences of opinion which exist in this Nation are nothing like so violent as those which had existed just prior to the time of this noble utterance by General Lee, it might be well for us again to bring to mind his admonition that a citizen has no more important duty to all the people than to promote harmony and good feeling and to qualify himself to participate in the selection of the finest men whom he can find to assume the responsibilities of government.

The second quotation is from a great southern biographer and historian, Douglas Southall Freeman, of Richmond, Va. At the close of his four-volume biography of General Lee, Mr. Freeman speaks of him as follows:

> Of humility and submission was born a spirit of self-denial that prepared him for the hardships of the war and, still more, for the dark destitution that followed it. This self-denial was, in some sense, the spiritual counterpart of the social self-control his mother had inculcated in his boyhood days, and it grew in power throughout his life. He loved the luxury that wealth commanded. Had he been as rich as his Grandfather Carter, he would have lived in a style as hospitable. Fine horses and handsome clothes and lavish entertainments would have been his; Arlington would have been adorned, and his daughters would have enjoyed travel and the richest comfort. But Arlington was confiscated, its treasures were scattered; each stage of his sacrifice for the South brought him lower and lower in fortune until he was living in a borrowed tenant house and his wife was husbanding the scraps from a pair of trousers a farmer's wife had made for him. His own misfortunes typified the fate of the Confederacy and of its adherents. Through it all, his spirit of self-denial met every demand upon it, and even after he went to Washington College and had an income on which he could live easily, he continued to deny himself as an example to his people. Had his life been epitomized in one sentence of the Book he read so often, it would have been in the words, "If any man will come after me, let him deny himself, and take up his cross daily, and follow me." And if one, only one, of all the myriad incidents of his stirring life had to be selected to typify his message, as a man, to the young Americans who stood in hushed awe that rainy October morning as their parents wept at the passing of the Southern Arthur, who would hesitate in selecting that incident? It occurred in northern Virginia, probably on his last visit there. A young mother brought her baby to him to be blessed. He took the infant in his arms and looked at it and then at her and slowly said, "Teach him he must deny himself."
>
> That is all. There is no mystery in the coffin there in front of the windows that look to the sunrise.

In the virtue of self-denial I think will be found much strength to help carry American citizens through the actual privations which I am sure will confront us in the years which lie immediately ahead.

I close with a quotation from an epic poem written by Stephen Vincent Benét, a great Pennsylvanian, who was, by the way, the son of a colonel in the United States Army, and whose grandfather, Stephen Vincent Benét, was an officer in the United States Army during the War Between the States. In his poem, John Brown's Body, he pays one of the finest tributes to General Lee which I think has been uttered by anyone:

> And so we get the marble man again,
> The head on the Greek coin, the idol-image,
> The shape who stands at Washington's left hand,
> Worshipped, uncomprehended, and aloof,
> A figure lost to flesh and blood and bones,
> Frozen into a legend out of life,
> A blank-verse statue.
> How to humanize
> That solitary gentleness and strength
> Hidden behind the deadly oratory
> Of 20,000 Lee memorial days,
> How show, in spite of all the rhetoric,
> All the sick honey of the speechifiers,
> Proportion, not as something calm congealed
> From lack of fire, but ruling such a fire
> As only such proportion could contain?
>
> The man was loved, the man was idolized,
> The man had every just and noble gift.
> He took great burdens and he bore them well,
> Believed in God but did not preach too much,
> Believed and followed duty first and last
> With marvelous consistency and force,
> Was a great victor, in defeat as great,
> No more, no less, always himself in both,
> Could make men die for him but saved his men
> Whenever he could save them—was most kind
> But was not disobeyed—was a good father,
> A loving husband, a considerate friend,
> Had little humor, but enough to play
> Mild jokes that never wounded, but had charm.
>
> Did not seek intimates, yet drew men to him,
> Did not seek fame, did not protest against it,
> Knew his own value without pomp or jealousy
> And died as he preferred to live—sans phrase,
> With common sense, tenacity, and courage,
> A Greek proportion—and a riddle unread.
> And everything that we have said is true
> And nothing helps us yet to read the man,
> Nor will he help us while he has the strength
> To keep his heart his own.
>
> For he will smile
> And give you, with unflinching courtesy
> Prayers, trappings, letters, uniforms, and orders,
> Photographs, kindness, valor, and advice,
> And do it with such grace and gentleness
> That you will know you have the whole of him
> Pinned down, mapped out, easy to understand—
> And so you have.
> All things except the heart.
> The heart he kept himself, that answers all.

Mr. President, I hope that the mention of General Lee's qualities of devotion to duty, of self denial, of gentleness, of kindness, and of the promotion of harmony and unity among his people after a time of great violence and great difference of opinion, will not be found by the Senate to be inappropriate at this particular time.

ALLOCATION OF MEAT

Mr. FLANDERS. Mr. President, I introduce for appropriate reference a bill to provide for the allocation of meat.

The bill (S. 2024) to provide for the allocation of meat, was received, read twice by its title, and referred to the Committee on Banking and Currency.

Mr. FLANDERS. I wish to say a few words at this time to explain the nature of this bill and my reasons for introducing it.

The bill relates to the allocation of fresh and processed meat and meat products, including rationing thereof at the consumer level. It authorizes the President to do everything necessary to formulate such an allocation or rationing program, including the complete preparation and distribution of the necessary papers, forms, and other documents, and the planning of an organization to administer it.

The bill forbids the direct setting of maximum prices. But by controlling effective demand, the free play of the mar-

ket will itself control prices. Intelligently administered, rationing will assure prices high enough to bring out heavy supply, yet lower than result from limitless demand on temporary short supply. In addition, the available supply will be more broadly distributed.

The bill does not provide for the actual initiation of allocation or rationing. Before that can take place the President must submit his program to Congress, together with a report in the form prescribed in section 6A of Public Law 395, of the Eightieth Congress, commonly known as the anti-inflation bill. It will be remembered that this section provides that the President shall state the circumstances requiring the proposed measures, give a detailed procedure for their administration, including a specification of the additional budget and personnel requirements, indicate the proposed degree of curtailment and the formula to be employed, and give a complete record of the factual evidence on which his recommendations are based.

After such recommendations have been made there is provided a period of 30 calendar days of continuous session on the same terms as that prescribed in the Reorganization Act of 1946, Public Law 601, of the Seventy-ninth Congress, during which time Congress can take action to prevent the putting of the program into action.

The administration of the proposed act is placed with the Department of Agriculture, and only the Secretary may exercise the powers, authority, and discretion so delegated as a part of the administration of that Department. No separate or new authority may be set up.

Unless and until the actual procedure of allocation or rationing is requested by the President, together with an appropriation therefor, provision is made for the preparation authorized by the act, by transfer or otherwise, of such amounts as may be necessary, not exceeding $1,000,000, from any appropriation or fund available to any bureau, corporation, or agency within the Department of Agriculture.

The authority granted by the act will expire on January 31, 1949, or on such earlier date as the two Houses of Congress may adopt in a concurrent resolution declaring that the further continuance of the authority granted by the act is not necessary.

Mr. President, no one realizes better than I the seriousness of this proposal. It can be justified only by the seriousness of the conditions which threaten the country at this time, and it warrants consideration now only because of the fact that it will take some months of preparation to organize action of the kind for which the necessity is feared. When the crisis comes upon us, if it does come, it will be too late to make preparations for meeting it.

What is the situation which we fear will make allocation and rationing advisable? What we have reason to fear is the further and even accelerated continuance of an inflationary spiral, already under way, which particularly affects meat and meat products.

As a result of the testimony presented at the hearings of the Eastern Price Investigating Subcommittee of the Joint Committee on the Economic Report, which hearings lasted more than 2 months and covered the country east of the Alleghenies, it became clear that the cost of food is the serious element in the cost of living for the low-income groups. Whereas it has been considered that normally one-third or less of the family budget goes for sustenance, testimony was repeatedly presented to the effect that among this group the percentage which had to be devoted to food is rising to 40, 50, and, in some extreme hardship cases, even 60 percent of the total family budget.

We remember, of course, that there are differences of expertness in food purchasing and food preparation on the part of the housewives. In many cases in which these extreme percentages appear more skillful buying and preparation of food might have reduced the percentage of the income which had to be devoted to this part of the cost of living. It did not appear, however, that any combination of skill and experience could have done more than mitigate the burden which the high cost of food is putting on the overloaded shoulders of this unfortunate group of our fellow citizens.

It is clear from the testimony that the wage increases made since the end of the war have tended to widen the gap between the lower-income groups and those who have been most successful in gaining advances. There has been a wide disparity between the highly organized and highly paid wage earners, on the one hand, and, on the other hand, white-collar workers, workers in many service occupations, employees of intrastate businesses, and others who have had no adequate adjustment of their pay to meet the increased cost of living. Meanwhile, the new advances, contemplated and asked for, widen this gap still further.

Besides the low-paid wage earners there are elderly people living on pensions and retirement allowances, publicly or privately provided for; all those living on the painfully accumulated savings of a lifetime; many groups of governmental employees, for instance, the postal clerks; Federal and State employees, notably school teachers, as well as firemen, policemen, and other workers, accounting in the aggregate for many millions who are in severe and increasing distress. There must be added to this practically all those connected with religious and charitable institutions such as preachers, hospital employees, and others. The employees of charitable institutions are particularly hard hit since the financial conditions in which these institutions find themselves make any increase in the pay to their employees difficult, if not impossible.

It is this growing body which has been left behind, which should give us most serious concern from the human standpoint. Were it not for this increasing gap between the two groups, and the continuing increase in the numbers of the group left behind, we would be unconcerned as to a rise in the price of living which was matched by an increase in income. We would be unconcerned, that is, from the human standpoint, though we would still be seriously concerned as to the effect of such a situation on our economy as a whole, and on the prospects for continued high employment, production, and consumption.

The plight of this low-income group carries with it economic dangers, as well as human suffering, to the extent that a larger and larger percentage of the family budget has to go to food. To that extent the ability to purchase other consumer goods is diminished. To that extent the market for clothing, entertainment, household equipment, furniture, and other necessities will be severely curtailed. This factor alone may well be the one which sets a limit on our present prosperity, so-called, by starting a recession in those businesses which deal not merely with consumer luxuries, but with consumer goods which, though necessities, are still less so than is the food which keeps the human being in health and even continued existence from day to day.

There is no single contribution to slowing up the continued rise in the cost of living which can be as effective as focusing our attention on meat. While food is the largest single element in the family budget, meat is the most expensive and most uncontrolled factor in the cost of food. Under present conditions it accounts for at least 12 percent of the normal family budget. If we can arrest the increase in this one factor and if we can, hopefully, start it moving in the reverse direction, we shall do more to relieve the acute problems of the family budget than by doing anything else about anything else.

No one familiar with the situation holds out any hope for anything except a further rise in meat prices on a scale more serious than anything we have yet experienced.

Mr. THYE. Mr. President, will the Senator yield for a question and a very brief comment in connection with the food cost to which he has reference?

Mr. FLANDERS. I yield.

Mr. THYE. This morning we had a hearing before the Committee on Agriculture and Forestry; and Mr. Dodd, Under Secretary of Agriculture, was testifying before the committee. Mr. Dodd said that under their price-support purchasing of eggs, alone, they have purchased more than 60,000,000 pounds of excellent powdered eggs and frozen eggs, and are holding them in cold storage at the present time. He said they have put them in storage at a cost of slightly over 30 cents a pound, and that under the law by which the Commodity Credit Corporation is governed they cannot sell these eggs at a loss, but must sell all the commodities they have in storage at what they cost them.

I wonder whether the Senator knows that the Commodity Credit Corporation cannot find a market for that excellent food product—eggs—for which they would have to receive approximately 35 cents a pound if they resold them, which would be at the equivalent of about 35 cents per dozen. In the event that they continue to be unable to find a market for these eggs—which, if sold by them, must be sold for slightly more than 30 cents a pound, then is it not better that we commence to examine ourselves as a

nation by going into such situations and determining what we must do legislatively and what we must do in policing those who have put all kinds of food commodities into cold storage and are holding them in cold storage, hoping and hoping that by their very action they can force up the market price, so that they can make a profit on those commodities?

This morning there came across my desk a letter from an operator of a large cold storage plant, who says, "My plant is full to the roof with commodities," and he also referred to the large quantities of commodities stored by the Commodity Credit Corporation and other agencies.

I mention these points now because I believe we should examine ourselves as a nation, rather than take steps to put the Nation under police control. I believe that such control is not now necessary, because the cold-storage warehouses are full of commodities, whereas the legislation enacted by Congress ties the hands of the Government agencies in such a way that they are prevented from disposing of, for instance, 60,000,000 pounds of dried eggs.

Mr. FLANDERS. Mr. President, I think the Congress might well consider the matter of the prices which the Commodity Credit Corporation is allowed to charge, and a little later in my remarks I shall have some things to say about the problems of policing.

Mr. HOLLAND. Mr. President, will the Senator yield to me?

Mr. FLANDERS. I yield.

Mr. HOLLAND. I should like to say for the record, and because I think it should be stated at this time, in connection with the able remarks which have been made by the Senator from Minnesota [Mr. THYE] that having in mind exactly the situation of which the Senator from Minnesota has complained, at the time when the authorization bill, and later the appropriation bill, relating to the giving of intermediate foreign aid to western Europe was before the Senate, some of us offered a provision, which was written into the authorization bill, and, in somewhat different form, and even enlarged, was written into the subsequent appropriation bill, by which questions such as that relating to dried eggs, to which the Senator from Minnesota has referred, are solved by the diversion of such surpluses for consumption in Europe. In that bill we did exactly what has been suggested by the Senator from Minnesota, in that we permitted the Commodity Credit Corporation to sell such commodities at a loss, for use in the foreign relief program, and permitted it to write off that loss, in an amount not to exceed $57,500,000, limited, however, to food commodities in surplus supply purchased under the price-support program and thereafter diverted for European relief.

So, if I correctly understand the situation, the problem complained of by the distinguished Senator from Minnesota has been solved to a very considerable degree by the method just suggested.

I thank the Senator for yielding.

Mr. YOUNG. Mr. President, will the Senator yield to me?

Mr. FLANDERS. I yield.

Mr. YOUNG. At the present time, farmers in my State are selling poultry at prices ranging from 12 cents to 17 cents a pound. I understand that in Washington the price to the consumer is around 40 cents a pound. Therefore, the middlemen—those who handle poultry between the farmer and the consumer—are receiving more than the farmer himself receives.

If the Senator's bill were effective, and if it reduced the price received by the farmer for his poultry to a level below the present low levels, which compare very well with the prices of 4 or 5 years ago, it seems to me that the net result would be a lowered production and only more trouble in the future.

I cannot see any reason for imposing police controls again at this time, unless we go all the way and get at the high profits which are being piled up between the producer and the consumer.

In fact, just the other day a statement was issued to the effect that the chain stores made greater profits last year than in any previous year. It seems to me that is more the problem, rather than the problem with the producer himself. By this I mean dealers in food ought to operate on a more reasonable profit margin.

Mr. FLANDERS. Mr. President, I may say to the Senator from North Dakota, whom I thank for his observations, that in this bill it is not proposed to control poultry in any way.

Mr. YOUNG. How about meat, then? In the case of meat, is not the difference between the price the farmer receives and the price the consumer pays almost as great as in the case of poultry?

Let me say that I have every sympathy for the cause the Senator is representing, and I certainly have great respect for the Senator personally; but I think that in connection with these items we should not place the shackles of controls on the farmers exclusively. I think the largest profits at the present time are being made by the middlemen.

Mr. FLANDERS. Mr. President, I think what the Senator has said is perhaps particularly true in the case of many commodities. The investigations made by our price committee indicated that there are very severe mark-ups, particularly in the case of vegetables and other fresh produce, and indicated severe mark-ups in other lines. However, speaking for myself, let me say I was astonished to find that the public records of packers and distributors, such as chain stores, although indicating unprecedented aggregate profits, nevertheless indicate that the profits on the basis of the dollars of sale were small enough so that if they had given up all their profits and if the profits thus given up were expressed in terms of lower prices to the consumers, the consumers would scarcely have noticed the difference. That was one of the most astonishing things that came out of our study. In other words, those profits are for the most part made by taking a thin shaving off a very fast-moving stream of production.

Mr. YOUNG. Mr. President, will the Senator yield further?

Mr. FLANDERS. I yield.

Mr. YOUNG. I do not think the profit is so thin, at times. For instance, the testimony in our Committee on Agriculture this morning, by the Department of Agriculture, included a statement that now, when a loaf of bread is selling for 15 cents, the cost of wheat entering into that loaf of bread is only 4 cents. The other 11 cents goes entirely to middlemen and processors. If the price of wheat were reduced $1.50 a bushel, bread would still be selling at 13½ cents a loaf.

Mr. FLANDERS. I would say to my friend, the Senator from North Dakota, that I am not trying to make out the same case for bread as for meat. I am referring strictly to meat. I think the conditions turn out to be very much different when we look at the figures involved.

Mr. YOUNG. I appreciate that, but I am concerned about all the controls sought to be imposed upon the things the farmer produces, with nothing of a similar nature to be imposed upon the manufacturer or upon labor. I fear that we shall wind up just as we did after the First World War, with the farmer footing the bill, receiving nothing for the things he produces.

Mr. FLANDERS. I hope, sir, to express not merely my sympathy with, but my confident hopes for, the future of the stock raiser and stock feeder, before concluding my remarks.

Mr. YOUNG. If I may add, just for the RECORD, the price that the farmer in my State is receiving for his poultry, as of January 15, is, on heavy hens, 18 cents; roosters, heavy, 17 cents; roosters, light, 12 cents. That affords a considerable contrast to what the good people of Washington are paying for poultry.

Mr. FLANDERS. It is a contrast, sir. No one familiar with the situation holds out any hope for anything except a further rise in meat prices on a scale more serious than anything we have yet experienced.

The short corn crop of 1947 and the limits placed on the use of other grains, particularly wheat, aggravate the prospect. The requirements for European relief have seriously cramped the supply of feed grains and the substitutes for feed grains among the food grains. Even more serious than this is the fact that the increased incomes of the higher income groups tend to express themselves particularly in meat. The purchase of more and higher grade meat is the way in which the American is accustomed to express an improvement in his income. It is most unfortunate that this tremendously increased demand on the part of the better-paid group results in depriving those less fortunate of the share to which they have been accustomed.

With this short supply of feed and an effective consumer demand without visible limits, the price of this food element continues upward day by day. The shortage in feed and the stimulus of present high prices has resulted in heavy movement of meat animals to the market. This heavy movement is at the expense of future supply. The demand will continue and expand. The supply will diminish. We have ahead of us in weeks or months from now, a situation which we may safely predict as being one in which meat prices will go far beyond anything we have ever previously experienced or

imagined. It is to meet this contingency that the bill is introduced.

I have spoken primarily of the human aspects involved. Serious though these are, we might feel hesitant to return to any measure of control were it not for the fact that broad-scale and important economic considerations are involved as well. The bill is proposed as a major contribution to the control of our existing inflation. Its place in our whole economy may be expressed as follows:

While monetary and fiscal factors and policies set the ceiling to which inflation may rise, there works beneath that ceiling a machinery of inflation which we see in active and effective operation. That machinery is the wage-cost-price-cost of living spiral which makes its continued upward progress month by month, with no evidence as yet of meeting any brakes or deterrents to its progress. Every price advance furnishes the motive power for this mechanism. Every wage advance makes more certain its continued operation. As this vicious spiral rises over the months and years, we can view with melancholy confidence an impending disaster of resulting calamitous deflation, which will express itself in unemployment, decreased incomes, restricted consumption, and general distress. We are justified in believing that the higher this spiral goes the more severe and the more extended will be that subsequent deflation and unemployment. It is therefore of the utmost importance that we find the means to put the brakes on this inflationary machinery.

Mr. President, I conceive the bill which I am introducing today to be a major instrument in the control of this inflationary mechanism. If we can bring the price of meat under control, we can make an important contribution to arresting the increasing cost of living. That is a contribution which Government can make to solving our problem.

There is a contribution which industry can make. If those businesses whose profit margins are good—and there are many such businesses—will at least hold off on price rises and preferably lower them by a moderate amount, the other elements of the cost of living will also have been brought under control. The recent action of the General Electric Co. in reducing its prices for household equipment and the action of the Weyerhaeuser Lumber Co. in reducing the cost of lumber, are both significant contributions to this effort. A third one recently noted in the papers was the endeavor on the part of the boys' clothing manufacturers to bring their price onto a more reasonable basis.

There can be and must be more effort of this kind. As an example, the prosperous oil refiners should reverse the mounting price of fuel oil for household heating. This will be the contribution of business to a restraint of the vicious upward spiral.

Mr. President, if the Government can make its contribution with regard to the price of meat and if business will expand its contribution to controlling the prices of other materials and products so that, in combination, it becomes evident that we are really contributing to the balancing of the family budget, then business and Government and public opinion in general may with confidence ask organized labor to restrain its requests for this new revolution of the fearful machinery of inflation. I have the necessary confidence in the public spirit of organized labor and in its intelligent analysis of its long-range interests to believe that such action on the part of Government and of business will meet with a ready response from the better-paid wage earners.

It may be objected, and it has been objected, that black markets would quickly destroy the effectiveness of rationing. As against this fear let us remember that the Congress will authorize rationing only on insistent public demand. Under such conditions most of the policing will be done by the people. Let it also be remembered that we have but one commodity to control, and that, as to rationing only and not as to price. A little policing will go further. Let us not forget that we shall be rationing a volume of meat which we would have considered abundant in past years. We are not rationing as the result of real scarcity. Let us finally remember that black markets grow with time. The critical period would not be expected to outlast one corn-crop failure and one season of drought-ruined grain crop in western Europe.

It may be objected, and it has been objected, that the proposals of the bill place the burden of restraining inflation in too heavy a measure on stock raisers and stock feeders. I am sure that consideration of the problem as a whole and with respect to its effect in maintaining our general prosperity and averting a serious decline will override the apparent short-range interests of those engaged in animal husbandry. Even as the demand for meat expands with prosperity, so it contracts with depression. Anything which maintains that prosperity is in the long-range interest of this branch of agriculture.

Furthermore, in placing the administration of rationing in the hands of the Department of Agriculture we give assurance that it will be administered in the long-range interests of the American farmer. It will be easier to do this since, if rationing is so administered as to lower the price to the farmer unduly, it will diminish the needed supplies. It is the essence of wise administration that the price at the stockyards should be high enough to warrant high production on the farms and on the ranches. If this is not done, the controls fail of their purpose.

It is an admittedly uncontrollable factor at the present time in the shortage of feed grains. I can see no reason why this should affect the shortage of animal production so far as beef is concerned. It is no real hardship to have to go to grass-fat cattle. The meat is not of as high quality, but the pressure cooker and other ways of preparing render such meat tender, palatable, and nutritious. We are concerned here with quality not quantity. As to the quantity, every assurance can be given, as stated before, that prices resulting from administration by the Department of Agriculture will assure profit from high production. To assume any other result is to assume an ineptitude for the existence of which there is no evidence.

Mr. President, in my humble opinion there is no other industry in the Nation which has an assured future which can be compared with that of stock raising and feeding. As has already been stated, prosperity for the American family expresses itself in meat. If we can assure prosperity, we can assure a large and profitable market for the meat raiser. This bill is primarily a contribution to the maintenance of that prosperity on which the animal husbandry of the Nation depends for its future profits.

In closing let me again emphasize that the bill merely makes provision for establishing the machinery of allocation and rationing. The actual putting of that machinery into operation cannot take place unless it is the will of Congress that it should take place. It will not be the will of Congress to allow allocation and rationing actually to be undertaken unless and until the popular demand for it becomes so strong that the process can be administered successfully on the basis of a widespread support in public opinion. The danger is that that strong necessity and strong demand may come when we are months away from our ability to meet it. The purpose of the bill is to provide for that contingency when, as, and if it appears in insistent form.

Mr. President, we are engaged in a new and serious undertaking. We are undertaking to do what our Nation has never done before or, so far as I know, what has never been done by any nation at any time. We are attempting to maintain high employment, high production, and high consumption on a basis of broad distribution, and at the same time avoid a destructive end to this condition by inflation. I commend the bill to the earnest consideration of the Members of this body as a contribution to the solution of the problem of the continued maintenance of a high and well-distributed national prosperity.

Mr. LUCAS. Mr. President, will the Senator from Vermont yield to me for a question?

Mr. FLANDERS. Yes.

Mr. LUCAS. The bill the Senator has introduced, as I understand, provides for allocation and rationing of meat——

Mr. FLANDERS. And meat products.

Mr. LUCAS. And meat products. Yet it gives the administration or the executive branch of the Government no authority at this time to enforce any of its provisions. That, as I understand, would be a factor to be determined eventually by the Congress of the United States.

Mr. FLANDERS. That is correct.

Mr. LUCAS. The question I wish to propound is this. What does the bill do, if anything, with respect to delegating power to the executive branch of the Government to prepare for the eventual passage of a rationing bill by Congress?

Mr. FLANDERS. I read that——

Mr. LUCAS. The Senator probably read it, and I apologize for not having been present and heard it.

Mr. FLANDERS. I read that provision from the bill itself. It is as follows:

Notwithstanding any other provision of law, title III of the Second War Powers Act, 1942, is hereby revived and reenacted for the exercise, but only in accordance with the provisions of this act, of the powers, authority, and discretion conferred on the President by such title III with respect to the allocation of fresh and processed meat and meat products, including the rationing thereof at the consumer level.

The President is authorized to do all things necessary to formulate a program under this act, including, but not limited to, the preparation, printing and binding, and distribution of necessary papers, forms, records, and other documents and, subject to the provisions of section 4 hereof, the planning of an organization to administer such program.

Does the Senator wish me to go on with respect to the provision authorizing the machinery?

Mr. LUCAS. No. I thank the Senator, but he will not have to do that for me.

Has the Senator conferred with the Secretary of Agriculture or any other agencies of government which would be compelled to follow through with the preparing of the necessary machinery, as is suggested in the bill, with respect to whether they have the personnel or whether they have the funds to do the things the Senator is requesting be done in his bill?

Mr. FLANDERS. I may say that I have so conferred. The suggestion of the Secretary, so far as the funds are concerned, is to be found in section 8 of title I:

There are hereby authorized to be appropriated such funds as may be necessary to carry out this act. For the purpose of carrying out the provisions of this act until such time as an appropriation shall be made pursuant to this section, there may be utilized, by transfer or otherwise, such amounts as may be necessary, not exceeding $1,000,000, from any appropriation or fund available to any bureau, corporation, or agency within the Department of Agriculture.

Mr. LUCAS. I thank the Senator. It seems to me from what I know of the problem that the Senator is certainly on the right track. I cannot foresee any harm whatsoever arising from the adoption of such a measure.

Mr. FLANDERS. As a result we may have spent $1,000,000 uselessly. There is precedent for doing that.

Mr. THYE. Mr. President, will the Senator yield to me for a moment?

Mr. FLANDERS. Would the Senator from Minnesota mind if I cleared up the matter I now have under discussion with the Senator from Illinois?

Mr. THYE. No, indeed. I am sorry to have interrupted.

Mr. FLANDERS. I was speaking, of course, with misguided humor when I said there was precedent for wasting a million dollars. What I should say is that it is a small insurance premium to pay if we can, by the expenditure of that sum, avert a major calamity.

Mr. THYE. Mr. President——

Mr. LUCAS. Mr. President, will the Senator yield to me further?

Mr. FLANDERS. If the Senator from Minnesota will excuse me, I will yield to him next.

The ACTING PRESIDENT pro tempore. The Senator from Vermont declines to yield to the Senator from Minnesota until he has concluded his colloquy with the Senator from Illinois.

Mr. LUCAS. What I have to say will not take long, I assure the Senator. What the Senator is attempting to do through his measure is simply to have the machinery prepared and ready for the emergency which he anticipates is coming as a result of the shortage in the corn crop and as a result of the situation which exists in the meat commodities of the country at the present time. There is nothing in the bill which would delegate to the President of the United States authority to ration or control or allocate anything. In the event the time comes—and I believe it will come—when the people of this country will be so economically disturbed, as the result of the constant increase in food prices, that they will eventually demand that such legislation as now discussed has become a reality. When that time arrives, then Congress would pass a second bill, which would provide for the taking of certain action, but in the meantime all that the Department of Agriculture would be doing is getting the machinery ready so that they would not have to wait perhaps a couple of months to put the second bill into effect. The Department then will have the machinery all set up and the facilities ready to proceed in the event Congress decides to make the move which the Senator suggests.

Mr. FLANDERS. That is the effect of the present bill.

I now yield to the Senator from Minnesota.

Mr. THYE. Mr. President, the only reason I wanted to make a comment at this time was that the able Senator from Illinois asked whether there would be any harm in inaugurating at this particular time the mechanics for administering rationing. The only harm which I recognize today in connection with any discussion of rationing or any discussion of control is that many persons have sought to obtain meat-storage facilities and that every person who has been able to obtain storage facilities has been busily engaged in filling them. I read an article in a newspaper not so many weeks ago in which the Senator from Vermont himself was quoted as having said he had the storage plant in his home filled. If the people of the Nation have a fear that we are going to reestablish some type of control it will result in lessening the normal market flow by reason of the fact that people will fill their lockers and private storage plants as rapidly as they are able to fill them. That in itself will create another run on the meat supply, which is already short, and, on top of that, it will create the danger of a black market in meat.

It may be said, Mr. President, that we are all rational human beings and will never resort to such an unpatriotic action; that we will not black market our livestock, and so forth. But it has been proven in every nation which today has controls in operation, as they are in European countries, that the black markets are in full operation there, and if black-market operators are threatened with respect to one particular commodity they will shift over to another commodity, and in that way create a scarcity in that other commodity.

What we should attempt to do here is to control the black market. If illegal slaughtering is indulged in it will mean the loss of byproducts which are so necessary to the health of all of us, and particularly to those who are affected with certain types of ailments, for they will be deprived of certain products which are necessary to keep them in good health or alive. When the byproducts of animals slaughtered in the normal manner are lost by reason of the slaughtering of animals in the black market there will be scarcities created in medical supplies. Under black-market operation, hides will not be properly cared for. That will create a further scarcity of leather. Leather production is now in a distressed condition, and black-market operations will aggravate that distress. I could go on and enumerate many other evils which would result as a reaction to the suggestion which the Senator from Vermont has put before us here today respecting proposals to reration or recontrol meats.

That is the reason why I wished to comment at this particular point.

Mr. COOPER and Mr. LUCAS addressed the Chair.

The ACTING PRESIDENT pro tempore. Does the Senator from Vermont yield; and if so, to whom?

Mr. FLANDERS. If the Senator from Kentucky and the Senator from Illinois do not object, I should like to say a word or two about the lockers full of meat. I think that privilege is one which should be granted to me.

My recollection is that in talking with a gentleman engaged in stock feeding I spoke somewhat expansively about having meat in a locker. A member of the staff of a certain radio commentator telephoned and asked if it was true. I gave him the details as to the meat in my locker, which the commentator very calmly and completely disregarded in making the broadcast.

I have three children. Each child has a husband or wife, as the case may be. The total progeny amounts to eight grandchildren, who afford one of the greatest satisfactions a person can have when he reaches my age. I assure Senators that children have nothing on grandchildren.

From the total number of children and grandchildren let us subtract two who are infants in arms. That leaves 12 meat eaters, aside from Mrs. Flanders and myself. Last fall, before I thought anything about meat rationing, we had one grass-fed steer put into the meat lockers. It was not a new undertaking. I even did it under OPA. I did it strictly in accordance with OPA rules. At that time the animal was brought up and fattened on a farm in which I had a large interest—not complete ownership,

but enough thousands of dollars so that it worried me then. I have since written it off.

We have in the meat lockers, then, what is left of that one steer. The lockers are nearly full, but their contents consist largely of fruits and vegetables and the remains of one steer. To that extent I am guilty.

Let me say, however, that I am not sure that meat lockers are a bad thing in the long run. I am not sure but they will tide the country over during a period of scarcity and somewhat relieve the tremendous demand, to the extent that they come into operation at a later time of heavy pressure of demand on prices, and thereby make the task of the Government that much easier.

Mr. THYE. Mr. President, will the Senator yield?

Mr. FLANDERS. I yield to the junior Senator from Minnesota.

Mr. THYE. A thought occurred to me when the Senator stated that meat in lockers might tide us over a short period. That would be true in the case of the person fortunately situated with meat in his locker. However, I am concerned about the poor lady whom I used to see when meat rationing was in effect, standing in the street waiting for the butcher shop to open. Then she would rush in with all the others, in the hope that there would be a piece of meat for her when she got to the counter. I am concerned about that person, and not the man with a locker full of meat to provide for his children and their children. When she cannot find meat in the meat market or at the storage plant, she is not as well situated as is the person whose grandfather or someone else has meat in the locker.

Mr. FLANDERS. I should like to suggest two things to the Senator from Minnesota. The first is that there is an effect favorable to this imaginary lady in an imaginary queue. A certain amount of the effective demand for meat has been removed by the man with a high income who has stored it away. By the way, so far as I know meat lockers in my region, they are largely filled by ordinary people. The people with large incomes have not been the moving spirits in starting the cooperative lockers or in filling them.

The second point is this: Remember that we shall be rationing what we have always considered to be an abundance instead of a scarcity. My guess is that the queues will be very short, and will not extend out into the rain, the snow, and the hail.

I now yield to the Senator from Kentucky [Mr. COOPER].

Mr. COOPER. Mr. President, in the very able speech which the Senator has made, he stated that the price of meat was the central factor in the high cost of food. I ask the Senator if his statement is based upon a belief that if the price of meat continues to rise there will be an incentive to farmers to feed more and more grain to livestock, and that the supply of grain will be diminished, which will be reflected in the cost of other foods.

Mr. FLANDERS. There are two factors involved: One is saving grain and the other is controlling the cost and distribution of meat. In a way they are tied together. Extremely high costs have led to the feeding of high-cost grain. However, my principal approach to the question in this bill has been from the standpoint of control of a major element in inflation on the economic side, and an endeavor to bring about better distribution at a somewhat lower cost to a growing group of American citizens who are being left behind. There are those two elements—one of a human sort and the other of an economic sort.

Mr. COOPER. Let me ask the Senator if it is true that the domestic consumption of meat today is approximately 150 pounds per person, as compared with 125 2 or 3 years ago?

Mr. FLANDERS. It was a little more than that in the year 1947. It is not expected to be quite so high this year. In fact, the supply is variously estimated at between 125 and 135 pounds, which for many years past has been considered an ample supply of meat.

Mr. COOPER. Would it be true, if rationing were imposed, that there would be as much meat per person available as was available 3 or 4 years ago?

Mr. FLANDERS. That would be the expectation because the temporary flow of beef creatures to the market and the temporary shortage in hogs because of the lack of feed are both reckoned in the estimates which I made of 125 to 135 pounds per capita.

Mr. COOPER. I gather from what the Senator has said that he has no doubt that in the next few months there will be an increased demand for a diminishing supply of meat.

Mr. FLANDERS. Yes.

Mr. COOPER. If his assumption is correct, why is the Senator proposing to postpone the matter of rationing rather than advocating that it be imposed now?

Mr. FLANDERS. The answer is very simple. We cannot ration successfully until the general population is aroused to the necessity for rationing.

Mr. COOPER. However, if the Senator's assumptions were true, is it not true that the situation in the future will be much worse respecting supply and demand than it is today, and that prices will have advanced?

Mr. FLANDERS. Yes. Sometimes one must have a pretty hard toothache before he is willing to go to the dentist.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. FLANDERS. I yield.

Mr. AIKEN. I should like to return to the lockers for just a moment and ask my colleague if he does not think it is about time for the professional critics of the farmer who kills a hog or a steer and freezes the carcass in his locker to come forward with some workable plan showing the farmer how he can kill from 20 to 30 pounds of a steer at a time, and not criticize him for having the whole animal frozen.

Mr. FLANDERS. Let me say to the senior Senator from my native State that there is a research problem in agriculture which has not yet been adequately solved by the research staff of the Department of Agriculture, and that is some means of cutting T-bone steaks from a steer without killing it. When that can be done such criticism will be justified.

Mr. LUCAS. Mr. President, will the Senator yield in order that I may make an additional observation with respect to the locker situation?

Mr. FLANDERS. I yield.

Mr. LUCAS. As I understand from what the Senator from Minnesota [Mr. THYE] has said, the lockers are practically all filled at the present time.

Mr. FLANDERS. That is the best information we can get.

Mr. LUCAS. So whatever we do will not have very much effect upon the locker situation, because we cannot get more meat into them than is there at this particular moment.

Furthermore it seems that when we get into one of these arguments we get into the discussion of black markets. Some would want it to appear that the Senator is introducing a measure which would immediately establish a black market in meat throughout the country. I challenge that contention on the basis of what the Senator has said. It should not be forgotten that this measure does not do anything other than give the Secretary of Agriculture a certain amount of authority to prepare for the eventful day which we all hope will not come.

Mr. FLANDERS. That is correct.

Mr. LUCAS. As I understand the bill, all we are doing is taking time by the forelock. I do not see why there should be very much complaint about that kind of an operation. To say that people are immediately going to do something illegal, which is in line with what some have done before, is not in harmony with the provisions of the bill. When the Senator from Minnesota spoke about the lady who waited in line under OPA——

Mr. THYE. Mr. President, I wonder if the Senator will permit me to make a remark at this point.

Mr. FLANDERS. I will yield if the Senator from Illinois is willing to have me yield.

Mr. LUCAS. I had hoped I might be able to finish my statement. We may be here a long time this afternoon.

Mr. THYE. It will take only a moment of time.

Mr. FLANDERS. Out of courtesy to the Senator from Illinois, I shall let him finish his sentence.

Mr. LUCAS. I thank the Senator. It is customary and usually parliamentary to permit a Senator to finish his statement before he is interrupted by another Senator. I am making only a short statement in the Senator's time. That is, strictly speaking, against the rule. But it is seldom that a Senator is interrupted in such fashion in the middle of a statement.

Mr. FLANDERS. I take it that the Senator from Illinois does not have a speech in mind, but simply a brief statement.

Mr. LUCAS. That is correct. What I was about to say I think is applicable to what the Senator from Minnesota stated regarding the lady who waited in line, in the rain, to get a piece of round steak. If she did get a piece of round steak at 48 cents a pound in the butcher

shop, under OPA, that is more than the same lady, who may come from a family on an income of $2,500 or $3,000 a year, is getting today. That lady does not get any round steak at the present time, because she cannot afford to buy it, due to the high price.

Mr. THYE. Mr. President, will the Senator yield?

Mr. FLANDERS. I will yield to the Senator from Minnesota.

Mr. THYE. I thank the Senator from Vermont. The only reason why I was so brash as to interrupt at that particular moment was that it seemed so pertinent to the thought which the Senator was expressing at the time. That was the reason for the interruption. Cattle must be placed in feed lots, and if there is a question raised as to whether we shall reestablish rationing, it immediately breaks off the normal chain of events. The man who normally builds his feed lots to fatten and grow a certain tonnage of beef immediately stops then and there. There is a break in the chain of production that cannot be overcome. The same is true of the man who is planning to farrow pigs next August or next July for fall production. If he thinks he can make more by selling grain today, he will sell it at today's prices, and he will not be prepared for production in the fall. That chain of events will be broken. It will have two reactions. That is what has happened in European countries, and it is reasonable to believe that in the United States people will act as they have in European countries, such as France and Italy and the other countries which are involved with rationing at the present time.

I thank the Senator.

Mr. FLANDERS. I should like to say to the junior Senator from Minnesota that it is entirely possible that stock raisers and feeders will act on the impulse of the moment, on very short-range interest, and against their long-range interest. I had supposed that that fleeting nervousness was characteristic rather of the money market in New York than of the solid, substantial, down-to-earth raisers and feeders of stock. I tried to say in my talk before this body that there is no imaginable consideration that can be brought to bear on this subject by anyone which does not indicate to my mind that the future of the stock raiser and feeder is the rosiest, that stock raising is the most hopeful branch of agriculture whatsoever in this country, and that it is menaced only by one thing, namely, by a drop in the standard of living of the American people. Anything which tends to maintain that standard of living is something in which stock raisers and stock feeders are tremendously interested. So long as our people are well paid and prosperous, so long will they make their principal method of expressing their prosperity the purchase of more and better meat.

Mr. YOUNG. Mr. President, will the Senator yield?

Mr. FLANDERS. I yield.

Mr. YOUNG. The real purpose of the bill is to reduce the price of meat; is not that correct, Senator?

Mr. FLANDERS. Yes; and to better distribute it; but not to reduce it below a price at which it will make it unprofitable to raise cattle.

Mr. YOUNG. During the course of the able Senator's remarks he referred to beef and stated that rationing would not reduce the number of cattle. To a certain extent I would agree with him, but that would be untrue as to hogs. For instance, the reduction in the number of hogs now is due directly to the higher price of corn. The hog lives entirely on grains.

Mr. FLANDERS. A grass-fed hog is a rare animal.

Mr. YOUNG. Yes. If we should reduce the price of hogs, there would immediately be another sharp reduction in the number of hogs, which would further aggravate the problem and extend it that much further into the future. I think if the people would wait until next year, when we should again get a corn crop and get hog production up, the problem will be solved. The more we go into rationing the bigger our problem will be in the future.

Mr. FLANDERS. The observations of the Senator from North Dakota are cogent and almost convincing, except from this standpoint: I think that with a good corn crop we may confidently look to the early return of pork on the market as a means of tiding us over the long period of scarcity of beef. Pork has always been the mainstay of the lower-income groups. They are the ones who are in most serious difficulty at the present time. We should not do anything about reducing the price of hogs as long as corn is as scarce and as high as it is at the present time.

Mr. YOUNG. I would agree with the able Senator that there are certain laboring groups, particularly white-collar workers, who are severely hurt. But it is difficult for me to understand why, with the tremendous purchasing power of the American people, the price of beef is being forced up when we have a better supply than we have had for a long time. Someone must have money to spend.

Mr. FLANDERS. Someone must have money to spend, and those who have it are forcing the demand. As I tried to explain in my introductory remarks, there is a situation in which one group of our citizens is continuously expanding its income and leaving another group behind. That group is very definitely being left behind, and there are millions of persons in the group—not just a few tens of thousands, or a few hundreds of thousands, but literally millions of them.

I yield the floor.

LEAVE OF ABSENCE

Mr. DONNELL. Mr. President, I ask unanimous consent that I may be excused for my absence during that portion of the session at which I was not present today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMERICAN FOREIGN POLICY—FAR EASTERN COMMISSION DOCUMENT NO. 230

Mr. KNOWLAND. Mr. President, on Friday, December 19, 1947, I brought to the attention of the Senate the document known as FEC 230. Since that time I have raised certain questions concerning this document and related policies with the State Department and the Department of the Army.

For the information of the Senate I wish briefly to review the situation. On December 15, 1947, a copy of FEC 230 came into my possession from a non-Government source.

On December 17, 1947, while the Senate Appropriations Committee was holding hearings on the emergency-aid program, I requested Mr. William Butterworth of the Far Eastern Section of the State Department, then a witness before the committee, to supply us with a copy of FEC 230. The Department complied that afternoon and sent a copy to the committee, but pointed out that it was classified as confidential.

During the 40 days that have passed, I have requested by letter, personal conference, and telephone that this document be made public. To date, this has not been done.

During my remarks on December 19, 1947, I said:

> Although I am in complete accord with the policy of breaking up cartels and trusts in both Germany and Japan, I believe that FEC 230 and other policies being followed in Japan go far beyond this.

Today I wish to point out why I believe this to be so.

On April 12, 1947, the "law relating to prohibition of private monopoly and methods of preserving fair trade" was promulgated and has been in effect in Japan since then. This law, which is broader and perhaps better than our own antitrust laws, prevents monopolies and combinations in restraint of trade.

If the Government of Japan in following S. C. A. P.—Supreme Commander for the Allied Powers—directives was dissolving corporations for the violation of the provisions of this law, there would be a basis for commending S. C. A. P. for some big-scale trust busting. But FEC 230 and certain other policies go far, very far, beyond trust busting.

The claim is made by the State Department that FEC 230 is not final policy, but was only submitted to the Far Eastern Commission for their consideration and action. It was also indicated that our Government had withdrawn the document for further study.

Let us look at the record.

Mr. President, I hold in my hand a copy of a booklet entitled, "Activities of the Far Eastern Commission." It is a report by the Secretary General to the Secretary of State. On page 7 of that booklet, where Committee No. 2, on "Economic and Financial Affairs" is discussed, the following appears:

> Chairman: Mr. F. C. Everson (United Kingdom).
>
> Deputy Chairman: Mr. Roswell H. Whitman (United States).
>
> Subjects for consideration: Extent and character of Japanese industry, commerce, and agriculture necessary for a viable economy in Japan; measures necessary to establish such an economy, such as regulation of Japanese foreign commerce, control of agriculture, control of fishing and aquatic industries, control of transportation and communication, and control of industries.

Just why so much emphasis is placed on "control" rather than rehabilitation is difficult to understand.

Mr. President, FEC 230 is an 18-page document outlining a "policy of excessive concentrations of economic power in Japan." It was submitted by the United States representative and was circulated among the other members on or about May 12, 1947. Section 5 of that document provides:

All individuals who have exercised controlling power in or over any excessive concentration of economic power, whether as creditors, stockholders, managers, or in any other capacity should be:

a. Divested of all corporate security holdings, liquid assets, and business properties;

b. Ejected from all positions of business or governmental responsibility;

c. Forbidden from purchasing corporate security holdings or from acquiring positions of business or governmental responsibility at any time during the next 10 years.

In addition to the above, certain lesser restrictions apply to others, as is indicated by the following language also found in section 5:

All other persons likely to act on behalf of the individuals described above should be subjected to the measures specified below. Determining who such persons may be, such factors as ties by blood, marriage, adoption, or past personal relationship should be taken into account.

Mr. President, all this is to be done without any accusation, trial, or conviction as a war criminal or as any other type of law violator by either American or Japanese standards.

Now let us see how the property of the "purgee" is to be disposed of. Section 6 states:

a. Policies which facilitate the conveyance of divested holdings to new owners should not be modified by an effort to obtain any specified degree of compensation for the former owners of these holdings. The overriding objective should be to dispose of all the holdings in question as rapidly as possible to desirable purchasers; the objective should be achieved even if it requires that holdings be disposed of at a fraction of their real value. In negotiated sales of divested holdings to desirable types of purchasers, the purchasers' ability to pay, rather than the real value of the holdings, should affect the fixing of prices and terms of payment.

Section 7 states:

If necessary to complete the liquidation within about 2 years, invitation of bids upon securities from eligible purchasers, and acceptance of the highest bids, however low such bids may be.

Mr. President, I call to your attention and to the attention of the Senate that this is not a proposal of the Kremlin as you might suspect, but is the official American proposal to the Far Eastern Commission.

Now let us see who these "desirable purchasers" are. In section 8b it is stated:

A decided purchase preference, and the technical and financial aid necessary to take advantage of their preference, should be furnished to such persons as small or medium, entrepreneurs and investors, and to such groups as agricultural or consumer cooperatives and trade-unions whose ownership would contribute to the democratization of the Japanese economy. * * * in the case of negotiated sales, prices should be fixed with special reference to such purchasers' ability to pay, as should the time period allowed for payment of these prices.

So much for our Government's proposal for purging the former owners without trial of any kind; sale of their properties without regard to their value; further cuts in the sale price to fit the purchasers ability, if any, to pay; or financing of the sale to cooperatives and labor organizations, a considerable number of which in Japan are Communist-dominated.

Apparently, however, those in the economics section of SCAP believed that the already adopted "Anti-Trust" legislation did not go far enough. Like some of our Washington bureaucrats they wanted unlimited power over all Japanese companies, regardless of whether they were monopolies. I have been informed, but have not yet been able to verify the story, that at about 6 p. m. on the evening of December 9, which was the last day the Japanese Diet was in session, several men representing themselves as being from occupational headquarters arrived and strongly urged, if in fact they did not demand, that the new economic deconcentration bill be enacted. As a result, it passed the lower House, and then went to the House of Councillors at about 11:40. Since adjournment was scheduled for midnight, this left about half an hour for discussion. Even so, the clocks had to be stopped.

Article 1 of the "Elimination of Excessive Concentration of Economic Power Law" states:

By eliminating the Excessive Concentration of Economic Power at the earliest possible date and rationally reorganizing the economy, as a part of the series of measures taken for the reconstruction of the peacetime and democratic nation, aims to lay the ground work for building a democratic and healthy national economy.

Article 2 states:

"Enterprise," as used in this law, shall include every kind of economic business or financial instrumentality or person, whether in the form of cartel, syndicate, combine, trust, stock company, partnership, association, concern, aggregate of firms or bodies, individuals, or otherwise.

Now, let us take a look and see what restraints, if any, are placed upon the HCLC, the Holding Company Liquidation Commission. It is to be noted that they also have their alphabetical agencies. Article 3, as I read it, should be a bureaucrat's delight and a pattern to be followed wherever and whenever the state sets out to become the supreme authority over a nation's economic life. This article states:

The HCLC shall designate excessive concentrations of economic power which exist on the effective date of this law or which shall have been in existence at any time between August 1, 1945, and the effective date of this law, and shall eliminate such excessive concentrations of economic power in interest of public welfare. For this purpose, an excessive concentration of economic power shall be defined as any private enterprise conducted for profit, or combination of such enterprises, which, by reason of its position in many lines, restricts competition or impairs the opportunity for others to engage in business independently, in any important segment of business.

Mr. President, I submit that this language is broad enough to give the power of life or death over the entire Japanese economy, limited only by the conscience of the members of the HCLC.

Now let us turn to some of the laws socializing certain parts of the Japanese economy. Like controls, these are claimed to be temporary expedients to meet emergency situations. However, experience in our own country has shown that it is easier to pass such laws than to get rid of them.

Mr. President, I wish to say that I have copies of the legislation and photostatic copies of the Official Gazette, promulgating these various laws, which may be described as follows:

First. The grocery-distribution law. There is established a tax-exempt government corporation which has the sole purchase and sale of all indigenous and imported grocery at prices established by the price board; the storage, transportation, recovery, necessary mixing, and examination of grocery, and the appointment of authorized dealers in grocery business incidental to the business provided for it in items 1 and 2.

Next is a feed-distribution law, which is also a tax-exempt government corporation having the sole purchase and sole sale of all feed at prices established by the price board, together with the storage and transportation of all feed.

Next is a liquor-distribution law. Here again a tax-exempt government corporation is set up, having the sole purchase and sole sale of all liquors, at prices established by the price board, together with the storage and transportation of all liquors.

Fourth. The petroleum-distribution law. This, too, sets up a tax-exempt government corporation having the sole purchase and sole sale of petroleum products at prices established by the price board, and the storage and blending, distribution, transportation, and appointment of authorized dealers in fuel.

Fifth. The solid-fuel distribution law. The pattern of a tax-exempt government corporation is followed having the sole purchase and sole sale of coal, coke, and lignite, at prices established by the price-control board, together with storage, transportation, and matters incidental to solid fuels.

Next, the industrial reconstruction public corporation law, which creates a tax-exempt government corporation for the construction, lease or sale of industrial equipment, or the purchase, lease or sale of industrial equipment or materials.

Seventh. The oil stuffs distribution law creates a tax-exempt government corporation having sole purchase and sole sale of indigenous and imported oil-stuffs, at prices determined by the price board, together with their storage and transportation, and the appointment of dealers.

When FEC 230 is examined, not alone but in conjunction with other policies, a pattern develops which is disturbing to me, and I think it will be disturbing to the Congress.

I have a very high regard for Gen. Douglas MacArthur. His contribution to the winning of the war is known to every American. The restoration of law and order in Japan, the demilitarization

and repatriation of troops were all carried out under the most skillful and intelligent leadership of the supreme commander. But the military phase of the occupation was completed months ago and was succeeded by the necessity of restoring the Japanese economy to the point where it can be self-supporting and not a continual drain upon the United States Treasury.

In the lower echelons of SCAP are former OPA officials and employees, together with numerous individuals who have had little, if any, practical managerial experience in American business or industry.

Either originating among doctrinaire New Dealers who found their activities limited in Washington and signed up for overseas occupation service, or finding its fountainhead in the Far Eastern Commission, which initiates some policies for transmission to General MacArthur, certain activities are open to serious question by both the Congress and the people.

It seems to me that in both Germany and Japan our policy should be to eliminate trusts and cartels, but not to promote socialism or a controlled economy. Rather, we should strive to build a beachhead of free enterprise to the end that their people may raise their standard of living as we have done down through the years.

Mr. HICKENLOOPER and Mr. McMAHON addressed the Chair.

The PRESIDING OFFICER (Mr. THYE in the chair). Does the Senator from California yield; if so, to whom?

Mr. KNOWLAND. I yield to the Senator from Iowa.

Mr. HICKENLOOPER. Mr. President, I understand from the remarks of the Senator from California that under the order to which he refers, if anyone in Japan has a historical background of having accumulated any property by way of success and interest in a business, it is now to be taken away from him. Is that substantially correct, or have I overstated it?

Mr. KNOWLAND. No. I think the general policy as enunciated in FEC 230 goes that far.

Mr. HICKENLOOPER. Therefore, the criterion to be used is to examine whether or not an individual there has been a successful operator in the economy of Japan heretofore. I would assume that that is one of the criteria. If he has accumulated anything, if he has an important position in industry or business, that is now to be destroyed or taken away from him. I am not supporting certain of the policies heretofore followed by some of the Japanese industrial leaders; I think that a certain amount of punishment and reorganization and rearrangement may be necessary; but I also understand that under the policy of the document to which the Senator refers, somebody in the State Department or somebody in the administrative government then undertakes to take that property and parcel it out to such persons as they want to give it to without any sound program for the repayment, based upon the value of the property, or even upon the ability, if you please, of the person receiving it to operate the business successfully within a free economy. Is there any safeguard in that direction?

Mr. KNOWLAND. I do not see in FEC 230 any safeguard such as we would consider necessary in any Anglo-Saxon idea of equity or law. I wish to say to the Senator from Iowa, I heartily agree with him that if there are any of these Japanese industrialists, large or small, who are war criminals, or who have been convicted of crimes against occupation regulations or Japanese law they should of course be eliminated from the industrial and economic picture of Japan. This is the process that we have followed in Germany. I would say the general policy of breaking up the cartels, the trusts, the so-called zaibatsu interests is a sound policy for us to follow in Japan, as it is in Germany. But the point I wanted to make is that they apparently have a very sound antitrust law which is now on the statute books of Japan. This goes far beyond the breaking up of monopolies, the breaking up of businesses in restraint of trade. It gives into the hands of a new agency the power to eliminate economic organizations which are not in that category. As I pointed out, FEC 230 itself, if that policy is to be carried out, provides the owner will be divested of his holdings without regard to the value of the property or the fair market price of the property.

Mr. HICKENLOOPER. I have one further question, if the Senator will yield. I understand from the statement of the Senator that the business involved in the stock ownerships or investment ownerships is to be destroyed, necessarily.

Mr. KNOWLAND. No; the business is not necessarily to be destroyed.

Mr. HICKENLOOPER. Then may I ask one further question? The Senator has been through this a great deal. It is difficult for me to see how monopoly is destroyed or how competition can be enlarged if they take it away from one group of ownership and transfer it, without pay, necessarily, to another group of owners. I am not saying the Senator said this at all, but I am wondering how that relieves the competitive situation or the monopolistic situation.

Mr. KNOWLAND. I think the Senator misunderstood me in that regard. I said that the business, as a business, was not being destroyed, unless it was a war industry. I think the pattern is clearly established that they are breaking up the large combinations; which I think is entirely sound. Then, of course, a business would continue, unless it was a war industry, which would very correctly also be taken out of the Japanese economy entirely. But the point is that a considerable number of people who have worked for some of the large industries in Japan, in my opinion, under a strict reading of FEC 230, would be deprived of the privilege of being associated with industrial or business activity in Japan for a period of 10 years, even though they may not have been either accused, tried, or convicted of a crime of any nature whatever.

Mr. HICKENLOOPER. Mr. President, if the Senator will yield further, I may say from his remarks that he has certainly given a picture of a most shocking and startling philosophy that apparently is being put into effect in Japan, if free enterprise is to be fostered in Japan and if Japan is to go forward under a free competitive system. I congratulate him for digging into this thing and giving us the picture of it.

Mr. McMAHON. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield to the Senator from Connecticut.

Mr. McMAHON. Without in any way commenting upon FEC 230, I should like to ask the Senator a question. General MacArthur is still in supreme command of the whole situation in Japan, is he not?

Mr. KNOWLAND. He is.

Mr. McMAHON. Has the Senator had any occasion to talk with him personally or to exchange written views with him, or to inquire as to what he thinks about it?

Mr. KNOWLAND. No; I have not, on this particular document. Two years ago, when I was a member of the committee, with the former Senator from Delaware, Mr. Tunnell, relative to an investigation of the disposal of Army and Navy surplus properties overseas, I had the opportunity to meet with General MacArthur and certain members of his staff. At that time this document, of course, was not even in being. I will say that I was very favorably impressed with the occupation job which General MacArthur had done. It was a most unusual situation, having come into and occupied Japan, where they had had a home army that had not been defeated in the field. At the time we were there, which was approximately 7 months after VJ-day, there had not been a single attack upon any American soldier or any other soldier of the occupation forces. It showed that General MacArthur had been able to take control of the situation and was carrying out his occupational duties diligently. I think he has done an outstanding job in the defeat of Japan, in demilitarizing Japan, repatriating the Japanese soldiers there, and in getting the country back on a nonwarlike basis.

Mr. McMAHON. That may be all well and good. I do not say I disagree with any of the encomiums the Senator has indulged in respecting the General. But the fact remains that he is still in supreme command of our occupation of Japan.

Mr. KNOWLAND. Only to this extent, if I may interrupt the Senator at that point. The General is in supreme command as the executive officer who is responsible for carrying out the policies of the Government of the United States and the Far Eastern Commission. But, as the able Senator from Connecticut may know, at the Moscow meeting of Foreign Secretaries in December 1945, further negotiations between the United States, the Soviet Union, and the United Kingdom were conducted on the subject of greater Allied participation in the control of Japan during the occupation, and with the concurrence of China the three Foreign Ministers on December 27, 1945, issued a communiqué establishing terms of reference for a Far Eastern Commis-

sion to replace the Far Eastern Advisory Commission, and that this Far Eastern Commission has as its principal functions to formulate the policies, principles, and standards in conformity with which the fulfillment by Japan of its obligations under the terms of surrender may be accomplished.

The Commission may take action by a majority vote, provided the representatives of the United States, the United Kingdom, the Soviet Union, and China all concur in the action taken. The Far Eastern Commission formulates policies, which are then transmitted to the State Department and to the joint chiefs of staff, which are then forwarded on to General MacArthur as directives for him to execute.

Mr. McMAHON. Granted that that may be so; General MacArthur's conduct of the occupation has been such as to lead me to believe that if he did not think that a policy which was handed to him was for the best interests of this Government we would have heard from him from Tokyo in no unmistakable terms. Which leads me to the observation that in view of the seriousness of the situation, as the Senator from California portrays it, and I do not doubt it or deny it, it occurs to me that it might be a good thing for me, as one individual interested in the question, to send the Senator's speech to General MacArthur and say to him "Now, look here, General, here is the story. What have you to say about it?" Then when I receive the General's reply I shall be glad to show it to the Senator and place it in the RECORD.

Mr. KNOWLAND. I shall be glad to have it.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotion of the interchange of persons, knowledge, and skills between the people of the United States and other countries and by means of public dissemination abroad of information about the United States, its people, and its policies.

REORGANIZATION PLAN NO. 1 OF 1948 (H. DOC. NO. 499)

The PRESIDING OFFICER laid before the Senate a message from the President of the United States, which was read by the Chief Clerk, and, with the accompanying plan, referred to the Committee on Labor and Public Welfare.

(For President's message, see today's proceedings of the House of Representatives on p. 303.)

EXECUTIVE MESSAGES REFERRED

As in executive session.

The PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(For nominations this day received, see the end of Senate proceedings.)

ADJOURNMENT TO WEDNESDAY

Mr. WHERRY. Inasmuch as it appears that the work of the Senate has been concluded for the day, I now move that the Senate adjourn until Wednesday next at 12 o'clock noon.

The motion was agreed to; and (at 2 o'clock and 16 minutes p. m.) the Senate adjourned until Wednesday, January 21, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 19, 1948:

IN THE NAVY

Rear Adm. Oscar C. Badger, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as Commander, Naval Forces, Western Pacific.

Andrew Roman (Naval ROTC) to be an ensign in the Navy from the 4th day of June 1948.

The following-named (Naval ROTC) to be ensigns in the Navy from the 4th day of June 1948, in lieu of appointment as ensign in the Supply Corps of the Navy, as previously nominated and confirmed:

Warren W. Barker	Wedo Nutaitis
Raymond A. Marston	Theodore W. Pstrak

John D. Shaw (Naval ROTC) to be an ensign in the Civil Engineer Corps of the Navy from the 4th day of June 1948.

Richard M. Hennigan to be an ensign in the Civil Engineer Corps of the Navy from the 4th day of June 1948, in lieu of appointment as ensign in the Navy, as previously nominated and confirmed.

Dwight H. Smith (civilian college graduate) to be a lieutenant (junior grade) in the Medical Corps of the Navy.

The following-named (civilian college graduates) to be lieutenants (junior grade) in the Medical Corps of the Navy, in lieu of lieutenants (junior grade) in the Medical Corps of the Navy, as previously nominated and confirmed, to correct spelling of names:

Dennis P. McCarty
Francies Marshall

The following-named (civilian college graduates) to be ensigns in the Supply Corps of the Navy:

James C. Billings, Jr.	Henry A. L. Church
Norman D. Chetlin	Lawrence R. Eades

The following-named (civilian college graduates) to be ensigns in the Civil Engineer Corps of the Navy:

Robert E. Dickman
Edward L. MacCordy

Myers Thornton (civilian college graduate) to be a lieutenant (junior grade) in the Dental Corps of the Navy, in lieu of lieutenant (junior grade) in the Dental Corps of the Navy, as previously nominated and confirmed, to correct spelling of name.

The following-named to be ensigns in the Nurse Corps of the Navy:

Anne M. Bailey	Josephine L. Hart
Ann M. Bono	Virginia M. Huff
Margaret Bozdos	Valeria Kalemba
Margaret M. Cook	Emma R. Partridge
Hazel C. Crouse	Edna J. Rundell
Wanda M. Crouse	Mary E. Staud
Alyeene L. Emfinger	Flora B. Sturm
Lois J. Gallagher	Hollyce J. Trantham

The following-named to be ensigns in the Nurse Corps of the Navy, in lieu of ensigns in the Nurse Corps of the Navy, as previously nominated and confirmed, to correct spelling of names:

Ethel C. A. Eusebio	Dorothea M. Johnston
Eleanor G. Hall	Maria Poljanac

The following-named officer to the grade indicated in the line of the Navy:

LIEUTENANT (JUNIOR GRADE)

William H. Martin, Jr.

The following-named officers to the grades indicated in the Medical Corps of the Navy:

COMMANDER

Frank F. Wildebush

LIEUTENANT COMMANDER

John D. Boland

LIEUTENANTS (JUNIOR GRADE)

John P. Ahearn	Albert E. Thielen
Arthur A. Helgerson	Harry A. Underwood
Francis E. Hornbrook	William J. Weller

The following-named officers to the grades indicated in the Medical Corps of the Navy, in lieu of lieutenants (junior grade) in the Medical Corps of the Navy as previously nominated and confirmed, to correct spelling of names:

Halim G. Habib
James M. Keirnan
Joseph E. F. Rankin

The following-named officer to the grade indicated in the Supply Corps of the Navy:

LIEUTENANT (JUNIOR GRADE)

John E. McGraw

The following-named officers to the grades indicated in the Dental Corps of the Navy:

LIEUTENANTS

Charles E. Payne
Lloyd W. Wolford

LIEUTENANTS (JUNIOR GRADE)

Philip H. Dunham	Roy C. Lininger
Joseph O. Kuebel, Jr.	Edward A. Smith
Joseph T. Kuschell	Wayne C. Whitehead

The following-named officers to the grades indicated in the Medical Service Corps of the Navy:

LIEUTENANT COMMANDER

Jasper E. Morgan

LIEUTENANT

Arthur L. Hall

The following-named officers to the grades indicated in the Nurse Corps of the Navy:

LIEUTENANTS

Lillian T. Buytaert	Marjorie H. Johnson
Anne T. Cooley	Marie E. Poulin
Patricia E. George	Vera M. Joyce
Bertha M. Davis	Bertha E. Rollings
Cecilia C. Flannery	Ellen Williams
Ruth E. Hartley	

Gladys LaV. P. Kennedy, to the grade indicated in the Nurse Corps of the Navy, in lieu of lieutenant (junior grade) in the Nurses Corps of the Navy as previously nominated and confirmed, to correct spelling of name.

ENSIGNS

Corinne A. Fischer
Melanie Ince
Eleanora W. Rennock

HOUSE OF REPRESENTATIVES

MONDAY, JANUARY 19, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Eternal Father, by whose mercy we are permitted to assemble, do Thou refresh us with Thy presence. Breathe into our souls Thy quickening spirit, that we may stand fully assured of Thy will. We pray that this erring world, with its oppression and misery, may cease to follow the winding paths of greed and selfish ambition. From Thy abundant gifts may we learn that it is more blessed to give than to receive.

Dear Lord, we ask Thee to relate our lives to the welfare of all the people

whom we serve; keep us within Thy hands, that, by industry, by discipline, and intelligent devotion to high purpose, we may act as men and women who believe in God and in the ultimate triumph of the right. We pray in the name of Him who is our Redeemer forever. Amen.

The Journal of the proceedings of Thursday, January 15, was read and approved.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Miller, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 3342. An act to enable the Government of the United States more effectively to carry on its foreign relations by means of promotion of the interchange of persons, knowledge, and skills between the people of the United States and other countries, and by means of public dissemination abroad of information about the United States, its people, and its policies.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1020) entitled "An act to amend the Philippine Rehabilitation Act of 1946, as amended."

EXTENSION OF REMARKS

Mr. HESELTON asked and was given permission to extend his remarks in the RECORD as to charges made by some persons that Members of Congress are at fault for the current fuel-oil shortage.

FUEL SHORTAGE

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I know that all of you who represent areas afflicted with a fuel shortage and unprecedented cold waves received but little encouragement from the reports in the local press headlined, "Truman cuts oil, gas for Federal buildings," and "Truman cuts oil for United States offices." I am confident that you read those articles and noted that the President directed that the working-hour temperatures in Government buildings using fuel oil were to be reduced to 68°, and that Government automobiles move no faster than 40 miles an hour.

I am sure you noted further that the local newspapers reported that the customary temperatures range from 72° to 74° in Government buildings are to be reduced to 68° during the daytime and to 60° at night.

The fact that Washington suffered the extreme hardship of a temperature of 36° Saturday afternoon may have led the President to issue this order. This will not greatly impress the people of New England, where the temperatures have ranged from zero to 22° below zero in the same period, nor will it impress the people of the Central and Middle West, where even lower temperatures were reached during the cold wave of last week.

The delay in instituting this obvious means of conservation of heating oil at a time when the Federal Government has been urging civilians to adopt every measure of conservation, in view of the admitted shortage in fuel oil, is regrettable. There is no way of knowing how much of that precious fluid has been wasted in heating Federal buildings up to 70° or 74° this last month and a half while New England, the Northeast, North Carolina, and the central part of the country have been struggling with a fuel-oil shortage during repeated cold waves.

I shall request soon the opportunity to lay before the House the full details of knowledge, on the part of Federal officials, of the impending fuel shortage, which goes back as far as July and, in some instances, as far back as April or May.

At this time, I want to call the attention of my colleagues to a telegram to the President, dated December 13, 1947, which read as follows:

Yesterday afternoon in the testimony of William E. Gannon, purchasing agent, Bureau of Federal Supply, before the House Committee on Interstate and Foreign Commerce, it appeared that many suppliers of fuel oil, Diesel oil, and kerosene have determined not to bid for the period of 6 months beginning February 1. It also appeared that a number of Government buildings had reconverted to oil-heating units within the last year. The witness stated that he did not know why they could not reconvert to coal. The total requirements for the 6-month period in region No. 1 was 28,500,000 gallons, and for region No. 2, 27,500,000 gallons. We do not now have the figure for region No. 3. We understand the supplies of coal for all those regions are much more adequate than the supplies of fuel oil. As you know, the shortages of fuel oil in portions of both regions 1 and 3 have created emergency conditions which may become much worse soon, and appeals have been made and are being made to the public of those areas to carry out conservation measures. We believe it is of the utmost importance that immediate steps be taken to investigate the possibility of conversions in Government buildings not only in the affected areas but throughout the country to determine the wisdom of such a means of relieving the fuel-oil situation and that vigorous action should be taken to that end. If it is possible to do this, it should also have the further effect of encouraging the conservation suggestions now being urged on the general public. We respectfully and urgently request that you order that such investigation be conducted immediately. Mr. O'HARA signs this telegram as a member of the House Interstate and Foreign Commerce Committee and as a Representative from Minnesota in region No. 3, an area deeply concerned with the existing fuel-oil situation. The others sign as members of a special committee appointed by Speaker MARTIN to inquire into possibilities as to the fuel situation in New England and as to developments before the House Interstate and Foreign Commerce Committee.

This telegram was signed by the following members of the New England delegation: ANGIER L. GOODWIN, ROBERT HALE, THOMAS J. LANE, WILLIAM J. MILLER, ANTONI N. SADLAK, and myself. The gentleman from Minnesota, JOSEPH P. O'HARA, joined us in this telegram.

Not having received any reply from the President, on December 19, 1947, a further telegram was sent to the President, which is as follows:

We are advised New England weather continuing cold and averaging 6° colder than last year. Although governors and State agencies doing everything possible to meet the crisis, suppliers throughout New England are daily reporting their supplies of heating oil rapidly approaching exhaustion. In view of fourth recommendation of industry committee filed yesterday, we respectfully request your advice as to whether our suggestion in our telegram to you of December 13 met with your approval. We sincerely believe the emergency conditions confronting the industries and the people of New England require the interest of and most vigorous possible action by their Federal Government.

It was signed by the following members of the New England delegation: ANGIER L. GOODWIN, ROBERT HALE, THOMAS J. LANE, WILLIAM J. MILLER, EDITH NOURSE ROGERS, ANTONI N. SADLAK, and myself, who are members of the subcommittee designated by the Speaker on December 8, 1947, to observe with the House Interstate and Foreign Commerce Committee.

On December 19 Hon. John R. Steelman wrote the following letter:

Reference is made to your telegram of December 13, addressed to the President, signed by yourself and Congressman ANGIER L. GOODWIN, ROBERT HALE, THOMAS J. LANE, WILLIAM J. MILLER, JOSEPH P. O'HARA, and ANTONI N. SADLAK, regarding the fuel-oil shortage.

In accordance with the suggestion in your telegram, I have asked Maj. Gen. Philip B. Fleming to investigate the practicability of converting heating facilities in Government buildings from oil to coal.

I will communicate with you again as soon as results of this investigation are available.

As of this moment I have not received any further communication reporting the result of General Fleming's investigation. However, on January 13 my attention was called to the assertion made recently in the column written by Mr. Drew Pearson in which he discussed the military requirements for oil. As a result I wrote Mr. Steelman on that date the following letter:

I noticed this morning in the column written by Mr. Drew Pearson for the Washington Post, he stated, "Within the past few weeks Stewart Field, N. Y., has converted its heating units from coal to oil, and Fort Myer, Va., has switched from coal to oil for heating the barracks." In view of the suggestion with reference to such conversions made by a subcommittee of the New England delegation to the President and your letter of December 19, I would appreciate your advice as soon as possible as to whether this is an accurate statement, and if so, the amount of daily consumption of heating oil at those two points.

Again I have had no reply to my request for information.

Consequently, I have sent Mr. Steelman this morning the following telegram:

Referring to the telegram December 13 from several members New England delegation and Congressman O'HARA, to second telegram December 19 from several members

New England delegation, to your letter December 19 and to my letter to you of January 13, in view of conservation order issued Saturday and extreme cold wave prevailing New England, shall appreciate your immediate advice of results of General Fleming's investigation and as to information requested in my letter January 13.

You all know that many Federal agencies have been engaged in vigorous attempts to convince the private citizen that he or she must overcome this shortage by the most drastic kind of voluntary cooperation in reducing the heat in their homes. In the meantime, State and local officials are doing their utmost to meet the requirements for their hospitals, schools, churches, transportation systems, and other institutions, while industries using fuel oil have been engaged in a constant effort to keep in full operation so that their employees may work full time and production of vital goods may continue.

While it will be a source of some comfort to them that the President has taken a cautious step toward the conservation of heating oil more than a month after we made the request for an investigation as to the possibility of converting in Government buildings, there remain a great many questions as to the soundness of the Government's over-all program. It is my purpose to discuss this further in the near future.

ARLINGTON MEMORIAL AMPHITHEATER—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 500)

The SPEAKER laid before the House the following message from the President of the United States, which was read and together with the accompanying papers referred to the Committee on Public Lands and ordered to be printed:

To the Congress of the United States:

In compliance with the requirements of the Public Act No. 397, Sixty-sixth Congress, I transmit herewith the Annual Report of the Commission on the Erection of Memorials and Entombment of Bodies in the Arlington Memorial Amphitheater.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 16, 1948.*

UNITED STATES EMPLOYMENT SERVICE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 499)

The SPEAKER laid before the House the following message from the President of the United States, which was read and referred to the Committee on Expenditures in the Executive Departments and ordered to be printed:

To the Congress of the United States:

I transmit herewith Reorganization Plan No. 1 of 1948, under the Reorganization Act of 1945, which transfers the United States Employment Service and the Bureau of Employment Security to the Department of Labor. The United States Employment Service is now in the Department of Labor by temporary transfer under authority of title I of the First War Powers Act, 1941, while the Bureau of Employment Security is at present a constituent unit of the Federal Security Agency. This plan will place the administration of the Employment Service and unemployment-compensation functions of the Federal Government in the most appropriate location within the executive establishment and will provide for their proper coordination.

I find that this proposed reorganization is necessary to accomplish the following purposes of the Reorganization Act of 1945: (1) To group, coordinate, and consolidate agencies and functions of the Government according to major purposes, (2) to increase the efficiency of the operations of the Government, and (3) to promote economy to the fullest extent consistent with the efficient operation of the Government.

The United States Employment Service was established in the Department of Labor by the Wagner-Peyser Act in 1933. It was later transferred under Reorganization Plan No. 1, effective July 1, 1939, to the Social Security Board in the Federal Security Agency. After the creation of the War Manpower Commission, the United States Employment Service was placed under that Commission by Executive Order No. 9247 of September 17, 1942. Shortly after the Japanese surrender the Service was transferred to the Department of Labor by Executive Order No. 9617. Both of these transfers were made under the temporary authority of title I of the First War Powers Act.

The provision of a Nation-wide system of public employment offices, which assists workers to get jobs and employers to obtain labor, belongs under the leadership of the Secretary of Labor. Within our Federal Government the Department of Labor is the agency primarily concerned with the labor market and problems of employment.

The Department of Labor already has within its organization many, but not all, of the resources needed for the full performance of this role. It has a broad understanding of working conditions and the factors in labor turn-over. Through the Bureau of Labor Statistics, it develops extensive information on the long-term trends in employment and on the occupational characteristics of the labor force. Through the Apprentice Training Service, it promotes the development of needed skills. I consider it necessary and desirable that these facilities of the Department of Labor should now be augmented by the other major operating agencies in the field of employment—the United States Employment Service and the Bureau of Employment Security. These agencies are concerned, as is the Department of Labor, with the full and proper employment of American workers.

The results achieved by the Employment Service after more than 2 years of operation within the Department of Labor strongly justify the decision to place these functions permanently within that Department. More employers are now using the facilities of the public employment offices than ever before in the history of the peacetime Employment Service. More services are being furnished employers by the public employment offices than ever before. Today the public employment office has become the central labor exchange in the community and the primary source of information on employment opportunities and immediate labor market trends.

The Bureau of Employment Security in the Federal Security Agency administers the Federal activities relating to the Nation-wide unemployment compensation system. As a practical matter these functions have proved to be intimately related to those of the United States Employment Service. Under existing State laws, claimants for unemployment compensation must register with the Employment Service before they may become eligible for benefits. In consequence nearly all States have assigned the administration of these two programs to the same agency.

Both the Employment Service and the unemployment compensation system are concerned with the worker as a member of the labor force. Both are concerned with shortening the periods of unemployment and with promoting continuity of employment. When the worker becomes unemployed the alternatives are either to assist him in obtaining new employment or to pay him benefits. The proper emphasis is on employment rather than on benefit payments. This emphasis can best be achieved by having the two programs administered in the agency most concerned with the employment process—the Labor Department.

By reason of the reorganizations made by this plan, I find that the responsibilities and duties of the Secretary of Labor will be of such nature as to require the inclusion in the plan of provisions for the appointment and compensation of a Commissioner of Employment to coordinate the Employment Service and unemployment insurance activities within the Department. The plan also provides that the Federal Advisory Council, a group representative of labor, management, and the public, authorized by the Wagner-Peyser Act, shall advise the Secretary and the Commissioner on the operation of both the unemployment compensation system and the United States Employment Service.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 19, 1948.*

AMENDING RECLAMATION PROJECT ACT OF 1939

Mr. ALLEN of Illinois, from the Committee on Rules, submitted the following resolution (H. Res. 430), which was referred to the House Calendar and ordered printed:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 2873), to amend certain provisions of the Reclamation Project Act of 1939. That after general debate, which shall be confined to the bill and continue not to exceed 3 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Lands, the bill shall be read for amendment under the 5-minute rule. It shall be in order to consider without the intervention of any point of order the substitute committee amendment recommended by the Committee on Public Lands now in the bill, and such substitute for the purpose of amendment shall be considered under the 5-minute rule as an original bill. At the conclusion of the reading of the bill for amendment, the

Committee shall rise and report the same to the House with such amendments as may have been adopted, and any member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

AMENDING THE TRADING WITH THE ENEMY ACT

Mr. ALLEN of Illinois, from the Committee on Rules, submitted the following resolution (H. Res. 431), which was referred to the House Calendar and ordered printed:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases. That after general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

REREFERENCE OF BILL

Mr. MICHENER. Mr. Speaker, the bill H. R. 3239, introduced by the gentleman from New York [Mr. KEATING], was inadvertently referred to the Committee on the Judiciary. I have conferred with the chairman of the Committee on Education and Labor, with the gentleman from New York [Mr. KEATING], and others interested, and I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill H. R. 3239 and that the same be rereferred to the Committee on Education and Labor.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXTENSION OF REMARKS

Mr. CLASON asked and was granted permission to extend his remarks in the RECORD in two instances; in one to include a radio speech by himself, and in the other, a newspaper editorial.

PERMISSION TO ADDRESS THE HOUSE

Mr. CLASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. CLASON]?

There was no objection.

Mr. CLASON. Mr. Speaker, last week temperatures in the Second District of Massachusetts ranged down to 22° below zero, while our people are victims of a fuel-oil shortage. Prices are mounting rapidly. No one knows why. Emergency officials have been appointed by Gov. Robert F. Bradford to aid any individuals who find themselves unable to secure fuel oil or kerosene. They are doing their best to bring relief wherever necessary. They are serving without pay. They are not connected with any oil companies. I have been told by the State coordinator, Mr. George Rockwell, that his organization has been successful in furnishing oil wherever needed. Because of the scarcity of fuel oil, deliveries are limited in amount. People are told to follow various rules in order to conserve their allotments.

During the war we had a scarcity of fuel oil in New England. We knew our Army and Navy were using tremendous quantities and that tankers were scarce and tank cars also. What is the reason or the excuse for the present fuel-oil shortage? Is it lack of crude oil, fuel oil, or kerosene in the United States? Not at all, if the information given to Senate and House committees and individual Senators and Congressmen is accurate. Oil company and Government officials tell us that an export quota of 12,000,000 barrels of oil for the first 3 months of 1948 has been established. Great quantities were shipped abroad in 1947. Perhaps the Secretary of Commerce, who handles oil export licenses, has not heard the story emanating from Max W. Ball, Director of the Interior Department's Oil and Gasoline Division, that the United States will suffer from an oil scarcity for the next 4 years. Perhaps he has heard the story, and his decision to issue these licenses is the proper one. Then, we are told that four times as much oil was piped in 1947 as in 1946 from Portland, Maine, to Montreal—not for Canadian use but to be exported overseas.

I favor helping our European friends. I do not want them to suffer from the cold. I plan to vote more aid for them. But I would like to know the facts. Is the scarcity due to our Government, directly or indirectly, purchasing oil in competition with the people of the United States for foreign use? Does the Government pay more for its oil than the market price and so get preference? That is the way it gets grains, and up goes the price here at home. And the price of fuel oil surely is going up. Why? Transportation costs were offered as an explanation by one witness. Yet a Boston independent oil dealer bought a tanker when he was advised that no tankers were available for his use. Then he sent letters to the New England congressional delegation showing that he tried to buy some oil to bring in his tanker to Boston at the time our committees were being told that there was more oil in storage in the Gulf area than at this time last year. The Bostonian received two bids to furnish him with oil at a time when the regular market for fuel oil was approximately 6¾ cents per gallon. One bid was for 13 cents a gallon, the other 11½ cents a gallon. Today I am told that independent distributors are paying retail prices for wholesale deliveries of fuel oil in order to supply their customers.

A lot of questions are being asked in Massachusetts by angry and resentful people. Did manufacturers of oil products receive greater profits from oil shipped overseas in 1947 than they were receiving per gallon from oil sold by them in the United States? Are they making greater profits in 1948 from their overseas shipments than from oil sold at home? How much oil did they sell to the United States Government or any of its agencies or for its account in 1947? At what prices?

Why did the Cabinet of the President of the United States order the sale of more than 80 Government tankers to foreigners in 1947, even if a law permitted it, when the Secretary of the Interior and Mr. Ball must have known that there would be a serious scarcity of fuel oil in the United States this winter, caused in part by lack of tankers? If the Secretary of the Interior by Mr. Ball, who serves under him, can prophesy that the people of the United States will suffer from a scarcity of fuel oil for the next 4 or 5 years, why were not adequate steps to prevent the present existing shortage along the entire eastern seaboard taken by him last summer and fall instead of now in the dead of winter? If the major oil companies do not intend to increase the capacity of their refineries in 1948 what action does Secretary Krug recommend?

Why are the prices for fuel oil advanced at about the same time and the same amount by many, if not all, of the major companies? Who fixes them? What is the true break-down for the existing prices of fuel oil and gasoline? The dealers claim that they are getting the same spread which they have had for years.

Since scarcity of fuel oil for heating purposes is causing human suffering and anxiety, why do the refiners not increase the percentage of distillation of fuel oil and decrease the percentage of gasoline? Most owners of oil heating systems own automobiles. My guess is that they would unanimously prefer a scarcity of gas and sufficient fuel oil to the system as now manipulated.

And if Mr. Ball, of the Department of Interior, has reasonable grounds for testifying that there will be a scarcity of fuel oil for the next 4 or 5 years, what is he or Secretary of the Interior Krug planning to do about it?

And if they have nothing better to offer the American people than the miserable conditions prevailing in many States today, I urge the members of the House Committee on Interstate and Foreign Commerce to make every effort to ascertain the answers to the above questions and many others which will occur to committee members. Government officials have proved so ineffective to date in this important matter that I urge the committee to report such legislation as will protect our own people against scarcity of fuel oil and, also, gasoline; against exorbitant prices for them; and against the bungling in oil products which has caused so much trouble this winter in the United States of America. It might be well to find out why a driver of an automobile has no trouble in keeping his tank full while a home owner cannot be sure of obtaining fuel oil—a much more serious matter.

Did the refiners make such a bad guess on fuel oil needs this year that we are just plain out of luck for once, and next year they will refine all the fuel oil we need? I hope this is the correct answer. I heard President Rathbone, of Standard Oil of New Jersey, testify. I believe he has the ability and the knowledge to set up a program which will work for the rest of this winter and during coming winters. Under a recent law, the major oil companies can make such voluntary agreements with the President's approval as may be necessary. But, I would add that if Mr. Ball's prophecy of a 4 years' scarcity of fuel oil comes true while this Nation is at peace, then the oil industry will have failed to keep faith with its best customers—the people and Government of the United States. And something which will protect the people may be necessary—perhaps something drastic. This is not a partisan political matter at all. This is an all-American matter which requires the active cooperation of our people, our corporations, and our Government. This problem can and will be licked.

The SPEAKER. The time of the gentleman from Massachusetts [Mr. CLASON] has expired.

SPECIAL ORDER GRANTED

Mr. PLUMLEY. Mr. Speaker, I ask unanimous consent that on Wednesday, January 21, after all legislative business and any other special orders that may have been entered, I may address the House for 20 minutes on the subject, There Are No Such Words as Political Expediency.

The SPEAKER. Is there objection to the request of the gentleman from Vermont?

There was no objection.

EXTENSION OF REMARKS

Mr. KILBURN asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter.

Mr. MILLER of Nebraska asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter from a constituent.

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances and to include editorials.

Mr. CURTIS asked and was given permission to extend his remarks in the Appendix of the RECORD and include tables and excerpts.

Mr. BRADLEY asked and was given permission to extend his remarks in the RECORD and include an article from the Daily News of Los Angeles.

Mr. POTTER asked and was given permission to extend his remarks in the Appendix of the RECORD on the subject of Michigan's veteran laws and include therein a digest thereof.

GOVERNMENT PROPAGANDA

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. MILLER of Nebraska. Mr. Speaker, the Subcommittee on Publicity and Propaganda under the Committee on Expenditures in the Executive Departments held a hearing on January 14, 1948, relative to complaints that the committee had received, charging improper activities in propagandizing and lobbying for pending legislation providing for universal military training. It is interesting to read the testimony of the Secretary of the Army, Kenneth C. Royall, and others who appeared before the committee.

It would seem that the military has established a so-called Army Advisory Committee which has for its goal the establishing of these committees in at least 600 representative communities, with an approximate membership of 9,000 civilians. The purpose of the advisory committees, according to a memo signed by Col. James Pierce, issued August 26, 1946, is for "preparing a favorable reception for Army policy and discovering the things that hamper Army policy; to advise the Army on all community attitudes which are based on adverse reactions to acts, facts, and policies of the Army; to provide channels for the dissemination of facts and policies of the Army in a manner so that the public will understand and be completely informed."

Under date of November 14, 1947, an invitation to a meeting to be held at the Pentagon on Tuesday, December 9, 1947, was forwarded to members of the Advisory Council over the signature of Maj. Gen. F. B. Parks. This meeting was attended by delegates of various women's organizations throughout the Nation. The main purpose of the meeting was to get support for the universal military training plan.

The thing that disturbs me, Mr. Speaker, is the fact that not only the Army, but other branches of the Government, are spending huge sums of the taxpayers' money to indoctrinate and propagandize the public for their pet ideas.

Up to January 1 of this year, the Army had been using military aircraft to fly groups to Fort Knox for inspection of the experimental units. The record also shows that they have flown groups of ministers and newspapermen and others to Europe for inspection trips of various kinds.

Government agencies distort and screen the news. Propaganda of all sorts flood the press and radio. It reminds one of Hitler's teaching of telling, over and over again, a lie, for people will soon believe the falsehoods.

When the Secretary of the Army, General Royall, was asked by the gentleman from Indiana [Mr. HARNESS], the chairman of the committee, as follows:

> Now do you feel, Mr. Secretary, that it is proper and legitimate for the Department of the Army to use appropriated funds to that Department for paying lunches of women's organizations, such as the one that was entertained at the Pentagon, the other day.

General Royall replied:

> I think it is perfectly proper. They are advisory to us. Whenever we have sent a group of ministers, a group of newspapermen, or a group of businessmen, either over to Europe or anywhere else, to look at the situation and give us the benefit of their advice, whenever we have invited people in this country to come to Washington, or come from Washington in a group to advise us on a particular matter, we buy them meals out of Army funds. I don't mean individually, but when we have a group.

It seems to me that the military should carry out our policies and not form them. The overload of military personnel in Government seems responsible for this unhealthy condition.

It seems to me, Mr. Speaker, that there is a very fine line of demarcation between what is propaganda and what is information. If the Secretary of War feels it is proper to set up advisory committees to indoctrinate them in favor of universal military training, then what is to prevent other departments of the Government from the following similar procedures?

The advisory committees, if they are the same as we had under the old OPA and the WPB, it is quite evident that they were selected because they think as the agency wants them to think. They are told what the policy will be. Their advisory capacity has, indeed, been limited. It is only natural that when these committees receive a trip to Washington, Fort Knox, or across the water, and are wined and dined, that they are expected to go out and spread the propaganda of the Department which gives them the honorary title of advisory committees. They are expected to try and influence legislation before Congress. In this last respect, it seems a clear violation of the law. It is a subterfuge for the military or any department of Government to say they are doing it to inform the public. The real reason for the entertainment and the spending of the taxpayers' money is to influence legislation.

I trust that the committee investigating lobbying activity will bring those who are violating the law to the court of justice. If the law is not explicit, then it ought to be clarified to prevent agencies of the Government spending the taxpayers' money to promote the propaganda and influence legislation favorable to them.

TITLE TO TIDELANDS

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BRADLEY. Mr. Speaker, I have just introduced a bill to correct through congressional action the unfortunate conditions brought about by the recent decision of the United States Supreme Court in the so-called Tidelands case against the State of California. This is the bill which has been prepared by the Association of Attorneys General of the various States after several months of study and deliberations and it applies impartially to every part of the Nation.

Mr. Speaker, this bill reasserts the principle of States' rights, as opposed to centralization of power in one top-heavy bureaucratic despotism. It restores title to their homes to thousands of families in widespread areas of the United States,

and it returns the ownership of docks, and piers, and bridges, and harbor works of all kinds to their rightful owners rather than keeping them clouded by either present claims or possible future litigation on the part of the Federal Government. This bill will clarify the present muddled situation by the one means the Supreme Court indicated might properly be utilized for that purpose.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. BRADLEY. I yield.

Mr. RANKIN. And also keep a bureaucracy from getting between those States on the border line such as Mississippi and California, and the ocean or gulf.

Mr. BRADLEY. I thank the gentleman.

Mr. Speaker, I hope that many other Members of the House will introduce this identical bill in support of the sentiments now existing in their States and congressional districts, as indicated by the very widespread approval given to it by the Association of Attorneys General.

UPWA-CIO SPONSORS PAUL ROBESON FOR PANAMA CANAL ZONE TEACHERS

Mr. BUSBEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BUSBEY. Mr. Speaker, on last Monday, January 12, I inserted in the CONGRESSIONAL RECORD a report which, in my opinion, shows conclusively that the United Public Workers of America, CIO is Communist dominated and controlled. As further proof of my contention, I call your attention to a copy of the Daily Worker of last Wednesday, January 14, 1948, which I hold in my hand. Everyone knows the Daily Worker is the official publication of the Communist Party of America. On page 12 there is advertised a benefit performance of the well-known Communist, Paul Robeson, to be held tonight at 8:30 p. m., Manhattan Center, Thirty-fourth Street at Eighth Avenue, New York City. At the bottom of this advertisement is printed "Auspices United Public Workers of America, CIO."

I also hold in my hand a dodger that has been distributed and put in public buildings which, in addition to advertising the benefit concert, states at the bottom that it is for the "benefit scholarship fund for public-school teachers in the Panama Zone," and, also, that it is "sponsored by the United Public Workers of America, CIO."

Everyone in the United States should know by now Paul Robeson's many Communist affiliations, but just for the record I am going to ask permission from the Speaker, under leave to extend my remarks, to include a report on Paul Robeson, prepared by the staff of the House Committee on Un-American Activities, and also a letter sent by me to the Attorney General, Tom C. Clark, last Saturday, urging that the United Public Workers of America, CIO, be named as a subversive organization:

PAUL ROBESON

The Daily Worker of April 6, 1938, page 2, reveals that Paul Robeson visited the Abraham Lincoln Brigade in Spain, and the Daily Worker of January 24, 1938, page 4, reveals that he entertained this group in Spain. The Abraham Lincoln Brigade was cited as a Communist front by the Special Committee on Un-American Activities in Report No. 1311, dated March 29, 1944.

Paul Robeson, according to a sheet attached to a letterhead of January 17, 1920, was a signer of a petition to discontinue the Dies Committee, which was sponsored by the American Committee for Democracy and Intellectual Freedom. The American Committee for Democracy and Intellectual Freedom was cited as a Communist front in Report 1311, dated March 29, 1944, of the Special Committee on Un-American Activities.

A letterhead of January 18, 1939, lists Paul Robeson as a member of the executive committee of the China Aid Council of the American League for Peace and Democracy. The Attorney General has said of this organization: "The American League for Peace and Democracy * * * was designed to conceal Communist control in accordance with the new tactics of the Communist International" (Attorney General Francis Biddle, CONGRESSIONAL RECORD, September 24, 1942, p. 7684), and that it was "established in the United States, in an effort to create public sentiment on behalf of a foreign policy adapted to the interests of the Soviet Union." (Attorney General Francis Biddle, CONGRESSIONAL RECORD, September 24, 1942, p. 7683.) The Special Committee on Un-American Activities cited the American League for Peace and Democracy as a Communist front in three committee reports which are dated January 3, 1940, June 25, 1942, and March 29, 1944.[1]

A pamphlet entitled "What is APM," page 12, discloses that Paul Robeson was a member of the national council of the American Peace Mobilization, and, according to the Daily Worker of September 3, 1940, page 4, he was a vice chairman of this organization. In addition, Paul Robeson was a speaker at an American Peace Mobilization mass meeting held in Washington, D. C. (See Daily Worker, September 13, 1940, p. 4, and September 15, 1940, p. 2.) The American Peace Mobilization was cited as a Communist front by the Special Committee on Un-American Activities in the report of March 29, 1944, and Attorney General Francis Biddle said, "The most conspicuous activity of American Peace Mobilization was the picketing of the White House, which began in April 1941, in protest against lend-lease and the entire national-defense program. * * * On the afternoon of June 21, 1941, he (Frederick V. Field, national secretary) suddenly called off the picket line around the White House." (CONGRESSIONAL RECORD, September 24, 1942, p. 7684).[2]

The program, Artists' Front to Win the War, reveals that Paul Robeson was a sponsor of this organization which was cited as a Communist front by the Special Committee on Un-American Activities in committee report of March 29, 1944.

A letterhead, dated September 11, 1941, lists Paul Robeson as a sponsor of the Citizens' Committee for Harry Bridges, an organization cited as a Communist front on March 29, 1944, by the Special Committee on Un-American Activities.

According to the Daily Worker, March 5, 1941, page 2, Paul Robeson was a signer of the statement sent to the President defending the Communist Party.

An official booklet of the committee lists Paul Robeson as a member of the Coordinating Committee to Lift the Embargo. This booklet, These Americans Say, page 8, lists him as a representative individual. The Coordinating Committee to Lift the Embargo was cited by the Special Committee on Un-American Activities as a Communist front on March 29, 1944.

Paul Robeson was vice chairman of the Emergency Peace Mobilization. (See Daily Worker, Sept. 3, 1940, p. 1.) He was also affiliated with this organization as a singer according to the Daily Worker of August 13, 1940, page 5; August 31, 1940, page 1; and September 2, 1940, page 4. This organization was cited as a Communist front by the Special Committee on Un-American Activities in report 1311 of March 29, 1944.[1]

A letterhead of February 26, 1946, reveals that Paul Robeson was a national sponsor of the Spanish Refugee Appeal of the Joint Anti-Fascist Refugee Committee. The Special Committee on Un-American Activities cited the Joint Anti-Fascist Refugee Committee as a Communist front on March 29, 1944.[2]

Paul Robeson was a national sponsor of the Medical Bureau and North American Committee to Aid Spanish Democracy as shown by a letterhead of July 6, 1938. Another letterhead, that of February 2, 1939, of the Michigan chapter, reveals he sponsored the same organization. On March 29, 1944, this organization was cited as a Communist front by the Special Committee on Un-American Activities.

Paul Robeson has been affiliated with the National Council of American-Soviet Friendship as a sponsor according to a memorandum issued by the council on March 18, 1946. The National Council of American-Soviet Friendship was cited as a Communist front by the Special Committee on Un-American Activities on March 29, 1944.[2]

The affiliation of Paul Robeson with the National Federation for Constitutional Liberties is shown by the Daily Worker of March 18, 1945, page 3, which names him as one of the signers of a statement hailing War Department order on commissions for the Communists which that organization sponsored. The National Federation for Constitutional Liberties was cited as a Communist front by the Special Committee on Un-American Activities in the committee reports of June 25, 1942, and March 29, 1944. Attorney General Francis Biddle called it "part of what Lenin called the solar system or organization, ostensibly having no connection with the Communist Party, by which Communists attempt to create sympathizers and supporters

[1] The American League for Peace and Democracy was a successor of the American League Against War and Fascism, which, together with the American Peace Mobilization, were named as subversive by the Department of Justice acting under authority of Executive Order 9300, dated February 5, 1943.

[2] The Joint Anti-Fascist Refugee Committee; the National Council of American Soviet Friendship; the Veterans of the Abraham Lincoln Brigade, and the American Youth for Democracy were designated as subversive by the Department of Justice acting under authority of Executive Order 9835, dated March 21, 1947.

[1] The American League for Peace and Democracy was a successor of the American League Against War and Fascism, which, together with the American Peace Mobilization, were named as subversive by the Department of Justice acting under authority of Executive Order 9300, dated February 5, 1943.

[2] The Joint Anti-Fascist Refugee Committee; the National Council of American-Soviet Friendship; the Veterans of the Abraham Lincoln Brigade, and the American Youth for Democracy were designated as subversive by the Department of Justice acting under authority of Executive Order 9835, dated March 21, 1947.

of their program. (CONGRESSIONAL RECORD, Sept. 24, 1942, p. 7687.)[3]

A pamphlet, For a New Africa (proceedings of Conference on Africa, New York, April 14, 1944), shows that Paul Robeson was chairman of the National Negro Congress which was cited as a Communist front by the Special Committee on Un-American Activities in committee reports of January 3, 1940, June 25, 1942, and March 29, 1944. This organization was also cited by Attorney General Francis Biddle in support of the following characterization: "From the record of its activities and the composition of its governing bodies, there can be little doubt that it has served as what James W. Ford, elected to executive committee in 1937, predicted 'An important sector of the democratic front' sponsored and supported by the Communist Party." (CONGRESSIONAL RECORD, Sept. 24, 1942, p. 7689.)

The issues of January 5, 1943, March 14, 1944, page 2, and April 30, 1946, page 2, of New Masses, reveal that Paul Robeson has been a contributing editor of that publication. Paul Robeson was a signer of the New Masses' letter to the President which defended Communists. (See New Masses, April 2, 1940, p. 21.) New Masses, November 9, 1943, page 31, discloses that Paul Robeson was a member of the reception committee of New Masses' thirty-third artists' and writers' annual ball. New Masses was described by Attorney General Francis Biddle as a Communist periodical (CONGRESSIONAL RECORD, Sept. 24, 1942, p. 7688) and was cited as a Communist front by the Special Committee on Un-American Activities in the report of March 29, 1944.

Paul Robeson's affiliation with the New Theater League and the New Dance League is shown by his contribution to the New Theater of July 1935, page 5. Both the New Theater League and the New Theater have been cited as Communist fronts by the Special Committee on Un-American Activities in the report of March 29, 1944.

The Schappes defense committee, which was cited as a Communist front by the Special Committee on Un-American Activities on March 29, 1944, sponsored the open letter to Gov. Thomas E. Dewey, of New York State, which requested a pardon for Morris U. Schappes, a Communist. According to the New York Times, October 9, 1944, page 12, Paul Robeson was a signer of this letter.

According to the program of the third meeting of the Southern Conference for Human Welfare, Nashville, Tenn., April 19–21, 1942, Paul Robeson gave an evening concert on April 20, 1942. The Southern Conference for Human Welfare has been cited as a Communist front by the Special Committee on Un-American Activities in report 1311 of March 29, 1944.

The dinner invitation reveals that Paul Robeson sponsored the Soviet Russia Today dinner which celebrated the twenty-fifth anniversary of the Red Army at the Hotel Commodore in New York City. Soviet Russia Today was cited as a Communist front by the Special Committee on Un-American Activities in the reports of June 25, 1942, and March 29, 1944.

Paul Robeson has been affiliated with the Spanish Relief Campaign as the international chairman of the Negro Peoples' Committee, a participating organization. This information was obtained from the back cover of Children in Concentration Camps. The Spanish Refugee Relief Campaign was cited as a Communist front by the Special Committee on Un-American Activities on January 3, 1940.

Paul Robeson's affiliations with the Veterans of the Abraham Lincoln Brigade is shown by the Daily Worker of February 21, 1940, which discloses that he was a signer of the letter sponsored by that organization to President Roosevelt and Attorney General Jackson protesting the attacks upon the Veterans of the Abraham Lincoln Brigade. In addition, the Daily Worker of September 17, 1940, page 7, and September 20, 1940, page 7, shows that he has sung for this organization which was cited as a Communist front by the Special Committee on Un-American Activities on March 29, 1944.[2]

According to a handbill, "Paul Robeson will welcome America's real fighters for peace and freedom"; Paul Robeson was a speaker at a Washington Peace Mobilization meeting held in Washington, D. C., on September 13, 1940. The Washington Peace Mobilization was cited as a Communist front on March 29, 1944, by the Special Committee on Un-American Activities.[3]

Paul Robeson was a speaker at a youth rally to defend labor's right to strike on June 14, 1946, at Manhattan Center, New York City, according to a handbill. This rally was sponsored by the American Youth for Democracy, an organization cited as a Communist front by the Special Committee on Un-American Activities in report 1311 of March 29, 1944, and also in report 271 of April 17, 1947. The following is quoted from report 271: "The committee calls upon the governors or legislatures of the various States as well as the administrative heads of the various colleges and universities to thoroughly expose the Communist connections of the American Youth for Democracy as well as the inimical objectives of the Communist Party in America."[2]

The Daily Worker of April 6, 1942, page 5, contains a report by Sasha Small of the International Labor Defense National Conference on Civil Liberties in Support of War. The following is quoted from that: "Paul Robeson * * * spoke * * * of * * * how the ILD today under the leadership of such a person as Congressman VITO MARCANTONIO was performing an essential service to the winning of the war." The International Labor Defense was cited as a Communist front by the Special Committee on Un-American Activities in reports of June 25, 1942, and March 29, 1944, and was called the legal arm of the Communist Party by Attorney General Francis Biddle. (CONGRESSIONAL RECORD, Sept. 24, 1942, p. 7686.)

The Daily Worker of July 23, 1940, page 1, reveals that Paul Robeson was a signer of an open letter to President Roosevelt which protested against the attack on the right of the Communist Party to use the ballot.

The following statement is attributed to Paul Robeson by the Daily Worker: "There are only two groups in the world today—Fascists and anti-Fascists. The Communists belong to the anti-Fascist group and I label myself as anti-Fascist.

"The Communist Party is a legal one like the Republican or Democratic Party and I could belong to either. I could just as well think of joining the Communist Party as any other." (See Daily Worker, April 21, 1947, p. 1.)

The March 16, 1947 issue of the New York Times contains an article by Jack Goodman which tells of Paul Robeson's retirement from the formal concert field. In this article, he is attributed with saying, "Then * * * I want my audiences that I am about to wind up with some pretty strong stuff—actually inviting them to leave if they can't take it. * * * They've paid their money, heard some truly great music, actually as many numbers as most artists sing. From that point on it's up to the listeners' hearts, and they can either enjoy or hate my songs of Soviet Russia, union songs like Joe Hill, songs of the Spanish Republican front fighters, and songs of the Chinese people. I know I've made many enemies that way, usually based on the listener's pocketbook, but those are the songs I do most wish to sing."

The Daily Worker of April 29, 1947, page 12, contains an article by Ruby Cooper which reports on a rally in tribute to Paul Robeson and to post the recent ban on his concert at Peoria, Ill., held at the Civil Opera House in Chicago under the sponsorship of the Abraham Lincoln School. The Abraham Lincoln School was cited as a Communist front by the Special Committee on Un-American Activities in report 1311 of March 29, 1944.[4]

On August 7, 1941, Zola Ardene Clear appeared before the Special Committee on Un-American Activities and gave testimony in executive hearings. At this time Miss Clear submitted letterheads of the Washington Committee for Aid to China and the National Negro Congress, which were placed on file as exhibits. Both of these letterheads announced that Paul Robeson would sing on April 25, 1941, at Uline Arena, at a benefit performance for the two organizations. The Washington Committee for Aid to China was cited as a Communist front by the Special Committee on Un-American Activities in report 1311, dated March 29, 1944. The citation of the National Negro Congress has been given in a previous paragraph of this report.

WASHINGTON, D. C., *January 17, 1948.*

HON. TOM C. CLARK,
United States Attorney General,
Washington, D. C.

DEAR MR. CLARK: I am enclosing pages A102, A103, A104, A105, and A106 from the Appendix of the CONGRESSIONAL RECORD, containing a report on the United Public Workers of America-CIO, with my personal remarks. I have every reason to believe the contents of this report are accurate.

You recently released a list of organizations which, in your opinion, are subversive and should be considered as such in connection with determining the loyalty of Federal employees. While you stated at the time that the list was not complete and you expected to add names from time to time, I fail to find the name of the United Public Workers of America-CIO on your original or subsequent lists. In view of this, I respectfully ask and would appreciate your answers to the following questions:

1. Has the Federal Bureau of Investigation made an investigation of and submitted to the Attorney General's office a report on the UPWA-CIO?

---

[2] The Joint Anti-Fascist Refugee Committee; the National Council of American-Soviet Friendship; the Veterans of the Abraham Lincoln Brigade, and the American Youth for Democracy were designated as subversive by the Department of Justice acting under authority of Executive Order 9835, dated March 21, 1947.

[3] The National Federation of Constitutional Liberties and the International Labor Defense were absorbed by the Civil Rights Congress; the Washington Peace Mobilization was the local affiliate of the American Peace Mobilization and both of these organizations were designated as subversive by the Department of Justice acting under authority of Executive Order 9835, dated March 21, 1947.

[4] The Abraham Lincoln School was designated as an organization that appears to be an adjunct of the Communist Party by the Department of Justice acting under authority of Executive Order 9835, dated March 21, 1947.

NOTE.—Footnotes by Hon. FRED E. BUSBEY, of Illinois.

2. If you have received such a report, did it contain information indicating that the organization is subversive within the contemplation of Executive Order 9835?

3. If you have received such a report and it contained information indicating that the organization is subversive within the contemplation of Executive Order 9835, why has the organization not been designated by you as subversive?

4. If the Federal Bureau of Investigation has not made a report on the UPWA-CIO, will you request Mr. J. Edgar Hoover to make such an investigation and inform me of the results?

From the enclosed report on the UPWA-CIO, one can readily see that the organization has consistently followed the Communist Party line as much as any Communist-front organization you included in your original list of subversive organizations. If this is true, the UPWA-CIO should be listed immediately as a subversive organization.

The leaders and officers of the UPWA-CIO have been completely dominated by the policies of the Communist Party. They have repeatedly shown that they are slaves to the Communist Party line even if it meant opposing the Government of the United States.

In the Panama Canal Zone the UPWA-CIO has taken the lead in pro-Communist activities and has played an important role in undermining our defenses and in bringing pressure against the granting of vital bases to the United States.

As further proof of my belief that the UPWA-CIO should be listed as a subversive organization, I invite your attention to an advertisement on page 12 of the January 14, 1948, issue of the Daily Worker, wherein it was announced that the UPWA-CIO was sponsoring a benefit performance by Paul Robeson and Ray Lev. While the advertisement does not say for whose benefit the performance is given, a printed dodger recently circulated by the United Public Workers of America, which you probably have in your files, specifically states that the Robeson-Lev concert is for the "benefit scholarship fund for public-school teachers in the Panama Zone."

In view of the fact that the UPWA-CIO is the sponsor of this performance featuring Paul Robeson, I believe it would be not only appropriate but necessary to call your attention to the attached record of this well-known Communist. This report was prepared by the staff of the House Committee on Un-American Activities, but the footnote is mine.

I respectfuly urge you to give this matter your immediate attention and request that you furnish me with a repy at an early date.

Very truly yours,

FRED E. BUSBEY,
Member of Congress.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include therein a letter addressed to the Honorable Tom Clark, Attorney General, last Saturday on this question and a report on Mr. Paul Robeson made by the Committee on Un-American Activities.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

SPECIAL ORDER GRANTED

Mr. ENGEL of Michigan. Mr. Speaker, I ask unanimous consent that on Thursday next, after disposition of matters on the Speaker's table and at the conclusion of any special orders heretofore entered, I may be permitted to address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXTENSION OF REMARKS

Mr. YOUNGBLOOD asked and was given permission to extend his remarks in the RECORD and include an article appearing in today's Washington Post.

Mr. JAVITS asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article by W. Howard Chase.

INCREASE IN DOMESTIC AIR-MAIL RATE

Mr. TWYMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. TWYMAN. Mr. Speaker, I am today introducing a bill to provide for a return to a 6-cent rate for domestic air mail. It was promised that the 5-cent rate would produce such an increase in volume in air mail that a profit would result. Contrary to predictions, the volume has not increased sufficiently but the deficit is much greater. The estimated deficit for domestic air mail for the fiscal year of 1947 is nearly $19,000,000. By increasing the air-mail rate to 6 cents we will reduce the deficit by nearly $15,000,000 a year. I do not believe that the volume will suffer by reason of this increase. The American people will be satisfied to pay a fair price for air-mail service.

MEAT RATIONING

Mr. JAVITS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JAVITS. Mr. Speaker, I have today offered in the House Senator FLANDERS' meat-rationing bill which he has today offered in the Senate. The bill proposes that full organization for meat rationing be established by the President but that meat rationing be put into effect only after 30 days' notice to Congress and provided that Congress shall not stop it by concurrent resolution. The need is clear. Spiraling costs of meat have been perhaps the most potent element in the spiraling costs of food. In addition, feeding of grain to cattle has aided inflationary pressures on grain.

The real pinch will come in the spring.

Democracy is freedom, not license, as we show by our capability to control ourselves, whether in meat or in rents, when we need to, without fear. Democracy will be preserved by its flexibility. It can be destroyed by rigidity. This bill will give us the machine for meat rationing and we shall decide whether to step on the starter.

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, of all the ridiculous proposals that have been brought before the Congress for a long time it is this idea of starting out on a rejuvenated OPA in connection with meat rationing. Meat happens to be an end product. How you are going to set up a meat-rationing program without including everything in connection with the production of meat is more than I can understand. Ordinarily wheat is the barometer of the agricultural price world. Wheat prices influence all other grain prices. Of late the shortage and demand for corn for industrial and feed purposes seems to make corn a more potent yardstick than ever before. Huge domestic consumption of meat, plus the increase in meat exports, plus the grain exports, keep strengthening the prices for meat.

The reason we do not have meat in this country is because we have not been following the proper process for obtaining meat and meat products. What has happened in the last 4 years? Cattle numbers have been reduced from 85,000,000 on January 1, 1945, to 76,000,000 on January 1, 1948, or by 9,000,000 head. Slaughter is on the increase. Why? This administration has killed off 35 percent of the sheep since 1942 and the Department of Agriculture wants to kill off 3 percent more this year. Since January 1, 1942, sheep numbers have been reduced from 56,000,000 to 36,000,000. There were 83,000,000 hogs on United States farms on January 1, 1943, and 59,000,000 January 1, 1947. In fact, on January 1, 1943, there were 40 percent more hogs on farms than now. Then a few months ago under the same sponsorship in connection with this proposed meat-control legislation we had Mr. Luckman brought into the picture to start killing off the chickens. The chicken numbers will not stand too much reduction in numbers either.

The foreign shipments of meat which have been in the billions of pounds have been made by reducing cattle, hog, and sheep numbers in the United States. We have been killing off the seed stock or the stock pile, in other words. How much further should livestock numbers in the United States be reduced? Even milk cow numbers are down—yes, below what they were 10 or 12 years ago—and now even they are not supposed to be fed grain.

Did you realize that less milk was produced in the United States in December 1947 than any December since 1940? Do you realize the ten to twelve millions increase in population since 1940? Do you realize we have been on a dairy products export basis up to the war period and now on a dairy export basis? Do you want less meat for the American people? Do you want less milk for the babies of America? If some change of attitude in high places does take place you can be sure to see it.

The more clamor there is for meat control the higher the price. All this talk

about rejuvenating the OPA is idle. You cannot have meat and send it away at the same time. The President has the power, authority, and money to control prices—either high or low prices—and any time he wishes to assume the responsibility of doing something about them he can do so.

EXTENSION OF REMARKS

Mr. McGREGOR asked and was given permission to extend his remarks in the RECORD and include an article by Louis Bromfield.

Mr. CROW asked and was given permission to extend his remarks in the RECORD and include a letter received from former Democratic Governor Earle, of Pennsylvania.

Mr. GROSS asked and was given permission to extend his remarks in the RECORD and include a letter received from a constituent.

CALIFORNIA MILK SHIP

Mr. POULSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. POULSON. Mr. Speaker, the great heart of America is indisputedly illustrated in an event now taking place in the State of California. There Gov. Earl Warren, one of the West's outstanding leaders, conceived the plan to send an entire shipload of condensed milk to the undernourished children of Greece, France, and Italy as a gift from the people of California.

Governor Warren called upon his friend, Charles P. Skouras, president of Fox West Coast Theaters and National Theaters, to give aid and support to this worthy cause. One of the West's greatest civic leaders, Mr. Skouras immediately assigned his organization to make the California milk ship an unqualified success by spearheading the publicity activities for this humanitarian endeavor throughout the State.

That is being done, gentlemen, and at the end of this week the steamship *Golden Bear* will sail from California with 1,400 tons of milk for the hungry children of the three countries.

From every city and community in California cash contributions poured into the coffers of the milk-ship fund. This was the result of untiring efforts on the part of Mr. Skouras' representatives, who, working with civic bodies such as junior chambers of commerce, told the people of California of this fine gesture of democracy.

It is thus worthy of note that when an admirable cause is to be supported, it is the great motion-picture-theater industry that leaps into the breech and leads the way. Gentlemen, hardly a campaign in history of the motion-picture industry has been launched but what its leaders were ready to take the reins.

One of the most noted of these leaders, Mr. Skouras, demonstrated again the eagerness with which the industry is willing to contribute time and great sums of money to promote peace and good will throughout the world, and to let the peoples of the world witness an example of democracy at work.

The California milk ship is the training ship of the California Maritime Academy. Usually at this time of year it sails on a 4-months' training cruise to South America. But this year the academy and the United States State Department agreed to permit the ship to travel to Marseilles, Pireaus, Naples, and Genoa to deliver the milk purchased by the people of California. More than a hundred cadets of this fine academy will combine their training period with the roles of ambassadors of good will delivering the sorely needed milk to authorized relief agencies in the three countries.

Here is an example of American generosity and humanitarian qualities that might well be considered by the people of other States. With this gesture, California is demonstrating its determination to inspire the unfortunate people of our allied lands with its conviction in the principles of democracy. California will do its share to build good will throughout the world.

Governor Warren, Mr. Skouras, and all the people who have helped to send the California good-will ship on its way are to be congratulated for their high ideals and their efforts to defeat the destructive forces of communism, which are seeking to prevent the humanitarian forces of democracy from being welcomed and treasured by freedom-loving people of the world.

APPOINT COORDINATOR OF FUEL OIL

Mr. ROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROSS. Mr. Speaker, it seems confusion is the keynote in the Federal agencies here in Washington. You have heard my colleagues, speaking this morning, call to your attention the fact that the Federal Government is converting to fuel oil in many of our Federal buildings and that enormous quantities of fuel oil are being exported, notwithstanding the fact that thousands of homes and apartment buildings throughout the Nation are unable to obtain needed fuel oil.

For many weeks the country was led to believe that the reason for the fuel-oil shortage was a lack of transportation facilities. Within the past few days we have been told there is not an adequate supply of fuel oil.

On January 9 I wired Col. J. M. Johnson, Administrator of the Office of Defense Transportation, urging that emergency steps be taken to channel adequate facilities for transportation of direly needed fuel oil to the metropolitan New York area. In reply I received a communication signed by A. H. Gass, Director of Railway Transport Department, wherein he stated:

> I believe that your principal difficulty is a lack of tanker space rather than tank-car space. If this is so, then the allocation of tankers is under the Maritime Commission and not the Office of Defense Transportation. If, however, your feeling is that it is a tank-car proposition, I would appreciate advice as to where the oil is available for movement into the New York area.

Mr. Speaker, I have introduced today a House resolution expressing the sense of this House that there exists an emergency in the distribution and supply of fuel oil and urging that the President of the United States appoint a Coordinator of Fuel Oil to conduct a complete survey and study of the operations of Federal agencies with any supervisory power over the production, distribution, or procurement of fuel oil, with a particular view of recommending ways and means to alleviate the fuel-oil shortage in the affected areas. I hope the House will take action on this resolution. Possibly a coordinator can bring order out of the existing confusion.

EUROPEAN RECOVERY PROGRAM

Mr. GROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GROSS. Mr. Speaker, it is no wonder that the country is disgusted with the double-talk that is now going on in the executive department of this Government. For instance, a few weeks ago the President came up here and cried out loudly against the rising cost of living. This morning I find that the Commodity Credit Corporation is back in the market buying potatoes to boost the price at the very moment that potatoes are selling for a price higher than I can remember. They have 61,000,000 pounds of dried eggs on hand, and since October 27 they have only sold 1,120,000 pounds, and they are now back in the market buying eggs to maintain and boost the price. It is no wonder that such prominent Democratic leaders as George H. Earle, former Governor of Pennsylvania, now Democratic national committeeman, sent out a letter saying—and I quote:

> From the bottom of my heart, I say if Truman is nominated and defeated, our Democratic Party is sunk. If Truman is nominated and elected, our country is sunk.

I think Governor Earle knows what he is talking about.

EXTENSION OF REMARKS

Mr. RAMEY asked and was given permission to extend his remarks in the RECORD and include a poem by Lou Williams, the Buckeye poet.

Mr. GILLIE asked and was given permission to extend his remarks in the RECORD in two instances and include two articles from the Fort Wayne News-Sentinel, one entitled "Hoosier Watchdog," and the other on military training.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD in two instances and include in one an editorial from the New York World Telegram and in the other an editorial from the New York Times.

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the RECORD and include two articles from the Milwaukee Sentinel on the situation in Poland.

Mr. MACKINNON asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. LARCADE asked and was given permission to extend his remarks in the RECORD in three instances, and to include in each a newspaper article.

Mr. PASSMAN (at the request of Mr. LARCADE) was given permission to extend his remarks in the RECORD.

Mr. DAVIS of Georgia asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. GOSSETT asked and was given permission to extend his remarks in the RECORD.

Mr. MARCANTONIO asked and was given permission to extend his remarks in the RECORD and include a statement issued by the United Electrical and Machine Workers of America, CIO.

Mr. COX. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a very interesting statement made by George Reedy, an able newspaperman, over the radio this morning on the subject of Henry Wallace and his third party.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

HIGH PRICES

Mr. PRESTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. PRESTON. Mr. Speaker, several days ago I received in the mail from a gentleman down in my district a Confederate $5 bill. This party asked me to redeem it if it was any good, and send him $5 for it. Not wanting this friend to lose faith in the stability of the Confederacy, I promptly mailed him the $5. However, the thought occurred to me at the same time that the $5 bill I sent him of United States currency is worth little more than this Confederate bill printed in 1864 and will buy little more today. I further reflected on the thought that during the special session of Congress we failed to do anything about it. I also reflected that from the way this session is beginning it is unlikely that this session, controlled and dominated by the Republican Party, is apt to do anything about the high prices. I say to you that the least we can do is to freeze prices and wages at the present level and not permit prices to go any higher.

FUEL SHORTAGE

Mr. DURHAM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. DURHAM. Mr. Speaker, in view of the fact that this morning there has been quite a discussion as to the oil problem, may I say that the special committee appointed by the chairman of the Committee on Armed Services has begun an investigation of this problem as it affects our national defense, and Mr. Forrestal, Secretary of National Defense, appeared before us this morning and made what I believe to be a factual statement, which I think will be of information to the membership of the House. In view of the fact that there has been some discussion of the use by the armed services of too much oil, I ask unanimous consent, Mr. Speaker, that this statement may be printed in the Appendix of the RECORD. I urge all Members to read this factual statement.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

GEN. ROBERT E. LEE

Mr. BRYSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. BRYSON. Mr. Speaker, this is the one hundred and forty-first birthday of Gen. Robert E. Lee. I claim the honor at this time to call attention of the anniversary date of so great a man to the Congress.

Let us examine General Lee and inquire what makes his life so immeasurably grand. It must be the fact that he went beyond the heights of greatness and on to peaks of nobility.

His life was gentle, and the elements so mixed in him that nature might stand up and say to all the world: This was a man.

We have only to witness the degree of fortitude and courage with which Lee accepted adversity as well as the gracious manner in which he bore pain, suffering, and even defeat to appreciate the true stature of his greatness. Everything about Lee, the loftiness of his ideals, manliness of his actions, and the unselfishness of his deeds, seemed firmly anchored in the bedrock of Christian faith, hope, and charity.

Both by nature and necessity General Lee was a lover of hard work; he cared little for the social or lighter pursuits of life. He liked the soldier's hardships, the soldier's toil, even the soldier's fare, as well as the soldier's glory.

General Lee was born in Virginia January 19, 1807. In 1825 through the generosity of that great South Carolinian, then Secretary of War John C. Calhoun, young Lee was admitted to West Point, graduating therefrom 4 years later without a demerit, second in his class.

Probably the most unusual experience ever coming to an individual came to Lee in March 1861, when at the Blair House in Washington, he was confronted with the decision as to whether he should command the Federal forces or the poorly organized, scantily clad troops of Virginia. He assumed command of the Confederate forces in 1861 with the rank of general which he held until his surrender at Appomattox on April 9, 1865.

Someone has said that the presence of Napoleon in battle line was equal to the presence of 100,000 troops. If that be true how could we estimate the value of the presence of the matchless Lee as he recklessly rode among his troops in his modest uniform of grey, bearing only the stars to indicate his rank?

The late Benjamin H. Hill, of Georgia, has described the character of Lee in these beautiful and striking words:

He was a foe without hate; a friend without treachery; a soldier without cruelty; a victor without oppression and a victim without murmuring. He was a public officer without vice, a private citizen without wrong, a neighbor without reproach, a Christian without hypocrisy, and a man without guile. He was a Caesar without his ambition, Frederick without his tyranny, Napoleon without his selfishness, and Washington without his reward. He was as obedient to authority as a servant, and royal in authority as a true king. He was gentle as a woman in life, and modest and pure as a virgin in thought, watchful as a Roman vestal in duty, submissive to law as Socrates, and grand in battle as Achilles.

So, like the varicolored threads of a rich tapestry which combine to produce one perfect, balanced design of beauty, the attributes of Lee's greatness, that is, his outstanding ability and talent, his sterling character, his high moral caliber, his Christian faith and devotion, together without the nameless other qualitative attainments and representations of his life were joined, it seemed, to create the world's grandest and most enduring design for noble living.

Theodore Roosevelt once said:

The world has never seen better soldiers than those who followed Lee; and their leader will undoubtedly rank, without any exception, as the very greatest of all the great captains that the English-speaking people have brought forth.

British Field Marshal Wolseley said of Lee:

He was the ablest general, and to me seemed the greatest man I have ever conversed with. * * * General Lee was one of the few men who ever seriously impressed and awed me with their natural and inherent greatness.

To be sure there is no longer any feeling of sectionalism, no South, no North, no East, no West; all of us are now sons and brothers of our great common country. It is with a feeling of pride, however, that those of us from the South extol the virtues of our heroes and count their contributions to history. At the top of the great roster of our southern heroes will forever be found the name of Robert E. Lee.

THE LIQUOR INDUSTRY

Mr. WALTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, recently there was sent to the desks of all Members a news letter of the beer, wine, and liquor industries. In this letter the Secretary of Agriculture was charged with playing politics with whisky. I am not saying anything in defense of the Secre-

tary of Agriculture. He does not need anybody to do that. But the same news letter contained the strongest proof possible of the need for immediate restriction of the use of grain for alcoholic-beverage purposes. This news letter showed that the stocks of liquor on hand on November 1947 as compared with November 1946 was 100,000,000 gallons more. In view of the fact that we have today a supply of liquor over 4 years old, which is more than adequate to meet the present high demand for the next 6 years, it seems to me that while there is so much hunger in the world we could well afford to restrict the use of grain for alcoholic-beverage purposes.

Time is urgent in this matter because the grain-conservation program comes effectively to an end January 21, 1948, and if statutory power does not exist by that date, serious and irreplacable wastage of grain will occur.

Since most grain never leaves the farm on which it was raised, the problem of practically conserving grain has to be solved among those industries which consume cash grain. The amount of grain used by any one of these may seem small against the whole crop, yet be a very serious percentage of the grain available to the market; and it is only grain reaching the market that is available for bread, industrial requirements, an important part of animal and poultry feeds and exports.

During the war conservation methods were found practical in the brewing industry, the wet-milling industry, and other cash-grain users. The President should have the power to restore such of these controls as are deemed wise.

Both the domestic economy and foreign policy of the United States will benefit by a removal of the distilling industry from the grain market. The consumption of grain by the distillers during the past 2 years has averaged between 50,000,000 and 55,000,000 bushels a year, or nearly 5,000,000 bushels a month. In the period of operation, from October 1 to 25, 1947, the industry consumed more than 8,000,000 bushels, or at a rate of nearly 100,000,000 bushels a year.

While this is a small part of the total grain consumption, it is a significant part of the grain which comes to market and a very large part of the estimated carry-over for the present year. The carry-over as of July 1, 1948, has been estimated as between 60,000,000 to 150,000,000 bushels—a figure described to the Senate Committee on Appropriations as dangerously low by a representative of the Kansas City Board of Trade, who considered anything less than 235,000,000 bushels reckless. The Secretary of Agriculture has given his opinion that the indicated carry-over may be so small as to be disastrous.

The savings from the distilleries would make up half of the indicated deficit in this year's carry-over, and may be the decisive margin between success or failure in meeting our foreign grain commitments and maintaining adequate stocks for bread and other normal uses in this country toward the end of the present crop year.

Moreover, the withdrawal of the distillers from the grain market should remove a powerful upward pressure on grain prices. Because the cost of grain is so small a part of the cost of whisky, the distillers are free to buy regardless of costs, and in the present grain market are a very strong bullish force. A vice president of General Mills testified before the Senate Appropriations Committee that an increase in the export program from 500,000,000 to 570,000,000 bushels might entail a rise of 1 cent a bushel for each additional million bushels bought. This would result in an increase of 70 cents a bushel in the price of grain. Conversely, the withdrawal of the distillers' demand for 50,000,000 bushels of grain over the next year would substantially reduce the price of grains. The suspension of distilling purchases might well then save the Government and all other grain buyers substantial sums, simply by relieving the pressure of the distillers on present grain supplies.

If the use of grain for whisky and beverage spirits were suspended even through the entire 1948 crop year, no harm would be done to the industry or the public.

The distilling companies, unlike all other industrial users, such as wet millers or brewers, have great stocks of their products on hand because of the very nature of their business. The distilling companies now have in their barrels and tanks 475,000,000 gallons of whisky and an 8 months' supply of neutral spirits for blending purposes. This amount represents about 110,000,000 bushels of grain, the last great remaining grain stock from the years of abundance, and will supply the country at the highest known rates of liquor consumption for approximately 2½ years.

Even a year's suspension of distilling will not affect the tax receipts from whisky and beverage spirits. Those taxes are paid on the release of stocks from warehouses and this amendment will in no way prevent the continued sale from stocks.

No unemployment problem will result from extending the present distilling holiday. The actual distilling of grain for whisky and beverage spirits gives employment to little more than 2,000 people.

If the distillers are allowed to resume unrestricted operations, the industry, to judge from its performance in October, will consume grain at the ruinous rate of 10,000,000 bushels a month in anticipation of a later shut-down. In the circumstances it is imperative that restrictions should continue so that the greatest possible savings of grain from the industry may be insured. Control over the use of grain for alcoholic-beverage purposes is in no way intended to single out and harm the distilling companies and their interests. In fact the companies do not stand to suffer any material loss. They will be free to sell from their present large stocks. However, the distilling companies should not in this year of world famine be converting grain into whisky. When the present grain crisis is passed, they can rapidly replace their stocks with no loss of continuity.

Public interest requires control legislation; and it will injure no private interest.

LEASING OF SALMON TRAP SITES IN TERRITORIAL WATERS

Mr. BARTLETT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the Delegate from Alaska?

There was no objection.

Mr. BARTLETT. Mr. Speaker, two identical bills are now pending before Congress which are, I am convinced, opposed by 99 percent of the people of Alaska. I refer to those bills before both Houses which would set up a system of leasing salmon-trap sites in the Territorial waters. It is safe to say that a substantial majority of Alaskans are opposed to the use of the salmon trap. This will be definitely determined at a referendum to be held next October. Then the people of Alaska will be asked to vote on whether traps ought to be abolished over a 10-year period. All observers with whom I have talked expressed belief that those opposed to traps will far outnumber the trap supporters. Of course, under the strict limitations of our organic act, the referendum will be only advisory in nature. That is because in passing the organic act in 1912 Congress reserved to itself the power to legislate with reference to fish and wildlife in Alaska. My understanding is that no other Territory was discriminated against in this fashion. Every effort during the last 36 years to give administrative control of these resources to the people of Alaska has failed. This despite the fact that insufficient Federal appropriations, and other factors, have resulted in a notable diminution of fish and wildlife resources under Federal management.

Now it is proposed not to right the wrong which has been done but to confirm it absolutely. The pending bills would do that which to my knowledge has never before been done in the history of the United States—give title to private individuals and private companies for a 15-year period to these trap sites. It is true the bills make no provision for renewal of these leases. But it is likewise true that there is no prohibition against another bill being introduced somewhere near the end of the 15-year period to amend the law so as to renew those leases.

There is supposed to be some sugar coating in all this. The bills provide that the biggest operators must surrender a certain percentage of the traps they now hold. I contend that a close examination of the bills will reveal there is no positive necessity for surrender of any traps. Even if there were such surrender, I maintain the proposed legislation should command no support. It would in effect give a vested private right in what is and always has been considered a public resource. So today I have introduced a bill anticipating the result of the referendum in Alaska next fall, calling for the abolition of salmon traps in Alaska waters over a 10-year

period. That bill should be passed or my bill to transfer control of the fish and wildlife resources in Alaska to the Territorial government should be passed. The public good would be served if either of them were to become a law. Quite the contrary would result if the trapsite leasing bill were to pass.

EXTENSION OF REMARKS

Mr. HARRIS asked and was given permission to extend his remarks in the RECORD and include a very interesting editorial from the Arkansas Gazette of January 9, 1948, entitled "No Room for Compromise."

SPECIAL ORDER GRANTED

Mr. HUBER. Mr. Speaker, I ask unanimous consent that my colleague, the gentleman from New York [Mr. MULTER] may address the House for 30 minutes on Wednesday next after disposition of business on the Speaker's desk and the conclusion of special orders heretofore granted.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

EXTENSION OF REMARKS

Mr. HUBER asked and was given permission to extend his remarks in the RECORD and include an article from the Boston Traveler.

Mr. DAVIS of Tennessee asked and was given permission to extend his remarks in the RECORD and include a radio speech delivered by him.

Mr. KEFAUVER (at the request of Mr. PRIEST) was given permission to extend his remarks in the RECORD in two instances and to include a newspaper article.

THE LATE HONORABLE JOSEPHUS DANIELS

Mr. DEANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. DEANE. Mr. Speaker, on Saturday the citizenship of North Carolina laid to rest a distinguished world citizen, Hon. Josephus Daniels. Time will not permit my giving a worthy tribute to this outstanding citizen, but I would like to include as a part of my remarks, with your permission, Mr. Speaker, the following editorial from the Charlotte News of January 16, and to quote from the editorial this statement:

His last public utterance came from the White House less than a month ago at the conclusion of a visit with President Truman. It was a bit of advice to the American people, or more particularly to newspaper editors and writers. He urged them to talk and write less of war, and to talk and write more of peace. Words are thoughts and thoughts become deeds. It was a profound truth, stated simply in a few words.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

(The editorial referred to follows:)

JOSEPHUS DANIELS, OF RALEIGH

Josephus Daniels believed in man's fundamental goodness and in his infinite capacity for growth, and we believe in this because of men like Josephus Daniels.

He attained success and distinction as publisher, editor, statesman, diplomat, and writer, but his greatness rests in his simple humanity. It is Josephus Daniels, the individual, who looked upon all men as unique and who was himself unique, that we remember first when we think of him and recall the many things he accomplished in his long, rich life among us.

His last public utterance came from the White House less than a month ago at the conclusion of a visit with President Truman. It was a bit of advice to the American people, or more particularly to newspaper editors and writers. He urged them to talk and write less of war and to talk and write more of peace. Words are thoughts, and thoughts become deeds. It was a profound truth, stated simply in a few words.

He had been talking to Presidents for a large part of his life and preaching truth in plain words since early manhood. He spoke out boldly on many subjects, but all his advice over the years summed up to the theme of his last message—work for peace and human happiness.

He was called a crusader—and he was a forceful, versatile, and wide-gaged reformer who was at his best when turning out a blistering editorial—but he was more of an evangelist than a political crusader. He sought to convert rather than confound. He wanted a Christian revival, not a revolution. He was a Puritan bred in the democratic spirit, so that his causes ranged from prohibition to the New Deal, which carried forward on the national level a movement he long before had advanced in his native North Carolina. But whether he was contending against John Barleycorn, American monopolists, or British imperialism—three of his favorite targets—it was clear that he wanted something more than sobriety, economic security, and political freedom for men. He believed, and he proved, that life on earth could be good.

Josephus Daniels started out with a paper of his own in a North Carolina town when he was 18 years old and lifted himself to a place among the famous American editors in the line extending from Benjamin Franklin. His nearest counterpart in this notable company is William Allen White, of Emporia, Kans., who died in 1945.

White was the spokesman of the progressive Middle West, Daniels of the liberal South. White was the adviser of Presidents and other national leaders and the conscience of the Republican Party. Daniels worked in the Administrations of three Democratic Presidents and was the intimate of two—Wilson and Roosevelt. His work to keep the Democratic Party true to the Jeffersonian ideals made his home in Raleigh a mecca for politicians. Both White and Daniels attained the status of national figures and the stature of world citizens while working at their editor's desks in relatively small cities of the American hinterland.

Josephus Daniels belongs to Raleigh, to North Carolina, to Washington, to America, and to the world, and his effect upon all for good cannot be measured except by the word, "great." His contributions as Secretary of the Navy, as adviser on national policy, as Ambassador to Mexico, and as a journalist and writer over more than 60 years are all distinguished by the generous, honest, noble spirit that was the shining mark of the man. Presidents and world leaders turned to him for counsel because they found deep insights in his simple words, a wisdom that came from broad knowledge of and complete devotion to the Christian and democratic faiths of America. The people listened to him because he spoke with an intelligence that consistently was informed by the heart. Now that he is gone, they think of him with pride and affection, and remember how well he taught them that America's greatest glory comes from its citizens who love their fellow men and live courageously in that faith.

EXTENSION OF REMARKS

Mr. McCORMACK asked and was granted permission to extend his remarks in the RECORD and include an editorial recently appearing in the Boston Post.

Mrs. ROGERS of Massachusetts asked and was granted permission to extend her remarks in the RECORD, and include the program of the DAV and the program of the VFW.

PRICE CONTROLS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, we have heard some very interesting speeches this morning covering all deals, going in all directions, condemning—I want to refrain from using a little stronger word—condemning everything under the sun, except one constructive speech about increasing our air-mail postage from 5 cents to 6 cents.

Meat? Why, I can remember, in 1946, when people were promised within 60 days they would have all the meat they wanted at lower prices than OPA. We now have approximately a 30-percent average increase in the cost of living since that time, as a result of the great majority of the Members of the Republican Party voting as they did, and bringing about a cost to the American consuming public of at least $20,000,000,000 more than they would have paid if OPA-controlled prices were in existence since June 30, 1946.

On the question of fuel oil, the trouble is production. There is lack of production. The distribution can be improved upon, but production is by private interests. Only last year we directed the Maritime Commission to dispose of tankers. This Congress did that. The Maritime Commission had to do it. This Congress has failed to give them the power to see that those who bought the tankers should transport fuel oil to American cities and to sections of the country adversely affected under the present emergency. The fault lies in this respect with the Congress of the United States rather than with any agency of the executive branch of the Government.

The SPEAKER. The time of the gentleman from Massachusetts has expired.

FUEL OIL

Mr. CASE of South Dakota. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. CASE of South Dakota. Perhaps the fault does lie with Congress in not placing some limitation upon the amount of petroleum supplies that are being sent abroad. I read in the paper just the other day that Ambassador Caffery announced that since the interim-aid program had been voted, 200,000 tons of petroleum had been received by France.

I also received a letter from a party who has a picture taken of a Russian oil tanker loading up from Hamilton Point, Calif., taking a cargo of petroleum to Russia.

SPECIAL ORDER GRANTED

Mr. CASE of South Dakota. Mr. Speaker, I ask unanimous consent that at the conclusion of any other special orders heretofore entered for today, I may address the House for 10 minutes.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

FUEL-OIL SHORTAGE

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, on this oil problem there is only one solution. The oil dealers apparently cannot or will not work the matter out themselves. The President's letter to me said if the owners of the tankers would use the tankers for home consumption instead of for foreign export, there would be enough tankers to care for the United States transportation. Increased shipments of oil are going to Russia and Canada. There is only one thing to do in order to keep the people warm, and that is to issue an embargo, as the President did in the case of coal, until the emergency is over. It is not entirely a question affecting New England, but it is a problem that affects the entire country. I assure everybody who is interested in relief that you are not going to get that bill through very quickly if we continue sending oil to Russia—the country which is constantly obstructing us—if we continue sending unneeded oil, I believe, to Canada, and let our own people suffer from cold. One man and one boy were found dead in a cold house this week end.

Mr. REES. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield.

Mr. REES. With respect to this question of the production of oil, it ought to be observed also that in my section of the country we are having difficulty getting machinery to produce the oil, yet at the same time we are sending large quantities of oil abroad.

Mrs. ROGERS of Massachusetts. It is not a local situation, it is a general one.

The SPEAKER. The time of the gentlewoman from Massachusetts has expired.

SPECTER OF INFLATION IS PROPAGANDA

Mr. OWENS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. OWENS. Mr. Speaker, I was interested in the comment of the gentleman from Georgia about prices. He unconsciously, or perhaps consciously, is merely reiterating the propaganda of the ADA. I want to call the gentleman's attention to the fact that in his message on the state of the Union the President stated that since 1938 the income of the industrial workers of this Nation enabled them, dollar for dollar, to buy everything they did in 1938, to pay their taxes, and have 50 percent left over. He forgot, however, that there are some people in the country who are not in that position; for instance, certain people on the civil-service pay rolls, teachers, and others in State employment, white-collar workers, and those who depend upon fixed incomes.

The President in his message on the budget, just a few days ago, said he was not going to raise the wages of Federal employees. However, those are the very persons who need help, if they are not receiving at least 75 percent more than they received as wages in the year 1938. I say we should give an example to the rest of the country by raising the wages of necessary Federal employees to the point where they can once again meet the cost of living. Then the various States of the Union will do justice to their employees, as will the businesses of the country with their faithful white-collar workers.

The SPEAKER. The time of the gentleman from Illinois has expired.

EXTENSION OF REMARKS

Mr. JOHNSON of California asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances and in each to include an editorial.

ONE-YEAR HOLIDAY ON USE OF GRAIN FOR LIQUOR MAKING

Mr. REES. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. REES. Mr. Speaker, I commend the distinguished gentleman from Pennsylvania [Mr. WALTER] for calling attention to the fact that the Government is continuing to use a great quantity of grain in the manufacture of distilled liquors even though they have a full year's supply on hand. It seems incredible at this time when there is such a shortage of food that millions of bushels of corn and other grains are being used presently for the making of distilled liquors.

It may interest you to know that a great portion of the two and a half million bushels of grain allocated to the distillers is corn. At the same time, on the floor of the House we talk about the shortage of meat for human food. In place of using that corn to produce meat they are using it to produce distilled liquors. There is not much sense in that sort of thing as I see it.

I have a bill pending in the Committee on Agriculture. I am going to ask for its consideration in the immediate future. This bill would withhold new grain from the making of distilled liquors for a period of 1 year. I think the bill is fair and I trust the Members on both sides of the aisle will support this proposed legislation.

EXPORTATION OF PETROLEUM PRODUCTS

Mr. BULWINKLE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. BULWINKLE. Mr. Speaker, something has been said about the export of oil. I call the attention of the House to the fact that we are exporting 450,000 barrels of crude oil daily; we are importing 460,000 barrels daily of crude and heating oils and petroleum products. Of the export, part is lubricating oil. Two refineries in the United States make lubricating oil out of a different grade of oil than is used for general purposes. Very little, if any at all, is being exported to Russia.

When you speak of sending oil to Canada you must remember that we are getting imports from Canada of wood pulp and other critical materials. We are not sending them too much. Anybody on the Committee on Armed Services could tell you that there are certain critical materials we are getting from Canada. Now, if you want to go ahead and slap somebody in the face and say, "No, you cannot have it," you are going to have the same retaliation come back at you sooner or later. And also the shipments to Canada have been reduced.

THE LATE JOSEPHUS DANIELS

Mr. COOLEY. Mr. Speaker, I ask unanimous consent to address the House.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. COOLEY. Mr. Speaker, "Know ye not that a prince and a great man has fallen—in Israel." On last Thursday, January 15, at his home, Wakestone, in the city of Raleigh, N. C., the spirit of Josephus Daniels passed from the shores of sound to the great realm of silence. He was North Carolina's most distinguished and beloved citizen, and he was my close, personal friend. From the days of my childhood I have enjoyed the friendship of this great and good

man, and I shall always cherish the memory of all the moments I have spent with him. Sincere human affection inspires me to pay tribute to this great statesman whose life was such a blessing to the State, to the Nation, and to the world in which he lived.

No words that I might employ could add dignity to the life, nor splendor to the spirit of Josephus Daniels who, by his own life, enriched the lives of all who felt the tolerance and kindness of his great heart.

Only in the dusk of evening, when the sinking sun goes down, do the lovely heavens glow with the rich coloring of the dying day and tell the true story of the great light which never wanes. The soul of Josephus Daniels has entered upon a new career in the regions of immortality, but this great spirit of departed eminence will enter that new career unafraid and with humility, tolerance and love, the human attributes which marked the pathway of his life. The tender sweetness of his genial manner was a living inspiration to all mankind. He possessed all of the splendid virtues and fine sensibilities prerequisite to true greatness. On the broad stage of human affairs, he rose to lofty peaks, but his soul selected its own society. The magnificence of his life is a benediction which shall be cherished by troops of friends around the world. He rose to the full stature of manhood, and he died in the faith of a Christian. He left a name without a blemish, a heritage of honor to his children. His proud spirit may travel the pathway of the stars, but no tomb can ever enclose the grand influences of his life.

They say that life is a highway; the milestones are its years,
And here and there is a tollgate where we pay our way with tears.
It's a high road and a rough road and it leads near and far,
But it leads at last to the golden town where the golden houses are.

In the shadow of his life, travelers upon the rough and rugged road of life have found rest and inspiration. His spirit is on the road that leads to the "golden houses."

In a life beyond fourscore years, he was honored with a commission from every Chief Executive of his political faith who has occupied the White House since the day he was born. His long public record is written in the history of our Nation, and his private life upon the tablets of the hearts of thousands of friends. He was a gifted statesman and a righteous man. He loved his children and adored his wife. His great and true devotion for his wife will always be remembered by the people of his State. His charming wife and companion preceded him to the grave a few short years ago. When I think of his great devotion for the woman he always affectionately called Miss Addie, and when I think of the long number of years he has lived, there is something quite appropriate in these lines of an English poet:

To my ninth decade I have tottered on,
And no soft arm bends now, my step to steady.
She, who once led me where she would, is gone.
So when He calls me, Death shall find me ready.

TENNESSEE-TOMBIGBEE INLAND WATERWAY

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, at this time I desire to say a word to those Members of Congress whose people are shivering in the cold for want of oil. The last Congress authorized the construction of the Tennessee-Tombigbee inland waterway that, when completed, will be equal to a slack-water route from the Gulf to Chicago.

It will open up the vast oil fields in the South to everybody between the Great Lakes and the Gulf of Mexico and everybody who has access to the Great Lakes.

There is more oil produced in Mississippi than is produced in the States of Michigan, Pennsylvania, New York, and Ohio all put together. Those four States produce 106,300 barrels a day, while Mississippi produces 107,300 barrels a day. That oil cannot be transported profitably up the swift current of the Mississippi River, but by the development of this inland waterway it gives us a slack-water route all the way up to the Tennessee River and a downstream route, 262 miles from there to Cairo, Ill., which will offset the 180 miles upstream from Cairo to St. Louis and the 38 miles distance from St. Louis to where we enter the Illinois River, which provides a slack-water route into Chicago.

I am appealing to you now to help get construction started on this great project at once.

I will show where it will benefit the people in every State between the Alleghenies and the Rocky Mountains, and even beyond the Allegheny Mountains, because it will provide a slack-water route into the Great Lakes which will enable your people to transport, not only oil but all other materials, on barges that cannot now navigate economically against the swift current of the Mississippi River because of the enormous expense.

At the same time, as General Robbins pointed out, it saves the swift current of the Mississippi for downstream traffic.

He said it would mean more than would extending an arm of the Gulf of Mexico all the way up to St. Louis; for the reason that it would furnish a slack-water route for upstream traffic and at the same time save the swift current of the Mississippi for downstream traffic.

The SPEAKER. The time of the gentleman from Mississippi has expired.

EXTENSION OF REMARKS

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the RECORD and to include a radio address.

DISSEMINATION ABROAD OF INFORMATION ABOUT THE UNITED STATES

Mr. MUNDT. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotion of the interchange of persons, knowledge, and skills between the people of the United States and other countries, and by means of public dissemination abroad of information about the United States, its people, and its policies, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 7, strike out "1947" and insert "1948."

Page 2, strike out lines 2 to 19, inclusive, and insert:

"SEC. 2. The Congress hereby declares that the objectives of this act are to enable the Government of the United States to promote a better understanding of the United States in other countries, and to increase mutual understanding between the people of the United States and the people of other countries. Among the means to be used in achieving these objectives are—

"(1) an information service to disseminate abroad information about the United States, its people, and policies promulgated by the Congress, the President, the Secretary of State, and other responsible officials of Government having to do with matters affecting foreign affairs;

"(2) an educational exchange service to cooperate with other nations in—

"(a) the interchange of persons, knowledge, and skills;

"(b) the rendering of technical and other services;

"(c) the interchange of developments in the field of education, the arts, and sciences."

Page 2, after line 19, insert:

"UNITED NATIONS

"SEC. 3. In carrying out the objectives of this act information concerning the participation of the United States in the United Nations, its organizations and functions, shall be emphasized."

Page 2, line 21, strike out "3" and insert "4."

Page 2, line 25, strike out all after "agency" over to and including "branch" in line 1 on page 3.

Page 3, line 12, after "skill" insert "and shall wherever possible provide these interchanges by using the services of existing reputable agencies which are successfully engaged in such activity."

Page 3, line 20, strike out all after "States." over to and including "deported." in line 2, page 4, and insert "The persons specified in this section shall be admitted as nonimmigrant visitors for business under clause 2 of section 3 of the Immigration Act of 1924, as amended (43 Stat. 154; 8 U. S. C. 203), for such time and under such conditions as may be prescribed by regulations promulgated by the Secretary of State and the Attorney General. A person admitted under this section who fails to maintain the status under which he was admitted or who fails to depart from the United States at the expiration of the time for which he was admitted, or who engages in activities of a political nature detrimental to the interests of the United States, or in activities not consistent with the security of the United States, shall, upon the warrant of the Attorney General, be taken into custody and promptly deported pursuant to section 14 of the Immigration Act of 1924 (43 Stat. 162, 8 U. S. C. 214). Deportation proceedings under this section shall be summary and the findings of the Attorney General as to matters of fact shall be conclusive. Such persons shall not be eligible for suspension of deportation under clause 2 of subdivision (c) of section 19 of the Immigration Act of February 5, 1917 (54 Stat. 671, 56 Stat. 1044; 8 U. S. C. 155)."

Page 4, line 13, strike out "or" and insert "and."

Page 5, line 2, strike out "person" and insert "citizen of the United States."

Page 5, line 5, after "serving." insert "No person shall be assigned for service to or in cooperation with the government of any country unless (1) the Secretary finds that such assignment is necessary in the national interest of the United States, or (2) such government agrees to reimburse the United States in an amount equal to the compensation, travel expenses, and allowances payable to such person during the period of such assignment in accordance with the provisions of section 302, or (3) such government shall have made an advance of funds, property, or services as provided in section 902."

Page 5, line 11, strike out "person" and insert "citizen of the United States."

Page 6, line 2, strike out "person" and insert "citizen of the United States."

Page 6, line 23, strike out "their" and insert "the."

Page 6, line 23, after "approval", insert "of the President."

Page 6, line 24, strike out all after "agencies." over to and including "agencies." in line 12, page 7, and insert "Whenever the Secretary shall use the services, facilities, or personnel of any Government agency for activities under authority of this act, the Secretary shall pay for such performance out of funds available to the Secretary under this act, either in advance, by reimbursement, or direct transfer. The Secretary shall include in each report submitted to the Congress under section 1008 a statement of the services, facilities, and personnel of other Government agencies utilized in carrying on activities under the authority of this act, showing the names and salaries of the personnel utilized, performing services utilized, during the period covered by such report, and the amounts paid to such other agencies under this section as payment for such performance."

Page 8, line 5, strike out "the" and insert "any appropriate."

Page 8, lines 5 and 6, strike out "with appropriate legislative authority."

Page 8, line 8, after "agencies", insert ", and shall not enter into the performance of such services to any foreign government where such services may be performed adequately by qualified private American individuals and agencies and such qualified individuals and agencies are available for the performance of such services."

Page 8, line 23, strike out all after "assignments" over to and including "title" in line 8, page 9.

Page 9, strike out lines 9 to 17, inclusive.

Page 9, strike out lines 18 to 24, inclusive.

Page 10, strike out lines 1 to 8, inclusive.

Page 10, line 17, strike out all after "abroad." down to and including "abroad." in line 22 and insert "Any such press release or radio script, on request, shall be available in the English language at the Department of State, at all reasonable times following its release as information abroad, for examination by representatives of United States press associations, newspapers, magazines, radio systems and stations, and, on request, shall be made available to Members of Congress."

Page 11, line 1, strike out all after "Secretary" down to and including "and" in line 5.

Page 11, line 11, strike out all after "information" down to and including "source" in line 18.

Page 11, strike out all after line 18 over to and including line 14 on page 14 and insert:

"TITLE VI—ADVISORY COMMISSIONS TO FORMULATE POLICIES

"SEC. 601. There are hereby created two advisory commissions, (1) United States Advisory Commission on Information (hereinafter in this title referred to as the Commission on Information) and (2) United States Advisory Commission on Educational Exchange (hereinafter in this title referred to as the Commission on Educational Exchange) to be constituted as provided in section 602. The Commissions shall formulate and recommend to the Secretary policies and programs for the carrying out of this act: *Provided, however,* That the commissions created by this section shall have no authority over the Board of Foreign Scholarships or the program created by Public Law 584 of the Seventy-ninth Congress, enacted August 1, 1946, or the United States National Commission for UNESCO.

"MEMBERSHIP OF THE COMMISSIONS; GENERAL PROVISIONS

"SEC. 602. (a) Each Commission shall consist of five members, not more than three of whom shall be from any one political party. Members shall be appointed by the President, by and with the advice and consent of the Senate. No person holding any compensated Federal or State office shall be eligible for appointment.

"(b) The members of the Commission on Information shall represent the public interest, and shall be selected from a cross section of professional, business, and public service backgrounds.

"(c) The members of the Commission on Educational Exchange shall represent the public interest and shall be selected from a cross section of educational, cultural, scientific, technical, and public service backgrounds.

"(d) The term of each member appointed under subsection (a) of this section shall be 3 years, except that the terms of office of such members first taking office on each Commission shall expire, as designated by the President at the time of appointment, two at the end of 1 year, two at the end of 2 years, and one at the end of 3 years from the date of the enactment of this act. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor is appointed shall be appointed for the remainder of such term. Upon the expiration of his term of office any member may continue to serve until his successor is appointed and has qualified.

"(e) The President shall designate a chairman for each Commission from among members of the Commission.

"(f) The members of the Commissions shall receive no compensation for their services as such members but shall be entitled to reimbursement for travel and subsistence in connection with attendance of meetings of the Commissions away from their places of residences, as provided in subsection (6) of section 801 of this act.

"(g) The Commissions are authorized to adopt such rules and regulations as they may deem necessary to carry out the authority conferred upon them by this title.

"(h) The Department is authorized to provide the necessary secretarial and clerical assistance for the Commissions.

"RECOMMENDATIONS AND REPORTS

"SEC. 603. The Commissions shall meet not less frequently than once each month during the first 6 months after their establishment, and thereafter at such intervals as the Commissions find advisable, and shall transmit to the Secretary a quarterly report, and to the Congress a semiannual report of all programs and activities carried on under the authority of this act, including appraisals, where feasible, as to the effectiveness of the several programs, and such recommendations as shall have been made by the Commissions to the Secretary for effectuating the purposes and objectives of this act and the action taken to carry out such recommendations."

Page 14, line 20, strike out "may" and insert "shall."

Page 16, line 17, after "create", insert "with the approval of the Commission on Information and the Commission on Educational Exchange."

Page 18, after line 17, insert:

"ADVANCE OF FUNDS

"SEC. 902. If any other government shall express the desire to provide funds, property, or services to be used by this Government, in whole or in part, for the expenses of any specific part of the program undertaken pursuant to this act, the Secretary is authorized, when he finds it in the public interest, to accept such funds, property, or services. Funds so received may be established as a special deposit account in the Treasury of the United States, to be available for the specified purpose, and to be used for reimbursement of appropriations or direct expenditure, subject to the provisions of this act. Any unexpended balance of the special deposit account and other property received under this section and no longer required for the purposes for which provided shall be returned to the government providing the funds or property."

Page 18, line 20, strike out all after "1001." over to and including line 10 on page 19, and insert "No citizen or resident of the United States, whether or not now in the employ of the Government, may be employed or assigned to duties by the Government under this act until such individual has been investigated by the Federal Bureau of Investigation and a report thereon has been made to the Secretary of State: *Provided, however,* That any present employee of the Government, pending the report as to such employee by the Federal Bureau of Investigation, may be employed or assigned to duties under this act for the period of 6 months from the date of its enactment. This section shall not apply in the case of any officer appointed by the President by and with the advice and consent of the Senate."

Page 19, strike out lines 11 to 16, inclusive.

Page 19, line 18, strike out "1003" and insert "1002."

Page 20, line 2, strike out "1004" and insert "1003."

Page 20, line 8, strike out "1005" and insert "1004."

Page 20, line 24, strike out "1006" and insert "1005."

Page 21, line 1, strike out all after "utilize". down to and including "agencies," in line 2 and insert "to the maximum extent practicable, the services and facilities of private agencies, including existing American press, publishing, radio, motion picture, and other agencies."

Page 21, strike out lines 9 to 15, inclusive.

Page 21, line 18, strike out "1008" and insert "1006."

Page 21, lines 18 and 19, strike out ", or under any provision thereof."

Page 21, after line 21, insert:

"VETERANS' PREFERENCE ACT"

Page 21, line 22, strike out "1009" and insert "1007."

Page 22, line 2, strike out "1010" and insert "1008."

Page 22, line 10, strike out "1011" and insert "1009."

Page 22, after line 14, insert:

"SEPARABILITY OF PROVISIONS

"SEC. 1010. If any provision of this act or the application of any such provision to any person or circumstance shall be held invalid, the validity of the remainder of the act and the applicability of such provision to other persons or circumstances shall not be affected thereby."

Amend the title so as to read: "An act to promote the better understanding of the United States among the peoples of the world and to strengthen cooperative international relations."

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

Mr. HALLECK. Mr. Speaker, reserving the right to object, and I certainly am not going to object, but I think it would be proper for the gentleman to explain what this is that he is proposing to do.

Mr. MUNDT. I will be very happy to do that, Mr. Speaker. This is the bill to create an American Information Service abroad that was debated so long in the House last summer and which passed the other body unanimously on Friday of last week. The Members of the House will be interested to know that there are no basic changes whatsoever in the legislation as it passed the House with the exception that the other body added some minor amendments which have further encouraged the use of private agencies, wherever they could, in the implementation of this program. The only other material change in our House bill made in the other body was the change in the so-called Dirksen amendment, which was made in consultation with the gentleman from Illinois [Mr. DIRKSEN] and in consultation with me as chairman of the subcommittee in charge of this bill. It was made also on the basis of investigation and study which both the gentleman from Illinois [Mr. DIRKSEN] and our subcommittee made in Europe this summer. Otherwise there are no major changes in the bill from the form in which it passed the House last June 24, and so I recommend we concur in the Senate amendments.

Mr. HALLECK. Mr. Speaker, I withdraw my reservation of objection.

Mr. RANKIN. Mr. Speaker, further reserving the right to object, who selects these voices? Some voices, I had assumed, did not go to Europe.

Mr. MUNDT. These voices, as you call them, will be selected by the Department of State under the Secretary of State, Mr. Marshall, and the program will be administered by personnel cleared and checked by the FBI before it is utilized. The so-called Mundt loyalty amendment which we have put in all of our foreign-aid and assistance bills, since our unfortunate experiences with UNRRA, is made an inherent part of H. R. 3342. I made sure of that before I ever introduced the legislation.

Mr. MACKINNON. Reserving the right to object, Mr. Speaker, has any division been made in the bill between the propaganda activities and the educational activities?

Mr. MUNDT. Yes. That was made in the revised Advisory Commission by the amendment to the Dirksen amendment, to which I earlier referred.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

Mr. MUNDT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. MUNDT. Mr. Speaker, by our final passage of H. R. 3342 just now with the amendments added by the Senate, the Eightieth Congress has in my opinion written an important new chapter in American history. For the first time in our peacetime history, this Republic will now have a permanent, comprehensive, and coherent program for disseminating information abroad about the American concept, the American program, and the American people. For the first time, we will be equipped and prepared to tell people in foreign lands the truth about America and the free institutions which have made us strong. And for the first time, too, when and where we need to use it we shall have an arm of our Government able and adequate to answer and refute slanderous falsehoods about us and to expose the fallacies and motives of vicious propaganda directed against us and our way of life. We will now be prepared to wage a peace just as we must be prepared to wage a war should necessity arise.

Mr. Speaker, today's action concludes a long and arduous campaign to establish such an information service as H. R. 3342 provides. Like all new ventures, it has had persistent opposition but it has also had the loyal and consistent support of many advocates. I wish to extend my personal appreciation to the many individuals and organizations who have cooperated so energetically and tirelessly in the promotion of this legislation. The educational campaign which they have conducted has aided mightily in bringing about the final passage of this legislation, which, in my opinion, in the final analysis may well do as much or more than the Marshall plan itself to promote permanent peace and to prepare the minds and hearts of people in foreign countries to follow the pursuits and practices which make war both unnecessary and impossible.

Now that H. R. 3342 has become permanent legislation, Mr. Speaker, we who believe in letting the voice of America be heard abroad in strong and strident terms must not cease our efforts. I hope that within the next few weeks we can pass a supplemental appropriations bill making available without further delay five or six million dollars to do the immediate make-ready work necessary to the full development of an adequate and effective foreign information program. I also trust our State Department will request not less than $50,000,000 for the next fiscal year to conduct an information program abroad which will be a real credit to the United States and an effective element in waging the peace which we must win if we are to avert the necessity of again having to wage war. I predict that this Congress will wholeheartedly support an adequate appropriation for this work if the State Department, the Budget Bureau, and the Appropriations Committee will cooperate to bring before us an appropriations item which is large enough to do this man-sized job in a businesslike, effective, and determined manner.

EXTENSION OF REMARKS

Mr. MUNDT asked and was given permission to extend his remarks in the RECORD in two instances and include extraneous material in each.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

FILLING VACANCY IN OFFICE OF DISTRICT JUDGE, SOUTHERN DISTRICT OF NEW YORK

The Clerk called the bill (H. R. 1436) to repeal the prohibition against the filling of a vacancy in the office of district judge in the southern district of New York.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. I object, Mr. Speaker.

ESTABLISHING A FISH HATCHERY AT ROGERS CITY, MICH.

The Clerk called the bill (H. R. 210) to establish rearing ponds and a fish hatchery at or near Rogers City, Mich.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. I object, Mr. Speaker.

ESTABLISHING A FISH HATCHERY AT ST. IGNACE, MICH.

The Clerk called the bill (H. R. 214) to establish rearing ponds and a fish hatchery at or near St. Ignace, Mich.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. I object, Mr. Speaker.

ESTABLISHING A FISH HATCHERY AT CHARLEVOIX, MICH.

The Clerk called the bill (H. R. 215) to establish rearing ponds and a fish hatchery at or near Charlevoix, Mich.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. I object, Mr. Speaker.

ESTABLISHING A FISH HATCHERY ON THE ANNA RIVER, MICH.

The Clerk called the bill (H. R. 216) to establish rearing ponds and a fish hatchery.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. PLUMLEY, and Mr. DEANE objected.

AMENDING ORGANIC ACT OF GEOLOGICAL SURVEY

The Clerk called the bill (H. R. 3106) to reenact and amend the Organic Act of the United States Geological Survey by incorporating therein substantive provisions confirming the exercise of long-continued duties and functions and by redefining their geographic scope.

Mr. MACKINNON. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

BUREAU OF THE CENSUS

The Clerk called the bill (H. R. 1821) to provide for the collection and publication of statistical information by the Bureau of the Census.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. DEANE, and Mr. PLUMLEY objected.

SYNTHETIC LIQUID FUELS

The Clerk called the bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and

other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes.

Mr. KEAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Mr. CASE of South Dakota. Reserving the right to object, Mr. Speaker, I would like to call attention to the fact that this bill is one that proposes to do something about the fuel-oil situation. It is proposed to extend the time in which the demonstration plant which is being operated by the Department of the Interior can function. I understand it does violate the policy announced by the objectors on the Consent Calendar in that the amount involved is more than $1,000,000, consequently I am asking the Committee on Rules for consideration. However, I think the Members should know that the Department of the Interior, Oil and Gas Division, now regards the synthetic liquid fuel program as offering the answer to our dwindling petroleum reserves in this country. The reserves in coal shales are estimated to be five times that of our petroleum. The reserves in sub-bituminous coal are estimated to be 25 times that of petroleum. The research already carried on demonstrates that gasoline can be produced with presently known processes at less than 9 cents a gallon. It demonstrates that fuel oil can be produced at about $1.92 a barrel, making a synthetic fuel oil competitive with fuel oil produced from petroleum. The demonstrations that are now going on should be carried to completion. These pilot plants should be permitted to operate so that we can get experience and encourage private industry to put some money into plants and produce fuel oil that the country needs. Therefore if the Committee on Rules grants us a favorable rule, I hope that we can get favorable consideration of the bill at an early date.

Mr. CARROLL. Mr. Speaker, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. CARROLL. Is it not true that there is a great program under way at this time under present legislation?

Mr CASE of South Dakota. That is true. There is a program under way, but the Secretary of the Interior says he needs additional time and additional funds to carry it on. This bill was urgently recommended by him and reported by the Committee on Public Lands unanimously.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

BRAINERD WAR DEAD NATIONAL MEMORIAL

The Clerk called the bill (H. R. 3614) to provide for the establishment of the Brainerd War Dead National Memorial.

The SPEAKER. Is there objection to present consideration of the bill?

Mr. BUCK. Mr. Speaker, I object.

INTERPARLIAMENTARY UNION

The Clerk called the bill (S. 1005) to amend the act of June 28, 1935, entitled an act to authorize participation by the United States in the Interparliamentary Union.

The SPEAKER. Is there objection to present consideration of the bill?

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

FISH RESTORATION

The Clerk called the bill (H. R. 1693) to provide that the United States shall aid the States in fish restoration and management projects and for other purposes.

Mr. KEAN, Mr. COLE of New York, and Mr. CUNNINGHAM objected.

PANAMA CANAL

The Clerk called the bill (H. R. 2273) to amend the act of May 29, 1944, providing for the recognition of the services of the civilian officials and employees, citizens of the United States, engaged in and about the construction of the Panama Canal.

Mr. BUCK. Mr. Speaker, reserving the right to object, this bill has considerable merit from the standpoint of equity and justice, but in view of the fact that it involves some $3,000,000, it seems to me that it is not a proper bill for consideration on the Consent Calendar. Therefore, Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

COMMUNIST PARTY AND VETERANS' BENEFITS

The Clerk called the bill (H. R. 3623) to provide that members of the Communist Party shall be ineligible for veterans' benefits, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MARCANTONIO, Mr. HUBER, and Mr. KEAN objected.

NATIONAL FOREST LANDS

The Clerk called the bill (H. R. 1809) to facilitate the use and occupancy of national-forest lands, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUBER. Mr. Speaker, I object.

BUREAU OF RECLAMATION

The Clerk called the bill (H. R. 3218) to authorize an emergency fund for the Bureau of Reclamation to assure the continuous operation of its irrigation and power systems.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in order to assure continuous operation of irrigation or power systems operated and maintained by the Bureau of Reclamation, Department of the Interior, there is hereby authorized to be appropriated from the reclamation fund an emergency fund which shall be available for defraying expenses which the Commissioner of Reclamation determines are required to be incurred because of unusual or emergency conditions.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MISSISSIPPI RIVER PARKWAY

The Clerk called the bill (H. R. 1710) to authorize a survey of a proposed Mississippi River parkway for the purpose of determining the feasibility of such a national parkway, and for other purposes.

Mr. CUNNINGHAM. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

RECLAMATION PROJECT ACT OF 1939

The Clerk called the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. DONDERO. Mr. Speaker, reserving the right to object, will the author of this bill explain what part of the Reclamation Act is proposed to be amended?

Mr. BARRETT. Mr. Speaker, I may say that the Rules Committee has granted a rule on this bill and, as I understand, the bill is scheduled to come up for consideration tomorrow or the next day in the House. Consequently, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

PARKER RIVER NATIONAL WILDLIFE REFUGE

The Clerk called the bill (H. R. 4108) to reduce in area the Parker River National Wildlife Refuge in Essex County, Mass., and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. McDOWELL, and Mr. PLUMLEY objected.

NATIONAL CEMETERY IN EVERY STATE

The Clerk called the bill (H. R. 1109) to provide for one national cemetery in every State and Territory and such other national cemeteries in the States and Territories as may be needed for the burial of war veterans and certain other persons as provided for in section 281, title 24, United States Code, as amended.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. COLE of New York, Mr. CUNNINGHAM, and Mr. PLUMLEY objected, and the bill was stricken from the calendar.

KLAMATH INDIANS OF OREGON

The Clerk called the bill (H. R. 2502) to provide for the general welfare and advancement of the Klamath Indians in Oregon.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That this act shall be known as the "Klamath Welfare Act."

SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized and directed, from the capital reserve fund deposited in the Treasury of the United States to the credit of the Klamath and Modoc Tribes and Yahooskin Band of Snake Indians (hereinafter referred to as the "Klamath Tribes"), said fund being established pursuant to the act of August 28, 1937 (ch. 874, 50 Stat. 872), as augmented by the proceeds of the judgment fund of the Klamath Indians as provided in the act of August 7, 1939 (ch. 552, 53 Stat. 1252), to credit the sum of $1,000 upon the books of the Office of Indian Affairs, to each person determined by the Secretary of the Interior to be entitled to enrollment upon the annuity roll of said tribes of the Klamath Reservation, Oreg., living upon the date of the enactment of this act. Notwithstanding the provisions of any prior act or acts relating to the enrollment of members of the Klamath Tribes, the Secretary of the Interior is authorized, by and with the consent and recommendation of the general council of the Klamath Tribes, or its duly authorized representative, to eliminate from the roll any member or class of members for such cause as, to the Secretary and the said general council or its representative, shall be found just and reasonable upon such investigation or hearing as the Secretary may determine. The share of each adult member of the credit so established shall be available for expenditure, under such rules and regulations as the Secretary of the Interior may prescribe, for the following purposes;

Purchase of land or interests in land; improvement of lands acquired or already held by the Indian; erection and improvement of suitable homes, including household equipment and furnishings; repayment of any loans received from the United States or from the Klamath tribal funds; purchase of building material, feed, seed, and grain; purchase or rehabilitation and repair of farming equipment, tools, trucks, tractors, machinery, and implements; and purchase of any other equipment or supplies necessary to enable the Indians to fit themselves for or to engage in farming, livestock, industry, or such other pursuits or vocations, including education and adult education, as will enable them to become self-supporting; and health, including dental work: *Provided, however,* That the funds of the aged, infirm, decrepit, and incapacitated members may be used for their proper maintenance and support: *Provided further,* That during minority, the share of each minor Indian shall be available for expenditure only for his education and for health purposes, including dental work, except that in an emergency expenditure of a minor Indian's share may be made for any of the purposes specified in this act. As herein used, the term "minor" shall include all members of the tribe who have not attained the age of 21 years, except that minors 18 years of age or over and who are married or have families of their own to support, shall be regarded as adults. On the death of any enrolled member, adult or minor, the sum on deposit to his credit shall be distributed as personal property, and shall be available for expenditure by the distributees only for the purposes herein authorized: *And provided further,* That each member of the Klamath Tribes honorably discharged from service to the United States in its armed forces shall, upon application to the Commissioner of Indian Affairs, be paid $200 in cash, free from the aforesaid restrictions and in addition to the $1,000 to be credited to such member as provided in section 2 of this act.

SEC. 3. That in no event shall any portion of the funds hereby directed to be credited and paid become liable, payable, or subject to any debt or debts contracted prior to the passage of this act by any Indian of the Klamath Tribe, except debts to the United States or to the tribe.

With the following committee amendments:

On page 2, line 3, strike out "$1,000" and insert "$500."

On page 4, line 5, strike out "$1,000" and insert "$500."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JACKSON HOLE NATIONAL MONUMENT

The Clerk called the bill (H. R. 1330) to abolish the Jackson Hole National Monument as created by Presidential Proclamation No. 2578, dated March 15, 1943, and to restore the lands belonging to the United States within the exterior boundaries of said monument to the same status held immediately prior to the issuance of said proclamation.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. MARCANTONIO, Mr. HUBER, Mr. JAVITS, and Mr. DEANE objected, and the bill was stricken from the calendar.

ELIMINATION OF REGULAR ARMY OFFICERS

The Clerk called the bill (H. R. 2744) to provide for the selection for elimination and retirement of officers of the Regular Army, for the equalization of retirement benefits for members of the Army of the United States, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, reserving the right to object, I think this is a good bill but it is too long for the Consent Calendar, and therefore I object.

RECLAIMING LANDS BY DRAINAGE

The Clerk called the bill (H. R. 3538) to authorize the Bureau of Reclamation to investigate and report on projects for reclaiming lands by drainage.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior, through the Bureau of Reclamation, is authorized to investigate, plan, design, and report to the President and the Congress on projects for reclaiming lands by drainage.

SEC. 2. Reports on projects for reclaiming lands by drainage may be made from time to time to the Congress through the President and shall contain such information as the Secretary of the Interior shall deem pertinent, including in any event (1) a description of the area or areas to be drained; (2) a description of the principal works proposed to be constructed for the purposes of the project; (3) a statement of the estimated cost of the project; (4) the Secretary's recommendations regarding the part of the estimated cost of the project which can properly be allocated to Federal responsibilities in connection with the public health or other matters of general public benefit; (5) advice as to the extent to which contributions toward the project are assured through promises of financial aid, the contribution of lands, easements, or right-of-way, or other assistance by States or agencies or creatures thereof, or public or private bodies, or individuals; (6) advice as to what assurances have been obtained that beneficiaries of the proposed project will pay, either in advance of the beginning of construction thereof or over a period of years after completion of the construction of the project, and appropriate share of its construction costs; and (7) advice as to what assurances have been obtained that funds required from year to year for the operation and maintenance of the project will be forthcoming from sources other than the United States.

SEC. 3. There are hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the purposes of this act.

SEC. 4. This act shall be deemed supplemental to the Federal reclamation laws.

With the following committee amendments:

Page 1, line 3, strike out "the Interior, through the Bureau of Reclamation," and insert the word "Agriculture."

Page 1, line 10, strike out "the Interior" and insert "Agriculture."

Page 2, line 6, after the word "Federal", insert ", State, and local."

Page 2, line 7, after the word "benefit" and before the semicolon, insert "including a statement of the total value of private, local, State, and National benefits to be derived from the project."

Page 2, line 21, after the period, insert the following: "Recommendations for Federal participation in construction of any such projects shall not be made unless it is shown that the total private, local, State, and National benefits of the proposed improvements to whomsoever accruing exceed the total costs of the project: *Provided,* That where works or activities contemplated include channel and major drainage improvements within the purview of section 2 of the Flood Control Act, approved December 22, 1944, or otherwise, such works shall be the responsibility of and shall be reported on (and prosecuted) by the War Department under the direction of the Secretary of War and the supervision of the Chief of Engineers; and the reports of the Secretary of Agriculture and the Secretary of War shall take cognizance of the findings and recommendations of each other and shall state the respects in which the prosecution of the plans and proposals of each will be correlated: *Provided further,* That this act shall not include the authority to investigate, plan, and prepare reports relating to drainage projects adjacent and incidental to Federal irrigation projects under construction by or administration of the Department of the Interior except by agreement with such Department."

Page 3, line 3, strike out all of section 4.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The title was amended so as to read: "A bill to authorize the Department of Agriculture to investigate and report on projects for reclaiming lands by drainage."

VETERANS' HOSPITAL FOR NEGRO VETERANS

The Clerk called the bill (H. R. 3814) to provide for the establishment of a veterans' hospital for Negro veterans at the

birthplace of Booker T. Washington in Franklin County, Va.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, reserving the right to object, I understand the Speaker has announced that he would recognize somebody to move to suspend the rules on this bill.

The SPEAKER. That is correct.

Mr. KEAN. Then, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

TRADING WITH THE ENEMY ACT

The Clerk called the bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended, to create a commission to make an inquiry and report with respect to war claims, and to provide for relief for internees in certain cases.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CUNNINGHAM. Mr. Speaker, I am informed by members of the committee that a rule has been asked for on this bill, and therefore I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa [Mr. CUNNINGHAM]?

There was no objection.

PUBLIC AIRPORT IN THE TERRITORY OF ALASKA

The Clerk called the bill (H. R. 3510) to authorize the construction, protection, operation, and maintenance of a public airport in the Territory of Alaska.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CUNNINGHAM. Mr. Speaker, I understand the same situation applies to this bill as the preceding one. Therefore, I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

AIRPORT FOR THE CITY OF FAIRBANKS, ALASKA

The Clerk called the bill (H. R. 3509) to authorize the construction of a class IV airport for the city of Fairbanks, Alaska, and a public highway or bridge from the city of Fairbanks to the location of the airport.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CUNNINGHAM. Mr. Speaker, I understand a rule has been requested on this bill, and therefore I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

WAR ASSETS ADMINISTRATION

The Clerk called the next business, House Concurrent Resolution 57.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. DEANE. Mr. Speaker, I object.

AMENDMENT OF PUBLIC HEALTH SERVICE ACT

The Clerk called the bill (H. R. 3924) to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes.

Mr. CUNNINGHAM. Mr. Speaker, I understand a rule has been requested on this bill. I therefore ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

EXTENDING TIME FOR CERTAIN APPLICATIONS UNDER NATIONAL SERVICE LIFE INSURANCE ACT

The Clerk called the bill (H. R. 4141) to amend subsection 602 (d) (5) of the National Service Life Insurance Act of 1940, as amended, to extend for 2 years the time within which eligible persons may apply for gratuitous insurance benefits.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That subsection 602 (d) (5) of the National Service Life Insurance Act of 1940, as amended (38 U. S. C. 802 (d) (5), is amended by substituting "seven" for "five" in the first proviso, so that the subsection will read as follows:

"(5) If any person deemed to have been issued insurance under subsection (3) (A) or (b) hereof die without filing application and within the time limited therefor, death insurance benefits shall be payable in the manner and to the persons as stated in subsection (2): *Provided*, That no application for insurance payments under subsections (2) or (3), as hereby amended, shall be valid unless filed in the Veterans' Administration within 7 years after the date of death of the insured and the relationship and dependency of the applicant, where required as a basis for such claim, shall be proved as of date of death of insured by evidence satisfactory to the Administrator: *And provided further*, That persons shown by evidence satisfactory to the Administrator to have been mentally or legally incompetent at the time the right to apply for continuation of insurance or for death benefits expires, may make such application at any time within 1 year after the removal of such disability."

Mrs. ROGERS of Massachusetts. Mr. Speaker, the bill would amend subsection 602 (d) (5) of the National Service Life Insurance Act of 1940, as amended, in order to extend for 2 years the time in which eligible persons may apply for gratuitous—automatic—insurance benefits after the death of a veteran who was deemed to have been issued such insurance under existing law—subsection 602 (d) of the National Service Life Insurance Act of 1940, as amended.

Under existing law—subsection 602 (d) (5)—application must be made within 5 years after death of the insured and this bill would extend the time to 7 years after the death of the insured. Under present provisions, the time for filing applications has expired with respect to those persons eligible to apply for such death benefits, who were residing in enemy-occupied territories and were unable to learn of their rights, or if aware of such rights, were precluded from making application until the reoccupation of such territories. As an example the time for filing applications has expired with respect to those veterans who died between the time of the Japanese attack on the Philippines in December 1941 and the formal surrender in May 1942 of the troops in the Philippines and due to the Japanese control of the Philippines after the surrender, the dependents eligible to apply for such insurance death benefits, who were residing in the Philippines, were precluded from making application until our reoccupation of the Philippines.

This bill is intended to correct, by the necessary extension of time for making such application, the above-described situations.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ESTABLISHING MINIMUM RATING FOR SERVICE-CONNECTED ARRESTED TUBERCULOSIS

The Clerk called the bill (H. R. 4243) to provide minimum ratings for service-connected arrested tuberculosis.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, there is nothing in the report to show the attitude of the Veterans' Administration on this bill, and there is nothing in the report about the cost. Therefore, I object.

Mrs. ROGERS of Massachusetts. Mr. Speaker, on July 19, 1947, the Committee on Veterans' Affairs, House of Representatives, favorably reported H. R. 4243, Eightieth Congress, a bill to provide minimum ratings for service-connected arrested tuberculosis.

The purpose of the bill is to insure that veterans who have incurred active tuberculosis in the service of their country, either in time of war or peace, will receive compensation proportionate to the degree of disability resulting from arrested tuberculosis so long as they live.

Under existing regulations of the Veterans' Administration, provision is made for payment of compensation for service-connected arrested tuberculosis for specified periods following an arrest of active tuberculosis. In some instances where pronounced symptoms of the disease are manifest after arrest, ratings of 20 or 30 percent are authorized for life. However, in certain other cases where pronounced symptoms of tubercular disability are not manifest, veterans having arrested tuberculosis are ultimately rated as no percent disabled.

The committee, after extensive hearings and thorough consideration of the matter, is convinced that an active tubercular process has residuals which continue throughout life and that a veteran having arrested tuberculosis should be relieved of the fear that his compensation may be terminated, notwithstanding the fact that his disability continues.

The following table shows the difference between ratings made under existing regulations of the Veterans' Administration and those proposed by the bill:

Rating for arrested tuberculosis under Veterans' Administration regulations	Percent disability	Ratings for arrested tuberculosis proposed by H. R. 4243	Percent disability
Period:		Period:	
6 months after arrest (may be continued for successive periods of 6 months, up to a maximum of 2 years under certain conditions).	100	2 years after arrest (may be reduced to 50 percent for failure to follow prescribed treatment or to submit to examination when requested).	100
Balance of 5 years	50		
Next 5 years	30	Next 5 years	50
After 10 years:		After 7 years (for life):	
(A) If veteran had far-advanced active lesions, for life.	30	(A) If tubercular condition is diagnosed as far-advanced.	40
(B) If veteran had moderately advanced lesions and residuals continue to show certain evidence of disability, for life.	20	(B) If tubercular condition is diagnosed as moderately advanced or less.	30
or—			
(C) Otherwise	0		

Mr. Speaker, under the terms of the bill, at the rates of compensation now provided under Public, No. 2, Seventy-third Congress, and the veterans' regulations issued thereunder, a veteran having arrested tuberculosis incurred in wartime service will be entitled to at least $41.40 per month so long as he lives. A peacetime veteran having the same disability will receive at least $31.05 so long as he lives.

As chairman of the Committee on Veterans' Affairs, I am convinced that the bill is meritorious and should be promptly enacted to insure the welfare of veterans having arrested tuberculosis.

SENIORITY OF RURAL CARRIERS, POSTAL SERVICE

The Clerk called the bill (H. R. 1189) to establish the methods of advancement for post-office employees—rural carriers—in the field service.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. RANKIN. Mr. Speaker, reserving the right to object, will the author of the bill explain what it provides?

Mr. COLE of Missouri. I shall be pleased to.

Mr. Speaker, the bill provides for seniority out of a local post office on rural routes. For example, if there are three rural routes out of a town and one route becomes vacated then under my bill the oldest carrier out of that town has the right to fill that vacancy, and so on down the line.

Under present practices the postmaster can put a new man who qualifies as rural carrier on a select route. This bill gives seniority to those who have been carrying the routes and who in many cases have been carrying a route that was not the most desirable.

Mr. DONDERO. Mr. Speaker, will the gentleman yield that I may ask a question of the gentleman from Missouri?

Mr. RANKIN. I yield.

Mr. DONDERO. What is the attitude of the Post Office Department on this bill?

Mr. COLE of Missouri. The Post Office Department is not opposing the legislation. They contend that they are following this practice already.

Mr. MANASCO. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. MANASCO. I have had some experience along that line. In every instance the Post Office Department has made it mandatory that the senior carrier have the right to transfer to the vacated route over any carrier with less seniority. I do not know whether that is the law, but they have been doing that.

Mr. COLE of Missouri. I may say to the gentleman from Alabama that I have had several instances called to my attention where that procedure was not followed; and the purpose of this legislation is to make it mandatory that the oldest carrier out of the post office shall be entitled to the best route when it is vacated.

Mr. O'HARA. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. O'HARA. I have had several such cases in my own district. I found that they have even started to bring in rural carriers from other States to take these positions. To this I strenuously object, but what is in the bill that would prevent that sort of carpetbagging, so to speak?

Mr. COLE of Missouri. It would not prevent the transfer or exchange between other States. It would, however, make the man who transferred to that locality take the route that no one else carrying out of that post office desired.

Mr. RANKIN. Would this shut the door in the face of people living along the vacated route, many of whom are ex-service men, from competing for this route, and put on the route a man who probably would not be satisfactory to the patrons of the route, and who might not be a veteran?

Mr. COLE of Missouri. No; no; the veterans would qualify through examination and appointment.

Mr. RANKIN. I understand.

Mr. COLE of Missouri. I may say to the gentleman from Mississippi that this bill would not affect the prerogatives of Members of Congress of designating which one of the three top men on the eligible list shall be chosen.

Mr. RANKIN. I understand.

Mr. COLE of Missouri. And it would not prevent a veteran from taking a route out of that post office. He would have to take the route that was least desirable to the others who have served out of that post office a longer length of time.

Mr. ROBSION. Mr. Speaker, will the gentleman yield?

Mr. COLE of Missouri. I yield to the gentleman from Kentucky.

Mr. ROBSION. This has no relation whatever to any subsequent appointees. It just covers those who are serving at the time?

Mr. COLE of Missouri. That is right.

Mr. ROBSION. The one oldest in service has the preference?

Mr. COLE of Missouri. That is right and he does not have that preference until there is a vacancy on a route out of his post office. Then the oldest man has a right to request that he be transferred to that vacancy, if he desires it.

Mr. RANKIN. You can take a man and put him on a loop route 15 or 20 miles from the office he serves. Under this bill could not he be put on a route he has never served?

Mr. COLE of Missouri. The route must emanate out of the same post office.

Mr. RANKIN. Yes; but you have loop routes that come from the same post office, and some of them originate 10, 15, or 20 miles from the area to which you propose to transfer him.

Mr. COLE of New York. Mr. Speaker, will the gentleman yield?

Mr. COLE of Missouri. I yield to the gentleman from New York.

Mr. COLE of New York. The gentleman made the statement that this bill would not interfere with the prerogatives of Members of Congress in the appointment of one of the top three eligible candidates for a vacancy. It may be that I have overlooked some opportunities.

Mr. COLE of Missouri. I may say to the gentleman that that prerogative goes only to the member of the party of the administration in power.

Mr. COLE of New York. The administration at the White House?

Mr. COLE of Missouri. Yes; that is right. In the absence of a member in their party, either Senator or Representative, in the district wherein the vacancy occurs, why, then, the political adviser is the Democratic county committee of that particular county.

Mr. COLE of New York. Then do I understand it is correct that is the procedure that is followed under the guise of the civil service and the merit system?

Mr. COLE of Missouri. That is right.

Mr. RANKIN. You do not make any provision for promoting the substitutes who probably carry the mail during the bad weather, on the hot days and the rainy days and in the snow and sleet.

Mr. COLE of Missouri. There is a bill having that purpose in view before our committee at this time. That has long been requested.

Mr. REES. Mr. Speaker, will the gentleman yield?

Mr. COLE of Missouri. I yield to the gentleman from Kansas.

Mr. REES. All in the world this bill does is to provide that in the event of a vacancy in a certain post office, if there is more than one rural route out of that post office, if the senior carrier wants to do so he may be appointed or be transferred to the route that is vacated?

Mr. COLE of Missouri. That is right.

Mr. REES. That is all there is to it. It is wholly within the post office. The gentleman remembers, I believe, that the mail carriers' organization asked to have this privilege extended to include an entire State.

Mr. COLE of Missouri. That is right.

Mr. REES. But the committee decided this should apply only in a single post office?

Mr. COLE of Missouri. That is right.

Mr. REES. It has nothing to do with the rights of veterans, because if there is a vacancy there the veterans may apply themselves. They always have that privilege.

Mr. COLE of Missouri. That is right. The veteran must take his examination. He is entitled to his veteran's preference and under the civil-service rules if he is one of the top three men, and if the political advisor does not designate him, then they must state in writing the reason why they have bypassed the veteran.

Mr. RANKIN. If he is one of the top men and has a 10-point disability allowance, then he may be transferred over yonder to a route entirely away from his home and his own people.

Mr. COLE of Missouri. Let me follow through on that. If he is the oldest carrier out of that post office and a route out of that post office is vacated, it is optional with him to transfer. If he is on another route he is not disturbed at all, because no one can bump him.

Mr. RANKIN. You do not consult the people on the route, and I fear you shut out the servicemen and others on that route from the right to serve on the route the other fellow never lived on, or served on.

Mr. COLE of Missouri. There is no way that you shut out the servicemen. If the gentleman will just withhold his objection for a minute, let me cover it again. If you have a veteran who is a rural carrier on a route—let us say that there are four routes out of that post office—and one route becomes vacant, now, there are three men left carrying out of that post office; is that not correct? Any one of those men, the oldest in service first, can say, "I want the route that has been vacated." That does not disturb either of the others unless they want the route that is being vacated by the oldest man who is transferring, so it does not affect the veteran at all.

Mr. RANKIN. Of yes. The man who lived on this route, if they are going to give him an opportunity at all, must go and take an examination for another route that does not even touch his community and have transferred to their route a man who never lived in that area.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. RANKIN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

AMEND THE INCOME LIMITATION OF PENSION TO VETERANS

The Clerk called the bill (H. R. 4242) to amend the income limitation governing the granting of pension to veterans and death pension to widows and children of veterans, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. McCORMACK. Mr. Speaker, reserving the right to object, I think that this bill is a very meritorious one. It is aimed to meet a very unfortunate situation. I received a letter recently from a valued friend of mine who is the attorney general of Massachusetts, a man whom I respect very much, calling to my attention the inequitable results that follow from the present law where we put a limitation of $1,000 income each year in order for a widow to receive a nonservice-connected pension; that is, where the husband died without service connection.

As an illustration of the urgency of this bill, he called to my attention the case of a widow who, upon the death of her husband, received $1,000 life insurance. Then there was seventy-odd dollars extra in addition to the $1,000, a dividend of some kind, making a total of $1,070. She paid out $600 or $800 for burial expenses, but that was not deductible. That dividend brought it over $1,000, and, so far as the construction of the law by the Veterans' Administration is concerned, it has been that way for years. She received an income in excess of $1,000 that particular year, and she was denied the pension provided for by law.

Another case called to my attention is where a veteran died and his widow applied for a non-service-connected pension. It was denied. The facts are that there was a $1,000 insurance policy, but the insurance company paid it in 11 months instead of 12 months, and the Veterans' Administration said that if she had received the payments over a 12 months' period that she received for the 11 months' period it would be in excess of $1,000 income during the year. I understand that she was denied a pension because under those circumstances she received an income of over $1,000 in 1 year.

Now, the funeral expenses are not considered a deduction in determining income. You and I know that in the case of death there are funeral expenses, and yet the construction of the present law is such that the funeral expenses are not deducted, and then, in addition, any other income, such as a dividend, is considered as being in excess of $1,000.

This bill, introduced by the gentlewoman from Massachusetts [Mrs. ROGERS], and reported out of the committee, meets that situation. It is based upon justice, and I hope that no one will object.

Mr. KEAN. Of course everything the gentleman says is true, but there is nothing in the report on this bill to give the cost of the bill. There is nothing in the report to show the attitude of the Veterans' Administration. I am sure the gentleman from Massachusetts would not want us to pass a bill by unanimous consent unless we could get that information.

Mr. McCORMACK. Of course, I would; where there is justice involved I would. I am not adopting a position that I did not adopt when I was leader for 6 years. Everybody recognizes the justice of this bill. The very facts speak for themselves. Take the case of a veteran dying and leaving his wife a thousand dollars of life insurance. If there is a dividend of $70, she is getting earnings of over $1,000 a year. They do not even allow a deduction of the funeral expenses to be made from the gross earnings or income.

Then there is another case where the $1,000 life insurance policy was paid over an 11-month period instead of 12 months. Then they say that if it was paid over a 12-month period with the same payments the widow was getting over the 11-month period it would exceed $1,000.

It seems to me this legislation is so thoroughly based upon justice that despite what my friend from New Jersey says we ought to pass the bill today by unanimous consent.

Mr. COLE of New York. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from New York.

Mr. COLE of New York. I understand this bill is predicated upon the justification of the increased cost of living.

Mr. McCORMACK. That is one of the elements, yes.

Mr. COLE of New York. According to the report of the committee, that is the basis for justifying the bill.

Mr. McCORMACK. I would not argue that, but these other factors are involved.

Mr. COLE of New York. If that is so, then will not the gentleman agree that this bill, which seeks to correct what we all hope is a temporary situation, should be temporary and limited to a period of perhaps 2 or 3 years, rather than be a permanent adjustment of the allowances?

Mr. McCORMACK. I would not want to agree to that because, again, that does not meet the cases to which I have just referred.

Mr. COLE of New York. Neither does this bill.

Mr. McCORMACK. Yes, this bill meets those cases by increasing to $1,800 the income a widow can receive or earn during a year and still be eligible where she has no children, and a larger amount where there are children.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. The bill has the very strong endorsement of all the veterans' organizations. Our committee is deluged with mail upon this subject. It feels a great injustice was done. It was felt in the beginning that we did an injustice in not putting a higher ceiling upon it. I earnestly hope this bill will be allowed to pass. There is great suffering today because of it. I think the situation is very unusual. Certainly the widows and the dependents are among the most deserving and worthy people there are in the country today.

This bill (H. R. 4242) would increase the income limitation governing the granting of pension to veterans and death pension benefits to their dependents, and provide a fixed annual income limitation in passing on the dependency of parents for death compensation benefits.

Specifically, it raises the annual-income limitation relating to pension for non-service-connected disability for a single veteran from $1,000 to $1,800; and in the case of a veteran with dependents,

from $2,500 to $3,000. Payments of retirement annuities and social-security benefits would be excluded in determining income.

The annual-income limitation for a widow without child, or in case of a child, is raised from $1,000 to $1,800, and for a widow with child or children, from $2,500 to $3,000. Also, in this connection, the expenses of the veteran's last illness and burial borne by the dependents would be excluded in determining the annual income as would commercial life insurance or income therefrom not in excess of $3,000 received in any one year. An annual income limitation of $1,800 for one parent and $3,000 for two also is fixed in deciding their dependency for death compensation payments.

Hearings were conducted by a subcommittee of the Committee on Veterans' Affairs on a number of bills on this subject. The bill carries the endorsement and approval of all the major veterans' organizations. The record was thoroughly examined, and the committee was impressed with the conviction that existing limitations are outdated and too restrictive, particularly in view of the prevailing high prices. Income limitations now in the law were fixed when living costs were at a much lower level than they are today.

The committee believes that the limitations fixed in the bill are conservative, but by the adoption of this bill a number of worthy and necessitous cases heretofore barred would be given favorable consideration.

It is not possible to give a reliable estimate of cost, but it does not seem that the proposed slight liberalization would greatly increase the number of persons now on the rolls.

Mr. KEAN. If the gentleman will yield, if there is going to be any further suffering, it is because the committee did not make a proper report.

Mrs. ROGERS of Massachusetts. I think the committee did make a proper report.

Mr. KEAN. The committee made no estimate of the expense. The committee did not make a statement as to whether or not the Veterans' Administration is in favor of this bill. Therefore, Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

Mr. McCORMACK. I will have to object to that request.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Mr. McCORMACK. I object, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. I object, Mr. Speaker.

SPECIAL ORDER GRANTED

Mr. BULWINKLE. Mr. Speaker, I ask unanimous consent that on Monday next, January 26, at the conclusion of the legislative program of the day and following any special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

EXTENSION OF REMARKS

Mr. COOLEY asked and was given permission to extend his remarks in the RECORD and include a speech delivered on September 18 by the Honorable Josephus Daniels.

Mr. WOODRUFF asked and was given permission to extend his remarks in the RECORD and include an editorial.

CONSENT CALENDAR

The SPEAKER. The Clerk will call the next bill on the Consent Calendar.

The Clerk called the bill (H. R. 4309) to amend title III of the Servicemen's Readjustment Act of 1944—GI bill of rights—pertaining to "Loans for the purchase or construction of homes, farms, and business property," so as to provide more adequate and effective farm-loan benefits.

Mr. KEAN. Mr. Speaker, this bill is too big to be considered on the Consent Calendar. Therefore, I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, the bill we are considering at this time would authorize the Farm Credit Administration to make direct loans to World War II veterans at 3 percent for the purpose of acquiring farms and farm equipment.

Loans on farm real estate would be limited to $12,000, and on farm equipment, to $4,500. An appropriation for $200,000,000 is authorized for real-estate loans and $100,000,000 for equipment and personal property loans, and thereafter such sums as may be necessary to carry on the purposes of the bill.

Appraisal and approval of the loans would be made by county appraisal committees appointed by the Farm Credit Administration and a loan would be limited to 100 percent of the appraised value. It is believed that these local committees, being thoroughly familiar with the value of farm real estate and property, would be able to give the veteran adequate protection in purchasing farms or farm equipment.

Originally, the bill provided for administration of the bill by the Veterans' Administration, but this was changed to another agency—the Farm Credit Administration. It was felt that this organization, which has had much experience with direct farm loans, is equipped with existing machinery to carry out such a program.

The committee believes that there is an urgent need for more adequate opportunity for farm veterans, which the existing law does not provide, and that passage of this bill will give the needed relief to which they are entitled.

AMENDING SECTION 30 OF THE REVISED STATUTES

The Clerk called the bill (H. R. 3778) to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25).

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25), be, and it is hereby, amended so as to read as follows:

"SEC. 30. (a) At the first session of the House of Representatives in the Eighty-first and in each succeeding Congress, before any other business shall be transacted, the oath of office shall be administered to such of the Members-elect and Delegates-elect present whose qualifications shall not have been challenged by a Member-elect. Such oath of office shall be administered by the officer of the last preceding House of Representatives who has the duty of calling the roll of Members-elect and Delegates-elect. Upon taking the oath of office such affiants shall become Members or Delegates, as the case may be, of the Congress to which they have been elected.

"Thereupon the Speaker shall be elected by the then Members of the House, who are present, and the oath of office shall be administered to him by a Member of the House.

"Thereupon the Clerk shall be elected by the then Members of the House, who are present, and the oath of office shall be administered to him by the Speaker.

"The Speaker shall then hear and pass upon any challenge of the right of any Member-elect to take the oath of office and become a Member of the House and shall then administer the oath of office to its Members-elect whose right to take the oath and become Members of the House had been challenged and overruled.

"Whereupon, any such Member shall have the right for five legislative days to make a motion that the election of the Speaker and Clerk of the new House be reconsidered and vacated. If any such motion be carried such vacancies shall forthwith be filled, respectively and successively, by electing a Speaker, and then a Clerk, who shall immediately take office, and be sworn in as hereinabove provided.

"The Speaker shall administer the oath of office to those Members-elect and Delegates-elect who appear after others have been so sworn, before they take their seats, if no challenge of their qualifications shall have been interposed by a Member, and upon so taking the oath of office they shall become Members or Delegates, as the case may be, of the Congress to which they have been elected. In the event the qualifications of any Member-elect or Delegate-elect who appears after others have been so sworn, shall be challenged by a Member of the House, the Speaker shall hear and pass upon each such challenge, and in those cases in which the challenge is overruled he shall administer the oath of office to such Member-elect or Delegate-elect, and upon so taking the oath of office he shall become a Member or Delegate, as the case may be, of the Congress to which he has been elected. No Member-elect or Delegate-elect whose qualification shall have been challenged by a Member of the House and as to whom such challenge has been sustained by the Speaker shall be permitted to take the oath of office.

"(b) The Clerk of the House of Representatives of the Eightieth and each succeeding Congress shall cause the oath of office to be printed, furnishing two copies to each Member and Delegate who has taken the oath of office in accordance with law, which shall be subscribed in person by the Member or Delegate, who shall thereupon deliver them to the Clerk, one to be filed in the records of the House of Representatives, and the other to be recorded in the Journal of the House and in the CONGRESSIONAL RECORD; and such signed copies, or certified copies thereof, or of either of such records thereof, shall be admissible in evidence in any court of the United States, and shall be held conclusive proof of the fact that the signer duly took the oath of office in accordance with law."

"Members and Delegates of the House of Representatives of the Eightieth Congress may subscribe and deliver the two signed copies of the printed oath of office at their

convenience, at any time before the expiration of the Eightieth Congress."

With the following committee amendments:

Page 1, line 6, strike out the balance of the page down to and including line 24, page 3.

On page 3, line 25, strike out "(b)" and insert "SEC. 30."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CLASSIFIED CIVIL SERVICE

The Clerk called the bill (H. R. 4236) to amend the Civil Service Act to remove certain discrimination with respect to the appointment of persons having any physical handicap to positions in the classified civil service.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the act entitled "An act to regulate and improve the civil service of the United States," as amended (22 Stat. 403), is amended by adding at the end of paragraph "Second" the following new subparagraph:

"Ninth, that no person shall be discriminated against in any case because of any physical handicap, in examination, appointment, reappointment, reinstatement, reemployment, promotion, transfer, retransfer, demotion, or removal, with respect to any position the duties of which, in the opinion of the Civil Service Commission, may be efficiently performed by a person with such a physical handicap: *And provided further,* That such employment will not be hazardous to the appointee or endanger the health or safety of his fellow employees or others."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE BANKRUPTCY ACT

The Clerk called the bill (H. R. 3930) to amend the act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, as amended, in relation to extensions made pursuant to wage earners' plans under chapter XIII of such act.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That article XII of chapter XIII (relating to wage earners' plans) of the act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, as amended, is hereby amended by adding at the end thereof the following new section:

"SEC. 681. Extensions made pursuant to the foregoing provisions of this chapter shall extend the obligation of any person who is secondarily liable for or who may have insured or guaranteed such debt or debts, or any part thereof, or bonds issued upon the security of same, and a copy of the order confirming such extension, certified as required by the provisions of law with reference to judgments and proceedings in courts of the United States, shall be sufficient evidence that such extension has been confirmed in any suit or proceeding brought against any such person so liable."

SEC. 2. The amendment made by this act shall be applicable with respect to extensions which are confirmed on or after the date of the enactment of this act.

With the following committee amendment:

Page 1, after "SEC. 681," strike out the remainder of line 8, all of line 9, and on page 2 strike out lines 1 to 8, inclusive, and insert in lieu thereof the following:

"Extensions made pursuant to the foregoing provisions of this chapter shall to the same extent, extend the obligation of any person who is secondarily liable for such debt or debts, or any part thereof, as gratuitous surety, and a copy of the order confirming any such extension to the primary obligor, certified as required by the provisions of law with reference to judgments and proceedings in courts of the United States, shall be sufficient evidence of such extension both as to primary and secondary obligors."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL LIBRARY FOR THE BLIND

The Clerk called the bill (S. 1324) to amend the Civil Service Retirement Act so as to make such act applicable to the officers and employees of the National Library for the Blind.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That subsection (a) of section 3 of the Civil Service Retirement Act, approved May 29, 1930, as amended (U. S. C. title 5, section 693 (a)), is amended by inserting before the colon preceding the first proviso thereof a comma and the following: "and to all officers and employees of the National Library for the Blind at the election of such officers and employees as herein provided."

SEC. 2. Subsection (a) of section 3 of such act is further amended by adding at the end thereof two new sentences as follows: "In the case of any officer or employee in the service of the National Library for the Blind on the effective date of this amendment, notice of desire to come within the purview of the act must be given to the disbursing officer by whom his salary is paid within 6 months from the date of enactment of this act. In the case of any officer or employee of the National Library for the Blind who enters the service of such Institution after the date of enactment of this amendment, such notice of desire to come within the purview of this act must be given within 6 months after the date of entrance into such service."

SEC. 3. The first paragraph of section 5 of such act is amended by inserting after "or the legislative branch of the Government" a comma and "and periods of service as an officer or employee of the National Library for the Blind."

SEC. 4. Any service rendered prior to the effective date of this act as an officer or employee of the National Library for the Blind shall be considered creditable service for the purposes of section 9 of such act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MILITARY RESERVATION AT FORT SCHUYLER, N. Y.

The Clerk called the bill (H. R. 108) to authorize the conveyance of the United States military reservation at Fort Schuyler, N. Y., to the State of New York for the use as a maritime school, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War is authorized to convey to the State of New York the United States military reservation at Fort Schuyler, N. Y., together with the improvements thereon, subject, however, to certain limitations and conditions as hereinafter provided.

SEC. 2. Such conveyance shall contain the express provision that if the State of New York shall fail to maintain so much of the military structures and appurtenances presently erected, which formerly constituted the old fort, as an historical monument reasonably available to the public, or if the State of New York shall at any time cease to use the property so conveyed as a maritime school, devoted exclusively to purposes of nautical education or, in the alternative, if the State of New York shall fail to use and maintain the property so conveyed as a public park, title thereto shall revert to the United States.

SEC. 3. Such conveyance shall contain the further provision that whenever the Congress of the United States shall declare a state of war or other national emergency to exist, upon determination by the Secretary of War or the Secretary of the Navy that the property so conveyed is useful or necessary for military or naval purposes or in the interest of national defense, the United States shall have the right to reenter upon such property and use the same or any part thereof for the duration of such state of war or other national emergency.

With the following committee amendments:

On page 1, line 3, strike out the balance of the line down to and including line 7, and insert "That the Secretary of War is authorized to convey to the State of New York all that portion of the United States Military Reservation at Fort Schuyler, N. Y., together with all improvements thereon, lying easterly of a line commencing at a point (latitude 40 degrees, 48 minutes, 23 seconds; longitude 73 degrees, 47 minutes, 52 seconds) fixed on the south sea wall which is approximately 25.5 feet westerly from an angle in said sea wall and thence running in a northeasterly direction 592.5 feet, more or less, to a point on the north sea wall which is approximately 196.5 feet westerly from an angle in the north sea wall, said line being the easterly edge of a concrete curb for an 18-foot concrete road running in a northeasterly and southwesterly direction.

"Page 2, following section 3, add an additional section, section 4:

"SEC. 4. The conveyance herein authorized shall not be executed by the Secretary of War until the State of New York shall have relinquished to the United States of America, in a manner satisfactory to the Secretary of the Navy, all right, title, or interest that it may have pursuant to any lease or otherwise in that portion of Fort Schuyler Military Reservation which is not herein expressly authorized to be conveyed to said State."

Mr. ELSTON. Mr. Speaker, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: On page 2, line 8, strike out the word "War" and insert "Defense."

On page 3, line 12, strike out the word "War" and insert "Defense."

On page 3, line 14, strike out the word "Navy" and insert the word "Defense" in lieu thereof.

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

Mr. ELSTON. Mr. Speaker, I offer a further amendment.

The Clerk read as follows:

Amendment offered by Mr. ELSTON: On page 3, lines 4 and 5, strike out the words "War or the Secretary of the Navy" and insert the word "Defense."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

UNITED STATES MILITARY AND NAVAL MISSIONS TO FOREIGN GOVERNMENTS

The Clerk called the bill (H. R. 2313) to amend the act of May 19, 1926 (44 Stat. 565), as amended by the acts of May 14, 1935 (49 Stat. 218) and of October 1, 1942 (56 Stat. 763) providing for the detail of United States military and naval missions to foreign governments.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CARROLL. Mr. Speaker, reserving the right to object, I should like to ask the chairman of the committee for an explanation of certain sections of this bill.

Mr. ANDREWS of New York. This bill was reported by the Committee on Armed Services unanimously in July. The same bill passed in the Seventy-ninth Congress but failed of passage in the Senate.

The necessity for the bill at the present time is that it has to do with a small detail of officers and enlisted men in countries other than the Western Hemisphere. I should like to call attention to the fact that two subcommittees of the Armed Services Committee explored the Pacific and European theaters this fall, and it was the unanimous opinion of those subcommittees, one under the chairmanship of the gentleman from New York [Mr. COLE] and the other the gentleman from Missouri [Mr. SHORT], that the need for this bill is pressing. I would be glad to yield to either the gentleman from New York [Mr. COLE] or the gentleman from Missouri [Mr. SHORT] if they care to say anything about the measure.

Mr. CARROLL. Do I understand that the purport of this bill is to give the President the power to send naval and military missions outside of this hemisphere?

Mr. ANDREWS of New York. That is correct. He has that power under statute now with reference to the Western Hemisphere.

Mr. SHORT. And also the Philippines.

Mr. ANDREWS of New York. Also the Philippines.

Mr. CARROLL. Will the gentleman explain what is meant by "military and naval mission"? How large is a mission?

Mr. ANDREWS of New York. I think the figures are somewhat restricted, for obvious reasons, but I am certain that the gentleman from Missouri and the gentleman from New York will agree that the average mission in Europe is not over 25 men. That includes enlisted men and officers. If the gentleman knows anything about the situation in the Far East, in Arabia, he may have some understanding of the very important mission that these men will carry out.

Mr. CARROLL. Is there any limitation by Federal statute or regulation defining or outlining what constitutes a mission?

Mr. ANDREWS of New York. Not that I know of, but if the gentleman will name the exact mission we will be glad to tell him what the exact number in each mission in each country is and where it is detailed at the present time.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CARROLL. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Colorado [Mr. CARROLL]?

There was no objection.

OPERATION AND EXPANSION OF RESERVE OFFICERS' TRAINING CORPS

The Clerk called the bill (H. R. 4143) to provide for the effective operation and expansion of the Reserve Officers' Training Corps, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. TOWE. Mr. Speaker, I ask that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey [Mr. TOWE]?

There was no objection.

REGULATIONS FOR SOLDIERS' HOME, WASHINGTON, D. C.

The Clerk called the bill (H. R. 2536) to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564).

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. KEAN. Mr. Speaker, I ask unanimous consent that a similar Senate bill (S. 929) be substituted for the House bill.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill (S. 929), as follows:

Be it enacted, etc., That section 2 of the act of March 3, 1883 (22 Stat. 564), is hereby amended to read as follows:

"SEC. 2. The Inspector General of the Army shall designate officers of the Inspector General's Department under his jurisdiction to inspect thoroughly, once each year, the United States Soldiers' Home, Washington, District of Columbia, its records, accounts, management, discipline, and sanitary condition, and shall report thereon in writing to the Secretary of War, including in his report such suggestions as he desires to make."

Mr. KEAN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KEAN: Page 1, line 11, strike out the word "war" and insert the words "the Army."

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H. R. 2636) was laid on the table.

REGIONAL AGRICULTURAL CREDIT CORPORATION

The Clerk called the next business, House Joint Resolution 275 to authorize the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to fur farmers, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. KEAN. Mr. Speaker, this bill is too large for the Consent Calendar, and therefore I object.

Mr. MURRAY of Wisconsin. Will the gentleman withhold his objection for a moment?

Mr. KEAN. Yes; I will reserve the objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, I think, in all fairness, we should have a little consideration of this absolutely nonpartisan piece of legislation.

All we are trying to do is to correct something that happened last year in the Appropriations Committee. Except for that, it would not be necessary to come in here with this bill. They put in a provision under which the Regional Agricultural Credit Corporation has some severe restrictions on operations. I regret that the understanding is that bills that may involve loans even of over one million do not obtain approval of these official objectors. The sponsors of the bill should have been so advised so that an application for a rule could have already been made.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, I object.

POSTAGE STAMPS COMMEMORATIVE OF ONE HUNDREDTH ANNIVERSARY OF THE COMING OF THE SWEDISH PIONEERS TO THE MIDDLE WEST

The Clerk called House Joint Resolution 251, to authorize the issuance of a special series of stamps commemorative of the one hundredth anniversary of the coming of the Swedish pioneers to the Middle West.

There being no objection, the Clerk read the joint resolution, as follows:

Resolved, etc., That the Postmaster General is authorized and directed to issue, during 1948, a special series of 3-cent and 5-cent postage stamps, of such design as he shall prescribe, in commemoration of the one hundredth anniversary of the coming of the Swedish pioneers to the Middle West.

Mr. NORBLAD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. NORBLAD. Mr. Speaker, this resolution, which directs the Postmaster General to issue a 5-cent stamp commemorative of the one hundredth anniversary of the coming of the Swedish pioneers to the Middle West, is one which

I thoroughly approve and should, in my opinion, pass the House unanimously.

Our Swedish settlers played a very important part in the settlement, development, and growth of this country and this recognition is one which they justly deserve. Although this resolution pays tribute to their work in the Midwest, it is also a fact that the Pacific Northwest and other parts of the country were initially settled and developed by these pioneers.

Their task was certainly not an easy one, but by perseverance and hard work they developed many portions of this country from an uninhabitable state to a part and parcel of the strongest Nation on earth. We, in the State of Oregon, have seen many evidences of a job well performed and I, for one, wish to add my word of commendation and praise to these hardy pioneers.

The Clerk read the committee amendment, as follows:

Page 1, line 4, strike out the words "3-cent and."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the calling of eligible bills on the Consent Calendar.

SENIORITY OF RURAL CARRIERS, POSTAL SERVICE

Mr. REES. Mr. Speaker, I ask unanimous consent to return to the bill (H. R. 1189) to establish the methods of advancement for post-office employees—rural carriers—in the field service. I have conferred with the gentleman who objected and he has withdrawn his objection.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the seniority status of a rural mail carrier shall be based upon the regulations of the Post Office Department which provide that seniority shall commence on the day of appointment as a regular rural carrier. In case of voluntary transfer from one post office to another, or from any branch of the service into the rural service, the relative seniority of the transferee shall be determined by the date of entrance into the rural service of the office to which transfer is made.

SEC. 2. All rural carriers, upon entering the service, shall be assigned to the least desirable route and shall rise to the more desirable routes by seniority only.

SEC. 3. The awarding of promotions and preferential assignments shall be based upon seniority and ability; if ability be sufficient, seniority shall govern.

SEC. 4. Each new route or vacancy shall be bulletined and all rural carriers attached to the office shall be given a chance to apply. The senior rural carrier who applies shall be assigned thereto as provided in section 3.

SEC. 5. Rural carriers awarded these assignments shall have 90 days in which to demonstrate their fitness for the route and shall not be removed therefrom until their inability to fill the assignment has been proven. In case of their inability to fill the new assignment they shall be returned to their former position. Such rural carrier shall be allowed the right of appeal as stated in section 6.

SEC. 6. (a) A senior rural carrier who makes application for a new or vacant route, whose application has been denied, or who has been declared incompetent for same, shall have the right, upon written request, to a hearing before a post-office inspector, on his case, and shall be furnished a statement in writing of the reasons for his rejection by official responsible for same.

(b) This hearing shall occur, except under unusual conditions preventing same, within 10 days from the date of his request. In case of a postponement, the rural carrier affected shall be given a written statement of the reason for the postponement.

(c) The rural carrier shall have the right to be represented at the hearing by not more than three representatives of his own choosing.

SEC. 7. The provisions of this act shall not be construed as supplanting any civil-service regulations in effect on the date of its enactment.

SEC. 8. This act shall be known as the "Seniority Act for Rural Mail Carriers."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXPANDING FOREST USE IN ALASKA

Mr. BARTLETT. Mr. Speaker, I ask unanimous consent to return to Calendar No. 412, H. R. 1809, a bill to facilitate the use and occupancy of national-forest lands, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the Delegate from Alaska?

There was no objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of Agriculture, in conformity with regulations prescribed by him, may permit the use and occupancy of national-forest lands for purposes of residence, recreation, public convenience, education, industry, agriculture, and commerce, not incompatible with the best use and management of the national forests for such periods as may be warranted but not exceeding 30 years and of such areas as may be necessary but not exceeding 80 acres, and after such permits have been issued and so long as they continue in full force and effect the lands therein described shall not be subject to location, entry, or appropriation, under the public land laws or mining laws, or to disposition under the mineral leasing laws: *Provided*, That nothing herein contained shall prevent the said Secretary from canceling, revoking, or otherwise terminating a permit so issued upon proof of a breach of its terms and conditions or for other just cause.

SEC. 2. That the last paragraph in the appropriation for the Forest Service for the fiscal year ending June 30, 1916 (act of Mar. 4, 1915; 38 Stat. 1101; 16 U. S. C. 497), is hereby repealed.

With the following committee amendments:

Page 1, line 5, after the word "lands", insert the words "in Alaska."

Page 2, strike out all of lines 10 to 13, inclusive.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MEMBERSHIP AND PARTICIPATION BY UNITED STATES IN THE SOUTH PACIFIC COMMISSION

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent to take from the Speaker's table House Joint Resolution 232, providing for membership and participation by the United States in the South Pacific Commission and authorizing an appropriation therefor, with Senate amendments and concur in the Senate amendments.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendments, as follows:

Page 3, lines 2 and 3, strike out ", not more than $20,000 annually."

Page 3, line 4, strike out "For" and insert "Not more than $20,000 annually for."

Page 3, line 9, strike out "For" and insert "Such additional sums as may be needed for."

The amendments were concurred in.

A motion to reconsider was laid on the table.

ESTABLISHMENT OF A VETERANS' HOSPITAL FOR NEGRO VETERANS AT BIRTHPLACE OF BOOKER T. WASHINGTON IN FRANKLIN COUNTY, VA.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 3814) to provide for the establishment of a veterans' hospital for Negro veterans at the birthplace of Booker T. Washington in Franklin County, Va., with an amendment.

The Clerk read the bill, as follows:

Be it enacted, etc., That the sum of $5,000,000 is authorized to be appropriated to enable the Administrator of Veterans' Affairs to acquire, at the birthplace of Booker T. Washington in Franklin County, Va., a suitable site and to contract for the erection thereon of a hospital for Negro veterans.

The SPEAKER. Is a second demanded?

Mr. RANKIN. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER. The gentlewoman from Massachusetts is recognized for 20 minutes and the gentleman from Mississippi is recognized for 20 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, this bill was cleared by the leaders of the House. It was reported out of the Veterans' Affairs Committee unanimously for two reasons: One, that it would honor a great American, a Negro, who went extremely far in patriotism, citizenship, and in accomplishments.

The bill authorizes an appropriation of $5,000,000 to enable the Administrator of Veterans' Affairs to acquire at the birthplace of Booker T. Washington in Franklin County, Va., a suitable site and to contract for the erection thereon of a hospital for Negro veterans.

Your committee has taken cognizance of the fact that a Negro hospital, completely staffed and managed by Negroes,

has been very successfully operated by the Veterans' Administration at Tuskegee, Ala. This hospital now cares for a total of 2,113 Negro veterans. A 200-bed hospital for Negro veterans has been authorized for Mound Bayou, Miss.

May I say that I visited the hospital at Tuskegee, Ala., and I found it admirably conducted. May I say further that many of the finest papers on medicine and surgery have been written and sent to the Veterans' Administration by Negro doctors.

In considering the location of the proposed hospital, the committee took into consideration the Negro population of the area and the number of Negro veterans now in the Veterans' Administration hospitals in that area. The War Department records show that the State of Virginia alone has over 50,000 Negro veterans.

In addition to the advisability and need for such a hospital to serve the Negroes in that area, the committee felt that it would be a timely recognition of the services rendered by Booker T. Washington, one of the most outstanding leaders of the Negro race. The bill has the earnest support of several Negro groups.

Mr. Speaker, in hospitalizing these men it results in very much minimizing the spread of tuberculosis. In other words, tuberculosis will be somewhat stopped. It is a very infectious disease, so besides resulting in the saving of human lives it will mean a stopping of the spread of the disease.

Mr. RANKIN. Mr. Speaker, I am heartily in favor of the passage of this measure. I supported it in the committee and offered the amendment at the suggestion of the Veterans' Administration to raise the amount to $5,000,000.

For 16 years I was chairman of the Committee on World War Veterans' Legislation. For more than 20 years I have been a member of that committee. During all that time I have done everything I could to aid the Negro veterans hospital at Tuskegee, Ala. I saw to it that that institution was provided with whatever it needed.

Recently there was provided an all-Negro veterans' hospital for Mississippi at Mound Bayou, a Negro town, the land for which was contributed by Hon. Joseph Davis, a brother of Jefferson Davis, shortly after the War Between the States.

I understand that there have been some Communist influences attacking these all-Negro veterans' hospitals. However, I consider that the Negroes representing the Booker Washington Foundation have the interests of the Negroes at heart, and they are in favor of the passage of this bill. Booker T. Washington's daughter came to see me and asked me to support this measure, and this morning I received this telegram from her from Kansas City, Mo. It says:

> Am grateful to you for your efforts in legislature of proposed veterans' hospital at my father's birthplace in Virginia. We are hoping you will continue efforts for same.

The passage of this measure will be of great benefit to the Negro veterans of Virginia, West Virginia, east Tennessee, and the surrounding area. It will also greatly benefit the white veterans of Virginia and help to keep down that friction the Communists are trying to stir up between the two races in the Southern States.

I trust it will pass without a dissenting vote.

Mrs. ROGERS of Massachusetts. Mr. Speaker, before recognizing the gentleman from Arizona, I would like to state that the erection of this hospital will relieve the situation insofar as the shortage of beds in other hospitals is concerned. It will relieve the bed situation over the entire country today.

I now yield 5 minutes to the gentleman from Arizona [Mr. MURDOCK].

Mr. MURDOCK. Mr. Speaker, I am delighted to have this bill come before the House at this time. I think it might have passed under unanimous consent earlier in the day. It is well, however, to bring it up for this brief period of discussion. There is too much talk about racial discrimination in America on the part of those who want to present a false picture of America. This establishment of a hospital distinctly for colored veterans will go far toward refuting that false charge on the part of those in other lands who make such charges. I am not thinking particularly nor solely of that benefit as the main thing, but also of the good that will be accomplished by the hospital as it will be established.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from Mississippi.

Mr. RANKIN. We have one of these Negro veterans' hospitals at Tuskegee, Ala., and they have not had the slightest trouble. They have gotten along well and they are satisfied, and I think the same condition will prevail here.

Mr. MURDOCK. I am sure it will. This hospital honors a great man. It is a recognition not only of the need of our colored veterans, but also of the ability which doctors and leading men of that part of our citizenry have contributed in the field of medicine and will contribute in the future. Booker T. Washington has done a great piece of educational work, as have others of that race through the advancement of science, and through the instrumentality of the staff at this hospital we could and shall expect to see even greater things accomplished.

Mrs. ROGERS of Massachusetts. Mr. Speaker, if the gentleman will yield, my understanding is the only reason it was objected to on the Consent Calendar was because it would take a suspension in order to pass it.

Mr. RANKIN. And because of the amount.

Mrs. ROGERS of Massachusetts. And because of the amount that might be involved if the suspension had not been promised, because the need is very great.

Mr. MURDOCK. I understand that under the Consent Calendar there is a limited amount of expenditure that can be included in a bill.

Mr. BREHM. Mr. Speaker, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from Ohio.

Mr. BREHM. I would like to make this observation, that aside from the Negro veterans who need hospital facilities, the Negro race, as a whole, is desperately in need of adequate health facilities in the way of hospitals. The Negro race comprises one-tenth of our population, and yet they only have access to one-tenth of 1 percent of all the hospital facilities in the country. So, while I am 100 percent in favor of this bill, I trust the health facilities may be extended so that the colored people as a whole will have more adequate service available to them.

Mr. MURDOCK. I have that feeling also.

Mr. RANKIN. Mr. Speaker, if the gentleman will yield, of course that condition does not prevail in the South because no Negro is denied the use of a hospital.

Mr. BREHM. I did not mean that they were denied admission. I meant there are not enough adequate facilities to take care of them.

Mr. RANKIN. This will also do another thing. As was pointed out a moment ago, it will relieve the pressure on the hospitals that now exist throughout Virginia and West Virginia and Tennessee. This will fill a long-needed want. And it will have, in my opinion, one of the finest influences of anything that we can do at this time, and I want to say again that they asked us not to take it up under unanimous consent because of the amount and because of the fact that the Speaker had agreed to recognize the lady from Massachusetts under suspension of the rules. But I do not believe there would be a vote against it, certainly not more than a half dozen or a dozen if the roll were called and the entire membership of the House called on to register their views.

Mr. MURDOCK. I congratulate the committee for bringing this bill in, and thank the leading members of the committee who are sponsoring it here today. I feel that this hospital will serve the same useful purpose as the one to which the gentleman from Mississippi has already referred.

Mrs. ROGERS of Massachusetts. May I say also that the total of veterans waiting for admittance to veterans' hospitals is 18,192, so the gentleman can see the great need for every single bed that can be secured for hospitalization purposes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks on this bill at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

The SPEAKER. The question is on the motion to suspend the rules and pass the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

SPECIAL ORDER GRANTED

Mr. RICH. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore granted, I may be permitted to address the House for 7 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

EXTENSION OF REMARKS

Mr. SARBACHER asked and was given permission to extend his remarks in the RECORD.

Mr. ARNOLD asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. SHORT. Mr. Speaker, I ask unanimous consent to include at this point in the RECORD House Resolution 147, passed by the House of Representatives of the Missouri State Legislature.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The resolution is as follows:

House Resolution 147

Whereas the United States Army engineers, by act of Congress, are constructing a large dam on the White River near Bull Shoals in the State of Arkansas for the purpose of flood control; and

Whereas the construction of said dam will inundate all of the White River Valley in Taney County, Mo., from a point above Forsyth to the Missouri-Arkansas border, destroying practically all of the valley land in Taney County; and

Whereas the construction of said dam and the impounding of said waters of White River will flood the courthouse and the business section of the town of Forsyth, the seat of government of Taney County, Mo.; and

Whereas the people of the entire State of Missouri are interested in said seat of government of Taney County, Mo., for the reason that it is the place established by law for the holding of circuit court of the State of Missouri and for the further reason that the State of Missouri appropriated $5,000 in the year 1889 to aid Taney County in the construction of said courthouse; and

Whereas the said circuit court of Taney County, Mo., is a part of the judicial branch of the government of the State of Missouri; and

Whereas it has come to the attention of the General Assembly of the State of Missouri that the United States Army engineers are considering building a dirt levee around the courthouse and business section of the town of Forsyth rather than proceeding under eminent domain as provided by statute and established in the Constitution of the United States and the Constitution of the State of Missouri; and

Whereas said levee would not be compensation under the Constitution of the United States or the State of Missouri, would prevent the future growth of the town, would create a serious problem in sanitation; would ruin the business of the community, would be injurious to the health and happiness of the residents, would lessen to a great degree the value of the property therein, would place the official records of the county and the circuit court in constant danger of loss by flood in the event of the overflow or breaking of the levee, and would create a continuous hazard to life and property in Forsyth: Therefore be it

Resolved by the House of Representatives of the Sixty-fourth General Assembly of Missouri, That the United States Army engineers be requested to abandon the levee plan for Forsyth and to proceed with utmost dispatch to provide just compensation in accord with the Constitution of the United States and the Constitution of the State of Missouri as judicially determined; and be it further

Resolved, That copies of this resolution be sent by the chief clerk of the house to the President of the United States, each Member of Congress from Missouri, to the Governor of Missouri, to the Chief of the Army Engineers in Washington, D. C., and to the office of the Army engineers at Little Rock, Ark.

MURRAY E. THOMPSON,
Speaker of the House.

I hereby certify that House Resolution No. 147 was adopted by the house of representatives on January 8, 1948.

CURTIS J. TINDEL,
Chief Clerk of the House.

The SPEAKER. Under previous order of the House, the gentleman from South Dakota [Mr. CASE] is recognized for 10 minutes.

THOUGHTS ON CURRENT AFFAIRS

Mr. CASE of South Dakota. Mr. Speaker, there have been some questions asked as to whether I will enter the senatorial primary in South Dakota, or run for reelection to the House. The question in my own mind, however, has not been primarily on that point but whether I should be a candidate at all, so much out of tune do I find myself with much current opinion in Washington on world affairs.

Friday night, the press reported that the highlight of testimony by Secretary of Defense Forrestal before the Foreign Affairs Committee came when the gentleman from California [Mr. JACKSON] asked Mr. Forrestal what the effect would be on this country if a beachhead were established on the Mediterranean by any power hostile to the United States. Secretary Forrestal was quoted as replying:

I think any act of war in the Mediterranean or Middle East would have definite significance for us. In other words, the free transit of commerce and trade through the Mediterranean is a vital part of our national security.

That came only a day after it had been announced that the United States was reopening a big wartime air base in Libya, eastern Africa. It came within a week after the disclosure that 1,000 armed marines had been dispatched to our warships in the Mediterranean.

What Mr. Forrestal would say if some other world power should establish such beachheads in the Caribbean, I do not know, but reflection on these events forces me to think of the reckless way in which our policies run in opposite directions, at one and the same time.

On the one hand, we fall for the argument that our oil reserves lie in the rich fields of the so-called Near East, thousands of miles away, instead of in the almost limitless lignite coal fields of our own Northwest which could be converted into synthetic liquid fuels for a fraction of the subsidy we spend in airfields and Navy to support and safeguard the thin long lines to Saudi Arabia.

On the other hand, we let ourselves be pressured into supporting the partition of Palestine and antagonize the Arabs through whose world the oil lines run and in the heart of whose empire the fields are found. Now we are asked to send troops.

If there was ever a policy more calculated to get us out on a limb and saw it off, I cannot find it in history.

On the one hand, we pour out purple oratory about the dangers of communism; on the other we pursue a policy in Germany which starves the one people who have great capacity to produce and stifle their natural will to work.

We need, sir, to get a single objective in Germany. The German people do not desire to be rebuilt into a menace to France or Czechoslovakia or Poland or Russia or any other nation. They are sick and tired of conquest. They want to live; and they are the people who have both the capacity and the spirit to be an effective ally for western civilization if a time of test comes.

We fall for the silly Molotov line that the Germans want a unified reich above everything else and so we propose an ersatz empire for them which frightens France instead of permitting the natural revival of the original states with a simple plan of working together which could grow into a federation of the free states of Europe which France and Belgium and the other free states could join.

The Russians talk of unity but raid the factories of the Germans and keep their war prisoners for slave labor. Vishinsky may shout and Molotov may bluster but as long as Stalin persists in such tactics, the Germans will neither love nor trust them. We do not need to tell these things to the German people—we only need to give them a chance to work and eat and live. They know what is happening.

It may be heresy, Mr. Speaker, but while I am confessing my thoughts, I may as well say that great a man as he is, much as I admired his war leadership, I have my doubts that Gen. George Marshall is the most diplomatic man in the country to head our diplomatic department as Secretary of State. The other day he told a committee of the Congress that only his Department should be permitted to administer the foreign-aid program, that there "could not be two Secretaries of State," and, in effect, that it should be his program or nothing.

Another George in our history, George Washington, advised that in our commercial relations with other nations we should have "as little political connection as possible." It seems evident that George Marshall wants as much political connection as possible. He wants our commerce and our loans and our gifts to be on a political basis.

He is sincere, of course, but I fear his thinking is typical of the career military mind turned to diplomacy. There is so much of that these days, Mr. Speaker. Why, the portion of the new Congressional Directory devoted to the executive branches of the Government reads like a combination of the Army-Navy Register and a telephone directory from Wall Street. I was thankful the other day when one committee of Congress said "No" to the President when he proposed a brilliant but straight-out military man to be head of an agency intended to be

so civilian that the word "civil" or "civilian" appears in its very name.

Mr. Speaker, I do not like to make a speech of this sort, but I cannot regard these things with complacency. When President Truman sent us his message carrying the so-called Truman doctrine and followed that with his request for aid to Greece and Turkey, although I voted for the Greek aid bill because I thought our hands had been tied, I wrote the President and voiced my concern over the trend he was taking. The letter will be found in the Appendix to the CONGRESSIONAL RECORD, volume 93, part 11, page A2314.

The policy of opposing communism is proper because communism is a destroyer, but we should count our resources and command the times and places where we meet it. The policy of containment is fallacious. It forces us to ride off in all directions wherever the gremlins of the Kremlin want to extend us. We do worse than "the clumsy boxer who telegraphs his punch," to borrow the words of my eloquent colleague; we give to the Reds the power to say where we spend our energies and when.

Mr. Speaker, I do not despair of our country, but I do despair of the contradictory policies we are following today. This Nation can be strong. This Nation can help rebuild the world in ways which will preserve the self-respect of those who receive our aid and which will maintain our own way of life.

While I retain membership in Congress, I shall continue to try to point out those ways to the extent of my limited ability; if or when the time comes that the views I express are unacceptable to the people I have the honor to represent, I shall retire without regrets to a spot in western South Dakota, where the deer and—yes, Mr. Speaker, where the buffalo roam.

Mr. BRADLEY. Mr. Speaker, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. BRADLEY. I think I must join the gentleman in his thoughts that we want neither one-man rule nor military rule. I wonder if the gentleman could tell me, after his studies, if he believes we have a sufficient supply of fuel oil in this country in our shale and coal.

Mr. CASE of South Dakota. I will say to the gentleman that the Division of Oil and Gas in the Department of the Interior has supplied me with the figures to show that the reserves we have in oil shales in this country are 5 times those in petroleum, and that the reserves in the subbituminous coals are 25 times those of petroleum, and when you add that all together you have reserves that will run probably a thousand years or more.

Mr. BRADLEY. Is the gentleman convinced that we have adequate and economical methods for the extraction of those fuels?

Mr. CASE of South Dakota. I am not satisfied that we have plants in existence at the present time sufficient to produce the supplies that are needed. In my reference on the Consent Calendar, to the bill which I introduced for the continuation of the experimentation program, I pointed out that the results thus far obtained indicate that fuel oil can be produced in the laboratory plants at about $1.92 a barrel today. The Division of Oil and Gas tells me that, put on a commercial scale, this should be competitive with petroleum produced from natural sources.

The SPEAKER. The time of the gentleman from South Dakota has expired.

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent that the gentleman may have two additional minutes.

The SPEAKER. Is there objection to the request of the gentleman from California [Mr. BRADLEY]?

There was no objection.

Mr. BRADLEY. Has the gentleman any idea of what the capital cost would be to develop plants necessary to produce this fuel?

Mr. CASE of South Dakota. The capital cost will be very large. The Standard Oil Co. of New Jersey, in connection with a company in Pennsylvania, are investing $250,000,000 in a plant in western Pennsylvania, designed to make recoveries from waste coals there. The plant cost will be high. It will take some time to build them. That is why I think we should get on the job.

Mr. BRADLEY. Does the gentleman have any idea of the number of years that may be required to develop adequate plants?

Mr. CASE of South Dakota. That will depend on the size of plant which it is determined is most practical to use. It will take some time to complete the experimentation that will give an adequate guide. That is why we ought to be on the job.

Mr. JOHNSON of California. Mr. Speaker, will the gentleman yield?

Mr. CASE of South Dakota. I yield.

Mr. JOHNSON of California. How does the price you quoted for synthetic oil compare with the price of crude oil from petroleum?

Mr. CASE of South Dakota. I have heard a figure of $2.50 suggested as comparative at the present time.

Mr. JOHNSON of California. Is a barrel of this synthetic oil equal in value to a barrel of the petroleum oil?

Mr. CASE of South Dakota. My understanding is that it is, definitely.

The SPEAKER. The time of the gentleman from South Dakota [Mr. CASE] has again expired.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that at the conclusion of any other special orders today, I may proceed for 5 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. HESELTON]?

There was no objection.

The SPEAKER. Under previous order of the House, the gentleman from Pennsylvania [Mr. RICH] is recognized for 7 minutes.

OUR FOREIGN POLICY

Mr. RICH. Mr. Speaker, I have received many letters from people in the State of Pennsylvania that concerned me greatly, but none that concerns me as much as a letter I received today from a former Governor of Pennsylvania. I am going to read this letter to you and I think all of you should listen to it carefully:

WEST GROVE, PA., *January 13, 1948.*

MY DEAR CONGRESSMAN: This session of Congress will decide, not the welfare of us Americans, but our very existence.

You have before you a recommendation of General Marshall basing European recovery upon economic measures, namely, the expenditure of billions of American dollars. If carried out, this great sacrifice by the American people, raising our own cost of living to unbelievable heights, will be just as successful as the British of old, trying to buy off the Danish ravagers.

If Russia occupied Canada and we had no Army, Air Force, or Navy, would any of us be interested in building up our own business? That today is the position of every European country outside the iron curtain.

Why is our country threatened as never before?

Simply because first Roosevelt, Hopkins, and Marshall, and then Truman and Marshall, failed completely, in spite of repeated warnings, to analyze correctly the Russian menace. Yet you gentlemen, selected by our people because of your patriotism, foresight, and integrity, consider seriously again following the disastrous policy of President Truman and General Marshall.

In the autumn of 1945, Russia, by breaking again and again her agreements for Europe and Asia, was exposed in her true colors. Then we had the mightiest military power in world's history, on land, sea, and in the air, and a monopoly of the atomic bomb. That was the time for the show-down with Russia. And now today due to the policy of Truman and Marshall we are about to face this show-down with one-tenth of our military power and with God and the Kremlin alone knowing if we still monopolize the atomic bomb.

Listen to this next paragraph carefully.

From the bottom of my heart, I say if Truman is nominated and defeated our Democratic Party is sunk. If Truman is nominated and elected our country is sunk.

Very sincerely,

GEORGE H. EARLE,
Formerly Governor of Pennsylvania, Democratic National Committeeman, American Minister to Austria and Bulgaria.

It is time for all of us to wake up when men like former Governor Earle have such a change of heart, a man who was an ardent New Dealer for a number of years, a man who was appointed by a former President to serve as Minister to Austria and Bulgaria. When he says that if such and such is the case it is time for the American people to wake up. He speaks from the background of the extensive European experience he had a few years ago. He has had a change of heart and wants to save America. I say it is well to heed his advice.

If there ever was a time when America should wake up today is that time. We should weigh carefully what we are doing. We should make America strong. We ought not to wreck America for any other country in the world. We should think of, work for, and try to save this country, the most precious thing we have; and I hope every Member of Congress will take to heart what former Governor Earle has said. Just let me read that last sentence again. Bear in mind this is from a former Democratic

Governor of Pennsylvania and presently a Democratic national committeeman:

From the bottom of my heart, I say if Truman is nominated and defeated our Democratic Party is sunk.

That is pretty bad, to sink the Democratic Party. For I believe in the two-party system. But—

If Truman is nominated and elected our country is sunk.

That is altogether too bad. To wreck America and our form of government would be a catastrophe.

Mr. Earle now is putting country above politics. I congratulate him.

EXTENSION OF REMARKS

Mr. SHAFER asked and was given permission to extend his remarks in the RECORD and include a piece of legislation he introduced today, together with an explanation of same.

The SPEAKER. Under previous special order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 5 minutes.

THE FUEL-OIL SITUATION

Mr. HESELTON. Mr. Speaker, earlier today I took occasion to express briefly certain criticisms of a recent order with reference to the heating of Government buildings. I regret to learn that apparently a few of my colleagues thought I was approaching that problem in a partisan sense. I want to assure the Members of the House that when I am trying to deal with a situation such as this I am doing so as a representative of all the people in my district, as I know you do in connection with such problems affecting your people. The people who support the Democratic Party can become just as cold in the First District of Massachusetts and everywhere in this country as the Republicans. It is an important thing, in my opinion, for each and every one of us to join hands in attempting to meet this crisis.

I want to discuss another aspect of this problem and I assure you that in discussing it I am simply voicing a criticism I believe is sound and legitimate. Certainly, as human beings, whether as Members of Congress or officers of the executive department, we are all subject to the human frailty of making errors of judgment.

This has to do with what I believe to be a mistake made by responsible officers of the Department of Commerce. On January 2 the Department issued a bulletin referring to the fuel-oil difficulties in this country and advising that our friends in Canada had agreed to reduce exports from us of certain types of heating oil by 50 percent in the month of January. That is a very constructive step. Most of those exports were going right through the areas which are desperately in need of oil now. I commend the Department for the efforts they made.

For possible use by Members of the House, I am including the bulletin. It reads:

The Department of Commerce has just been informed by the Canadian Government, through its Embassy in Washington, of a voluntary reduction in imports of certain petroleum products from the United States, Under Secretary of Commerce William C. Foster announced today.

The petroleum industry of Canada has agreed to reduce its imports of finished kerosene, stove oil, furnace oil, and Diesel oil from the United States to 50 percent or less of the monthly average of imports in the first quarter of 1947. These reductions, effective January 1, will continue throughout the month of January when the Canadian Department of Reconstruction and Supply, in cooperation with the Canadian petroleum industry, will review Canada's petroleum position with a view to making even greater reductions during the remaining months of the first quarter of 1948.

Under the newly announced Canadian limitations, the import of these petroleum products from the United States during January will be reduced to a rate not to exceed 6,000 barrels a day. The Canadian reduction of petroleum imports comes as a result of a cooperative effort between the Canadian and American Governments to solve the liquid fuel problems of the two countries.

However, last Friday, the Department, through its Office of International Trade, issued another bulletin in which it gave a tabulation of the exports of petroleum products which would be allocated for shipment to all countries but Canada in the first 3 months of this year, which I am inserting at this point:

Country allocations of petroleum products for the first quarter of 1948 were announced today by the Department of Commerce through its Office of International Trade.

The country allocations and types of petroleum products follow:

[In barrels]

	Aviation motor fuel (5,016)	Other motor fuel (5,017)	Kerosene (5,027)	Gas oil and distillate fuel oil (5,030)	Residual fuel oil (5,031)	Blending A agents (5,013)
Argentina		220,000				
Australia	20,000	300,000	70,000	100,000	50,000	
Belgium		175,000	8,000	175,000	100,000	
Brazil		80,000				
British Honduras	2,000	5,000	2,000	3,000		
China	60,000	350,000	110,000	100,000		
Costa Rica	2,400	30,000	3,500	10,000	20,000	
Cuba	25,000	200,000			200,000	
Denmark		70,000	5,000	120,000	70,000	
El Salvador		25,000	1,500	3,500	40,000	
Eire	15,000		5,000			
France	120,000			300,000		
Guatemala	5,000	8,000	2,000		55,000	
Honduras		3,000	2,000			
Italy	30,000					
Mexico	80,000	450,000		100,000	400,000	
New Zealand	10,000	140,000	20,000	35,000	70,000	
Norway		10,000	7,000			
Panama, Republic	100	40,000	7,000	10,000	25,000	
Paraguay	1,500					
Philippines	20,000	330,000	70,000	160,000		
Portugal	20,000	250,000	40,000	10,000	19,000	
Sweden		225,000	50,000	250,000	100,000	
United Kingdom	120,000	1,500,000	130,000	1,200,000	300,000	
Netherlands				60,000		
Iceland	35,000	30,000		40,000		
British West Africa	5,000	70,000	25,000	20,000	10,000	
Switzerland		30,000	10,000	50,000		
French West Africa	10,000	60,000	10,000		15,000	
Subtotal	581,000	4,401,000	578,000	2,746,500	1,474,000	
Reserve	119,000	849,000	322,000	453,500	326,000	150,000
Greece	45,000					
Japan and Ryukus		400,000	50,000	1,600,000	375,000	
Total	745,000	5,650,000	950,000	4,800,000	2,175,000	150,000

Mr. Speaker, I made something of a study of that because the Department had indicated it wished to help us here at home and that it felt our good friends to whom we were shipping this oil would join with us as Canada did. But to my astonishment the tabulation as to gas oil and distillate fuel oil showed that we would export in excess of 583,617 more barrels in the first quarter of this year to all countries, including Canada, than we did in the first quarter of 1947, and upon examination of the residual oil figure, which is another important item, if we are going to meet this crisis, I found there will be in excess of 342,103 barrels shipped, if the program is carried out, over the comparable period of 1947. In short, we will be shipping from a vitally needed fuel-oil source in this country 925,720 more barrels than we did last year, and this at a time when our people are cold, when in New England we have had temperatures in the last week ranging from 2° to 24° below zero, 9.7° below the same period last year, at a time when the people of the West and Northwest are suffering, when the people of North Carolina are having their troubles, too, and when the people of the District of Columbia are having difficulties. I repeat, if my computations are correct, this program will mean that we will ship 975,720 more barrels of these types of oil than we did last year.

I want to make it clear that the figures were furnished to me by the Office of International Trade, the allocations being those in the table I have inserted, and the figures on exports to Canada and to all countries in the first quarter of 1947 having been prepared by that office for me Friday afternoon.

I now wish to insert another bulletin issued by that office on January 2, which reads as follows:

An export quota of 12,000,000 barrels of petroleum products has been established for the first quarter of 1948, the Office of International Trade, Department of Commerce, announced today. This quota continues the policy of restricting exports of major petroleum products to the maximum extent possible until the current domestic shortages are alleviated.

The 12,000,000-barrel quota figure compares with shipments of more than 17,000,000 barrels in the first quarter of 1947. Since the current established quota is substantially below estimated export demand, export licenses will be approved only on the basis of the most urgent need, OIT stated.

The first quarter of 1948 product breakdown of the quota is as follows:

	Barrels
Blending agents	150,000
Aviation gasoline	700,000
Motor gasoline	5,250,000
Kerosene	900,000
Gas oil and distillate fuel oil	3,200,000
Residual fuel oil	1,800,000
Total	12,000,000

In addition, 2,470,000 barrels of petroleum products have been authorized for shipment by the United States military authorities to Greece and the occupied areas of Japan and the Ryukyus Islands to meet the requirements of special programs.

Let me repeat for emphasis that very commendable statement of policy:

This quota continues the policy of restricting exports of major petroleum products to the maximum extent possible until the current domestic shortages are alleviated.

Can you or I explain how such a policy can be squared with allocations of 925,720 more barrels of these critically needed oils in this quarter over the amount exported in the first quarter of last year? Can anyone explain how we could secure such magnificent cooperation from our friends in Canada, where it is certainly cold, too, and be so completely unable to explain our situation satisfactorily to our friends in these other countries? Possibly there are urgent needs for gas oil and distillate oil in Costa Rica, El Salvador, Mexico, Australia, New Zealand, and British West Africa, but I doubt if it is for the purpose of heating homes in a zero temperature. Again, there may be urgent needs for residual fuel oil in Australia, Costa Rica, Cuba, Guatemala, Mexico, and British and French West Africa. If so, I insist that the people of this country also have need for this oil which can and should be explained to the governments and peoples of those countries. I have every confidence that if this is done, we would find the same friendly response as the one we received from Canada. If there is some other reason, which the Government does not wish to give publicly, at least an adequate explanation should be given to the representatives of those in this country who are facing difficulties and who are being asked to take every kind of a conservation measure.

There is another feature of this program. Competent witnesses before committees of this House, and particularly before the Committee on Interstate and Foreign Commerce, testified that one of the main reasons for this shortage is because we do not have enough tankers to bring oil from the Gulf coast up to New York, Pennsylvania, New Jersey, and New England. I do not know what the capacity of a T–2 tanker is, but those are the tankers involved recently in the foreign sales by the Maritime Commission, and I hope to be able to give you some more details about that particular transaction which I think was unwise in the extreme, and which met the protest of one member of that Commission. I do want to express the hope that something is being done by the Commission to make those tankers available for the east coast run until we get by the worst of this situation. Many of you will recall the committee resolution adopted by the House Committee on Interstate and Foreign Commerce making several constructive suggestions as to meeting our difficulties. But may I repeat two of the recommendations, which are as follows:

(3) The Maritime Commission should desist, for such time as such shortages continue to exist, from completing the transfer to foreign purchasers of tankers owned by the Government.

(4) Negotiations should be undertaken by the Maritime Commission with the purchasers and owners of tankers formerly owned by the United States, with a view to securing the use of such tankers for the transportation of fuel oil to alleviate such shortages.

If you wish to refer to the complete resolution, it is printed at page 11760 of the RECORD of December 19, 1947.

If that transaction is water over the dam, we now confront the fact that if the capacity of a T–2 tanker is approximately 100,000 barrels of oil, the requirements of this program to ship to our good friends abroad 14,470,000 barrels of petroleum products during these 3 months will mean that we shall have taken out of our coastal service the equivalent of 144 trips. And most of them will be much longer than the time for the average east-coast run. Mr. Rathbone, president of the Standard Oil Co. of New Jersey, testified before the Committee on Interstate and Foreign Commerce in December that if his company could have five additional tankers, it could serve all of that particular company's consumers in New England during the months of January, February, and March; in other words, the people who use that company's oil would not have a crisis.

I am trying to give these facts to the Members of this House whose constituents are cold and who have hospitals and schools and industries facing the possibility of closing.

In my own district one community is considering the advisability of closing its schools to conserve fuel oil. The governors of our New England States have begged us to try to help. We are all receiving daily pleas for assistance from county and local officials and from individuals. In my judgment, every Member of Congress has done his level best. I think it is fair, I think it is proper—in fact, I think it is our duty—when we think a mistake of judgment has been made by any administrative officer, to call attention to that mistake of judgment. I am very glad to report that my friend the chairman of the Committee on Interstate and Foreign Commerce has promptly called a meeting of that committee tomorrow so that we may go into these figures and find out what the facts are and try to carry out the express will of that committee, which, on December 19, passed the resolution to which I have referred, asking and urging that the administration use the export powers it has to protect our people at home, and try to get us through this crisis, and urging the President and every agency of Government to take all possible action to utilize such powers as they possess to aid in alleviating the shortages. We are not dealing with any theory. We are dealing with cold—and I mean cold—stark facts.

Your Committee on Interstate and Foreign Commerce, by initiating hearings last July, did not act as partisans; rather they were acting as a group attempting to discharge their responsibilities to this House and to the American people as a whole. You will find in the report of those hearings a clear indication, even then, that we were not only in trouble as to gas in the Northwest but that we were headed for trouble as to heating and fuel oil in other parts of the country this fall and winter unless everything worked out perfectly. You will find that the chairman and the members of the committee constantly impressed upon the witnesses from Government and industry the necessity of using every means of avoiding the situation now confronting us.

That committee did not continue its hearings during the last special session as partisans, and it certainly acted as representatives of all the American people, regardless of politics, when it promptly passed the committee resolution before adjournment.

I hope that every Member of this House, whether he be a Democrat or Republican, who has people at home suffering or in danger of suffering, will join with us all in trying to point out constructive solutions to remedy this unfortunate situation, which will keep our hospitals open, which will keep our schools and our transportation systems going, which will keep our people at least safely warm, and which will make it possible for these great industrial centers to keep their industries at 100-percent production to furnish the goods we need if we are going to undertake the programs ahead of us.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. MORGAN (at the request of Mr. MCCORMACK), for an indefinite period, on account of illness.

BILL PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on January 17, 1948, present to the President, for his approval, a bill of the House of the following title:

H. R. 4055. An act to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans.

ADJOURNMENT

Mr. HALLECK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 30 minutes p. m.) the House adjourned until tomorrow, Tuesday, January 20, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1211. A letter from the Secretary of the Treasury, transmitting the annual report of the Secretary of the Treasury on the state of the finances, for the fiscal year ended June 30, 1947 (H. Doc. No. 447); to the Committee on Ways and Means and ordered to be printed with illustrations.

1212. A letter from the Administrator, Federal Works Agency, transmitting the Annual Report of the Federal Works Agency, for fiscal year 1947; to the Committee on Public Works.

1213. A letter from the Secretary of the Army, transmitting a draft of a proposed bill to provide for government, relief, economic rehabilitation, reorientation, and reeducation in occupied areas in foreign countries, and for other purposes; to the Committee on Foreign Affairs.

1214. A letter from the Acting Secretary of the Navy, transmitting a report of proposed transfer to the State of Texas of a picket boat or craft of similar type; to the Committee on Armed Services.

1215. A letter from the Chairman, United States Maritime Commission, transmitting the quarterly report of the United States Maritime Commission on the activities and transactions of the Commission under the Merchant Ship Sales Act of 1946, from October 1 through December 31, 1947; to the Committee on Merchant Marine and Fisheries.

1216. A letter from the Attorney General, transmitting a report showing the special assistants employed during the period from July 1 to December 31, 1947, under the appropriation "Compensation of special attorneys, etc., Department of Justice"; to the Committee on Expenditures in the Executive Departments.

1217. A letter from the Secretary of the Navy, transmitting a report of proposed transfers to various eligible institutions and organizations which have requested donations or loans from the Navy Department; to the Committee on Armed Services.

1218. A letter from the Secretary of the Army, transmitting a draft of a proposed bill to amend the Canal Zone Code, and for other purposes; to the Committee on Merchant Marine and Fisheries.

1219. A letter from the Secretary of the Army, transmitting a draft of a proposed bill to amend the Canal Zone Code for the purpose of incorporating the Panama Railroad Company; to the Committee on Merchant Marine and Fisheries.

1220. A letter from the Chairman, Federal Trade Commission, transmitting the Thirty-third Annual Report of the Federal Trade Commission, for the fiscal year ended June 30, 1947; to the Committee on Interstate and Foreign Commerce.

1221. A letter from the Acting Chairman, Civil Aeronautics Board, transmitting a report of the activities of the Board occurring since its last annual report and up to November 1, 1947; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 430. Resolution for consideration of H. R. 2873, a bill to amend certain provisions of the Reclamation Project Act of 1939; without amendment (Rept. 1243). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 431. Resolution for consideration of H. R. 4044, a bill to amend the Trading with the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases; without amendment (Rept. No. 1244). Referred to the House Calendar.

CHANGE OF REFERENCE

Under clause 2 of rule XXII, the Committee on the Judiciary was discharged from the consideration of the bill (H. R. 3239) to amend section 4 of the United States Employees' Compensation Act, approved September 7, 1916, and the same was referred to the Committee on Education and Labor.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. BATES of Massachusetts:

H. R. 4996. A bill directing the Fish and Wildlife Service to undertake certain studies of the soft-shell clam in Maine, Massachusetts, and Connecticut; to the Committee on Merchant Marine and Fisheries.

H. R. 4997. A bill making an initial appropriation to enable the Fish and Wildlife Service to carry on certain studies of the soft-shell clam; to the Committee on Appropriations.

By Mr. BARTLETT:

H. R. 4998. A bill to prohibit the use of traps, weirs, and pound nets for fishing in the waters of the Territory of Alaska, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. BRADLEY:

H. R. 4999. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. VAN ZANDT:

H. R. 5000. A bill to increase all benefits under the Railroad Retirement Act, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. BLAND:

H. R. 5001. A bill to repeal the authority to assess certain owners of nonmilitary buildings situated within the limits of the Fort Monroe Military Reservation, and for other purposes; to the Committee on Armed Services.

By Mr. HERTER:

H. R. 5002. A bill to provide compensation for excess hours of work by certain employees of the United States Employment Service; to the Committee on Post Office and Civil Service.

By Mr. JAVITS:

H. R. 5003. A bill to provide for the allocation of meat; to the Committee on Banking and Currency.

By Mr. JUDD:

H. R. 5004. A bill to provide the privilege of becoming a naturalized citizen of the United States to all immigrants having a legal right to permanent residence, to make immigration quotas available to Asiatic and Pacific peoples, and for other purposes; to the Committee on the Judiciary.

By Mr. LEMKE:

H. R. 5005. A bill to amend the act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, as amended, with respect to farmer-debtor relief; to the Committee on the Judiciary.

By Mr. LYLE:

H. R. 5006. A bill to allow certain periods of service to be credited to certain employees of the postal service for the purposes of promotion under the act of July 6, 1945; to the Committee on Post Office and Civil Service.

By Mr. SHAFER:

H. R. 5007. A bill to strengthen national security and the common defense by providing for the maintenance of an adequate American-made rubber-producing industry, and for other purposes; to the Committee on Armed Services.

By Mr. TWYMAN:

H. R. 5008. A bill to provide a rate of postage of 6 cents for each ounce or fraction thereof, on domestic air mail, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. RAMEY:

H. R. 5009. A bill to grant retirement with pay to certain disabled emergency officers of World War I; to the Committee on Veterans' Affairs.

By Mr. FLETCHER:

H. R. 5010. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. HAGEN:

H. R. 5011. A bill to terminate the war-tax rates on admissions, cabarets, etc.; to the Committee on Ways and Means.

By Mr. JENKINS of Pennsylvania:

H. R. 5012. A bill to authorize for a limited period of time the admission of displaced persons temporarily residing in the United States for permanent residence; to the Committee on the Judiciary.

By Mr. JOHNSON of Oklahoma:

H. R. 5013. A bill to provide pensions for disabled veterans of World War I under similar conditions, and in the same amounts, as now provided for disabled veterans of the Spanish-American War; to the Committee on Veterans' Affairs.

By Mr. LEWIS:

H. R. 5014. A bill to amend section 1 of the act entitled "An act to amend and consolidate the acts respecting copyrights," approved March 4, 1909, as amended; to the Committee on the Judiciary.

By Mr. MITCHELL:

H. R. 5015. A bill to require the exclusion of payments by the Veterans' Administration and of aid to dependent children allowances from the computation of net income when making certain determinations with respect to low-rent or defense housing; to the Committee on Banking and Currency.

By Mr. NODAR:

H. R. 5016. A bill to provide additional compensation for postmasters and employees of the postal service; to the Committee on Post Office and Civil Service.

By Mr. PETERSON:

H. R. 5017. A bill to extend the time for filing valid application for disabled emergency officers' retirement benefits, to grant retirement pay to World War emergency officers who now have or who may later establish a 30-percent or more service-connected permanent disability for this and/or other purposes; to the Committee on Armed Services.

By Mr. ROSS:

H. R. 5018. A bill to amend and extend the maximum-rent provisions of Public Law 129, Eightieth Congress, and for other purposes; to the Committee on Banking and Currency.

By Mr. SIMPSON of Pennsylvania:

H. R. 5019. A bill to authorize the Administrator, War Assets Administration, to convey the Tobyhanna Military Reservation to the Commonwealth of Pennsylvania, and for other purposes; to the Committee on Expenditures in the Executive Departments.

By Mr. POULSON:

H. R. 5020. A bill for the relief of certain persons occupying lands of the United States

within the drainage of the Arroyo Seco, Angeles National Forest, Calif.; to the Committee on Agriculture.

By Mr. REEVES:

H. R. 5021. A bill to amend the act entitled "An act to authorize leases of real or personal property by the War and Navy Departments, and for other purposes," approved August 5, 1947, so as to permit State and local taxation of property leased thereunder; to the Committee on Armed Services.

By Mr. CASE of South Dakota:

H. R. 5022. A bill to provide that temporary housing projects located in municipalities may, on the request of the municipalities, be disposed of without regard to the removal provisions of existing law; to the Committee on Public Works.

By Mr. HEDRICK:

H. R. 5023. A bill to authorize the Secretary of War to make an allowance in lieu of headstones or markers for certain graves; to the Committee on Veterans' Affairs.

By Mr. BAKEWELL:

H. J. Res. 298. Joint resolution proposing an amendment to the Constitution of the United States relative to the Air Force of the United States; to the Committee on the Judiciary.

By Mr. SUNDSTROM:

H. Res. 432. Resolution for the relief of Georgia Reed; to the Committee on House Administration.

By Mr. ROSS:

H. Res. 433. Resolution requesting the President to appoint a Fuel Oil Coordinator; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRYSON:

H. R. 5024. A bill for the relief of Crawford F. Carpenter, Sr.; to the Committee on the Judiciary.

By Mr. CLASON (by request):

H. R. 5025. A bill for the relief of Josefina Feliu Mielnikowski; to the Committee on the Judiciary.

By Mr. HERTER:

H. R. 5026. A bill for the relief of the estate of James F. Delahanty, deceased; to the Committee on the Judiciary.

By Mr. JENKINS of Pennsylvania:

H. R. 5027. A bill for the relief of Mor Klein and Mrs. Teri Muller Klein, his wife; to the Committee on the Judiciary.

By Mr. KEOGH:

H. R. 5028. A bill for the relief of Five Boro Personal Loan Corp.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1149. By Mr. BRADLEY: Petition of 53 residents of California, urging that legislation establishing a system of universal military training be enacted; to the Committee on Armed Services.

1150. By Mr. ELSTON: Petition of H. E. Michaels and 81 other residents of Cincinnati, Ohio, and vicinity, urging passage of legislation establishing a system of universal military training; to the Committee on Armed Services.

1151. Also, petition of William C. Fische, Jr., and 60 other residents of Cincinnati, Ohio, and vicinity, urging passage of legislation establishing a system of universal military training; to the Committee on Armed Services.

1152. By Mr. FORAND: Petition of Miss Amanda E. Lind and 11 others, in favor of universal military training; to the Committee on Armed Services.

1153. Also, petition of Mrs. Haworth and 14 others, in favor of universal military training; to the Committee on Armed Services.

1154. Also, petition of Mrs. Louis Clark and 105 others, in favor of universal military training; to the Committee on Armed Services.

1155. By Mr. GRAHAM: Petition of 86 residents of Butler County, urging the passage of H. J. Res. 239 and S. J. Res. 150, the Christian amendment; to the Committee on the Judiciary.

1156. Also, petition of 91 residents of Beaver County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1157. By Mr. LEWIS: Petition of Charles H. Carey Post, No. 56, American Legion, Salem, Ohio, signed by 34 members, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1158. Also, petition of the Woman's Christian Temperance Union, of New Athens, Ohio, signed by 11 members, in support of the Capper bill and the Bryson bill prohibiting the manufacture, sale, and transportation and importation of alcoholic beverages; to the Committee on Interstate and Foreign Commerce.

1159. Also, petition of 15 residents of Steubenville, Ohio, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1160. By Mr. McGARVEY: Petition submitted by members of the Pennsylvania Railroad Post, No. 204, the American Legion, Philadelphia, Pa., in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1161. Also, petition submitted by Miss Betty Crothers, Philadelphia, Pa., and others, in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1162. Also, petition submitted by Mrs. A. H. Wittman, Philadelphia, Pa., and others, in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1163. Also, petition submitted by members of the William P. Roche Unit, No. 21, American Legion, Philadelphia, Pa., in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1164. Also, petition submitted by members of the Breen-McCracken Unit, No. 27, American Legion Auxiliary, Philadelphia, Pa., in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1165. By Mr. MARTIN of Massachusetts: Petition of Mrs. William W. Wakeman and sundry citizens of Massachusetts advocating enactment of S. 265; to the Committee on Interstate and Foreign Commerce.

1166. By Mr. SMITH of Wisconsin: Petition containing 87 signatures of residents of Racine County, Wis., and presented by the Racine County commander of the American Legion, in support of legislation for universal military training; to the Committee on Armed Services.

1167. By the SPEAKER: Petition of student veterans of West Virginia State College petitioning consideration of their resolution with reference to legislation to increase subsistence to veterans going to college; to the Committee on Veterans' Affairs.

1168. Also, petition of Local No. 22, ILGWU, of New York City, petitioning consideration of their resolution with reference to exporting arms and munitions of war to Palestine; to the Committee on Foreign Affairs.

1169. Also, petition of the chairman of the executive committee of the Protestant War Veterans of the United States, Inc., petitioning consideration of his resolution with reference to opposing the Marshall plan and aid to Europe; to the Committee on Foreign Affairs.

HOUSE OF REPRESENTATIVES

TUESDAY, JANUARY 20, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou who dost reveal Thyself to the pure in heart, we pray Thee to cleanse us from all unrighteousness. Allow not fears and doubt to abound. Free our hearts, and grant us wisdom and courage for these expectant days of hard work and loads to carry.

We pray for our own America, that she may always be a land of churches, homes, and schools, with a national theme of tolerance and good will to all within her borders. May her reverence, integrity, and simplicity be a royal fortress and her hearthstones be a rampart against this garish world.

Our Father, this day may we render acceptable service unto Thee. In the holy name of our Redeemer. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries, who also informed the House that on January 19, 1948, the President approved and signed bills of the House of the following titles:

H. R. 389. An act for the relief of the dependents of Carl B. Sanborn;

H. R. 769. An act for the relief of the estate of Ruth Horton Hunter;

H. R. 1155. An act for the relief of the estate of W. H. Rodgers, deceased;

H. R. 1175. An act for the relief of the estate of Daphne Ward Pope, deceased;

H. R. 1319. An act for the relief of Calvin J. Frederick;

H. R. 1426. An act to extend veterans' preference benefits to widowed mothers of certain ex-servicemen and ex-servicewomen;

H. R. 1531. An act for the relief of William P. Gillingham;

H. R. 1645. An act for the relief of Mrs. Leona McMinn Winkler;

H. R. 1933. An act for the relief of Mrs. Elizabeth F. McCombie;

H. R. 2056. An act for the relief of J. C. Bateman;

H. R. 2348. An act for the relief of Charles J. Smith;

H. R. 2891. An act for the relief of Mattie A. Horner;

H. R. 3068. An act for the relief of Alfred Thomas Freitas;

H. R. 3146. An act to amend section 3 of the Flood Control Act approved August 28, 1937, and for other purposes; and

H. R. 4055. An act to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans.

RESIGNATIONS FROM COMMITTEES

The SPEAKER laid before the House the following resignations from committees:

JANUARY 20, 1948.

Hon. JOSEPH W. MARTIN,
Speaker, House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: I herewith submit my resignation as a member of the Committee on Veterans' Affairs of the House of Representatives.

Sincerely,

MELVIN PRICE.

JANUARY 20, 1948.

Hon. JOSEPH W. MARTIN, Jr.,
The Speaker, House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the House Committee on Merchant Marine and Fisheries.

With kind regards, I am,

Respectfully yours,

EUGENE J. KEOGH.

The SPEAKER. Without objection, the resignations will be accepted.

There was no objection.

ELECTION TO COMMITTEES

Mr. DOUGHTON. Mr. Speaker, I offer a resolution (H. Res. 434).

The Clerk read as follows:

Resolved, That MELVIN PRICE, of Illinois, be, and he is hereby, elected a member of the standing Committee of the House of Representatives on Armed Services.

The resolution was agreed to.

Mr. DOUGHTON. Mr. Speaker, I offer a further resolution (H. Res. 435).

The Clerk read as follows:

Resolved, That EUGENE J. KEOGH, of New York, be, and he is hereby, elected a member of the standing Committee of the House of Representatives on Interstate and Foreign Commerce.

The resolution was agreed to.

REESTABLISHMENT OF THE GOLD STANDARD

Mr. BUFFETT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. BUFFETT. Mr. Speaker, on November 28 last I discussed the deterioration of our money since 1933 and pointed out that the only cure for spiraling prices appeared to be a restoration of free circulation of gold.

Today I have introduced a bill providing for the reestablishment of the gold standard on January 20, 1949—1 year from today—the date the next administration takes office.

Mr. Speaker, the importance of restoring the circulation of gold and ending the deterioration of our money is of direct and immediate importance to every bondholder, insurance-policy owner, and every pensioner in America.

However, restoring the right of the American citizen to own gold may be of much greater significance. There is impressive evidence indicating that the right to own gold is the human freedom on which all other freedoms ultimately depend.

It appears that only by the right to own gold can the people control the public purse and thus effectively restrain their political rulers. Because of that fact, the modern tyrants of Europe, Lenin, Hitler, and Mussolini, all quickly prohibited individual ownership of gold. Then there remained in the hands of the people no effective barrier against inflation and war.

If Congress will move constructively to restore to Americans the freedom to own gold, the drive here toward the chaos of national bankruptcy and perpetual war can most surely be ended.

In the weeks ahead I expect to discuss this important subject from time to time. Meanwhile, I hope all interested in peace and economic stability will carefully consider this proposal as possibly the only real and complete way out of our present difficulties.

EXTENSION OF REMARKS

Mr. MILLER of Nebraska asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article by Hon. KARL STEFAN entitled "Glass-House Tenant."

Mr. CRAWFORD asked and was given permission to extend his remarks in the RECORD and include three statements presented as a program on synthetic rubber before the Chemical Engineers' Club.

PRICES OF FARM PRODUCTS

Mr. COLE of Kansas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. COLE of Kansas. Mr. Speaker, I wish to read to the House a letter which I received from a farmer in Kansas. It reads as follows:

MORRILL, KANS., *January 12, 1947.*

Mr. ALBERT COLE,
House Office Building,
Washington, D. C.

DEAR MR. COLE: You, as a Representative of the people of this district, will have the opportunity during this session of Congress to speed the return of normal government or to further shackle certain industries through Government control.

I am a small farmer in Brown County engaged in diversified farming. Hog raising has always been best suited to my farm so in the past and now most of my crops and efforts end up in about 80 head of hogs produced annually. Whether or not I make a living depends to a great extent upon how much profit I make on my hogs, not, understand, how much I get for my hogs. I have sold hogs for $15 per hundredweight at a much larger profit than I receive today. Since we are continually bombarded with the discussion of high meat prices I think it is time the public should be informed of the real facts of the issue rather than sold on the idea of rationing and price control as Secretary Anderson is doing.

Meat is high but to my knowledge I have never produced pork at less profit than I do today. Understand I am not complaining about the situation as it is today, I am merely stating my case against rationing and price control in an industry which is already in a seriously low state of production because of the unattractive profit outlook. With record high grain prices we must have high meat prices or no meat. Ration meat now and there'll be none to ration later.

Today on my farm I can get $27 per hundredweight for my choice hogs; I can sell my corn for $2.70 per bushel. It has always been an accepted fact that it requires about 10 bushels of corn to produce 100 pounds of pork. Therefore at present prices I about break even on my feed costs. I sell my corn through the hogs for just about what I could sell the corn. Here's where the rub comes in—there's a hell of a lot of work and risk in raising hogs. It's no fun caring for them when the snow is hip deep or the mud in the lots is a foot deep. Then, too, an epidemic can strike your herd and wipe out your hogs and the corn crop that is already in them. The fellow, I'd say, that's sitting by the fire and has already sold his corn is the one in the golden chair when the feeding ratio is as it is today. I'm not in the hog business for conditions as they are today but I stay because there is always the possibility of a change before the next crop of hogs go to market. I may not make any money on the hogs I am now feeding but if the Government lets things alone I am still willing to gamble with the hogs.

Price control and rationing is nothing more or less than a political move to reduce the price of meat. The administration is smart enough to know that they cannot reduce the price of grain because the grain producer can sit on his grain until hell freezes over. With livestock the situation is different, when it reaches a certain age and weight it must be marketed regardless of price. I will admit that rationing and price control of meat would be a boon to President Truman this fall because millions would think they had benefited by the lower living costs. Have they forgotten their grumblings of a year or two ago when meat was not available at any price? After all are high living costs so poisonous a situation? We had low living costs in the early thirties; we also had bread lines, relief, and unemployment.

The impending shortage of meat is due largely to one thing—the lack of visible profit in its present production. The livestock producer doesn't ask $25, $30, or $35 per hundred for his product; he asks for a profit for his labor. The present price of grain makes $30 hogs a just and fair price. If the price of meat is reduced by act of Congress then I am shooting craps with a pair of dice that are loaded to roll deuces and I am forced to quit the game or go broke.

Sincerely,

VERN R. MOEHLMAN.

PRICE CONTROL AND RATIONING

Mrs. ST. GEORGE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mrs. ST. GEORGE. Mr. Speaker, we have been hearing a great deal of late about the return to controls and rationing. I have always been opposed to controls and rationing because I consider them absolutely contrary to the American philosophy of government. However, to implement my own thought on the subject, I would like to quote the words of Joe Stalin on the subject of rationing. He said, and I quote:

Ration books in the hands of the proletarian states are the most powerful means of

control. A power unprecedented in history, a means of compulsion stronger than the laws of the convent or of the guillotine.

We had better beware before it is too late.

EXTENSION OF REMARKS

Mrs. ST. GEORGE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an excerpt from a speech made by me before the Women's Patriotic Conference in Washington, D. C., on January 16.

The SPEAKER. Is there objection to the request of the gentlewoman from New York?

There was no objection.

REDUCTION IN THE COST OF LUMBER

Mr. GAMBLE. Mr. Speaker, I ask unanimous consent of the House to insert at this point in the CONGRESSIONAL RECORD a newspaper release of the Joint Committee on Housing dated January 9, 1948, announcing the 10-percent reduction in the cost of lumber for 60 days by the Weyerhaeuser Sales Co., of St. Paul, Minn. This is the first volntary move by a leading lumber producer to announce a cut in prices.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GAMBLE. Mr. Speaker, the release from the Joint Committee on Housing is as follows:

Encouraged by the first voluntary move by a leading lumber producer to announce a cut in prices, Congressman RALPH A. GAMBLE, Republican, New York, chairman of the Joint Committee on Housing, called upon another important building-material industry to aid in attaining the objective sought by the anti-inflation law recently enacted by Congress.

In a telegram to the Weyerhaeuser Sales Co., of St. Paul, Minn., and to Laird Bell, of Chicago, chairman of the board, Weyerhaeuser Sales Co., of Tacoma, Wash., which announced on Friday a 10-percent cut in lumber prices at the mill, Chairman GAMBLE complimented these companies on their moves and made it known that he had called upon the gypsum industry to pursue a similar course.

Chairman GAMBLE's telegram to the lumber firms read:

"The 10-percent cut in lumber prices at the mill which you have just announced is the first victory in our concentrated attack on inflation.

"I commend you for the courage you have shown in taking the leadership in support of the public interest.

"If other responsible interests in your great industry follow your example, we can quickly realize substantial savings in housing construction costs.

"Our committee has called the gypsum industry to a conference in Washington on January 28, similar to the one we held last Friday (January 9) for leaders in the lumber industry. I am hopeful the gypsum industry will join the lumber industry in reducing costs, speeding up production and channeling shipments to areas where materials are short, thereby promoting the objective sought by the anti-inflation law recently enacted by Congress."

The foregoing message to the Weyerhaeuser firms was prompted by a statement made by F. K. Weyerhaeuser, president, Weyerhaeuser Sales Co., in which he said:

"We wish to do our part in reducing the cost of building and in checking the inflationary trends now threatening our national welfare. Due to the great demand for lumber arising from the wartime depletion of stocks and the postwar boom in home construction, lumber prices have risen sharply but in about the same proportion as the prices of farm products.

"While the cost of lumber used in the average small house totals only about 20 percent of the cost of all materials and lumber used, nevertheless the price of lumber affects total building costs. Since OPA controls were removed we have followed a very conservative policy in the pricing of our products right down to the present moment.

"In spite of our present price position we have determined to make price reductions on house building items of Douglas fir, western hemlock, and coast red cedar lumber shipped from our affiliated sawmills and going to the retail lumber trade. We will maintain these prices on such shipments for the next 60 days and longer if we believe conditions warrant.

"These reductions will average 10 percent of the f. o. b. mill value. They will appear in our price quotations to retail customers and will also apply to orders now on file for these customers and shipped after this date."

HAS THE ROOSEVELT POLICY ON GOVERNMENT SPECULATORS BEEN REVERSED BY TRUMAN?

Mr. MACKINNON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks and include two letters and two newspaper articles.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MACKINNON. Mr. Speaker, recent disclosures have proved that high officials in the present administration have been engaging in commodity speculations.

It is interesting to note that President Franklin D. Roosevelt prohibited officers or employees from engaging in such practices when he was President. This order was issued April 22, 1937. It reads:

I believe it to be a sound policy of the Government that no officer or employee shall participate directly or indirectly in any transaction concerning the purchase or sale of corporate stocks or bonds or of commodities for speculative purposes, as distinguished from bona fide investment purposes. Engagement in such speculative activities by any officer or employee, whether under the competitive civil service or not, should be among the matters considered by the heads of departments and establishments and by the Commission in passing upon questions concerning his qualifications for retention or advancement.

FRANKLIN D. ROOSEVELT.

Following this announcement of Presidential policy the following notice was sent on April 30, 1937, to the heads of all departments and independent establishments:

In a letter dated April 22, 1937, the President requested the Commission to take steps to inform all officials and employees of the Government that speculation on their part or in their behalf in corporate stocks or bonds or in commodities is contrary to Government policy. The President said:

"I believe it to be a sound policy of the Government that no officer or employee shall participate directly or indirectly in any transaction concerning the purchase or sale of corporate stocks or bonds or of commodities for speculative purposes, as distinguished from bona fide investment purposes. Engagement in such speculative activities by any officer or employee, whether under the competitive civil service or not, should be among the matters considered by the heads of departments and establishments and by the Commission in passing upon questions concerning his qualifications for retention or advancement."

Accordingly, an official notice to this effect should be distributed to each officer under your jurisdiction, whether under the competitive civil service or not, for the information and guidance of the officials and employees therein.

By direction of the Commission:

Sincerely yours,

HARRY B. MITCHELL,
President.

The appointments of Edwin W. Pauley to the several offices he has recently held in the administration were in violation of this policy. These appointments indicate that the Truman administration is not following the same policy in such matters as was followed during the Roosevelt administration, even though President Truman, Attorney General Clark, and Secretary of Agriculture Anderson have made a number of recent speeches denouncing commodity speculators.

Now that these individuals have been charged with violating this policy, and the initial evidence has supported the charges, what standard is to be applied in proving them? Raymond Moley, who was an early supporter of President Roosevelt, has unearthed a Roosevelt precedent to cover the case. He states that where the initial evidence supports a violation of public trust by a public official the traditional rule as to the burden of proof is reversed and the burden rests with the officer charged. Moley states:

Members of this administration cannot sit tight and demand that Stassen and others prove them guilty. It is up to them to prove their innocence.

The entire article is here inserted under leave to extend my remarks:

MOLEY SAYS ADMINISTRATION MUST STICK TO F. R. STANDARD

In February 1932, as governor, Franklin D. Roosevelt removed Thomas M. Farley, sheriff of New York County. In doing so, he brushed aside several charges filed with him and rested his action on a broad principle of public morality.

Farley's bank account bulged with funds for which no explanation had been made. Nor had it been proved that these funds were illegally accumulated.

But since Farley held an office of public trust, Roosevelt maintained that the traditional rule that the burden of proof rested with the accuser was reversed and that the burden in such a case rested with the official charged. This reporter was in a position to know that Roosevelt, in making this point, was trying to set a standard for all future office holding.

In announcing his decision, he said: "The stewardship of public officers is a serious and sacred trust. They are so close to the means for private gain that in a sense not at all true of private citizens, their personal possessions are invested with a public importance in the event that their stewardship is questioned.

"One of their deep obligations is to recognize this, not reluctantly or with resistance, but freely. It is in the true spirit of a public trust to give, when personally called upon, public proof of the nature, source, and extent of their financial affairs.

"It is true that this is not always pleasant. But standards of public service must be measured in this way * * * because if popular government is to continue to exist it must in such matters hold its stewards to a stern and uncompromising rectitude."

The present members of the Truman administration hold office because the people elected the man who announced this principle. Their responsibilities as well as their power are derived from his mandate.

Members of this administration cannot under this principle sit tight and demand that Stassen and others prove them guilty. It is up to them to prove their innocence.

RAYMOND MOLEY.

Also here included under leave to extend my remarks is editorial appearing in the Minneapolis Star of January 14, 1948:

SMELLS BAD, MR. TRUMAN

Ed Pauley, special assistant to the Secretary of the Army, didn't make a million dollars speculating in the commodities market, Mr. Stassen. How could you accuse him of such a thing? He profited by only $932,-703.10, he says.

And Brig. Gen. Wallace Graham, White House physician, didn't deal in commodities after President Truman denounced speculators last October. At least, he didn't mean to. He still played the market in cotton and cottonseed oil, but he didn't think they were commodities. And he didn't incur a loss, as he said earlier. Now he admits he made $6,165.25.

After trying to create the impression for months that he didn't know a broker from a billygoat, Senator THOMAS of Oklahoma now confesses that he did do a little speculating, in his wife's name, to eke out his meager salary.

Trading on the commodity markets isn't illegal. It's a legitimate part of the milling and grain and similar businesses. But gambling on a rise or fall in prices in these days of world-wide want has a bad smell. Particularly when the gamblers are Government insiders who are in a position to know in advance about decisions which affect the market.

Mr. Truman has done a lot of talking about the evils of speculation. Much of it hasn't made complete sense. But now offenders are found right in his own circle.

What are you going to do about it, Mr. President?

Mr. Speaker, in closing I wish to urge the passage of my bill presently pending before the Judiciary Committee, prohibiting speculation in commodities by certain officers and employees of the Government.

EXTENSION OF REMARKS

Mr. ANDREWS of New York asked and was granted permission to extend his remarks in the RECORD and include an editorial on the proposed St. Lawrence seaway.

Mr. HUGH D. SCOTT, JR., asked and was granted permission to extend his remarks in the RECORD and include two articles, one from this week's issue of Newsweek and one from the Philadelphia Inquirer.

Mr. PATTERSON asked and was granted permission to extend his remarks in the RECORD and include a resolution adopted by the Litchfield County Farm Bureau, of Connecticut, at their annual meeting on January 9, 1948.

PERMISSION TO ADDRESS THE HOUSE

Mr. MCDONOUGH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks, and that the same appear in the Appendix of the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California [Mr. MCDONOUGH]?

There was no objection.

[Mr. MCDONOUGH addressed the House. His remarks appear in the Appendix.]

SHIPMENTS OF FUEL OIL ABROAD

Mr. SCRIVNER. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. SCRIVNER. Mr. Speaker, under a Paris date line, January 17, the Associated Press dispatch discloses that Ambassador Caffery stated that in the first 24 days of the interim-aid shipments of coal to France amounted to 1,250,000 tons, plus 200,000 tons of petroleum. I would suggest to some of those on the east coast bothered with fuel shortages that, while it may not get them needed fuel, they can at least generate some warmth, get hot under the collar, by figuring how many homes this amount of fuel would heat.

They might also try to figure out where the transportation came from, how much was used, and what relief they might have had if that transportation had been used to carry fuel for our own citizens.

The SPEAKER. The time of the gentleman from Kansas has expired.

INACTIVE DUTY TRAINING AND ROTC LEGISLATION

Mr. TOWE. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey [Mr. TOWE]?

There was no objection.

Mr. TOWE. Mr. Speaker, considerable interest is developing in two bills now pending before the House. They were reported by the Education and Training Subcommittee of the Armed Services Committee late in the first session. I am chairman of the subcommittee involved.

Of the two bills, the most important is the so-called inactive duty training pay bill which would authorize inactive duty training pay for Army and Air Force Reserve officers, thereby putting them on par with Navy and Marine Corps Reservists and members of the National Guard.

The other bill is the ROTC bill which proposes to expand and make certain refinements in the ROTC system. This bill also makes provision for an Air Force Reserve Officers Training Corps for the first time in our history.

I would like to have it clearly understood, Mr. Speaker, that I am very much aware of the importance of these two bills to the civilian components of the Army and the national defense. Nevertheless, I have not yet moved to seek a rule from the Rules Committee to activate either of these bills. It is not surprising that this gives some of my good friends on both sides of the aisle considerable concern.

After second thought, however, I think that my friends in the House will realize that public questions involving vast sums of money should be delayed when there is reasonable possibility that the legislative solution proposed may have to be changed considerably before the legislation can be enacted. At this time, there is meeting in the Department of Defense a special committee appointed by Secretary Forrestal and headed by the Assistant Secretary of the Army, Mr. Gordon Gray, whose function is to completely resurvey the reserve problems of the Army, Navy, Air Force, and Marine Corps. One of the problems to be considered by this special committee is the determination of the proper emoluments for the various reserve components as well as their interrelationship, such as the relationship of the National Guard to the Army Reserves and the relationship of the Naval Militia to the Naval Reserves. This study also is to encompass the possibility of joint usage of reserve training facilities in an effort to save vast investments of money, manpower and materials. It will also consider the officer training programs of the various services and seek to eliminate any unnecessary differences between them.

I have taken the position, and have so advised the military, that it would be improper for me to attempt to secure the approval of the House of Representatives on this legislation at a time when the Department of Defense is actively considering the possible revision of certain problems affecting the Reserve components. This seems to me to be eminently logical and fair and, for that matter, I would say that it is the only sensible way to proceed. May I also say, Mr. Speaker, that it would be inappropriate also in my view to proceed with this legislation at a time when the Department of the Army is unable to furnish fully the instruction material and training facilities for its own reserves. Additional armories are necessary as all of us know before these components can be adequately trained. Further, additional Army planning will be necessary before its reserves can be profitably trained. I have been pursuing this phase of the matter with the Department for some time.

So I do not believe, Mr. Speaker, that a brief delay in enactment of the inactive duty training pay bill will have very harmful results. In fact, a brief delay may well be very helpful, in that it may assist Mr. Gordon Gray in reaching an early decision with respect to the major questions involved in this exceedingly important subject.

I wish also to make it clear at this time, Mr. Speaker, to my friends on the floor of the House of Representatives and also to my good friends in the Reserve chapters throughout the country, that I am not personally opposed in any way to this legislation. Neither is it my intention to withhold action on it indefinitely. On the contrary, I do propose to seek action on this legislation this session and, I hope, favorable action. But again I say that in my opinion the House of Representatives should not act until it has available the

advice and conclusions of the expert, special committee now surveying this entire field by direction of the Secretary of Defense.

EXTENSION OF REMARKS

Mr. BENNETT of Missouri asked and was given permission to extend his own remarks in the Appendix of the RECORD.

Mr. HARDIE SCOTT asked and was given permission to extend his remarks in the Appendix of the RECORD and include therein a statement by Mr. William Rhinehart.

Mr. WOODRUFF asked and was given permission to extend his remarks in the Appendix of the RECORD by including an editorial and also a newspaper article.

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the Appendix of the RECORD and include two articles.

Mr. ELLIS asked and was given permission to extend his remarks in the Appendix of the RECORD and to include a newspaper article.

SPECIAL ORDER GRANTED

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent that on Thursday next, after the disposition of business on the Speaker's table and any other special orders entered for that day, I may address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

MISLEADING DISCUSSIONS OF MEAT SHORTAGE

Mr. HOPE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. HOPE. Mr. Speaker, the bill (H. R. 5003) to provide for the allocation of meat, introduced by the gentleman from New York [Mr. JAVITS], and a similar Senate bill, are mischievous proposals. Their net effect will be to make meat scarcer and harder to get during the coming year. I know that the gentlemen who are sponsoring this legislation are not deliberately trying to reduce the supply of meat available to the average consumer in this country, but that is going to be the effect of their proposals and of all the discussion going on in this country today, in high places and low, on the question of meat shortages.

This discussion is mischievous because the best available estimates from both Government and private sources indicate that the per capita supply of meat this year will be above the average consumption in recent years.

There need be no shortage and there will be none unless it is an artificial shortage, created by the fear generated by misleading discussions of possible shortages and threats of rationing and price controls. Reports from all over the country indicate that this fear is resulting in the hoarding of meat on the part of consumers everywhere, something that is easily possible because of the great number of frozen food lockers. They indicate also, because of the uncertainty as to controls, that producers and feeders of livestock are sending immature and unfinished animals to market and are reducing the scope of their operations.

This is thoroughly understandable because, with controls on meat and no controls on the prices of feed, wages, and other production costs, no farmer can safely make his plans for months ahead, which he must do if he stays in the livestock business. Producers are willing to take their chances with the law of supply and demand, with the risks of weather, and pests, and diseases, but they understandably are reluctant to add to these the additional risk of what may come out of Washington if we are going to start in with controls.

The estimated per capita consumption of meat for 1947 was 156 pounds. The estimate for 1948 is 146 pounds, or 6.5 percent less. Figured out in terms of daily consumption, it means that consumers will have to reduce their daily consumption for 1948 by less than half an ounce, as compared with 1947. But that is not all. With the exception of 1946 when the per capita consumption was about 153 pounds, and 1947, consumers will this year have more meat than they have had in any year, going back as far as 1910. They will have more than 20 pounds per capita above what was consumed on an average between the years 1935 and 1939.

Is this any cause for a panic? Is there going to be any suffering in this country because our available supply of meat is going to be half an ounce less per day than it was during the year of our greatest consumption? Is this any excuse for going back to controls, which even those with the shortest memories know mean black markets, outrageous prices, and empty meat counters? Let us use our heads.

TAX ON OLEOMARGARINE SHOULD BE ELIMINATED

Mr. POTTS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POTTS. Mr. Speaker, I have consistently tried to reduce the high cost of living of the city dweller by every means at my disposal, including voting for tax reduction and other alleviating measures. To that end I have today joined other Members of the House, including the gentleman from New York [Mr. BUCK], in introducing a bill to eliminate the tax on oleomargarine. I hope the House will pass this measure.

CALENDAR WEDNESDAY

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the call of the committees in order on tomorrow, Calendar Wednesday, may be dispensed with.

Mr. ANDREWS of New York. Mr. Speaker, reserving the right to object, as I understand the gentleman's unanimous-consent request would obviate Calendar Wednesday tomorrow.

Mr. HALLECK. That is right.

Mr. ANDREWS of New York. I take this opportunity and still reserve the right to object to ask the distinguished majority leader in the absence of the chairman of the Rules Committee—I having addressed the chairman of the Rules Committee 2 weeks ago in regard to four bills, three of which were unanimously reported by the Armed Services Committee, and the well-known bill on universal military training, which passed the House Committee on Armed Services by a two-thirds vote—can the majority leader on behalf of the Rules Committee or the leadership of the House give me any idea when I may expect an answer from the chairman of the Rules Committee?

Mr. HALLECK. As the gentleman of course knows, that is a question to be addressed to the committee. I might say to the gentleman from New York that one of those bills on which he asked a rule was reported from the Rules Committee and the gentleman called it to the floor and brought it to passage.

Mr. ANDREWS of New York. We very much appreciate that. The bill passed the House by unanimous vote, but we have other bills in the same category.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. ANDREWS of New York. Mr. Speaker, I shall not object at this time.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

EXTENSION OF REMARKS

Mr. NORBLAD (at the request of Mr. EDWIN ARTHUR HALL) was given permission to extend his remarks in the RECORD and include an editorial.

Mr. COLE of Missouri asked and was given permission to extend his remarks in the RECORD and include transcript of a broadcast by Jack Beall on January 10, 1948.

Mr. YOUNGBLOOD asked and was given permission to extend his remarks in the RECORD.

Mr. COURTNEY asked and was given permission to extend his remarks in the RECORD and include certain resolutions.

Mr. BUCHANAN asked and was given permission to extend his remarks in the Appendix of the RECORD and include an address by Secretary of State Marshall.

Mr. BLOOM asked and was given permission to extend his remarks in the RECORD and include an article appearing in the New York Journal American.

PERMISSION TO ADDRESS THE HOUSE

Mr. EDWIN ARTHUR HALL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

THE FUEL SHORTAGE

Mr. EDWIN ARTHUR HALL. Mr. Speaker, the past 2 weeks have seen an

unrivaled cold spell attack the regions of up-State New York and the Northeast. Ice is 3 feet thick in some spots. Snow is deep and the weather is generally overpowering.

Reports come from my section that there is some suffering and considerable discomfort from the winter. The 20-percent shortage of fuel oil from normal supplies is bound to cause such misfortune. While State authorities are doing what they can, I believe it is incumbent upon the Federal Government to act likewise.

With careful distribution, much of the suffering can be eliminated. The first duty of the petroleum industry, it seems to me, is to take care of fuel-oil users who have homes and families to keep warm. Their need is paramount.

Behind the iron curtain, the proletariat is considered only after all favored groups and government commissars are taken care of. This is true with fuel as it is true with other necessities. The people get what is left and have to like it.

But we live in America, where cold and hunger are supposed to be unknown. We are said to enjoy the highest standard of living in the world.

Therefore, to preserve this great country, people must be kept safe from the ravages of the elements. I call upon business and the proper agencies of Government as well to cooperate in the equitable distribution of fuel oil.

To stimulate such cooperation, I am introducing the following bill, which the House should pass before this critical emergency threatens the whole Nation.

My bill reads:

Be it enacted, etc., That Congress hereby directs the President to call representatives of the Department of Interior and of the petroleum industry together for the purposes of:

1. Taking immediate care of all persons who heat their homes with fuel oil and who now find themselves in desperate straits because of lack of it.

2. Assuring home users of fuel oil that they will be given priority over other users, at least up to 1,000 gallons.

3. Securing adequate additional supplies of fuel oil at the earliest possible moment from sections of the United States not suffering from extreme cold and arranging for the shipment of these supplies to areas where shortages of fuel oil exist.

ALLOCATION OF GRAIN TO THE DISTILLING INDUSTRY

Mr. YOUNGBLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. YOUNGBLOOD. Mr. Speaker, in the closing days of the special session the Congress gave the President power of life and death over the beverage-distilling industry, to allocate that industry's grain until January 31 next, on the theory that by the end of this month the President and the Secretary of Agriculture should be able to prove whether or not there was a sufficiently serious food shortage to warrant the restriction of all grain processors in their use of grain. Now I understand that the administration is saying, in effect, that they have not had enough time to prove a shortage and provide an orderly method of allocating grain to all users, but that they must keep the use of grain rationed. A bill has been introduced in the Senate giving them until February 29, 30 days more. I think we ought to give them 60 days; let us get this whole question of the alleged need of controls straightened out once and for all. Accordingly, I am introducing today a resolution extending the effective date of that provision of Public Law 395 allocating grain to distillers to March 31, 1948.

In a word, what I am saying is this: If the President or the Secretary of Agriculture have not had time to demonstrate a bona fide grain shortage and to set up an allocation system for all users of grain, we should now give them until March 31, approximately 2½ months, and during this period the beverage-distilling industry should be allowed a fair and adequate amount of grain with which to continue their operations and to provide full employment for their workers.

BARUCH PROPOSALS

Mr. HOLIFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOLIFIELD. Mr. Speaker, I have asked for this 1 minute to call to the attention of the House the testimony of Mr. Bernard Baruch yesterday before a committee in another body. In my opinion this testimony of Mr. Baruch is one of the best-balanced proposals that we have had in regard to our foreign-aid program, and I commend to the Members of the House a careful consideration of the 11 points brought out in the Baruch proposal as presented to the committee in the other body yesterday. Most of us are convinced that aid to the western European nations is absolutely necessary for their rehabilitation and for a peaceful and stable world. We also realize that aid from the United States will be a subtraction from our total supply of goods, foods, machinery, medicine, and moneys. Such a subtraction must be made in an orderly manner or its effect on our domestic economy will be subject to justifiable criticism. The Marshall plan must be spelled out in the coming weeks in a practical and common-sense manner. In my opinion Mr. Baruch's 11 points lay the practical basis and common-sense principles which must be carefully considered in the spelling out of our aid program to the 16 nations of western Europe. It provides a framework for the proper coordination of our domestic-production economy with the foreign-aid program. I include at this point the 11 points as outlined in this morning's Washington Post:

TEXT OF 11-POINT BARUCH PLAN

Here is the text of the 11-point program recommended by Bernard M. Baruch to the Senate Foreign Relations Committee:

"1. The United States stand ready to buy all nonperishable raw materials produced anywhere and by anyone in the world for the next 5 years, and which cannot find normal commercial markets: Minerals, metals, and ores, both crude and refined jute, sisal, etc., yes, even wool and cotton. Also up to 750,000 tons of crude rubber. This should be made a part of the European recovery legislation.

"2. Extend the President's present tariff authority for the next 3 years.

"3. That the countries of Europe—as many as are willing—band themselves into a political, economic, and defense union under the United Nations. This would include the lowering of trade barriers among them.

"4. That the United States, and such others as will join us, mutually guarantee the nations entering this union against aggression. By guaranteeing I mean a firm promise to go to war in joint defense if any of them are attacked.

"5. That the European nations organize to liberate and use every productive resource of the Continent, with those of the Ruhr regulated under priorities and international control so as to protect the peaceful interests of Germany's neighbors.

"6. Stabilize all European currencies and establish realistic rates of exchange.

"7. A 2-year production drive in this country—to work for peace as we worked for war—where feasible, with longer hours and overtime; where not, to smash production bottlenecks.

"8. As part of this work-for-peace drive, an across-the-Nation anti-inflation program to stabilize for peace, including:

"(a) Reduction of major food and agricultural prices in exchange for guaranteeing farmers an assured price for their crops for the next 3 years, with ample soil conservation.

"(b) In return for this roll-back, stabilization of wages.

"(c) Restoration of the excess-profits tax by 50 percent of the cut from war levels, with wartime amortization for new plants.

"(d) Continued rent controls, with provision only for clearly justifiable increases.

"(e) Postpone tax reduction for 2 years, after which a 5-year orderly reduction of personal and corporate taxes combined with the systematic, substantial lowering of the national debt which is a terrible threat to our security.

"(f) Put off all less essential works, including Federal, State, and municipal projects, giving priority to increasing production, housing, schools, hospitals, and other more essential needs.

"(g) Set up a capital issue committee, with advisory powers, under the Secretary of the Treasury, to review all capital issues, public and private, with a view to deferring less essential projects. The Governors of each State should appoint committees to pass on all proposed projects at the local level before going to the Federal committee.

"(h) Congress to set up a digging committee to scrutinize all Federal works and expenditures to determine which are postponable; also where Government spending can be cut and whether it is being done most economically. 'Cut costs for great efficiency' is a sound business maxim. It applies to governments as well.

"(i) More production—so important that I repeat it.

"9. Settle realistically all prewar and wartime intergovernment debts. For example, Britain and her creditors must decide what is to be done with the $14,000,000,000 of frozen pound sterling accumulated during the war.

"10. The British and others to retain their empire preferences for 3 years.

"11. A general staff for peace to develop an over-all, global strategy for America's peacemaking."

EXTENSION OF REMARKS

Mr. MADDEN asked and was given permission to extend his remarks in the RECORD in two instances and include in

one an editorial appearing in the Daily Northwestern, of Northwestern University, Evanston, Ill.

Mr. PRICE of Illinois asked and was given permission to extend his remarks in the RECORD in two instances; to include in one an editorial appearing in the St. Louis Post-Dispatch, and in the other a radio broadcast by George E. Reedy.

Mr. GARMATZ asked and was given permission to extend his remarks in the RECORD and include a radio address.

Mr. SMATHERS asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. LANE asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. FEIGHAN asked and was given permission to extend his remarks in the RECORD and to include an article.

Mr. BUSBEY asked and was given permission to extend his remarks in the RECORD and include a letter.

Mr. McCORMACK asked and was given permission to extend his remarks in the RECORD in two instances; to include in one a radio address delivered by him, and in the other a letter with an editorial enclosed.

Mr. CELLER asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. RICH asked and was given permission to extend his remarks in the RECORD and include an article appearing in Reader's Digest entitled "Hidden Red Ink in TVA Books."

Mr. BECKWORTH asked and was given permission to extend his remarks in the RECORD and include a report from the Alien Property Custodian.

SPECIAL ORDERS GRANTED

Mr. LANE. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore entered, I may be permitted to address the House for 5 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. JAVITS. Mr. Speaker, I ask unanimous consent that on Tuesday next, at the conclusion of the legislative program of the day and following any special orders heretofore entered, I may be permitted to address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

RED INK IN THE DAILY TREASURY STATEMENT

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, the daily Treasury statement should be printed in red ink, and I would introduce a bill to that effect, but I am afraid I would not be successful in having it passed. Now, according to the statement of the Treasury of January 15 it shows that we have spent $231,832,000 more than it has taken in. That puts us in the red for the year to date; with a debt of $256,558,000,000 we must not go in the red. The thing that worries me and the thing that is going to keep us in red ink is the fact that the President did not say a word in any of his messages about economy in Government. That is the thing that disturbs me. He has charge of all departments of Government. He is only interested in asking the Congress to appropriate $17,000,000,000 for the people in foreign countries. He is asking us to appropriate for universal military training the sum of $3,000,000,000, and for socialized medicine it will cost about $800,000,000.

The President wants aid to education for $500,000,000. He wants five hundred million for interest on the public debt. He is always asking for more money for more things for the Government to do. Where will you get all this money? The people want less taxes. How can you cut taxes, cut the public debt, and keep on spending? I say it cannot be done. So, Mr. President, I say to you and the Congress, Cut out your foolish and unnecessary spending. Where is the end going to be? Everything will be red pretty soon.

VETERANS' INSURANCE LEGISLATION

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include a bill which I am introducing today.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, today I am introducing into the House a bill to amend the National Service Life Insurance Act, to protect the insured against lapse by crediting to the insured dividends from excess of premiums over death costs chargeable thereto and by automatic payment of premiums from accumulated credits. It will save insurance for thousands of veterans, Mr. Speaker. The bill may not go through; the committee may not decide to favor the bill, but I think something of this sort should pass in order to protect the veterans who have allowed their insurance to lapse and to give the veterans the benefit of surpluses due them. It is a very precious possession to them, and I believe that something should be done. Our Committee on Veterans' Affairs had a hearing relating to the purposes of the bill.

The National Service Life Insurance Act of 1940 as enacted and now in force provides that the United States shall bear the cost of administration and shall bear the excess mortality cost and of cost of waiver of premiums for total disability traceable to the extra hazards of the military or naval service as such hazards may be determined by the Administrator.

This is a promise on the part of the Government to the insured that the Government shall bear all expenses and all payments to be made on account of death and disability traceable to the extra hazard of the military or naval service. This leaves to be paid out of the accumulated premium payments by the insured only the civilian death claims remaining after excluding payments of war connected deaths and disabilities required to be made wholly by the Government.

The bill provides for a prompt credit of dividends to each insured veteran to cover the excess of the premiums paid over the civilian death claims. The credit begins with the end of the insured's first policy year and continues at the end of each policy year. Any premium not paid when due is paid as of the due date by being charged against his credit. Three percent compound interest is added to the credit at the end of each policy year.

The present NSLI of October 8, 1940, is verbatim the same as the Government Insurance Act of 1917 in requiring the premiums charged to be based on the American experience table of mortality. This was then uniformly recognized by the United States and the States and used by the life-insurance companies for insurance on standard civilian risks. No change was made in this until after a study of the 10-year experience of the life companies between 1930 and 1940, the insurance commissioners of the United States and the District of Columbia in cooperation with the life insurance companies agreed on the new 1941 commissioners standard ordinary mortality table which shows a lower death rate, particularly in the younger ages. The death rate is, however, about the same for ages approaching 60 and many years thereafter. This new mortality table has been adopted by the legislatures of more than two-thirds of the States as the compulsory basis for standard life risks insured by the companies beginning in 1948.

The savings in the lower number of deaths shown by the new table as compared with the rates of premiums paid on the basis of the old table entitle the insured to dividends which are illustrated in the following table per $1,000 of insurance:

Age at entry	American experience table of mortality, 5 year term	Commissioners standard ordinary mortality table, 1941	Excess for dividends
18	$7.58	$2.30	$5.28
20	7.70	2.43	5.27
22	7.81	2.59	5.22
24	7.93	2.77	5.16
27	8.17	3.11	5.06
30	8.41	3.56	4.85
34	8.88	4.35	4.53
38	9.59	5.46	4.13

This means that a young man entering service at age 18 and having the premiums of $7.58 deducted from his pay or paid during 3 years would have accumulated dividends of $5.28 during each year. This would keep his insurance in force for more than the entire 8 years of possible present term insurance. The same would be true for a young man entering at age 20 and paying for 3 years. For a young man entering at age 30 who pays premiums for 4 years, the dividends

would keep his insurance in force for the whole 8-year period of term insurance. In every such case there would be a remaining credit to be applied to his converted insurance premium or to a continued term premium if the term rate should be extended.

Even for those serving or paying for less than the 3 or 4 years stated there would be a substantial accumulation of dividends to carry the insurance in force for a proportionate number of years.

The bill I referred to is as follows:

A bill by Mrs. ROGERS of Massachusetts to amend the National Service Life Insurance Act to protect the insurance against lapse by crediting to the insured dividends from the excess of premiums over death costs chargeable thereto and by automatic payment of premiums from the accumulated credits.

Be it enacted, etc., That the National Service Life Insurance Act, as amended, is amended by inserting in section 602, at the beginning of subsection (f), a paragraph number (1) and adding at the end of subsection (f) a new paragraph (2) to read:

"(2) Every insured veteran shall be credited with an annual dividend on each policy, as of the end of the first and of each succeeding policy year, equal to the difference between the current mortality contribution of the policy on the mortality and interest basis prescribed in subsection (e) of this section as paid by the insured by deduction from pay, or from a dividend accumulation, or otherwise, and the net mortality losses chargeable to the policy on the basis of actual experience excluding any losses traceable to the extra hazard of the military or naval service; provided, that prior to any other determination effective after the taking effect of this act, it shall be assumed that such net mortality losses are based upon the expected mortality computed on the basis of the 1941 Commissioners Standard Ordinary Table of Mortality.

"From the date of the original policy all premiums deducted from the pay of the insured, or otherwise paid, together with all dividends and optional additional payments made, if any, accumulated as of the end of each policy year with interest at the reserve rate, shall from time to time be applied; first, to pay any premium as of the due date; second, to reduce any premium loan against the policy; and third, on termination of the policy by surrender or death any remaining credit be paid in the same proportion and manner as other payments to the insured or to the beneficiary or beneficiaries.

"Unless the insured in a converted policy shall elect otherwise in writing, any premium not otherwise paid shall be paid as of the due date from the accumulated dividend credit, and any remaining unpaid premium shall be paid by a premium loan against the policy to the extent that, as of the end of the current policy year, the total accumulated indebtedness shall not exceed the reserve.

"Interest under this subsection shall be accumulated at the reserve rate.

"No dividend or remaining credit shall be paid in cash in any case other than on surrender of the policy or as a part of payments to a beneficiary or beneficiaries.

"No policy shall be held to have been lapsed or shall be lapsed for nonpayment of any premiums which have been or are being paid by a charge against the dividend accumulated credit or by a premium loan as herein provided.

"The Veterans' Administration shall give prompt notice to the insured of dividends and unpaid premiums, if any, and of the remaining accumulated credit or charge, and within 6 months after the taking effect of this act give notice to each insured whose policy shall have been lapsed of the requirements for reinstatement."

PERMISSION TO ADDRESS THE HOUSE

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include an address I made some time ago. I also ask that my address may follow the address of the distinguished gentleman from Pennsylvania [Mr. RICH].

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

[Mr. RANKIN addressed the House. His remarks appear in the Appendix.]

EXTENSION OF REMARKS

Mr. FOOTE asked and was given permission to extend his remarks in the RECORD and include a bill he introduced today.

FUEL SHORTAGE

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I wish to speak briefly as to the current situation in New England with reference to the continuing shortage of fuel oil.

First, at the request of the chairman of the House Interstate and Foreign Commerce Committee, the gentleman from New Jersey [Mr. WOLVERTON], I am glad to report that the committee arranged a special meeting to consider the analysis I had made of the proposed export program of petroleum products for the first 3 months of this year. I referred to that in detail in my remarks yesterday, which may be found at page 329 of the RECORD. Yesterday I requested the committee staff to check on the accuracy of my analysis, and the staff reported to the committee that it was in agreement with it. The committee instructed its staff to immediately secure an explanation of the program from the Office of International Trade, Department of Commerce.

Next, I wish to report that the weather situation in New England remains very severe. News accounts reaching here this morning indicate that in eastern Massachusetts a record cold was registered. In central Massachusetts the mercury dropped to 45° below, an official low record. In western Massachusetts temperatures between 8° and 25° below were registered. As Members from Pennsylvania, New York, and the Central and Midwestern States know, this is a terrific burden on the depleted fuel-oil supplies. On top of that, the sixth snowstorm in 25 days in parts of Massachusetts aggravated conditions. The news account states that 47.2 inches of snow has fallen on storm-weary Boston up to now.

I have been trying to keep closely in touch with the current situation in western Massachusetts, and upon inquiry yesterday afternoon I received the following telegram from Hon. Robert F. Bradford, Governor of Massachusetts:

Continued cold weather; rapidly increasing seriousness of fuel-oil situation in Massachusetts. Temperatures last week averaged 9.7° below same period last year. Urgent that all possible steps be taken to obtain additional supplies for Massachusetts.

Yesterday, at pages 302–303 of the RECORD, I reported in detail upon a constructive suggestion which had been made by a subcommittee of the New England delegation as early as December 13, 1947, and upon subsequent correspondence with Hon. John R. Steelman. I stated that I had sent another wire to Mr. Steelman yesterday morning, indicating I would appreciate his advice as soon as possible as to the results of General Fleming's investigation and the practicability of converting heating facilities in Government buildings from oil to coal and as to the accuracy of a report which I brought to his attention on January 13, that within the past few weeks Stewart Field, N. Y., and Fort Myer, Va., had converted from coal to oil. I stated I had had no reply to my letter of January 13. I regret to advise the Members that, as of a few minutes ago when I left my office to come to the floor, I had not received an acknowledgment of my letter or any reply to the telegram which I sent yesterday. Consequently, I have sent another wire to Mr. Steelman, reporting on Governor Bradford's wire, and again asking for the courtesy of an immediate report on General Fleming's investigation and as to the accuracy of the report of recent conversions at these two Army installations. The wire is as follows:

Referring to telegram December 13, second telegram December 19, your letter December 19, my letter January 13, and my telegram yesterday, may I quote from a telegram I have received from the Governor of Massachusetts: "Continued cold weather; rapidly increasing seriousness of fuel-oil situation in Massachusetts. Temperatures last week averaged 9.7° below same period last year. Urgent that all possible steps be taken to obtain additional supplies for Massachusetts." I shall appreciate report on results of General Fleming's investigation and as to accuracy of information reported in my letter January 13, so that I may inform the New England delegation immediately and include it in report to Governor Bradford as to all efforts which have been made by all members of New England delegation to obtain additional supplies for Massachusetts.

I do not know how much fuel oil is being consumed daily in the gigantic and scattered institutions owned or operated by the Federal Government. If any is being consumed where reconversions could have been made promptly after the suggestion of December 13, then more than a month's supply of an unknown amount of this now precious fuel has been consumed unnecessarily.

I insist that the Federal Government has had ample opportunity to examine the possibility of reconversion all over the country and to have taken constructive action. Surely, any fuel oil which could be saved in this manner in areas where the weather conditions are not severe could have been diverted to those

who so desperately need it. Too, it is obvious that any such release of shipping space would help to break the bottleneck of transportation to these areas. Many witnesses have testified that there is ample oil if we can only get shipping space. I am supremely confident that our colleagues from those areas would definitely approve of such a governmental policy in behalf of the people of our districts and I cannot understand this apparent delay in action by the executive department. If it is not feasible, it is simple enough to state so and explain the reasons. If it is feasible, every 24 hours lost in taking the action is the loss of some amount of fuel oil which might mean the difference between keeping a school, a hospital, or an industry in one of our districts operating 24 hours longer. It is reasonable to believe that it would keep scores of houses warm and this is a matter of prime importance where every householder is concerned and obviously of the greatest importance where there may be sickness or elderly people or children living in such a house.

Finally, I again state that I believe it is the clear responsibility of the executive department to take vigorous and effective action in every field in which they can be of assistance. That was not only the request, but the formal recommendation of the House Committee on Interstate and Foreign Commerce in its resolution adopted December 19, CONGRESSIONAL RECORD, page 11760, as follows:

(8) The President and the departments and agencies of Government should take all other possible and appropriate action to utilize such powers as they now possess to aid in alleviating such shortages.

Already, too much time has elapsed. All too much irreplaceable fuel oil has gone. There is no excuse for any further delay. In my opinion, it has been a case of too little and too late. I not only ask in behalf of my constituents, whether they be Democrats or Republicans or independents, I demand immediate action. I hope each of you, if your constituents are affected, will do everything in your power to support the efforts of your Committee on Interstate and Foreign Commerce and of those of us, irrespective of party, who have been working together toward the simple end of preventing this situation from becoming worse and of curing it, if it lies within our power to do so. I know that, even if your constituents are not affected, you are interested in the well-being of your fellow Americans and I ask you, too, to support us.

REPORT OF THE NATIONAL ADVISORY COUNCIL ON INTERNATIONAL MONETARY AND FINANCIAL PROBLEMS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 501)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

I transmit herewith a report of the National Advisory Council on International Monetary and Financial Problems covering its operations from April 1, 1947, to September 30, 1947, and describing, in accordance with section 4 (b) (5) of the Bretton Woods Agreements Act, the participation of the United States in the International Monetary Fund and the International Bank for Reconstruction and Development for the above period.

Previous reports of the National Advisory Council were transmitted to the Congress on March 1, 1946, March 8, 1946, January 13, 1947, and June 26, 1947, respectively. Previous reports on the participation of the United States in the International Monetary Fund and the International Bank were included in the reports of January 13, 1947, and June 26, 1947, respectively.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 19, 1948.*

LOUIS H. DEAVER

Mr. CASE of New Jersey. Mr. Speaker, in behalf of the Committee on the Judiciary, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 3111) for the relief of Louis H. Deaver, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 1, lines 3 and 4, strike out "United States Employees' Compensation Commission" and insert "Bureau of Employees' Compensation, Federal Security Agency."

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

EVA L. DUDLEY

Mr. CASE of New Jersey. Mr. Speaker, on behalf of the Committee on the Judiciary, I ask unanimous consent to take from the Speaker's table the bill (H. R. 1799) for the relief of Eva L. Dudley, Grace M. Collins, and Guy B. Slater, with a Senate amendment thereto, disagree to the Senate amendment, and ask for a conference.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. JENNINGS, CASE of New Jersey, and CRAVENS.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

BELMONT PROPERTIES CORP.

The Clerk called the bill (S. 851) for the relief of Belmont Properties Corp.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Belmont Properties Corp., Arlington, Va., the sum of $667.50. Such sum represents the amount of a fee paid by the said corporation to the Federal Housing Administration in connection with an application, made on October 20, 1941, to such Administration for mortgage insurance on an apartment-house project in Arlington, Va. While such application was pending the land on which such project was to be constructed was condemned by the United States: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BERTHA M. ROGERS

The Clerk called the bill (H. R. 4331) for the relief of Bertha M. Rogers.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Bertha M. Rogers, of Frederica, Del., widow of John R. Rogers, Sr., the sum of $8,285.47; such sum having been awarded to the said John R. Rogers, Sr., by an act entitled "An act for the relief of William J. Simpson and John R. Rogers, Sr.", approved July 11, 1946 (Private Law 716, 79th Cong.), and the said John R. Rogers having died prior to receiving such award or any part thereof: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HAYATO HARRIS OZAWA

The Clerk called the bill (H. R. 387) for the relief of Hayato Harris Ozawa.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding the provisions of section 13C of the Immigration Act of May 26, 1924, the Attorney General be, and he is hereby, authorized and directed to permit Hayato Harris Ozawa, the husband of Shigeko Elizabeth Tamura Ozawa, a citizen of the United States, and the father of two children born in the United States, to remain permanently in the United States, provided he is otherwise admissible under the immigration laws.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WILHEMINA PIPER ENZ

The Clerk called the bill (H. R. 560) to record the lawful admission to the United States for permanent residence of Wilhemina Piper Enz.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General be, and is hereby, authorized and directed to record the lawful admission for per-

manent residence of Wilhemina Piper Enz, who entered the United States at New York, N. Y., on December 1, 1943, and that she shall, for all purposes under the imimgration laws, be deemed to have been lawfully admitted as an immigrant for permanent residence.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. KEUM NYU PARK

The Clerk called the bill (H. R. 899) for the relief of Mrs. Keum Nyu Park.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That for the purposes of the immigration and naturalization laws, Mrs. Keum Nyu Park, Honolulu, T. H., shall be considered to have been lawfully admitted on March 9. 1938, to the United States for permanent residence.

With the following committee amendment:

Strike out all after the enacting clause and insert "That the Attorney General be, and he is hereby, authorized and directed to record Mrs. Keum Nyu Park as having entered the United States for permanent residence on March 9, 1938."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DR. GISELA PERL (KRAUSZ)

The Clerk called the bill (H. R. 1139) for the relief of Dr. Gisela Perl (Krausz).

There being no objection, the Clerk read the bill as, follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws the Attorney General be, and he is hereby, authorized and directed to record the lawful admission for permanent residence of Dr. Gisela Perl (Krausz) as of March 2, 1946, the date she was admitted temporarily to the United States.

With the following committee amendment:

On page 1, line 8, after the period insert "Upon the enactment of the act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the quota for Rumania of the first year that the said quota is available."

The committee amendment was agreed to.

Mr. POTTS. Mr. Speaker, I offer an amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. POTTS: On page 1, line 7, strike out "March 2, 1946" and insert in lieu thereof "March 25, 1946."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANASTASIOS PANAGE IOANNATOS

The Clerk called the bill (H. R. 1298) for the relief of Anastasios Panage Ioannatos (known as Anastasios Panage Ionnetos or Tom Panage Yanatos).

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in the administration of the immigration and naturalization laws, Anastasios Panage Ioannatos (known as Anastasios Panage Ionnetos or Tom Panage Yanatos), of Santa Fe, N. Mex., who served honorably in the armed forces of the United States in time of war and has resided in the United States of America since January 18, 1926, shall be held and considered to have been lawfully admitted to the United States for permanent residence on January 18, 1926, the date that he entered the United States at New York, N. Y.

SEC. 2. The Attorney General is authorized and directed to cancel any warrants of arrest or orders of deportation which may have been issued with respect to the said Anastasios Panage Ionnatos.

SEC. 3. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the non-preference category of the first available Greek immigration quota.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MITSU M. KOBAYASHI

The Clerk called the bill (H. R. 2303) for the relief of Mitsu M. Kobayashi, who is the wife of Edward T. Kobayashi, a citizen of the United States.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, that provision of section 19 (c) of the Immigration Act of February 5, 1917, as amended (39 Stat. 889-890; 54 Stat. 671-673; 56 Stat. 1044; 8 U. S. C. 155), which denies the benefits of its provisions to persons racially inadmissable or ineligible to naturalization in the United States, shall not be held to apply to Mitsu M. Kobayashi who last entered the United States in the year 1926

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LAWRENCE EDGAR EDWARDS

The Clerk called the bill (H. R. 2218) for the relief of Lawrence Edgar Edwards.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration laws, Lawrence Edgar Edwards shall not be subject to sections 3 and 19 of the Immigration Act of February 5, 1917, as amended (39 Stat. 878, 889; 8 U. S. C. 136, 155).

With the following committee amendment:

Strike out all after the enacting clause and insert "That notwithstanding the provisions of the eleventh category of section 3 of the Immigration Act of February 5, 1917, as amended (8 U. S. C. 136 (e)), the Attorney General be, and he is hereby, authorized and directed to record the lawful admission for permanent residence of Lawrence Edgar Edwards as of April 7, 1946, the date upon which he was admitted temporarily to the United States at Detroit, Mich."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. DAISY A. T. JAEGERS

The Clerk called the bill (H. R. 2250) for the relief of Mrs. Daisy A. T. Jaegers.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is directed to cancel forthwith any outstanding warrant of arrest, order of deportation, warrant of deportation, and bond in the case of the alien Mrs. Daisy A. T. Jaegers, New York, N. Y., and is directed not to issue any such further warrants or orders in the case of such alien insofar as any such further warrants or orders are based upon the same grounds as the warrants or orders required by this act to be canceled. For the purposes of the immigration and naturalization laws, the said Mrs. Daisy A. T. Jaegers shall be held and considered to have been lawfully admitted at New York, N. Y., on March 11, 1942, to the United States for permanent residence.

With the following committee amendment:

On page 2, line 3, after the period insert "Upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the quota for Portugal of the first year that the said quota is available."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUGUST DANE TETUAEARO

The Clerk called the bill (H. R. 2425) for the relief of August Dane Tetuaearo.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is directed to cancel forthwith any outstanding warrant of arrest, order of deportation, warrant of deportation, and bond in the case of the alien August Dane Tetuaearo, of Ryde, Sacramento County, Calif., and is directed not to issue any such further warrants or orders in the case of such alien insofar as any such further warrants or orders are based upon the same grounds as the warrants or orders required by this act to be canceled. For the purposes of the immigration laws, the said August Dane Tetuaearo, whose wife is a citizen of the United States, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of his entry therein in the year 1925.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

VICTOR C. KAMINSKI

The Clerk called the bill (H. R. 3061) for the relief of Victor C. Kaminski, also known as Victor Kaminski.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is directed to cancel forthwith any outstanding warrant of arrest, order of deportation, warrant of deportation, and bond in the case of the alien Victor C. Kaminski (also known as Victor Kaminski), of Wilmington, Del., and is directed not to issue any such further warrants or orders in the case of such alien insofar as any such further warrants or orders are based upon the same grounds as the warrants or orders required by this act to be canceled. For the purposes of the immigration and naturalization laws, the said Victor C. Kaminski (also known as Victor Kaminski) shall be held and considered to have been lawfully admitted to the United States for permanent residence on the date and at the place of his last entry therein.

With the following committee amendment:

Page 2, line 6, after the period, insert "Upon the enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the quota for Poland of the first year that said quota is available."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TECH. SGT. TSUYOSHI MATSUMOTO

The Clerk called the bill (H. R. 3263) for the relief of Tech. Sgt. Tsuyoshi Matsumoto.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding section 303 of the Nationality Act of 1940, as amended (54 Stat. 1140; 8 U. S. C. 703, 57 Stat. 600), Tech. Sgt. Tsuyoshi Matsumoto, who served honorably in the United States Army and who entered the United States temporarily as a student in 1937, may be permitted to remain permanently in the United States if he is found to be admissible under the immigration laws other than those relating to persons of races ineligible to naturalization.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ESTHER RINGEL

The Clerk called the bill (H. R. 420) for the relief of Esther Ringel.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws the Attorney General is hereby authorized and directed to cancel the outstanding order and warrant of deportation issued pursuant to sections 19 and 20 of the Immigration Act of February 5, 1947 (39 Stat. 889–890; U. S. C., title 8, secs. 155 and 156) and section 14 of the Immigration Act of 1924 (43 Stat. 162; U. S. C., title 8, sec. 214) in the case of Esther Ringel, any previous or existing law to the contrary notwithstanding. From and after the date of the approval of this act, Esther Ringel should be deemed to be lawfully a resident of the United States.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOHN T. HOLLANDSWORTH, JR.

The Clerk called the bill (S. 99) for the relief of John T. Hollandsworth, Jr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to credit the account of John T. Hollandsworth, Jr., postmaster at Beckley, W. Va., with the sum of $2,000, on account of a shortage of that amount in his War Savings stamp account.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TROY CHARLES DAVIS, JR.

The Clerk called the bill (S. 258) for the relief of Troy Charles Davis, Jr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Troy Charles Davis, Jr., of Denver, Colo., a merchant seaman entitled to medical treatment and hospitalization at Government expense, the sum of $211.32, in full satisfaction of all claims against the United States for reimbursement of medical and hospital expenses incurred by him in connection with an emergency operation which it became necessary for him to have performed in a private hospital in Denver, Colo., because of the lack of a marine hospital in that city: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LUCY JEFFERSON WEIL

The Clerk called the bill (S. 339) for the relief of Lucy Jefferson Weil.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Civil Service Commission is authorized and directed to pay, out of the civil-service retirement and disability fund, to Lucy Jefferson Weil, the widow of Isaac Weil, a former employee of the United States, an amount equal to the amount which would have been refunded to her under the provisions of section 12 (d) of the Civil Service Retirement Act of May 29, 1930, as amended, with respect to the employment of the said Isaac Weil during the period from August 1, 1941, to November 7, 1944, had not such employment been in contravention of the automatic separation provisions of such act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COL. WILLIAM J. KENNARD

The Clerk called the bill (S. 957) for the relief of Col. William J. Kennard.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay, out of any money in the Treasury, not otherwise appropriated, to Col. William J. Kennard, of Washington, D. C., the sum of $950, in full satisfaction of his claim against the United States for the difference between (1) the amount he was actually allowed as compensation for the value of the personal property which he lost as a result of the invasion of the Philippine Islands by the Japanese in December 1941, and (2) the amount which should have been paid to the said Col. William J. Kennard as compensation for the value of such property: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ADA B. FOSS

The Clerk called the bill (S. 1039) for the relief of Ada B. Foss.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ada B. Foss, of Cape Porpoise, Maine, the sum of $275.99 in full satisfaction of her claim against the United States for compensation for accrued annual leave earned by her husband, the late Justin A. Foss, as a lighthouse keeper at the Goat Island Light Station, Cape Porpoise, Maine, the said Justin A. Foss having been prevented by his death on December 26, 1942, while serving in the United States Coast Guard, from making application under the act of August 1, 1941 (55 Stat. 616), as amended, for payment for such accrued leave: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FRANK J. SHAUGHNESSY

The Clerk called the bill (S. 1043) for the relief of Frank J. Shaughnessy, collector of internal revenue, Syracuse, N. Y.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to credit the internal-revenue account of Frank J. Shaughnessy, collector of internal revenue, Syracuse, N. Y., with the amount of $468, representing certain moneys received by and in the custody of John V. Franey, deputy collector of internal revenue, Binghamton, N. Y., as internal-revenue collections, and which were stolen by an unknown person in a hold-up of the branch office of the collector located at Binghamton, and which were not turned over to the said Frank J. Shaughnessy, collector of internal revenue, for deposit.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FRANKIE STALNAKER

The Clerk called the bill (S. 1100) for the relief of Frankie Stalnaker.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Frankie Stalnaker, of Baltimore, Md., the sum of $2,000, in full satisfaction of her claim against the United States for reimbursement of medical and hospital expenses incurred by her, and for compensation for personal injuries sustained by

her on December 7, 1944, in Baltimore, Md., as a result of being struck by a United States Government mail truck.

With the following committee amendment:

Page 1, line 6, strike out "$2,000" and insert "$1,500."

Mr. GARMATZ. Mr. Speaker, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. GARMATZ to the committee amendment: In lieu of the sum "$1,500" insert "$4,000."

The amendment to the amendment was rejected.

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CAFFEY ROBERTSON-SMITH, INC.

The Clerk called the bill (H. R. 350) for the relief of Caffey Robertson-Smith, Inc.

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

ESTATE OF MARY D. BRIGGS, DECEASED

The Clerk called the bill (H. R. 927) for the relief of the estate of Mary D. Briggs, deceased.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the estate of Mary D. Briggs, deceased, former postmaster at Los Angeles, Calif., is relieved of all liability to refund to the United States the sum of $2,796.60, which sum remains due as the result of a defalcation of one Clyde T. Suttle, then a clerk in the Los Angeles post office, in the amount of about $9,000, less amounts regained from the surety on the bond and by judgment against the said Clyde T. Suttle. All charges against the postmaster's account of the said Mary D. Briggs arising from the embezzlement of the said Clyde T. Suttle shall be remitted, and the Civil Service Commission is authorized and directed to release to the personal representative of the said Mary D. Briggs the amount to her credit in the civil-service retirement and disability fund which has been retained because of such shortage in her account.

With the following committee amendment:

Page 1, line 10, after the word "charges", insert the word "remaining."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SAMUEL W. POORVU

The Clerk called the bill (H. R. 1169) for the relief of Samuel W. Poorvu.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $8,288.45, to Samuel W. Poorvu, of Boston, Mass., in full settlement of all claims against the United States for expenses incurred in connection with the leasing of quarters for Wellesley branch of the post office at Boston, Mass.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LAWRENCE REVES

The Clerk called the bill (H. R. 1286) for the relief of Lawrence Reves.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $129.48 to Lawrence Reves, of Duck Hill, Miss., in full settlement of all claims against the United States for damages sustained by the said Lawrence Reves on the 20th day of May 1946 as the result of the negligent and wrongful operation of a United States Army vehicle at Camp McCain, Miss., by a member of the armed forces of the United States who was not then and there acting within the scope of his office and employment.

With the following committee amendment:

Page 2, line 3, add ": *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by an agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FOR THE RELIEF OF A. S. OSTEN AND GUY F. ALLEN

The Clerk called the bill (H. R. 1516) for the relief of A. S. Osten, certifying officer, and for the relief of Guy F. Allen, former chief disbursing officer.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That A. S. Osten, certifying officer of the Federal Public Housing Authority, be, and is hereby, relieved of financial liability by reason of erroneous payment in February 1943, in the sum of $2,386.54 under disbursing office symbol 86–774, and the Comptroller General is hereby authorized and directed to allow credit in the settlement of the accounts of Guy F. Allen, former chief disbursing officer, Treasury Department, by reason of such erroneous payment.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EDWARD W. BIGGER

The Clerk called the bill (H. R. 1653) for the relief of Edward W. Bigger.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That sections 15 to 20, inclusive, of the act entitled "An act to provide compensation for the employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, as amended (U. S. C., 1934 ed., title 5, secs. 767 and 770), are hereby waived in favor of Edward W. Bigger, who is alleged to have sustained injury in the line of duty on or about August 15, 1940, while employed as county administrative officer for the Agricultural Adjustment Administration in Marion, Crittenden County, Ark., and his claim for compensation is authorized to be considered and acted upon under the remaining provisions of such act, as amended, if he files such claim with the United States Employees' Compensation Commission not later than 60 days after the date of enactment of this act.

SEC. 2. The monthly compensation which the said Edward W. Bigger may be entitled to receive by reason of the enactment of this act shall commence on the first day of the month during which this act is enacted.

With the following committee amendments:

Page 2, line 5, strike out the words "United States" and insert "Bureau of."

Page 2, line 6, strike out the word "Commission" and insert "of the Federal Security Agency."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. HARRY L. NOVICK ET AL.

The Clerk called the bill (H. R. 1747) for the relief of Mrs. Harry L. Novick and others.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Harry L. Novick, the sum of $850, to pay to the estate of Randolph Bolles, the sum of $813.60; to pay Mr. and Mrs. John C. Clark, the sum of $320; all above claimants of Jacksonville, Fla.; to pay Marie F. Merwin, of Palatka, Fla., the sum of $926.05, in full settlement of all claims listed herein against the United States for property damage, as the result of a United States Army plane crashing in Jacksonville, Fla., on July 20, 1944: *Provided*, That no part of the amounts appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with these claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 1, line 5, after "Mrs.", strike out the bill down to the colon in line 2, page 2, and insert in lieu thereof "Margaret Lee Novick, of Miami, Fla., the sum of $275; to pay the estate of Randolph Bolles, deceased, of Jacksonville, Fla., the sum of $639; to pay to Mr. and Mrs. J. C. Clark, of Jacksonville, Fla., the sum of $203; to pay to Marie F. Merwin,

of Palatka, Fla., the sum of $466, in full settlement of all claims of said parties against the United States for property damages sustained by them as the result of the crash of two United States Army airplanes in Jacksonville, Fla., on July 20, 1944."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

The title was amended so as to read: "A bill for the relief of Mrs. Margaret Lee Novick and others."

MICHAEL ABARNO

The Clerk called the bill (H. R. 2009) for the relief of Michael Abarno.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Michael Abarno, Staten Island, N. Y., the sum of $15,000. The payment of such sum shall be in full settlement of all claims of the said Michael Abarno against the United States on account of the death of his minor son, Vito Abarno, who was fatally injured on July 15, 1943, when the automobile in which he was a passenger was struck by a United States Army truck at the intersection of Tompkins Avenue and Wadsworth Avenue, Staten Island, N. Y.

With the following committee amendments:

Page 1, line 5, strike out "Michael" and insert in lieu thereof "the estate of Vito."

Page 1, line 6, strike out "$15,000" and insert in lieu thereof "$5,000."

Page 1, line 7, strike out "Michael" and insert in lieu thereof "estate."

Page 1, line 8, strike out "his minor son."

At the end of bill add ": *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of the estate of Vito Abarno."

A motion to reconsider was laid on the table.

FRANK A. CONSTABLE

The Clerk called the bill (H. R. 2269) for the relief of Frank A. Constable.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Frank A. Constable, Detroit, Mich., the sum of $1,211.61. The payment of such sum shall be in full settlement of all claims of the said Frank A. Constable against the United States on account of personal injuries and property damage sustained by him on May 12, 1942, when an automobile owned and driven by him was struck by a United States Army truck at the intersection of Woodward Avenue and Eleven Mile Road, Detroit, Mich.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 6, strike out "$1,211.61" and insert "$711.61."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ORAN CURRY

The Clerk called the bill (H. R. 2386) for the relief of Oran Curry.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent that the bill S. 944, which is an identical bill, be substituted for the House bill.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to Oran Curry, of Neola, Utah, the sum of $587.33, in full satisfaction of his claim against the United States as compensation for quarters in connection with services rendered the Bureau of Indian Affairs, Department of the Interior, at the Uintah-Ouray Indian Agency and Reservation in Utah, from May 1926 through March 1933, inclusive, this being the amount due him and remaining unpaid under his contract of employment, as certified by the Commissioner of Indian Affairs: *Provided*, That no part of the amount appropriated by this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding $1,000.

SEC. 2. No charge shall be made against the disbursing officer or the certifying officer nor shall any claim be made against Oran Curry, for the amount of the overpayment of $35 made on certificate of settlement No. 0858898, dated August 21, 1944.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar House bill (H. R. 2386) was laid on the table.

A motion to reconsider was laid on the table.

HARDY H. BRYANT

The Clerk called the bill (H. R. 2479) for the relief of Hardy H. Bryant.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated to Hardy H. Bryant, the sum of $2,032.34, in full settlement of all claims against the United States for performance of certain service not covered by his contract with the Post Office Department to carry mail on screen wagon route 450002 at Beaumont, Tex.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JAMES W. ADKINS AND MARY CLARK ADKINS

The Clerk called the bill (H. R. 2489) for the relief of James W. Adkins and Mary Clark Adkins.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $10,000, to James W. Adkins and Mary Clark Adkins, of Moncks Corner, South Carolina, in full settlement of all claims against the United States for the death of their son, James Jervey Adkins, sustained as the result of a bullet fired from a .22-caliber automatic pistol in the hands of a United States Navy officer from the deck of a vessel in the waters of the Cooper River, in Berkeley County, South Carolina, on March 8, 1945: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 5, strike out "$10,000" and insert "$5,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

E. W. EATON COAL CO.

The Clerk called the bill (H. R. 2697) for the relief of E. W. Eaton Coal Co.

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

LEGAL GUARDIAN OF ROSE MARY AMMIRATO

The Clerk called the bill (H. R. 2729) for the relief of the legal guardian of Rose Mary Ammirato, a minor.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to pay the sum of $5,000 to the legal guardian of Rose Mary Ammirato, a minor, of Brooklyn, N. Y., for personal injury on August 30, 1944, by reason of the negligent driving of a post-office truck which resulted in certain injuries: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, strike out lines 6, 7, and 8 and insert in lieu thereof the following: "in full settlement of all claims against the United States for personal injuries, medical, hospital, and other expenses sustained as a result of an accident involving a United States mail truck at the intersection of Fourteenth Avenue and Sixty-first Street, Brooklyn, N. Y., on August 20, 1944: *Provided*,".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

E. J. BRENNAN AND JANET HOWELL

The Clerk called the bill (H. R. 3067) for the relief of E. J. Brennan and Janet Howell.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States is hereby authorized and directed to allow credit in the accounts of E. J. Brennan, Chief Disbursing Officer, in the amount of $220.70, for moneys advanced to Janet Howell, agent-cashier at the National Training School for Boys, which was stolen from the safe at the institution on April 12, 1946, and that Janet Howell, agent-cashier, also be relieved of accountability in that amount; and that the Secretary of the Treasury be authorized and directed to pay out of any moneys not otherwise appropriated the sum of $35.17 to Janet Howell to be credited to the personal accounts of inmates whose funds were stolen at the same time.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. MAE H. FITZGERALD

The Clerk called the bill (H. R. 3159) for the relief of Mrs. Mae H. Fitzgerald.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Mae H. Fitzgerald, of Mineral Wells, Tex., the sum of $10,742.15, in full settlement of all claims against the United States for personal injuries, medical and hospital expenses, and property damages, sustained as the result of an accident involving a United States Army truck and trailer on Highway No. 77 near Davis, Okla., on November 4, 1944: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 6, strike out "$10,742.15" and insert "$5,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARTIN A. KING

The Clerk called the bill (H. R. 3300) for the relief of Martin A. King.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Martin A. King, postmaster at Clarks Summit, Pa., is relieved of all liability to refund to the United States the sum of $410.53. Such sum represents a shortage in the amount of the said postmaster caused, without fault on his part, by the robbery of post-office funds on the night of July 27–28, 1934, from the post-office vault. The Comptroller General is authorized and directed to credit the account of said postmaster in the sum of $410.53. The sureties of the said postmaster are released from any liability to refund to the United States the whole or any part of such sum of $410.53.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JESSE L. PURDY

The Clerk called the bill (H. R. 3550) for the relief of Jesse L. Purdy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Jesse L. Purdy, a classified city carrier in the United States post office, Akron, Ohio, the sum of $55.47. Such sum represents the salary (a) which was paid to the said Jesse L. Purdy for 7 days annual leave and 1 day sick leave taken by him during the period beginning July 16, 1945, and ending January 15, 1946, while he was on duty as a temporary rural carrier, and (b) which he was required to refund to the United States because he was not entitled to payment for such leave. The said Jesse L. Purdy took such annual and sick leave after having been erroneously advised by post-office officials that he would be paid for such leave.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WILLIAM C. REESE

The Clerk called the bill (H. R. 3937) for the relief of William C. Reese.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay William C. Reese, of Birmingham, Ala., out of any money in the Treasury not otherwise appropriated, the sum of $3,500, in full satisfaction of his claim against the United States for personal injuries sustained from the kick of a mule on October 15 or 25, 1917, while the said William C. Reese was in the performance of his duty as an employee of the Goodrich Construction Co. engaged in the construction of an Army camp as a subcontractor under authority of the United States, said injury having been sustained through the negligent or reckless act of a soldier of the United States Army in charge of such mule whilst in the performance of his duties as such soldier: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. CLINTON R. SHARP

The Clerk called the bill (S. 84) for the relief of Mrs. Clinton R. Sharp.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provisions of law excluding persons of races ineligible to citizenship from admission to the United States (8 U. S. C. 213 (c), 703), Mrs. Clinton R. Sharp, Japanese wife of Clinton R. Sharp, a United States citizen and veteran of World War I, if otherwise admissible under the immigration laws, may be admitted to the United States for permanent residence upon application hereafter filed without presenting immigration visas or other travel documents. Upon such admission, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the quota for the Japanese of the first year that the said quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

IOANNIS STEPHANES

The Clerk called the bill (S. 136) for the relief of Ioannis Stephanes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General of the United States be, and is hereby, authorized and directed to cancel deportation proceedings in the case of Ioannis Stephanes (alias John Stephens), of Mountain City, Nev., who entered the United States in August 1925 and has remained in the United States longer than permitted by law and regulation, and that this alien shall be considered as having been admitted for permanent entry as of the date of his actual entry on payment of the visa fee of $10 and head tax of $8.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNA M. KINAT (MRS. JOHN P. TAYLOR)

The Clerk called the bill (S. 166) for the relief of Anna M. Kinat (Mrs. John P. Taylor).

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General be, and he is hereby, directed to cancel the outstanding order and warrant of deportation in the case of the alien, Anna M. Kinat (Mrs. John P. Taylor), and she shall not again be subject to deportation by reason of the same facts upon which said warrant and order have issued.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. YONEKO NAKAZAWA

The Clerk called the bill (S. 167) for the relief of Mrs. Yoneko Nakazawa.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding any provision of the immigration laws, Mrs. Yoneko Nakazawa, who was admitted to the United States on May 16, 1930, as the minor child of a treaty trader, is hereby declared to have been lawfully admitted to the United States for permanent residence.

SEC. 2. The Attorney General of the United States is authorized and directed to cancel all outstanding deportation proceedings in respect to the said Mrs. Yoneko Nakazawa. Upon the enactment of this Act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the quota for the Japanese of the first year that the said quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

THOMAS ABADIA

The Clerk called the bill (S. 185) for the relief of Thomas Abadia.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws Thomas Abadia, of Lava Hot Springs, Idaho, shall be held and considered to have lawfully entered the United States for permanent residence in 1940, the date of his actual entry into the United States, upon the payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of Thomas Abadia upon the ground of unlawful residence in the United States.

SEC. 2. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Spanish immigration quota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SANTIAGO NAVERAN

The Clerk called the bill (S. 186) for the relief of Santiago Naveran.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is directed to cancel forthwith any warrant of arrest, order of deportation, warrant of deportation, and bond, if any, in the case of the alien Santiago Naveran, and is directed not to issue any such further warrants or orders in the case of such alien insofar as any such further warrants or orders are based upon the same grounds as the warrants or orders required by this act to be canceled. For the purposes of the immigration and naturalization laws, the said Santiago Naveran, who arrived at Tampa, Fla., on or about July 7, 1924, as a seaman on the steamship *Sec. II*, which he deserted on or about July 10, 1924, shall, upon the payment of the required head tax, be held and considered to have been lawfully admitted to the United States for permanent residence at such place and on such date. Upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Spanish quota of the first year that such quota becomes available.

The bill was ordered to be read a third time; was read the third time, and passed, and a motion to reconsider was laid on the table.

ANTONIO ARGUINZONIS

The Clerk called the bill (S. 187) for the relief of Antonio Arguinzonis.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, Antonio Arguinzonis, of Shoshone, Idaho, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of his actual entry into the United States, upon the payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of the said Antonio Arguinzonis upon the ground of unlawful residence in the United States.

SEC. 2. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Spanish immigration quota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SIMON FERMIN IBARRA

The Clerk called the bill (S. 189) for the relief of Simon Fermin Ibarra.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, Simon Fermin Ibarra, of Twin Falls, Idaho, shall be held and considered to have lawfully entered the United States for permanent residence on March 14, 1940, the date of his actual entry into the United States, upon the payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of Simon Fermin Ibarra upon the ground of unlawful residence in the United States.

SEC. 2. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Spanish immigration quota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PEDRO UGALDE

The Clerk called the bill (S. 190) for the relief of Pedro Ugalde.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, Pedro Ugalde, of Twin Falls, Idaho, shall be held and considered to have lawfully entered the United States for permanent residence on May 18, 1940, the date of his actual entry into the United States, upon payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of Pedro Ugalde upon the ground of unlawful residence in the United States.

SEC. 2. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Spanish immigration quota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JULIAN URIARTE

The Clerk read the bill (S. 191) for the relief of Julian Uriarte.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, Julian Uriarte, of Boise, Idaho, shall be held and considered to have been lawfully admitted to the United States for permanent residence on July 19, 1931, the date of his actual entry into the United States, upon the payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of the said Julian Uriarte upon the ground of unlawful residence in the United States.

SEC. 2. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Spanish immigration quota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JUAN LLONA

The Clerk called the bill (S. 192) for the relief of Juan Llona.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws Juan Llona, of Boise, Idaho, shall be held and considered to have lawfully entered the United States for permanent residence on July 11, 1926, the year of his actual entry into the United States, upon payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of Juan Llona upon the ground of unlawful residence in the United States.

SEC. 2. Upon the enactment of this act, the Secretary of State is authorized and directed to instruct the proper quota-control officer to deduct one number from the nonpreference category of the first available Spanish immigration quota.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CERTAIN BASQUE ALIENS

The Clerk called the bill (S. 298) for the relief of certain Basque aliens.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General of the United States is hereby authorized and directed to cancel deportation proceedings in the cases of Pedro Bastida and Fidel Acordarrementeria, both of Battle Mountain, Nev., legally admitted as seamen, but who have remained in the United States longer than permitted by law and regulations, and that these aliens shall be considered as having been admitted for permanent entry as of the date of their actual entry on the payment of the visa fees of $10 and the head taxes of $8 per person.

Upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct two numbers from the Spanish quota for the first year that the said Spanish quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DAMIAN GANDIAGA

The Clerk called the bill (S. 1579) for the relief of Damian Gandiaga.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws Damian Gandiaga, of Tuscaror, Nev., shall be held and considered to have lawfully entered the United States for permanent residence on June 3, 1944, the date of his actual entry into the United States, upon the payment by him of the visa fee of $10 and the head tax of $8; and the Attorney General is authorized and directed to discontinue any deportation proceedings which may have been commenced in the case of Damian Gandiaga upon the ground of unlawful residence in the United States. Upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Spanish quota of the first year that the Spanish quota is hereafter available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HILARIO A. GOITIA

The Clerk called the bill (H. R. 353) for the relief of Hilario A. Goitia.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That for the purposes of the immigration and naturalization laws, the alien Hilario A. Goitia, 609 H Street, Los Banos, Calif., shall be held and considered to have been lawfully admitted at Galveston, Tex., on February 10, 1927, to the United States for permanent residence.

With the following committee amendment:

At the end of the bill insert "upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the first available quota for Spain."

The committee amendment was agreed to.

Mr. POTTS. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. POTTS: Page 1, line 7, after "residence", insert "upon the payment by him of the visa fee of $10 and the head tax of $8."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BETTY ISABEL SCHUNKE

The Clerk called the bill (H. R. 421) for the relief of Betty Isabel Schunke.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provisions of the fifth category of section 3 of the Immigration Act of February 5, 1917 (39 Stat. 875–878, 8 U. S. C. 136 (c)), the Attorney General is authorized and directed to permit the entry into the United States for permanent residence of Betty Isabel Schunke, Potts Point, Sydney, Australia; wife of Sgt. Edwin A. Schunke, United States Army.

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That, notwithstanding the provisions of the eleventh category of section 3 of the Immigration Act of 1917, as amended (8 U. S. C. 136 (e)), Betty Isabel Schunke, the wife of a citizen of the United States who served honorably in the armed forces of the United States during World War II, may be admitted to the United States for permanent residence under the act approved December 28, 1945 (Public Law 271, 79th Cong.), if she is found otherwise admissible under the provisions of the immigration laws."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MICHEL FERAPONTOW

The Clerk called the bill (H. R. 892) for the relief of Michel Ferapontow.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Michel Ferapontow, upon payment of the required head tax, be considered, for the purposes of the immigration and naturalization laws, to have been lawfully admitted to the United States for permanent residence at the port of New York on or about November 29, 1945. Upon the enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Russian quota of the first year that the same Russian quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

VIKTOR A. KRAVCHENKO

The Clerk called the bill (H. R. 896) for the relief of Viktor A. Kravchenko.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, the alien Viktor A. Kravchenko, of New York, N. Y., shall not be subject to the provisions of the act of October 16, 1918, as amended (U. S. C., 1940 ed., title 8, sec. 137), of section 19 of the act of February 5, 1917, as amended (U. S. C., 1940 ed., title 8, sec. 155), and of sections 305 and 328 of the Nationality Act of 1940, as amended (U. S. C., 1940 ed., title 8, secs. 705 and 728); and for the purposes of the immigration and naturalization laws, the said Viktor A. Kravchenko shall be held and considered to have been lawfully admitted as of September 1, 1944, to the United States for permanent residence.

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That the Attorney General is directed to record the admission to the United States on August 18, 1943, at Niagara Falls, N. Y., of the alien Viktor A. Kravchenko, as a lawful admission for permanent residence. In the administration of the immigration laws, the said Viktor A. Kravchenko shall not be regarded as having been at any time prior to the enactment of this act a person within the provisions of the act of October 16, 1918, as amended (U. S. C., 1940 ed., title 8, sec. 137), or those parts of sections 3 and 19 (a) of the act of February 5, 1917, as amended (U. S. C., 1940 ed., title 8, secs. 136 and 155 (a)), which relate to aliens who advocate or teach the unlawful destruction of property, or anarchy, or the overthrow by force or violence of the Government of the United States or of all forms of law or the assassination of public officials, or similar classes, and he may be naturalized, if otherwise eligible, regardless of the provisions of section 305 of the Nationality Act of 1940, as amended (U. S. C., 1940 ed., title 8, sec. 705).

"SEC. 2. Upon the enactment of this act, the Secretary of State shall reduce by one number the quota of the alien's nationality for the fiscal year then current or next following."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BASQUE ALIENS

The Clerk called the bill (H. R. 1572) for the relief of Basque aliens.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General of the United States be, and is hereby, authorized and directed to cancel deportation proceedings in the cases of Bartolome Errea, Marcelino Yturbe, Francisco Lorono, Pete Elguezabal, Zenon Zubieta, Francisco Alluntiz, Damin Gandiaga, Manuel Zulueta, Jose Antonio Odriozola, Fidel Acordarrementeria, and Pedro Bastida, all of eastern Nevada, legally admitted as seamen but who have remained in the United States longer than permitted by law and regulations, and that these aliens shall be considered as having been admitted for permanent entry as of the date of their actual entry on the payment of the visa fees of $10 and head taxes of $8 per person.

Upon the enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct 11 numbers from the Spanish quota for the first year that the said Spanish quota is available.

With the following committee amendments:

Page 1, line 7, strike out "Damin Gandiaga," and after "Zulueta" insert "and."

Line 8, strike out "Fidel Acordarrementeria, and Pedro Bastida."

Page 2, line 5, strike out "eleven" and insert "eight."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PHILIP LEE SJOERDT HUIZENGA

The Clerk called the bill (H. R. 1859) for the relief of Philip Lee Sjoerdt Huizenga.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws Philip Lee Sjoerdt Huizenga shall be held and considered to have been lawfully admitted to the United States for permanent residence on November 5, 1945, at San Francisco, Calif., if he is admissible under the immigration laws other than those relating to quotas. Upon enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the quota for China during the first year that the said China quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARGARET KATHERINE HUME

The Clerk called the bill (H. R. 1927) for the relief of Margaret Katherine Hume.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is directed to cancel forthwith any warrant of arrest, order of deportation, warrant of deportation, and bond, if any, in the case of the alien Margaret Katherine Hume, of Fortine, Mont., and is directed not to issue any such further warrants or orders in the case of such alien insofar as any such further warrants or orders are based upon the same grounds as the warrants or orders required by this act to be canceled. For the purposes of the immigration laws, the said Margaret Katherine Hume shall be held and considered to have been lawfully admitted to the United States for permanent residence on the date and at the place of her last entry therein.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. MARIAN D. McC. PLEIN

The Clerk called the bill (H. R. 3039) for the relief of Mrs. Marian D. McC. Plein.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding the provisions of eleventh category of section 3 of the Immigration Act of 1917 (8 U. S. C. 136 (c)), Marian D. McC. Plein, the wife of a citizen of the United States who served honorably in the armed forces of the United States during World War II, may be admitted to the United States for permanent residence under the act approved December 28, 1945 (Public Law 271, 79th Cong.), if she is found otherwise admissible under the provisions of the immigration laws.

With the following committee amendments:

Page 1, line 5, strike out "(c)" and insert "(e)."

Line 5, after the first comma, insert "as amended."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. FLORENCE BYVANK

The Clerk called the bill (H. R. 1009) for the relief of Mrs. Florence Byvank.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs be, and he is hereby, authorized and directed to pay the amount of the insurance under the Government life-insurance policy (No. K 720604) of Clarence A. Byvank to Florence Byvank, his widow and designated beneficiary, in accordance with the terms of such policy, beginning with the first calendar month following the month during which this act is enacted, notwithstanding the lapse of such policy in December 1931. The insured, Clarence A. Byvank, applied for reinstatement of such policy in February 1932 and transmitted payment for back premiums thereon at the time of application but died suddenly from monoxide gas poisoning on March 30, 1932, before a report of his medical examination had been filed with the Veterans' Administration.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FRANK DURANTE AND OTHERS

The Clerk called the bill (H. R. 3224) to authorize the cancellation of deportation proceedings in the case of Frank Durante and wife, Maria Durante, and two children, namely, Paul Durante and Patsy Durante.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is hereby authorized and directed to cancel the outstanding order and warrant of deportation issued pursuant to sections 19 and 20 of the Immigration Act of February 5, 1917 (39 Stat. 889, 890; U. S. C., title 8, secs. 155 and 156), in the case of Frank Durante, Maria Durante, Paul Durante, and Patsy Durante, any provision of existing law to the contrary notwithstanding. From and after the date of the approval of this act, Frank Durante, Maria Durante, Paul Durante, and Patsy Durante shall not again be subject to deportation by reason of the same fact upon which the outstanding proceedings rest.

With the following committee amendments:

On line 7, after the name "Durante", strike out the comma and insert the word "and."

On line 8, after the name "Durante" and the comma strike out the names "Paul Durante and Patsy Durante."

On line 10, after the name "Durante", strike out the comma and insert the word "and."

On line 11, after the name "Maria Durante", strike out the comma and the names "Paul Durante, and Patsy Durante."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Frank and Maria Durante."

A motion to reconsider was laid on the table.

ROBERT WILHEM GERLING

The Clerk called the bill (H. R. 3742) for the relief of Robert Wilhem Gerling.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws, the Attorney General of the United States shall record the lawful admission of Robert Wilhem Gerling, of New York City, N. Y., as of August 4, 1939, the date on which he was lawfully temporarily admitted to the United States. The said alien shall be admitted to become naturalized without complying with the provisions of section 331 of the Nationality Act of 1940, as amended (54 Stat. 1153; 8 U. S. C. 731): *Provided*, That he is found otherwise eligible for naturalization under all the provisions of existing laws.

With the following committee amendments:

On page 1, line 5, after the word "admission", insert the words "for permanent residence."

On page 1, line 5, substitute the name "Wilhelm" for "Wilhem."

On page 1, lines 8 to 13, inclusive, strike out all following the period after the word "States."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Robert Wilhelm Gerling."

A motion to reconsider was laid on the table.

DOMINGO GANDARIAS

The Clerk read the bill (H. R. 3849) for the relief of Domingo Gandarias.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General of the United States be, and is hereby, authorized and directed to cancel deportation proceedings in the case of Domingo Gandarias, of eastern Nevada, legally admitted as a seaman but who has remained in the United States longer than permitted by law and regulations, and that this alien shall be considered as having been admitted for permanent entry as of the date of his actual entry on the payment of the visa fee of $10 and a head tax of $8.

Upon the enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Spanish quota for the first year that the said Spanish quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LADISLAO VAIDA AND OTHERS

The Clerk called the bill (H. R. 4403) for the relief of Ladislao Vaida, Elena Vaida, and Stefano Vaida.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General be, and he is hereby, authorized and directed to record the lawful admission for permanent residence of Ladislao Vaida, Elena Vaida, and Stefano Vaida, who entered the United States at New York on December 28, 1945, and that they shall, for all purposes under the immigration and naturalization laws, be deemed to have been lawfully admitted as immigrants for permanent residence as of that date. Upon the enactment of this act, the Secretary of State shall thereupon reduce by one number the immigration quota of Czechoslovakia, and by two numbers the immigration quota of Hungary, for the current fiscal year.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOHN A. DILBOY

The Clerk called the bill (H. R. 1912) for the relief of John A. Dilboy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws the Attorney General be, and he is hereby, authorized and directed to record the lawful admission for permanent residence of John A. Dilboy as of July 2, 1925, the date he was admitted temporarily to the United States. Upon the enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Turkish quota of the first year that the said Turkish quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MABLE GLADYS VIDUCICH

The Clerk called the bill (H. R. 2557) for the relief of Mable Gladys Viducich.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding the provisions of the eleventh category of section 3 of the Immigration Act of 1917 (8 U. S. C. 136 (3)), Mable Gladys Viducich, the wife of a citizen of the United States who served honorably in the armed forces of the United States during World War II, may be admitted to the United States for permanent residence under the act approved December 28, 1945 (Public Law 271, 79th Cong.), if she is found otherwise admissible under the provisions of the immigration laws.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. That completes the call of the bills on the Private Calendar.

CHARLES E. CROOK

Mr. DOLLIVER. Mr. Speaker, I ask unanimous consent that the bill (H. R. 2268) for the relief of Charles E. Crook be restored to the Private Calendar.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

EDWARD H. ISENHART

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent that the bill (S. 664) for the relief of Edward H. Isenhart be restored to the Private Calendar.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

EXTENSION OF REMARKS

Mr. MANSFIELD asked and was given permission to extend his remarks in the Appendix of the RECORD.

AMENDING CERTAIN PROVISIONS OF THE RECLAMATION PROJECT ACT OF 1939

Mr. CHENOWETH. Mr. Speaker, I call up House Resolution 430 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939. That after general debate, which shall be confined to the bill and continue not to exceed 3 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Lands, the bill shall be read for amendment under the 5-minute rule. It shall be in order to consider without the intervention of any point of order the substitute committee amendment recommended by the Committee on Public Lands now in the bill, and such substitute for the purpose of amendment shall be considered under the 5-minute rule as an original bill. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and any member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Colorado [Mr. CHENOWETH] is recognized for 1 hour.

Mr. CHENOWETH. Mr. Speaker, I yield 30 minutes to the gentleman from Virginia [Mr. SMITH].

I now yield myself such time as I may require.

Mr. Speaker, House Resolution 430 makes in order the consideration of H. R. 2873, which is a bill to amend certain provisions of the Reclamation Project Act of 1939. This bill is known as the Rockwell bill, as it was introduced by my distinguished colleague from Colorado, who is chairman of the subcommittee of the Committee on Public Lands that reported this legislation.

This is an open rule, providing for 3 hours' general debate. I understand that the bill was reported unanimously by the House Committee on Public Lands. However, in order to be entirely frank and honest with the House, I must state that the bill does not come to the floor with the unanimous approval of the Rules Committee. There was a division in our committee and some members are opposed to certain provisions of the bill. They voted to report this measure to the House with the understanding that their opposition be noted.

Mr. Speaker, this is a very important piece of legislation. It is a complicated and intricate bill. It is exceedingly technical in its terms. I am not going to undertake to explain the bill, because I am sure the committee will be able to do that to the entire satisfaction of the House. As I have indicated, there is controversy over certain provisions of this bill and a sharp difference of opinion concerning some of its provisions.

Mr. Speaker, the accomplishments under our reclamation program are recognized by all. We have seen the benefits which have accrued from the great reclamation projects in the Western States. I am confident Congress will continue to develop and expand this program.

This is one of several bills, as I understand, which the Committee on Public Lands will bring to the House to perfect the procedure involved in approving new projects, and to clarify existing rules and regulations. This bill has the approval of Mr. Straus, Commissioner of the Bureau of Reclamation.

This is a bill over which there has been a great deal of controversy and wide differences of opinion in the committee. The Committee on Irrigation and Reclamation has been working on this legislation for more than 3 years. I understand it is a compromise measure; that it is not exactly what any member of the committee desired, but in order to bring a bill to the House it was necessary for members to give and take. The different members have made concessions in order that the bill might be reported out.

I am going to mention one or two provisions over which there will be controversy. There will be considerable debate over the period of time specified in this bill for the repayment of power projects. At the present time 50 years is the time fixed for the repayment of money used for the development of public power. This period is now being extended to 78 years. I know some of the Members feel that is a little too long. However, the bill is open to amendment, and every Member will have an opportunity to express his attitude.

Another controversial feature is the interest rate to be charged on power projects. At the present time interest is being charged on the amount allocated to power on these projects at the rate of 3 percent. The Reclamation Act of 1939 is not altogether clear on just what disposition is to be made of the funds obtained from this interest charge. Under what is known as the Solicitor's opinion, rendered several years ago, all of this money has been retained by the Bureau of Reclamation for expenditure on the project. This practice has not met with the approval of the irrigation and water people of the West who have contended that these funds should have been returned to the reclamation fund in the Treasury Department and reappropriated for the development of additional reclamation projects. A compromise was finally worked out, as you will note from the bill. This interest rate has been reduced to 2½ percent, of which 2 percent is turned back to the reclamation fund in the Treasury Department, to be reappropriated by Congress for the development of other projects. One-half of 1 percent is to be retained by the Bureau for use on the particular project on which the interest is collected.

The bill also provides that recreation, silt control, as well as fish and wildlife preservation, may be taken into consideration by the Secretary of the Interior in determining whether or not any particular project is feasible. I know some members of the Rules Committee expressed concern over this provision. I believe, however, that there is nothing to be disturbed about, and in my opinion the amount which would be charged to these particular features would be very small as compared with the cost of the entire project.

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield?

Mr. CHENOWETH. I yield.

Mr. SMITH of Virginia. The gentleman mentioned the fish and wildlife provision. What limitation is there in the bill as to how much may be charged that leads the gentleman to the conclusion that it will not be very much?

Mr. CHENOWETH. There is no limitation, I may state to the gentleman from Virginia, but the bill makes no change in the present procedure for the approval of reclamation projects. In other words, the Secretary must determine that the project is feasible before he can proceed with the construction of the same. If the allocations do not equal the total estimated cost then he must submit the project to Congress and we will have the opportunity of passing upon the amounts charged to recreation, fish and wildlife, and all other estimates in his report.

Mr. Speaker, I will not take further time to mention other provisions of the bill. I wish to state that I am going to stay with the committee on this bill. I do not think anyone is fully satisfied with this measure, but it is the best the committee can write after 3 years of work.

I feel that it is a question of taking this bill or have no legislation at all. I believe that some legislation is very desirable and essential at this time in order to promote and develop reclamation in our Western States.

We must develop the natural resources of our country. It has been proven that reclamation is of benefit not only to the arid States of the West where these projects are located, but to the entire Nation. Water is the life blood of the West and turns deserts into garden spots. The Subcommittee on Irrigation and Reclamation has determined this bill to be necessary. I urge that the rule be adopted and the bill pass as submitted by the committee.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER. The gentleman from Colorado has consumed 7 minutes.

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Arizona [Mr. MURDOCK].

Mr. MURDOCK. Mr. Speaker, this rule makes in order consideration of a bill that is highly important to the West. I must say that this legislation is long overdue, for some such legislation as that contained in the bill that will be brought before the House under the adoption of this rule has been called for during the past 3 or 4 years.

As early as 1945 there was a call made by several Members of this House for clarifying legislation. The law that is sought to be clarified is the Reclamation Act of 1939. One part of that act seemed ambiguous and there was a difference of opinion, and a controversy arose over the interpretation of that act. It was therefore sought to be clarified, and after many, many weeks of hearings beginning back in 1946 the bill that is before us was reported out by the Public Lands Committee. It was a unanimous report on the part of the Public Lands Committee, and I hope that the House will not hesitate to vote this rule so that the merits of the measure can be fully discussed. The Appropriations Committee, one of the great committees of this House, has asked for some such legislation as is before us if the rule is voted. If no action is taken today and this measure is not made in order, no chance to clear up the confusion may occur and the cause of reclamation would be hampered.

Mr. SMITH of Virginia. Mr. Speaker, I yield myself such time as I may consume.

The SPEAKER. The gentleman from Virginia is recognized.

Mr. SMITH of Virginia. Mr. Speaker, this bill is of far more importance to reclamation and to the country generally than the sparse attendance of the Members this morning would seem to indicate.

This bill makes some very radical changes in the Reclamation Act. I believe every Member of Congress is deeply sensible to the advantages of reclamation and the necessity for these reclamation projects, and, therefore, it is all the more important that legislation on this subject should be sound and should be businesslike. We should not let down the bars to logrolling and pressure groups, but we should continue the program upon a sound businesslike basis.

Now, there are some things in this bill to which I wish to call attention this morning because I think it ought to go back to the committee from which it came and be corrected. I am not the only one who thinks so. I know reclamation is a popular vote-getting subject in some areas of the country, but I think you have got to put it on a broader principle than that if you are going to sustain the program over the years and the generations that are to follow. There is such a wide field in the matter of reclamation in the West that this Congress should not take the responsibility of weakening that program by inappropriate concessions in order that unsound projects may be approved.

Let us discuss the method by which these reclamation projects are approved. There are certain principles laid down under which the Secretary of the Interior shall examine each individual project, and if he is convinced that it will be self-liquidating over a certain period of years, then he shall so certify and it then becomes automatically authorized. If the Members of this House think that after a project is proposed in the future it will come back here and you may have the opportunity to correct it by authorization, I want you to be disabused of that impression because under this bill—and under present law for that matter—you have delegated absolutely to the Secretary of the Interior the power to authorize any project that he sees fit under the terms laid down by this bill.

Mr. BARRETT. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Wyoming.

Mr. BARRETT. Of course, the gentleman knows that the Secretary of the Interior would have to come back to this Congress to get an appropriation, even though he found the project to be feasible.

Mr. SMITH of Virginia. Yes.

Mr. BARRETT. And the House would have to vote on it.

Mr. SMITH of Virginia. Of course, you have to get an appropriation for anything that is authorized, but it is the function of the Congress to authorize appropriations and you have delegated to the Secretary of the Interior the function which the Congress is supposed to perform.

Mr. BARRETT. That delegation was made quite some time back and it is existent at the present time.

Mr. SMITH of Virginia. Yes; it is existing law.

Mr. BARRETT. That is right.

Mr. SMITH of Virginia. That is one thing which surprises me about my friends who are now in control of the House. You have inveighed for years against bureaucracy and against delegation of authority to the bureaucrats to do this and that. I am wondering what has come over the spirit of your dreams when now you propose to reaffirm and lend your stamp of approval to this delegation of authority which is your constitutional duty to perform.

Mr. CHENOWETH. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Colorado.

Mr. CHENOWETH. I merely want to call the attention of the gentleman from Virginia to what the gentleman from Wyoming mentioned. There is no change being made in the present procedure by this bill.

Mr. SMITH of Virginia. That is what I am quarrelling about and I am surprised at gentlemen on that side of the aisle not desiring to make some change.

Mr. CHENOWETH. It is my understanding this committee is making a further study of the reclamation law and it is very possible the committee will come in later with some such provision as the gentleman is now suggesting. The present controversy deals principally with the interest charges and the period in which the project may pay back. I do not know whether the committee gave any attention to the other or not. I am not informed on that.

Mr. SMITH of Virginia. I am glad that the gentleman has finally paid such a fine compliment to the Democratic bureaucrats that they are willing to continue and reaffirm by legislation this delegation of authority.

Now, let us see what is in this bill that is new. Well, the law as presently laid down is that in order for the Secretary of the Interior to authorize one of these programs he must find that certain things exist, certain advantages, and they are enumerated in the present law. But, this bill adds to those things. This bill arranges it so under provision No. 7, which you will find on page 5 of the bill, that in determining the feasibility of a program, of a proposed project, that the Secretary of the Interior shall take into consideration not only the commercial benefits, not only the flood-control benefits, not only the irrigation benefits, but shall take into consideration recreational advantages and the preservation and propagation of fish and wildlife, and when they do take that into consideration there is no limitation of how much of this allocation may be charged up to propagation of wild tadpoles and other

wildlife, and after you have done that it is further provided that this provision to take care of the fish and rabbits and other wildlife shall not be charged back and shall never come back into the Treasury of the United States.

Now, is that sound, gentlemen? Does that sound businesslike, or is that what you Republicans, in the days of Harry Hopkins, used to call boondoggling? I am sort of ashamed of you fellows when you bring in a provision like that, and I say it in all seriousness, and I mean what I say that this bill ought to go back to committee. I remember when you gentlemen came into power in this House, a lot of people in this country were encouraged; they were encouraged to believe that you were going to have sound policies; that you were not going to propose any boondoggling; that you meant what you said about Harry Hopkins and the other New Deal boondoggling projects that too much money had been spent on, and we were encouraged to believe that you were going to help economize and balance the budget and bring down the cost of Government. And I voted with you a lot of times last year in the hopes you were going to do it and meant business. I remember that you started out pretty good and you voted down a lot of the reclamation appropriations that you did not think were sound. But something happened. Somebody got scared. An election year was coming on. And, after you had cut out all those projects and had reduced the budget some—you know you promised to reduce it $6,000,000,000—and when you got done, when you finished up and put in all of these reclamation projects and all the other little things that the logrolling was about, what happened to that budget that you were going to cut $6,000,000,000? Get your pencil and look, and you will find that when you get through with this year's appropriations you will have appropriated more money than the President of the United States recommended in his budget.

Now, gentlemen, I am interested in reclamation. Everybody is interested in reclamation, but if this reclamation business is going to work it has got to be sound. You cannot mix up sound reclamation with the preservation of fish, and recreation, and tadpoles, and rabbits and all the other little old things that you have got mixed up in this bill. Now, all of you know it. Why do you not take this bill back to your committee and cut out the boondoggling and bring in a bill here that we can all be happy about and proud to support? What is the reason for this boondoggling provision about the fish and the wildlife? Now, you understand that whenever you build a dam you are going to make a nice swimming hole and you will probably make a few little swimming holes back in the tributary streams, and you will revive the old swimming hole that the boys used to go to after school and sometimes before school was out, and I reckon that the Secretary of the Interior is going to have to take a census of all the little fish in those creeks so as to see how much of this can be charged up to boondoggling and then, of course, you have to take a census of the rabbits, and you have to take a census of the tadpoles, and then you have to figure out the infant mortality of the tadpoles so as to figure how many are going to turn into good edible frog legs in the course of time. Is that what you gentlemen are offering the people of the United States as an economy program? Do you mean what you have got in this bill, or do you mean what you are telling the people of the United States and what I hope you meant when you told the people of the United States? Are you going to pass this bill this morning and put your stamp of approval on a boondoggling project that Harry Hopkins in his brightest dreams never conceived of? Is that what you are offering the people of the United States as a program? All right.

I know what I say is not going to amount to a hill of beans. You are going on here today. You are going to talk about reclamation for 3 hours, so you can send some speeches back home and maybe mend up a few of the holes that you made last year when you cut out some of this stuff. That is what you are going to do. When it is all over, you are going to vote for this bill, Democrats and Republicans, and you are going to put this hoax on the people of the United States. When you do it, you are doing the greatest kind of an injury to the reclamation doctrine itself, because all reclamation is based upon the idea that this money is going to be paid back in a period of time, and that that same money, as Congresses come and go and generations come and go, can be reappropriated so that we may have other reclamation projects in the great West. Yet you are going to stop up the flow of that money back into the Treasury, you are going to stop it up by boondoggling with fish and rabbits and what have you.

Mr. CHENOWETH. Mr. Speaker, I yield 5 minutes to the gentleman from Oklahoma [Mr. RIZLEY].

Mr. RIZLEY. Mr. Speaker, of course I do not believe the very ingenious argument made by the distinguished gentleman from Virginia, in which he now says the Republicans have started on a boondoggling spree, is going to be taken very seriously by anyone. He has been in Congress a long time. I admire him a lot. We are on the Rules Committee together. He talks about voting with the Republicans. We respect his ability. We are glad when he votes with us, he should do so more frequently. But do you know what he is trying to do right now? The gentleman is a consistent party man. He wants to defeat this proposed legislation. Do you know what his party will be saying in a short time if it is defeated? "Look what these Republicans are doing to reclamation." He talks about tadpoles and frog ponds, and all that kind of business.

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield?

Mr. RIZLEY. No; I cannot yield right now. I have only 5 minutes. I would love to yield otherwise.

Mr. SMITH of Virginia. I wish the gentleman would yield, when he talks about me.

Mr. RIZLEY. There are some people here that happen to live out on the plains of Texas. I happen to live out on the plains of Oklahoma. Of course we do not have the Potomac flowing by as does the distinguished gentleman from Virginia. I do not think it is going to wreck the economy of this country and I do not think anybody ought to accuse anybody of boondoggling if some of these reclamation and flood-control projects have just a little bit of money in them for recreation. That is a very insignificant part of this bill, a very insignificant part.

The facts are that this legislation is needed, and needed badly. If you believe in reclamation, if you believe it is necessary to harness some of these streams and use some of the water for irrigation, then certainly we need this legislation. Let us see the position that the gentleman from Virginia would put us in. What is his remedy? His remedy is to leave the law just like it is, exactly as it is today. That is the only remedy that he suggests, except that he says he would send it back to the committee.

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield?

Mr. RIZLEY. I cannot yield right now.

Mr. SMITH of Virginia. The gentleman should not put words in my mouth unless he is willing to yield to me. That is not a fact.

Mr. RIZLEY. I will yield to the gentleman in a moment.

Mr. Speaker, the facts are that the Committee on Public Lands have been working on this bill for more than 3 years and have unanimously agreed on this bill. Talk about sending it back to the committee for further action—they have had this legislation for about 3 years and have been working on it intensely. I am not one of those who is going to come in here—and I do not know when the gentleman from Virginia first saw this bill, but I did not see it until last Friday, and I doubt if he did—but I am not going to say to the Committee on Public Lands who have been working on this bill as well as to other committees who were working on it until the reorganization bill came along, "You fellows do not know anything about what you are doing. You are just a boondoggling crowd. You are just a bunch of boondogglers and we want to send it back."

I think this rule ought to be adopted. The rule is wide open and we will have some amendments offered on the floor.

Mr. Speaker, I now yield to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. The gentleman said that I wanted to send it back. I do not care about sending it back if you will cut out the frills and foolishness contained in it. Does the gentleman favor this provision about wildlife and game?

Mr. RIZLEY. I am going to do just as the gentleman from Virginia is going to do. I am going to be here and vote for such amendments as I favor, and I will vote against those amendments which I do not believe should be in the bill.

Mr. SMITH of Virginia. That is a fair enough answer to my question.

Mr. BARRETT. Mr. Speaker, will the gentleman yield?

Mr. RIZLEY. I yield to the gentleman.

Mr. BARRETT. It seems to me that the gentleman from Virginia is taking a rather inconsistent position, if I understand correctly. He contends that these big flood-control dams should be constructed in these Eastern States on a wholly nonreimbursable basis, so that the people of those States do not pay a nickel toward the cost of construction of the dam. But when it comes to a matter of building them out West, he takes an entirely different position and says that the multiple-purpose dams built in the West, part for flood control, part for navigation, part for irrigation, should be paid for in their entirely by the farmers, and that none of the cost should be nonreimbursable, and that all of these other items which are for the benefit of the general public should not be charged to the public, but should be charged to the poor farmers who are trying to make an honest dollar.

Mr. RIZLEY. I think the gentleman's observation is very well taken.

Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

Mr. RIZLEY. I yield.

Mr. MURDOCK. This item on wildlife conservation is not really insignificant and certainly I do not believe such expenditure can be classed as boondoggling. Remember when we build a dam on the great rivers of the Northwest, if we do not put in fish ladders, we are going to destroy or injure the salmon industry. Putting in such fish ladders has been done along the Columbia River, and should be done elsewhere. A great industry depends upon it. Should that be charged up to the farmers who use the water? I contend it should not be. It should be a nonreimbursable item. There are other nonreimbursable provisions in this bill that ought to be considered favorably.

Mr. SMITH of Virginia. Mr. Speaker, I have no further requests for time.

Mr. CHENOWETH. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. RICH].

Mr. RICH. Mr. Speaker, I am very much interested in reclamation, but I am interested in seeing that reclamation is carried on in this country so that it is going to be beneficial to the people in the Western States where they need reclamation, to such a degree that the people in the Western States feel that it is a wise and good thing for the United States to adopt such a bill as this one now before us.

The gentleman from Arizona [Mr. MURDOCK] spoke about the Columbia River fish ladders. You know what has happened to the fish industry on the Columbia River. You have almost wrecked it. It is not now what it used to be. You westerners are to blame for that.

Now, you also have in this bill a 78-year period for repayment, where the former legislation required repayment in 50 years. If you put in this bill 78 years before these debts are repaid, you break faith for good legislation; your own farmers out there do not want it. Your own people are not anxious to have it in the legislation, but some smart politicians are trying to adopt that with the idea that it is going to help reclamation, in the guise that the politician will benefit. Shame on the politicians.

I suggest you make the time 50 years to pay; that is too long. Ever hear of a bank making a loan for 78 years? Ever hear of one for 50 years? Then let us cut down the time and be sensible. We need all the sense we have if we want cents in the Treasury, and more water on the land.

Mr. CHENOWETH. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa [Mr. JENSEN].

Mr. JENSEN. Mr. Speaker, I have predicted that certain sections of this bill would bring about just such a show on the floor of this House as we just witnessed a moment ago.

I shall not oppose the rule. I believe that every bill as important as this should have its day in court, and should stand or fall on its own merits or demerits.

There are certain sections of this bill to which I am vigorously opposed. The Secretary of the Interior at this time, under section 9 (a) of the Reclamation Act of 1939, has more power than any man in these United States should have to authorize projects. While some may say this bill does not extend that authority, the facts are that this bill puts the stamp of approval on that authority which is granted to the Secretary of the Interior in section 9 (a) of the Reclamation Act of 1939 and then some by inference, at least, if not specific.

I am also opposed to the 78-year payout period provided in the bill. In my candid opinion, I do not think any project is economically feasible that cannot pay out in 50 years or thereabouts.

As many of you know, with two other members of the Interior Department Subcommittee on Appropriations, I took a 9,500-mile trip by automobile through the Western States last fall.

We talked to hundreds and possibly thousands of people, to people who are electric power and water users; and I can frankly say that no one expressed any great concern about the costs of electric power or water for irrigation. What they want are sufficient appropriations by Congress to insure the building of good projects. They need water, which is liquid gold to the West; and they have need for more power in some sections of the West. The thing they want is for the Congress to appropriate sufficient money to carry on those projects.

I know most of the Members of Congress, and I believe I can say all of the Members of Congress are in favor of developing the West and of appropriating sufficient money for the completion of reclamation projects, hydroelectric projects, and everything else that is proper and feasible for the Western States; but to disturb that good feeling which now exists with the bill extending the pay-off time to 78 years is disturbing to a lot of us. This Treasury of ours needs money brought into it faster rather than to have it come in slower. I did not find anybody in the Western States who was not willing to pay his bill. True, we have flood control in every section of our Nation which is nonreimbursable; which is a national responsibility. I found no one in the West who did not want to pay his own freight. I have five counties along the Missouri River. I want the Missouri Valley program to go forward under the Pick-Sloan plan, which is now doing and will continue to do a good job developing that great area which covers one-sixth of the United States. I am also deeply interested in the development of the West. If anyone feels I am not he simply does not know my heartbeats. The best indication is the fact that I spent seven long weeks together with two other members of my committee, the gentleman from Pennsylvania, Congressman FULTON, and the gentleman from Oklahoma, Congressman SCHWABE, traveling night and day and Sundays, too, to see those projects out there so as to appropriate the right amount as near as is humanly possible for each project. I know the Congress is in harmony with that purpose today. To disturb it with such a provision as is contained in this bill, giving the Secretary more power, delegating power to the Secretary of the Interior which the Congress should reserve to itself, will hurt the West. Also let me remind you, my colleagues, that 78 years is equal to the time from Grant to Truman. I shall offer amendments at the proper time.

Mr. SMITH of Ohio. Mr. Speaker, will the gentleman yield?

Mr. JENSEN. I yield.

Mr. SMITH of Ohio. This bill further sanctions public electric power development. That is the socialization of electric power development. Is not that true?

Mr. JENSEN. To some degree it might because of the fact that under the 78-year pay-off program it may not be necessary to raise Federal power rates on many hydroelectric power-producing dams to the end that private industry will not be able to compete with the Government power rates. We of this Congress must defend the private power companies who are doing a good job in most instances furnishing power at reasonable rates and giving good service. We must defend them against unfair Government competition just as vigorously as we do the farmer or the peanut vendor or the corner grocery man.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. JENSEN. I yield to the gentleman from Mississippi.

Mr. RANKIN. The gentleman spoke of the Missouri Valley project. Does that provide for a 9-foot channel on the Missouri?

Mr. JENSEN. Yes.

Mr. RANKIN. How far up?

Mr. JENSEN. To Sioux City, Iowa.

The SPEAKER. The time of the gentleman from Iowa has expired.

Mr. CHENOWETH. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. ANDREWS].

Mr. ANDREWS of New York. Mr. Speaker, in view of certain recent statements in the press regarding the relationship between the recommendations of the President's Air Policy Commission and universal military training, I find it necessary to make the following observation:

There are no grounds for reaching the conclusion, either from the recommendations of the Air Policy Commission or after an examination of present security requirements, that a 70-group air force program could be an effective substitute for universal military training. Mr. Finletter and his associates confined the scope of their excellent study to the role of air power in a future war. They did not examine the role of the ground forces or of the surface Navy, nor the means required to maintain these and their respective Reserve components at the level of strength and degree of readiness commensurate with the national safety. This training bill would provide the nucleus for Army, Navy, and Air Reserves and directly benefit the National Guard.

It is noted that the President's Advisory Commission on Universal Training, which reported its findings on May 29, 1947, set down six essentials of an integrated program, all of which it deemed absolutely necessary to the national security. These included a mobile striking air force and universal military training. The Commission did not consider one the substitute for the other. The Commission reported, "We cannot sacrifice any one of these elements for any other. They must all be taken care of at the same time."

A powerful air force will be unquestionably the first line of American defense in a future conflict. Moreover, there is justification for the hope that such a force will serve in large measure as a deterrent to aggression against the United States, though it should be emphasized that a 70-group air force, built around 700 heavy bombers, is not an overwhelming force even by standards of World War II, as the Air Policy Commission carefully points out.

It cannot, however, be considered a conclusive deterrent to an attack upon the United States. If war comes, it will come without warning, exposing the whole of the American countryside to widespread casualty, panic, and demoralization. Without trained men in every community instantly available to reorganize essential services, replace broken communications, care for the wounded, and perhaps repel airborne invaders, it is quite possible the country would never recover from the initial blow. There will be no time to train men after an emergency has arrived, yet trained men will be needed by the millions to augment the Regular forces in their counteroffensive effort, and to keep the home front intact and operative. Almost certainly it will not be possible to distinguish combatant from noncombatant. Every American will be involved.

In the circumstances, it would be exceedingly dangerous if the American people allowed themselves to be soothed by the illusion that a striking air force and universal military training are interchangeable elements of a security program. Their missions are wholly distinct. Both are required to achieve the strongest possible deterrent to attack upon the United States, or to provide the indispensable success in the event of war.

Mr. Speaker, this morning I did not object to the majority leader's request to do away with Calendar Wednesday business. At that time I explained to him that I had asked the Rules Committee and the Republican leadership of the House in an inquiry by letter as to when the members of the Armed Services Committee might be heard before the Rules Committee on the question of universal military training, and three other bills unanimously reported by the Armed Services Committee. There are 33 members of the Armed Services Committee. Two-thirds of the membership of that committee fully support the principle of universal military training.

The bill was reported by the Armed Services Committee by a vote of 20 to 0. I have in my office petitions from a million and a half Americans on this subject favoring it. Five out of six potential Republican candidates have declared in favor of it. Not one word was said at the Republican National Committee yesterday by the gentleman reporting our congressional program. He not even mentioned the name "universal military training." I say it is high time for the leadership of this House or the chairman of the Committee on Rules to either state openly that they are not going to give us a rule, or the reasons therefor. Otherwise I shall continue to object to obviating Calendar Wednesday, and when the proper time comes in the House the Armed Services Committee will call up this bill.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include an editorial appearing in the New York Times on Wednesday, January 7, entitled "The GOP and UMT."

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ANDREWS of New York. The editorial referred to is as follows:

THE GOP AND UMT

No more important legislative business faces the present session of the Eightieth Congress than that of universal military training. This newspaper believes universal military training should be adopted. We believe it must be adopted if Congress is not to fail in its duty to the citizens of this country in providing for their security and is not to fail the peace-loving people of all the world in serving notice that the United States intends to remain strong in a military way until such time as threats of national aggression no longer exist. President Truman has repeatedly urged the establishment of such a system of training, and may confidently be expected to renew this recommendation when he addresses Congress today.

The decision whether UMT will be adopted at this session rests on the Republican leadership in Congress. Every opinion poll of the people for the last 3 years has shown an overwhelming majority in favor of some program of compulsory military training. Newspaper analysts of congressional attitudes believe that if Congress is given the opportunity it will pass such a bill. Five of the six leading potential candidates for the Republican nomination for the Presidency—Dewey, Warren, Stassen, Eisenhower, and MacArthur—have unequivocally supported UMT.

As matters now stand in Congress, the House Armed Services Committee has approved a bill establishing a compromise training program which is not so good as was hoped for, but which has been approved as adequate for the time being by the Army leaders who would have to direct it. This bill, however, is now blocked in the Rules Committee, which is controlled by the Republicans. Without the committee's approval it is unlikely even to reach the floor of the House. There is no bill before the Senate and none in immediate prospect. That, too, is a Republican responsibility. Senator GURNEY, a Republican, heads the Armed Services Committee and Senator TAFT decides the order of consideration of bills in the Senate.

Senator TAFT in the Senate and Speaker MARTIN in the House, and their fellow Republican policymakers, will be gambling with the national security of the United States and with their own political fortunes, we believe, if they attempt to block debate of UMT. Yet it is being freely predicted that attempts will be made to do this. Mr. TAFT has put himself on record as against UMT—for reasons which do not stand careful analysis—while Mr. MARTIN is said to be lukewarm toward the proposed program.

This is no time for partisan division on questions of national security. It is no time for any small group of men, no matter how honest their motives, to decide in a caucus room that they will not permit debate on a question which the majority of their colleagues and a majority of their countrymen apparently favor. Two and a half years ago, in his final report as Chief of Staff, the now Secretary of State warned that "the timing of our decision on universal military training is urgent." "The officials of the State Department," Mr. Marshall said then, "have been strongly of the opinion that a decision in this matter prior to the final peace negotiations would greatly strengthen the hand of the United States in securing acceptance of a genuine organization to handle international differences."

The question is no less urgent today than it was on June 30, 1945. Two and a half years of a strained peace have not lessened the necessity that this country retain its military leadership. Any sign of weakness on the part of the United States, any indication that we are not ready to assume our proper responsibilities in maintaining the peace of the world, can only be an invitation to aggression, as it was in 1914, as it was again in 1939. Quick consideration and passage of a strong training bill would do much to assure world peace. A militarily strong United States would not be an invitation to war. It would be a guaranty against it.

Mr. CHENOWETH. Mr. Speaker, I yield 2 minutes to the gentleman from South Dakota [Mr. CASE].

Mr. CASE of South Dakota. Mr. Speaker, I have asked for this time in order that I might direct an inquiry to the members of the committee handling the bill, if I may have the attention of either the gentleman from Colorado [Mr. ROCKWELL] or the chairman of the committee.

For the purpose of the RECORD, I would like to ask if the phrase used in subsection 2 of section 9, "the estimated cost of the proposed construction," is intended to cover the costs that will be incurred in repairing damages that might be involved in construction. Now, I raise that question because subparagraph 7 refers to the part of the estimated cost which can properly be allocated to preservation and propagation of fish and wildlife, and so forth, apparently listing that as a benefit from the project. This morning the Appropriations Subcommittee on Civil Functions for the War Department had before it representatives of the Fish and Wildlife Service asking for funds to build some hatcheries and to do some other things to overcome the

damages to the salmon run created by the construction of the McNary Dam and other dams on the Columbia River. Now, then, what I am wondering about is if it will be understood that the phrase "the estimated cost of the proposed construction" will include such costs as this for the building of hatcheries or the doing of whatever may be necessary to offset damages to fish and wildlife.

Mr. ROCKWELL. May I ask the gentleman from Montana to answer that question?

Mr. D'EWART. I think the gentleman should recognize that paragraph A of section 9 has to do with the report that will be made by the Bureau of Reclamation to the Congress in regard to the feasibility of projects. It specifies eight different items under which this report shall be divided.

Mr. CASE of South Dakota. I shall pursue the question further when we reach that point in the reading of the bill.

The SPEAKER. The time of the gentleman from South Dakota has expired. All time has expired.

Mr. CHENOWETH. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. WELCH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2873, with Mr. DONDERO in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. WELCH. Mr. Chairman, I yield 15 minutes to the gentleman from Colorado [Mr. ROCKWELL], chairman of the Subcommittee on Irrigation and Reclamation of the Committee on Public Lands.

Mr. ROCKWELL. Mr. Chairman, H. R. 2873 amends section 9 (a) of the Reclamation Project Act of 1939. This bill, as amended, was favorably and unanimously reported by the Public Lands Committee on July 11, 1947.

HISTORY OF THE BILL

The Reclamation Project Act of 1939 was passed for the purpose of making more flexible the annual repayments required of irrigation water users under a reclamation project. Its passage followed the report of a commission appointed to investigate the repayment situation on all projects in the West. While this legislation was being considered by Congress in 1939, there was incorporated in it provisions for the authorization by the Secretary of the Interior of projects which conformed to a formula set up in the act. It is this formula which is amended by H. R. 2873.

The hearings on the Reclamation Act of 1939 discloses that the feasibility formula was not too carefully scrutinized by Congress. The language of section 9, which H. R. 2873 amends, is ambiguous in some respects and has been subject to different interpretations.

The interpretation put on section 9 (a) by the Solicitor of the Department of the Interior led to a controversy, and the introduction of legislation 3 years ago was intended to clarify this provision. Former Congressman Robinson, of Utah, introduced the first bill for this purpose. Extensive hearings were held but the Seventy-ninth Congress adjourned before the Irrigation and Reclamation Committee, which considered it, made any report.

Before the introduction of the Robinson bill and since then, the House Appropriations Committee has raised questions with respect to the way by which the Bureau of Reclamation set up repayment schedules for reclamation projects under section 9 of the act. The National Reclamation Association, representing irrigation interests in 17 Western States, took exception to the interpretation of section 9 by the Solicitor of the Department of the Interior and passed resolutions urging clarifying legislation. Generally, it was contended by those who supported H. R. 2873 that the opinion of the Solicitor did not conform with the intent of Congress in passing the 1939 act. Further, it appeared that for 5 years after the act was passed, the Bureau of Reclamation had followed a practice which seemed to be in full accord with the intent of Congress in passing the act. However, after the Solicitor's opinion, which was rendered in 1944, the policy and practice of the Bureau changed. The Bureau contended, and probably correctly so, that it was bound by the Solicitor's opinion.

After H. R. 2873 was introduced and considered by the Public Lands Committee of the House, during the first session of the Eightieth Congress, the Senate Committee on Interior Department Appropriations included a statement in its report to the effect that clarifying legislation on this subject should be passed by Congress at the earliest possible moment.

Extensive hearings were held on H. R. 2873 in the form in which it was introduced. The issue involved was strongly contested by those appearing for and against the bill. There was a difference of opinion among members of the Public Lands Committee after hearings on the bill were concluded. Under this situation the committee made an effort to find a solution to the problem which would meet the views of all members of the committee. Finally, a proposal for amendments was suggested which was submitted to both the Bureau of Reclamation and representatives of reclamation interests in the West. This formula was accepted by both groups, written into the bill which, as thus amended, was unanimously approved by the committee.

I believe that the Members of this House will fully appreciate that the subject of this bill is very complicated and involved. It is not easily understood. Legislative language which has been carefully written and considered is required to cover the subject. Amendments which are not carefully weighed may result in further confusion and lead to interpretations by the executive branches of the Government contrary to the intent of a committee which spent weeks in considering the bill. The committee is satisfied, after most exhaustive weighing of every provision of the bill, that all ambiguity has been removed.

THE ISSUE

The principal issue under this bill concerns the application of the returns from the interest component of power rates fixed on commercial hydroelectric energy produced by a reclamation project. This may sound complicated. Perhaps I can explain it in this way.

Under the Reclamation Project Act of 1939, it was provided that the Federal Government's investment in the commercial power features of a reclamation project should bear interest at not less than 3 percent per annum. It would appear, from the language of the act, that this meant the payment into the Treasury of the United States of all returns from interest for the use of money. The Solicitor of the Department of the Interior, however, held that interest, as there used, did not connote its ordinary meaning. He said that the Secretary of the Interior was empowered by this act, when construed with other provisions of the reclamation law, to apply the interest returns from the power investment to aid in repaying irrigation costs which were beyond the ability of the water users to repay. This meant, of course, that the Government received no interest on its investment in the commercial power features of a reclamation project; and it was contended by those who supported H. R. 2873 that the result was a subsidy from the Nation's taxpayers to Federal power developments.

It was clear that Congress should determine whether the apparent intention of Congress in passing the 1939 act should be sustained or whether certain holdings of the Solicitor of the Department of the Interior should be recognized and written into law.

Some who appeared before the Public Lands Committee, as well as members of the committee, felt that the Government was justified for reclamation development to enact legislation which permitted the application of the interest component of power rates to aid in repaying irrigation costs. As chairman of the Irrigation and Reclamation Subcommittee of the Public Lands Committee, I opposed such a position and believe that the Federal investment in the incidental power developments of a reclamation project should not only bear interest on unpaid balances during the amortization period but should be used to reimburse the Government for use of money borrowed to finance such developments. This interest return to the Government would be in addition to the return of the original investment.

With this explanation in mind, may I now point out the principal provisions of H. R. 2873. They are:

First. Interest component: This bill, as now amended, provides that the interest rate on the commercial power in-

vestment in reclamation projects shall be not less than 2½ percent per annum.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Is the purpose of that just to reimburse the Federal Government for the interest they paid to help build these projects so that the general taxpayer will not pay in taxes to take care of the project?

Mr. ROCKWELL. That is the purpose; yes.

At least four-fifths of the returns from this interest rate shall be paid into the Treasury for the use of money. One-fifth of such interest rate may be assigned by the Secretary of the Interior to aid in repaying such irrigation cost of a reclamation project as are beyond the ability of the water users to repay. It is believed that under present cost of money to the Government the 2 percent will reimburse the Government for what it has to pay for borrowed money invested in power features of a reclamation project. The rates were fixed as a floor and accordingly may be increased as costs of money borrowed by the Government increases. Under this arrangement, specified in the bill on page 9, lines 10 to 23, inclusive, there will be paid into the reclamation fund, as provided by the act of May 9, 1938 (52 Stat. 291, 318), interest at not less than 2 percent per annum for the use of money invested in commercial-power features of a reclamation project. The returns from not less than one-half of 1 percent per annum may be assigned to aid in repaying irrigation costs.

Mr. HARNESS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield.

Mr. HARNESS of Indiana. Did I understand the gentleman to say that the 1939 act did not specify any particular period for the amortization of the capital investment of the Government?

Mr. ROCKWELL. That is correct.

Mr. HARNESS of Indiana. How about the 1932 law? Is there not something in there that fixed it at a total of 50 years, the first 10 years during construction requiring no amortization payments, but the balance to be paid in the next 40 years?

Mr. ROCKWELL. I only know what the Department told our committee. Their contention is that under the present law there is no limit; that they could say that the project could run for 200 years, and that they are only bound by the Solicitor's opinion. That is the law as it exists today, barring any legislation.

Mr. HARNESS of Indiana. At any rate, it has been the policy of the Department of the Interior and other agencies that have to do with this service to amortize the Government's investment over a period of 50 years?

Mr. ROCKWELL. I think that has been the custom, yes.

Mr. HARNESS of Indiana. This proposal is to increase that to 78 years?

Mr. ROCKWELL. This proposal is to make it possible to increase it to 78 years; to make it more flexible.

Mr. HARNESS of Indiana. Now, with reference to the interest charge, in the gentleman's investigation of this matter and in the hearings before the committee, was there any evidence that established the fact that the Congress had any intent in the 1932 or the 1939 acts to waive interest charges, or not to require the payment of interest on the money that the Government advanced to these parties, back into the Treasury?

Mr. ROCKWELL. That was the contention within the committee. The opinion of the Solicitor of the Interior Department stated that they must charge 3 percent interest, but after they had collected the interest they might use the money back on the project or for any purpose they desired connected with it. Therefore, they were not using it to go into the Treasury, but were placing it back as capital investment on the project.

Mr. HARNESS of Indiana. And they did that?

Mr. ROCKWELL. That has been the custom.

Mr. HARNESS of Indiana. In order to stop that it was necessary for them to write a legislative provision in the appropriation bill, which was done last year, I believe?

Mr. ROCKWELL. That is what the Appropriations Committee did last year.

Mr. HARNESS of Indiana. This provision in this bill that requires not less than 2½ percent is a compromise with the Interior Department, which insisted on a 3 percent, which was not to go back into the Treasury?

Mr. ROCKWELL. Yes; it is a compromise between the Department and also members of the committee, many of whom contended there should be no interest rate charged on power development, that they should only pay the original investment back to the Treasury. There were two schools of thought, one of which believed no interest should be charged at all as is the case with irrigation projects where the money is paid back without interest. The other school of thought of which I was one felt that the Federal Treasury should be reimbursed to the amount that it cost the Treasury for the money. This we estimated at 2 percent.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. WELCH. Mr. Chairman, I yield the gentleman from Colorado five additional minutes.

Mr. HARNESS of Indiana. Just one more question if the gentleman will yield further.

Mr. ROCKWELL. I yield.

Mr. HARNESS of Indiana. I am sorry to take so much of the gentleman's time but I hope he will touch on that provision of the bill appearing on page 6 which reenacts what I understand to be existing law giving the Secretary of the Interior in effect the authority to enlarge authorized projects without specific authorization of the Congress. I hope the gentleman will discuss that because I am very much interested in that particular provision.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield.

Mr. FERNANDEZ. The gentleman stated that there were some members of the committee who were in favor of power projects not paying interest. If the gentleman will recall, I think the true facts are that all members of the committee wanted power projects to pay interest, but some of us on the committee felt that the interest should be used to pay the irrigation part of the project which the irrigators could not pay, whereas the gentleman from Colorado and some other Members felt that the interest should be returned to the reclamation fund. In other words, we all wanted interest paid, but it was a question of how the interest should be applied. It divided the committee and finally there was an agreement whereby 2½ percent would be charged. One-fifth of that would go to the aid of the irrigators and four-fifths of it to the reclamation fund or the Treasury.

Mr. ROCKWELL. That is entirely correct, I may say to the gentleman from New Mexico. I thank the gentleman for correcting the statement.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I should like to complete my statement, but I will yield to the gentleman from California?

Mr. HOLIFIELD. In the comparison on page 4 of the committee's report, in section 5 of 9 (a), I notice there is a change in the wording from "power" to "commercial power." Will the gentleman explain if that has any significance in establishing a priority against municipal purchases in preference to private company purchases? As I understand it, now the municipalities have a priority right of purchase. By using the words "commercial power," changing the language from the one word "power" to the qualified phrase "commercial power," is there any significance?

Mr. ROCKWELL. I am not a lawyer, but I am sure it does not change the intent because the intent of the committee is that the REA and the local communities shall have the first right to this power.

Mr. HOLIFIELD. In other words, it does not change the priority right of purchase.

Mr. ROCKWELL. I know that is the intent of the committee.

Mr. D'EWART. Mr. Chairman, if the gentleman will yield, I would call the attention of the gentleman from California to page 9, line 3, and to lines 24 and 25. That answers the gentleman's question, I am sure.

Mr. ROCKWELL. Mr. Chairman, proceeding with my statement:

Second. Amortization period for repayment of power investment: The repayment period for the investment in commercial power features of a reclamation project may extend to 78 years or the useful life of the project, whichever is shorter. The 1939 act does not contain any express provision on the repayment period for the commercial power investment, but the practice of the Bureau of Reclamation had been to fix this period at 50 years. It should be noted that the 78 years is not a fixed amortization period. The period may be for any period, as determined by the Secretary of the Interior, up to 78 years. Further, during this entire period the investment bears interest on unpaid balances.

Third. Silt and salinity control and recreational benefits: The project cost for silt and salinity control and for recreational benefits are made nonreimbursable. This is justified because many a multiple-use project incurs additional cost to control salinity and provide for the retention of silt. These projects may also involve additional cost for incidental recreation values. Such costs are all in the public interest and should not be charged against the water users. Expenditures by the Government for flood control and for fish and wildlife are also in the public interest and under the present law are nonreimbursable. There is no reason why the cost of silt and salinity control and recreational benefits should not be put in the same position as flood control and as fish and wildlife expenditures. It should be pointed out, too, that under the present law if the Army engineers construct a project with incidental silt and salinity control and recreational benefits the costs for them are nonreimbursable. The same rule should be applied to multiple-purpose reclamation projects.

Mr. PETERSON. Mr. Chairman, I yield 15 minutes to the gentleman from Arizona [Mr. MURDOCK].

Mr. MURDOCK. Mr. Chairman, as I said a few moments ago while we were discussing the rule, this legislation or something like it has long been overdue. Correcting and clarifying legislation on the Reclamation Act of 1939 was called for in 1945. You will recall that the act of 1939 had provisions in it concerning the repayment with interest at 3 percent of the cost of commercial power facilities in these Government dams built by the Bureau of Reclamation.

A solicitor in the Department of the Interior in 1944 made a certain ruling or interpretation of subsection 9 (c) of the act of 1939. His interpretation was not acceptable to many Members of this House and to many water authorities throughout the country. In fact, the very powerful and influential National Reclamation Association at its next annual meeting went on record in its first resolution as condemning the view of the law as announced in the solicitor's opinion.

It was felt by Members of this House there should be clarifying legislation at that time. I was then chairman of the House Committee on Irrigation and Reclamation, and when called on to clarify the situation in a legislative way I said on the floor of the House in November 1945, that if the law is not clear we should clarify it and that I wanted to help in that matter. I made my view quite clear that the Congress makes the law and determines the policy and that we are not bound for very long at least by a solicitor's opinion if it is contrary to the intent of the Congress in the interpretation of the law.

Accordingly, a few weeks after that, the House Committee on Irrigation and Reclamation started hearings early in 1946 on a bill which was to remedy this matter. It has been said here by several that long and extensive hearings have been held on, if not this particular bill, similar bills. I have in my hand here the hearings held on the subject matter of this measure in the Seventy-ninth Congress. It is a very highly technical matter. I now hold in my hands the hearings held by the present Subcommittee on Irrigation and Reclamation of the Committee on Public Lands of the Eightieth Congress. So, you see, gentlemen, your Committee on Irrigation and Reclamation has heard reams of hearings and weeks of testimony by experts on this matter. It is a difficult and highly technical subject.

Let me go into it just a bit.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from California.

Mr. HOLIFIELD. On page 9 of the bill, lines 13 to 17, there is reference made that power revenues may include no more than one-fifth of the revenues derived. Will the gentleman explain what that means?

Mr. MURDOCK. That refers to one-fifth of the revenue derived as interest being used to retire the capital investment for irrigation. The crux of this question and one of the chief points in this matter is this: Shall interest be paid on Government investments in commercial power facilities in these Government plants? What disposition shall be made of such interest moneys? My colleague from New Mexico said a moment ago that everyone on the committee now, and formerly, too, felt and do feel that wherever the Government invests money in a commercial power plant in connection with reclamation, and that power is sold for commercial use to municipalities or anyone else, that interest should be paid on that money. This bill so provides for interest. In this bill we are changing the rate from 3 percent, which is written in the present law, to 2½ percent. But this measure provides that that money, the 2½ percent, shall go into the Treasury as rent or payment for the use of money. However, in certain cases the Secretary may determine that in order to make a project feasible it is going to have to have a little extra help, and he may take as much as one-half of 1 percent, or one-fifth of this interest money, and not pay it into the Treasury as interest, but apply it on the reduction of capital investment on the irrigation costs which are beyond the ability of the water users to repay.

Mr. HOLIFIELD. I thank the gentleman.

Mr. MURDOCK. Gentlemen, let me point out that the National Reclamation Association, by resolution for two different years, has called upon us to clarify this legislation, because they said the Solicitor's opinion, which had now become law, was contrary to the intent of Congress. Let me also point out that at the meeting of the same National Reclamation Association in Phoenix, Ariz., last October—and I am proud to say that several Members of the House were in attendance there—this matter came up, and by unanimous consent of that large organization, representing 17 Western States, the association went on record as endorsing this Rockwell bill in its present form. Now, in view of the fact that twice before they had called for something like this, and last October the same organization unanimously approved this form of a bill, it seems to me, gentlemen, that that ought to go far to convince us that we should adopt a measure like this, which is rather intricate for most of us to understand and very, very difficult to explain briefly, but is regarded as solving our problem, I want to give their request and later endorsement all the emphasis I possibly can.

Let me read the resolution that was adopted last year by the National Reclamation Association. Mind you, do not get confused by the name. The National Reclamation Association is a private organization of water users and is not the same as the United States Reclamation Bureau. This is their latest resolution:

Whereas the National Reclamation Association at its fourteenth annual meeting held in 1945 adopted in its resolution No. 1 an expression of its position adverse to the opinion of the Solicitor of the Department of the Interior respecting the application of power revenues in fixing the power rates on reclamation projects and affirmed its position as to the intent and application of the 1939 Reclamation Act; and

Whereas the National Reclamation Association at its fifteenth annual meeting held in 1946 reiterated by resolution No. 13 the position theretofore taken with respect to these matters and authorized the president of the association to appoint a committee to confer with the Secretary of the Interior the Bureau of Reclamation, the Members of the United States Senate and of the House of Representatives, and interested citizens; and

Whereas following extensive conferences and hearings before the Public Lands Committee of the House of Representatives there has been reported out, with amendments, a bill (H. R. 2873) which, in the judgment of the committee and of others who have closely analyzed it, fulfills the purposes sought to be accomplished by said resolutions hereinbefore described, and which contains additional beneficial provisions tending to promote the feasibility of Federal reclamation projects and to relieve water users on existing projects from costs attributable to purposes other than irrigation or municipal water supply: Now, therefore, be it

Resolved, That this association hereby expresses its satisfaction with H. R. 2873 as reported with amendments by the Public Lands Committee of the House of Representatives and urges its prompt passage by that body and by the Senate and its approval by the President of the United States.

The National Reclamation Association is made up of farmers, water users, and has some of the best technical experts in the country, who know more about irrigation, its purposes, and its value, I think, than any other group inside the Congress or out. After all these hearings before the House committee in which they took part they have placed their stamp of approval on this bill in its present form. For that reason, I hope we can pass the bill without amendment.

In 1945 I promised certain gentlemen now right in front of me that I would do my best as chairman of the committee in the Seventy-ninth Congress to get action taken by that proper legislative committee of the House to clarify this matter. While this bill does not satisfy me entirely, it is a compromise, it is the best we can get, and I believe we ought to adopt it.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I am glad to yield to my chairman.

Mr. ROCKWELL. I want to compliment the gentleman from Arizona [Mr. MURDOCK] on the fine work he did as chairman of this committee last year. It was certainly through no lack of desire on his part that we did not have his bill presented last year. I am with him in the hope that we can carry it at this time.

Mr. MURDOCK. I thank the gentleman.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield to the gentleman from California.

Mr. JOHNSON of California. I notice that section 9 provides that the Secretary may make findings as to the nonreimbursable items. The one I am interested in is the one with reference to salinity control. In my area there are 450,000 acres of land in the Sacramento-San Joaquin delta which are subject to the encroachment of salt water. Can the gentleman inform us what are the bases of his findings regarding how much should be nonreimbursable for that particular purpose?

Mr. MURDOCK. I cannot be as specific as that, as that is a special problem and varies with conditions on each project that has it.

I am heartily in favor of the provisions here written which were condemned a little while ago by a member of the Committee on Rules. When we build a great multiple-purpose dam on our western rivers and when we attempt to have a great reclamation project, there are other things that must be considered besides irrigation and power, for instance, salinity control as in the great Central Valley of California. If we cannot stop the encroachment of salt water in that area, which is in your district, sir, around the Great Bay, hundreds of thousands of acres of land which used to be productive will be ruined. It is just about as important that we build a dam like Shasta Dam to furnish fresh water to keep back salt water and provide for salinity control as to supply it to be used for irrigation.

In addition to that, there are other benefits to accompany reclamation. I mean recreation on lakes and rivers in our western part of the country where we have so little water that the sight of a cupful of it is delightful to the eye. We would like to have fish. The Fish and Game Protective Association of Arizona is in constant touch with me, calling my attention to the fact that thousands and thousands of citizens in Arizona want some place to go boating, some place to go fishing. These things are important and of such value that you cannot figure the money worth exactly, but they have great value, and the farmers in that irrigation district should not be called upon to pay for these benefits to get reclamation.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I am very glad to yield to the gentleman.

Mr. BARRETT. May I first commend my colleague, the gentleman from Arizona, for his splendid statement. But it occurs to me that he might have said to the gentleman from California [Mr. JOHNSON] that the extent of the allocation that the Secretary of the Interior might make for salinity control is wholly an engineering problem and, of course, the Secretary will refer that matter to a board of engineers. I might say to the gentleman from California that there are several checks upon size of the allocation that might be made by the Secretary of the Interior; in the first place the question of feasibility must be submitted to the Bureau of the Budget. Of course the budget then will call upon other interested departments of Government for advice as to the computation of the Secretary. In addition to that, of course, when the Bureau of the Budget requests an appropriation for that particular project, the Committee on Appropriations will then look into the various elements of feasibility and the amounts allocated. So it seems to me there are many checks on the discretion of the Secretary and no one can say just how much is going to be allocated for salinity control because the engineers themselves will have to make a detailed study and only after they make their report will the Secretary arrive at the amount to be charged against salinity control.

Mr. MURDOCK. The gentleman from Wyoming has put it just exactly right. All of these things are taken into consideration exactly as the formula for flood control has been studied by the engineers. Heretofore, for instance, when we built Hoover Dam, the cost of the whole thing was considered and the flood-control part was estimated at $25,000,000 and that amount was thought to be about right for flood control. Therefore that part of the cost was put in a special category by itself. The same thing will apply to silt control, salinity control, fish and wildlife protection, and recreational facilities. Certain things will be made nonreimbursable so that our farmers will not have to pay for them.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. JOHNSON of California. May I compliment the gentleman for his explanation of these provisions of law. May I also point out to you that in addition to the 450,000 acres of very rich peat land along the upper reaches of the San Francisco Bay, there are many industrial plants and twice in the last 25 years they have had serious encroachments there which almost compelled them to shut up their plants, the steel mills, chemical plants, and canneries and so forth. This will have a salutary effect in keeping these plants open throughout the entire year.

Mr. HOBBS. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. HOBBS. I rise to inquire about that clause on page 7: "The Secretary may make findings with respect to projects heretofore authorized." It seems to me that is going very far afield and opens the door to unknown possibilities. Not only to projects that will be authorized as to engineering data that may be available, but as to all of the projects that have heretofore been authorized, means that you are on a fishing expedition to justify an unjustifiable project. I would like to have the gentleman's explanation of that provision.

Mr. MURDOCK. As the gentleman from Wyoming [Mr. BARRETT] indicated a moment ago, such findings will be subject to engineering checks on those projects the same as on any projects which may hereafter be authorized. Some of these benefits which the bill makes nonreimbursable are so needed I would not deny existing projects of them after all have been carefully checked.

Mr. Chairman, may I, in closing, say this: The great cause of reclamation has been harmed or has been slowed down because of the controversy over the Solicitor's ruling in 1944 on the act of 1939. I believe that this measure will clarify it and put it on a sound business basis so that we can go forward at once with the work of reclamation which the country now needs. Failure to pass a proper bill will continue the existing confusion.

The CHAIRMAN. The time of the gentleman from Arizona [Mr. MURDOCK] has again expired.

Mr. WELCH. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, H. R. 2873, now under consideration, is a bill to amend certain provisions of the Reclamation Project Act of 1939. This bill is the result of extended hearings held over a long period of time. It was unanimously reported by the Subcommittee on Irrigation and Reclamation, of which the gentleman from Colorado [Mr. ROCKWELL] is chairman, to the full Committee on Public Lands, and in turn was unanimously reported by the full committee to this House after mature consideration. Differences of opinion in the committee which had been evident for some time have been composed in a satisfactory manner. Your committee believes that the bill here presented is one which will benefit the whole Nation and particularly those States depending upon irrigation, conservation, reclamation, and hydroelectric power.

The National Reclamation Association at its sixteenth annual convention held in Phoenix, Ariz., in October 1947, gave unanimous approval to the bill in its present form.

As reported, the bill will permit the inclusion of recreation, salinity control and silt control, and the allocation of costs of proposed Federal reclamation projects. It will reduce the rate of interest required to be returned on the power investment from 3 to 2½ percent per annum.

The bill settles the long-standing controversy over application of interest rate on the power investment by providing that not more than one-fifth of the revenue derived from the interest component of power rates may be applied on irrigation costs chargeable to power.

The enactment of this legislation will not cost the Federal Treasury one penny of the taxpayer's money. On the contrary, at the interest rate established by the bill, the Federal Government will receive a greater amount of interest than it

costs the Government to otherwise borrow money.

This bill would insure the completion of the great Central Valley project, which is as large as the entire State of Michigan. In other words, the Central Valley is as large as the States of Massachusetts, Connecticut, and one-half of the State of Rhode Island combined. It would also make feasible smaller projects which would otherwise be nonfeasible. The enactment of this bill will add billions of dollars of wealth from which the Federal Treasury will benefit.

The tremendous demand for power during the past year has necessitated the use of more than 40,000,000 barrels of oil for the production of electric energy, a large part of which could and should have been provided by hydroelectric power plants. This demand is increasing. Our national petroleum resources are limited, and every barrel of oil taken from the ground is gone forever. It is a woeful waste of irreplaceable oil to use it for manufacturing electricity in areas where hydroelectric power can be developed. Hydroelectric power is inexhaustible. Every reclamation, conservation, and irrigation project developing hydroelectric power, whether privately or publicly owned, builds our national peacetime economy just that much stronger and strengthens our national defense.

Mr. Chairman, money advanced for irrigation and conservation projects from which hydroelectric power can be developed is not a Government subsidy. It is an investment in the security of America. Every dollar must be repaid.

Mr. Chairman, there is no honest objection to the development of hydroelectric power by private enterprise. On the other hand, private power interests have no right to interfere with great hydroelectric power projects beyond their financial scope, such projects as the Tennessee Valley Authority, Hoover Dam on the Colorado River, Grand Coulee and Bonneville on the Columbia River, the Shasta Dam in the great Central Valley project, or with infant multiple projects which are made economically feasible by Government participation which will continue as they have in the past to be self-liquidating. Without these large publicly owned hydroelectric projects to which I have referred we would have been totally unable to produce the aluminum for the air fleets of World War II, one-third of which aluminum was produced from the power furnished by the Columbia River projects alone.

This is forward-looking, constructive legislation and should be passed by this House without changing its text, intent, or purpose.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The gentleman from California yields back 6 minutes.

Mr. PETERSON. Mr. Chairman, I yield 10 minutes to the gentleman from New Mexico [Mr. FERNANDEZ].

Mr. FERNANDEZ. Mr. Chairman——

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield for a question?

Mr. FERNANDEZ. I yield to the distinguished gentleman from California.

Mr. HOLIFIELD. The question I want to ask is along the line of that asked by the gentleman from Alabama [Mr. HOBBS] and relates to the proviso on page 7, beginning in line 5, which authorizes the Secretary to make a new analysis of the projects heretofore authorized. The question I wish to propound is whether new projects which are yet to be authorized will have the privilege of the 78-year repayment base period? Will these projects, which are going to be retroactively analyzed, also have that same benefit of extending their period of repayment from the present allowable of 40 years to 78 years?

Mr. FERNANDEZ. I may say to the gentleman there is no limit of 40 years at the present time. The life of the project is the limit at the present time.

Mr. HOLIFIFLD. It is not to exceed 40 years, is it not?

Mr. FERNANDEZ. No. That particular section refers to the power project, and as to power projects under the present law there is no limit. The practice of the Department has been to limit them to 40 or 50 years, but it may extend them beyond 50 years, subject, of course, to the approval of Congress, which appropriates the money. As to these projects, we may go back, even under present law, and revalue the projects and come to the Congress and ask for an additional period of time. So it makes no difference either way by this bill.

Mr. HOLIFIELD. Let me be clear in my understanding. At the present time the Central Valley water project in California is amortized on a 40-year basis.

Mr. FERNANDEZ. That is the irrigation project?

Mr. HOLIFIELD. Irrigation and power, both.

Mr. FERNANDEZ. As to the power project, there is no limitation, so far as the law is concerned.

Mr. HOLIFIELD. Can they obtain the same benefits, that is, change from a 40-year basis to a 78-year basis, that the new projects may enjoy?

Mr. FERNANDEZ. Yes, by going back and asking Congress again to authorize. All of these projects have to be authorized by the Congress.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I yield to the gentleman from Wyoming.

Mr. BARRETT. I think the gentleman is confused. The gentleman from New Mexico is absolutely correct. Under the present law there is no limit. It is merely limited to the useful life of the project. I have been informed a matter of only a few weeks ago a power project was authorized by the Secretary of the Interior on a pay-out of 69 years. So this matter of 40 years does not enter into it. The 40 years applies to the irrigation farmer, not to the power end of it. There is no limitation to the power pay-out at the present time, except insofar as the contracts made with the department set a limit.

Mr. FERNANDEZ. Mr. Chairman, I cannot understand why a matter so simple can be made so difficult to understand. The matter before us is very, very simple indeed if we only bear in mind two things.

In every multiple-power project the money invested by the Government is divided into two large sections. One is flood control, which is nonreimbursable. The other section is the portion of the investment which is reimbursable. That portion of the investment which is reimbursable is divided into three blocks. The first block is the power investment which power has to reimburse. It has to charge enough to pay back the investment to the reclamation fund or the Government. The second block is that portion of the irrigation costs which are assigned to the irrigators to pay and they have to pay those through their operations in a period of not to exceed 40 or 50 years. The third block is a small block, which is that portion of the irrigator's costs which the irrigators cannot reimburse and which are assigned to the power project to reimburse.

Under the present law it is required by the present practice of the Bureau of Reclamation that the power investment shall be reimbursed to the Government as principal plus 3 percent interest, but the 3 percent interest is used in some cases to aid in the third block of costs which are assigned to power but which go to irrigation and which the irrigators cannot pay.

The thing that brought all this controversy about is that the Solicitor back in 1944 ruled, as to power, that there was no limit within which the power investment need be paid, but that so long as power returned the principal within the useful life of the project, that was all that was necessary, and that in returning that principal, 3 percent interest should be credited to the principal, not as interest, and naturally, the National Reclamation Association and other people began to object.

In my opinion, they have made a mountain out of a molehill and they have made a mountain out of a molehill because they had a certain purpose in doing that. The National Reclamation Association is the one that through all their conventions and through all the sessions of Congress has been raising this question and making, as I say, a mountain out of a molehill. Why? Because the National Reclamation Association is composed of two classes of people: One, the people who already have projects built or have projects under construction and who, being organized, are members of the National Reclamation Association; second, people who are interested in reclamation because they are in sympathy with the power people who are interested in power. They are the people who put up the money for the association and they are the people who have the greatest voice in the National Reclamation Association. Sure, there are others of us who belong to it, but our voice is weak, because we are not organized. Our projects have not been authorized.

It is perfectly natural that those who already have their projects built or under construction should object to other projects being built on their same streams, if they can possibly prevent it; and just as naturally the power lobby is interested in seeing to it that as little public power as possible is provided at low rates of interest. So, their interests coincide and naturally the National Reclamation As-

sociation has been, in session after session, in and out of season, talking about this interest component, and they have convinced the fine gentlemen who head the Appropriations Committee and they have convinced many other Members of Congress that the Solicitor's opinion is a real danger to us. Well, maybe so; I do not know. But I do know that up until now that provision of the Solicitor's opinion which says that the interest component, the 3 percent interest, may be credited to the principal and to the reimbursing of the principal, has not been followed, and the Bureau of Reclamation has at all times said that they are not going to follow it. That is why I say that this thing is a mountain made out of a molehill.

Mr. Sawyer, of the National Reclamation Association, testified before the committee and virtually admitted that that was the fact; that the Bureau of Reclamation was not following the Solicitor's opinion, but he said:

That opinion of the Solicitor creates a climate in which appropriations are made and very strong representations have been made by influential members of the Appropriations Committee that they do not like that climate——

The CHAIRMAN. The time of the gentleman from New Mexico has expired.

Mr. PETERSON. Mr. Chairman, I yield the gentleman 10 additional minutes.

Mr. FERNANDEZ—

They would like to see it changed. They come from the portion of the country that has the voting strength. It is on the tolerance of these men—

That is, the Appropriations Committee men—

as I have said several times, that reclamation exists at all.

It is a climate created by the Solicitor's opinion that we are trying to correct by this bill. As far as I am concerned, and that is why I can talk about this bill without any animosity whatever, I do not care whether this bill is passed or whether it is not passed, because I think the present law under the administration of the Bureau of Reclamation and its present policies is good. This bill only makes it certain that the present policies will be followed, so far as power investment is concerned.

One of those gentlemen from the Committee on Appropriations, Mr. Jones, appeared before our committee. I congratulate Mr. Jones, a former Congressman from Ohio, because he was very frank with our committee. He said he wanted this 3 percent paid and not used to aid irrigation costs. He said he did not care whether it was paid to the reclamation fund or the Treasury, but he wanted it paid. He was frank in telling the committee what he thought, which reflected the thinking of the National Reclamation Association. I quote:

Mr. JONES. Therefore, by the policy of the present law, the reclamation program is being broken because they are breaking the market for the sale of power at higher generation cost projects.

Mr. FERNANDEZ. Pardon me, Mr. Jones. I did not quite understand what you mean by the expression "breaking the market for power." Would you mind explaining that?

Mr. JONES. Well, as a matter of fact, sir, to emphasize the point, you will find in last year's hearings of the Interior Department appropriation bill, where a private utility purchased all of the power at Shasta Dam, and it can produce it at 5 mills plus a kilowatt-hour, yet it is buying power at an average rate of about 2 mills per kilowatt-hour, the top rating being 3.4, which is 3.3 mills less than the private utility can generate that power with the tax component in its facilities.

Therefore, I say that the Reclamation Bureau is breaking the market. It should be able to get the full amount that the private power company would pay, if it were using it own facilities, five point plus a kilowatt-hour.

Do you understand what I mean?

Mr. FERNANDEZ. In other words, in simple language, it just means we are not selling power for enough money.

Mr. JONES. For what it would take private utilities to generate it, at their own plant, and pay the taxes according to the laws of the States.

Mr. FERNANDEZ. You want to charge more?

Mr. JONES. My point is you cannot have your cake and eat it, too. If power is to help pay out these projects, power should be used for this purpose. Instead of making a promise on the one hand to get the great transmission and generating projects to pay out the construction costs and then break the market of the power by underselling the market.

That is plain speaking, and that is what is before us.

As I said, we have three blocks of investments here. If the 3 percent is used to assist in paying that little block of irrigation costs that the irrigator cannot pay, then they can sell power a little bit cheaper. If, as the Solicitor's opinion says, the investment for power can be paid by the 3 percent being credited to principal, then they can sell power still cheaper. Under this bill they cannot do that. They cannot sell power and use the 3 percent to pay for the principal of the power investment. They cannot use the 3 percent to pay for the help that the irrigators get, except for the small one-fifth portion of the interest.

Because of that, I say that this bill simply carries forward what the Bureau of Reclamation has been doing, with the one single, solitary exception of that 3 percent which the irrigators used to get and which they will not get in the future if this bill is passed. To the extent of the other four-fifths, additional power rates will be necessary to assist the irrigators on the proportion of their cost assigned to power.

Mr. JOHNSON of California. I am referring to the provisions on page 9 of the bill where the matter which the gentleman is talking about is covered. As I understand it, one-fifth of the interest component can be turned into the irrigation project.

Mr. FERNANDEZ. One-fifth of the interest component can be credited toward paying the debt of the irrigators, which they are not able to pay.

Mr. JOHNSON of California. Then it reads as follows:

In addition to any and all sums otherwise assigned for such purpose from power revenues.

Will the gentleman please explain to the Members just on what basis the revenues from the power features of the project are turned over to the irrigators? What is the limit? What principles are involved?

Mr. FERNANDEZ. This is the principle involved: Under the reclamation law, the Congress realized that there were projects on which the irrigators could not pay in full for the advantages that they get. So, under the irrigation law, they provided that the Secretary may allocate some of those costs that otherwise would have to be paid by the irrigators to the power project.

Mr. JOHNSON of California. Yes; but the point is that here we have apparently granted an unlimited discretion to just turn over power revenues to the irrigators. What I want to know is what is the principle involved? We are building a big dam on the American River—the Folsom Dam—that will be authorized here very soon and part of that money from the power revenues is going to the irrigators.

Mr. FERNANDEZ. That is to assist the irrigators.

Mr. JOHNSON of California. Are there not some principles that the Secretary applies to determine what portion of the power revenues should be turned over to the irrigation people?

Mr. FERNANDEZ. Yes, of course.

Mr. JOHNSON of California. What are they?

Mr. FERNANDEZ. This is the principle: He requires the irrigators to pay to the limit of their ability. Then what they cannot pay he assigns to power, provided power can pay and still charge reasonable rates, and provided the Congress approves it. He must report to the Congress how much he does so allocate to power. If the gentleman does not agree with that principle, of course, that is another matter. There are some of us who are not in agreement with it and some of us who are.

Mr. JOHNSON of California. I am thoroughly in agreement with it. What I want to know from the gentleman is just how he does arrive at the amount of power revenues that should be turned over. Does it depend on the rate structure? Does it depend on how much the irrigators need, or any other factors? What is the principle that the Secretary invokes to make the allocation?

Mr. FERNANDEZ. It depends on what the Congress says can be turned over to them. He figures out the costs and amounts which can be recovered from power and brings it to Congress. It depends on the Congress and it depends on the cost.

Mr. JOHNSON of California. Will it vary from project to project?

Mr. FERNANDEZ. Oh, necessarily it has to vary from project to project. Each project must stand on its own feet.

Mr. JOHNSON of California. Does the Secretary have the absolute power to determine at what rate the water prices should be fixed? In other words, what is too much to pay for water?

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. Mr. Chairman, I do not believe I can yield any further. I

think I have answered the question so far as I as a Member of Congress can answer it. If you want some detailed explanation of just how he goes about that, I presume that you would have to ask him about it. I am not an engineer; I am not an accountant; and I do not have much experience so far as that aspect of these projects is concerned. I wish I had more. I am sorry I cannot help the gentleman.

Mr. JOHNSON of California. If I may ask the gentleman one more question. For instance, in the area that I referred to, would the rates that the Reclamation Bureau gives to the water users compare with the rates by local irrigation districts?

Mr. FERNANDEZ. You mean in setting the rates or the price that should be paid for power?

Mr. JOHNSON of California. No, in setting the rates that they should charge for water. What would determine how much irrigators have to pay for water?

Mr. FERNANDEZ. Oh, we are getting into deep water here. I cannot tell you that. I am not an engineer or an accountant.

Mr. JOHNSON of California. That is a matter of business and is not an engineering matter.

Mr. FERNANDEZ. If so, I am sure the gentleman can figure it out for himself. I cannot even undertake to tell you how my own home projects in New Mexico are being figured. That is up to these experts and up to the Congress when they bring the figures before the Congress.

Mr. MUHLENBERG. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I am so happy to yield to the gentleman.

Mr. MUHLENBERG. I would like to know the feeling of the committee on the principle involved in sections 8 and 9 on page 6 that if the proposed construction is found to be feasible then the new project shall be deemed to be authorized and may be undertaken by the Secretary. Is it the idea of the committee to turn this over to the Secretary without reference to Congress?

Mr. FERNANDEZ. No, that just follows the present law, with reference to small projects. They do that if they find they are feasible, provided Congress approves by appropriating the money. But there are no more small projects and nearly every project now comes to the Congress for authorization as well as appropriations.

Mr. MUHLENBERG. What in this act forces it to come before the Congress?

Mr. FERNANDEZ. Only Congress can vote the necessary appropriations. That language is exactly the same as the old law. There is no difference in that language.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PETERSON. Mr. Chairman, I yield three additional minutes to the gentleman from New Mexico.

Mr. FERNANDEZ. Mr. Chairman, in discussing the Solicitor's opinion, I think it would be proper to read from that opinion because I have heard some people say that the Solicitor's opinion is misinterpreted by some of us in Congress. When we have said that the Solicitor's opinion held that the power investment could be paid by applying the 3 percent interest to the principal rather than collecting the interest in addition, some people have said that we misinterpreted him. I want to read into the RECORD exactly what he said. In taking up the question, he first said:

> One view of the law is that the allocations report must be predicated on estimates of revenues sufficient to return to the United States that portion of the reimbursable costs properly chargeable to power and the other portions of the reimbursable costs that are to be met by power revenues, and, in addition, interest at 3 percent per annum on what is described in section 9 (c) of the Reclamation Project Act of 1939 as "an appropriate share of the construction investment."
>
> The other principal view is that, even though power rates are to be fixed on a basis that includes as a part of the rate base interest on that portion of the costs properly chargeable to power, it is only necessary, insofar as showing full reimbursability of the project is concerned, to show a return within an agreed period of amortization of the full amount of the project costs which are allocated to be returned from power revenues.

In answering these questions, he said:

> I believe that a proper interpretation of section 9 of the Reclamation Act of 1939 and the Hayden-O'Mahoney amendment to the Department's Appropriation Act of 1939 require that the minimum rate schedule be such as to produce revenues sufficient only to meet, in addition to the return for operation and maintenance cost, an amount equal to 3 percent of the power construction costs with the proviso that, if total revenues thus produced are insufficient to repay all costs allocated to power to be repaid by power revenues, "other fixed charges" must be included in the rate schedule to produce revenues sufficient to repay such costs.

That certainly holds that the 3 percent interest may be used to repay the total investment in the power plant. With that interpretation of the law none of us agreed; and, though the Bureau of Reclamation never has followed it insofar as the power investment is concerned, it does create a cloud. This bill, if it does nothing else, corrects that situation.

The CHAIRMAN. The time of the gentleman from New Mexico [Mr. FERNANDEZ] has again expired.

Mr. D'EWART. Mr. Chairman, I yield 15 minutes to the gentleman from North Dakota [Mr. LEMKE].

Mr. LEMKE. Mr. Chairman, this is not a sectional issue. It is a national issue. It affects not only the 17 Western States that are directly affected in the creation of new wealth, but it affects the Nation as a whole. We are 48 States but one Nation. The time has come that we should all realize that wealth-creating projects and wealth-saving projects should be given preference to every other, and it is not boondoggling, even though there may be same boondoggling in States very close to us.

The Federal Government realized the value of its vast resources. It realized that there were in the Western States large bodies of land that could be reclaimed by irrigation. Then, a little later on there developed another industry that came along which we did not see at the time we started in with reclamation. That was hydroelectric power. Hydroelectric power especially affects the Nation just as much as irrigation.

In my own State we are more interested in hydroelectric power than we are in irrigation, although we are interested in both. The REA is working in my State and it needs more and cheaper electricity if it can get it. Unfortunately there are some who would like to have us continue in darkness but we refuse to stay there. We are going to have plenty of light but up to date only 10 percent of the farmers of my State have been able to get electricity in their homes.

Now that the war is over, however, we are in hopes that this bill will pass and within a short time we will have electrical energy not only for light but for power for all the farmers of North Dakota. And I can assure you that that is also the longing and the desire of all farmers in all of the Missouri River Valley States.

Then comes another question with which this program and this bill are directly connected—the national welfare and the national security. I have before me a statement by Mr. Forrestal about synthetic oil and I shall just read a few sentences from it. Secretary of Defense Forrestal stated that the United States is so short of oil that if war came tomorrow we would need 2,000,000 barrels a day more than the Nation can produce. Get that! Then, testifying on the impact of the oil shortage on national defense before a House Armed Services Subcommittee, Mr. Forrestal urged the United States to set up immediately a synthetic-oil industry at the cost of $8,000,000,000.

I am sure my friend from Virginia would not say that that was boondoggling. Oil can be made synthetically from coal, natural gas, and oil shale. In addition I want to save at least part of the oil used in producing electrical energy and thereby save part of that $8,000,000,000 that Mr. Forrestal suggests. Let us develop hydroelectric power to do part of the work that this oil would do.

The chairman of our Public Lands Committee has told you on several occasions that we are now using in the neighborhood of 40,000,000 barrels of oil a year to create electrical energy and to do what this wasted water would do if put to useful work; water which runs unchallenged to the ocean when it ought to be harnessed and made to produce electricity and which could be used over and over again as long as the rains came from the heavens. We should use the water in place of burning up the oil we need so badly at a time when we are creating the largest air force in the world. We will need many times the oil we can produce today to keep those planes up in the air in case of war.

I say to you, Mr. Chairman, that this is a national issue, an issue confined not to the 17 Western States but which affects the entire Nation. Let us go a little further and see some of the results that have come from reclamation. Reclamation has already added billions and billions of dollars of new wealth. The Government collects income taxes on that new wealth. In the higher brackets it takes as much as 85½ percent of that

new wealth. That means a reduction in the taxes of this Nation, a load taken off of all the people. If this bill passes, it will materially facilitate and increase the production of this new wealth.

Why let the water go unchallenged to the ocean, bringing death and destruction not only to human beings, but destruction to property and to livestock as well? Let us harness the water and use it instead of letting it go unchallenged to destroy people down on the lower reaches of our large rivers such as the Mississippi, the Columbia, and so on.

In the last war, and the evidence is ample before our committee—it is in the hearings and if you have any doubt about what I say read the hearings—millions upon millions of dollars were saved to the Federal Government because of the new hydroelectric power plants that had been created, for they made possible the vast production of aluminum and other instrumentalities used in the war.

I am proud of the performance of these 17 Western States that had the vision—and of the eastern people too who had the vision—to see that reclamation was needed and to develop these new sources of electrical power and who had the good sense to finance it as well as use it for the needs of our Nation.

Now, something has been said as to the purpose of this bill. I just want to call your attention very briefly to a request that the Appropriations Committee made at the time one of these appropriation bills for the Reclamation Bureau was up for consideration.

Here is the statement:

> In making certain appropriations in this bill from the general fund for reclamation projects the conferees do so with the recommendation that new legislation shall be passed at the earliest opportunity providing for the disposal of the interest collected—

That is, the interest component—

> on sums invested in power and municipal water features on reclamation projects and with the understanding that interest heretofore or hereafter collected on such investments in power or municipal water features of any such reclamation project constructed or operated under the authority of the Reclamation Project Act of 1939 shall not be allocated during the fiscal year 1948.

Our committee had that mandate. After many weeks of meetings and after much diversity of opinion as my able chairman the gentleman from Colorado [Mr. ROCKWELL] has pointed out to you, there were differences of opinion. Those differences of opinion were not only in the Bureau of Reclamation and in our committee. There was a difference of opinion in the 17 Western States. There was a difference of opinion among many people outside of those 17 States as to just what should be done and what was for the best interest of the Nation as a whole as well as for the 17 States.

We finally compromised after many weeks. We had to give and we had to take. When the bill was finally reported it was reported unanimously. All of the members of the committee were present when it was reported out. There was no question left. We were all agreed we did not get all we wanted. I did not get all I wanted and the gentleman from Colorado [Mr. ROCKWELL] did not get everything he wanted for his bill. But we reached a compromise.

What was the compromise? Under the Solicitor's opinion—and I think the Bureau was correct, we would not want them to go against the Solicitor's opinion—the law was construed that this 3 percent could go into the irrigation project to help irrigation and it was further held that the time was unlimited except as to the life of the project. There is some doubt even whether it was limited to the life of the project. There was nothing said in the Solicitor's opinion as to how the principal should be paid back. His conclusion was that if you kept paying the 3 percent each year on a project you were doing your full duty and that was all that was required.

We compromised. The first compromise was that the interest rate was lowered from 3 to 2½ percent. Two percent was to go into the Treasury earmarked for reclamation. There was no dispute about that. I wanted all to go for the project, but my friends on the committee outnumbered me, although I did have some considerable support there for my position. Two percent goes now into the project and only one-half percent goes to the particular irrigation project for irrigation use to help the farmers. That is only one-half percent out of 2½ percent, whereas before we got the whole 3. That was a considerable concession.

However, in order to make these smaller financially sound projects feasible, I wish my friend from Virginia would hear those words "sound projects" because any one project is sound that pays out in the end with 2½ percent interest—we had to extend the life within which these payments were made from what was proposed both in my bill and in the Rockwell bill from 67 years to 78 years. This was necessary to bring about the results that we in our States need. But we do not live for our own States alone. If we are here legislating for the Nation we ought to be big enough to realize this Nation is one Nation. We cannot bear that in mind too many times. Sectionalism has no business in national legislation.

Now then, on this question—it was a debatable question and I am not saying which side was right or wrong—it was necessary to meet on some happy hunting ground, in the middle somewhere. So, we agreed that if the time was extended to 78 years we would consent that the 2 percent should go into the Treasury, earmarked for general reclamation, and that Congress should reappropriate and allow projects from time to time out of that particular money, that particular fund.

Now, I have no quarrel with anybody. That is the suggestion I have to make, and I wish to say, however, that the Committee on Rules should not be asked to write the laws. Their business is to bring out rules. The different committees that have all the information before them write the laws, and there is good reason why the Committee on Rules should not attempt to write laws, for the reason that they have not heard the evidence. They do not know what it is about.

It has been wisely said by myself and others that the person who does not know and remembers that he does not know is not dangerous to society or to national defense, but the person who does not know that he does not know and thinks he knows becomes dangerous to society and to national defense alike. So, let us remember that no person is all-wise in our body here; that we all are limited in time and energy and that we must not try to run the whole show; that we must limit ourselves to the subjects that we have heard fully discussed and have full knowledge of. That is one reason I believe that if you go amending this bill you will change the very purpose, the very object of our compromise, and I, for one, shall vote to recommit it if any such attempt is made here in this House.

Mr. BRADLEY. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from California.

Mr. BRADLEY. May I say to the gentleman that I do not know how the principal is to be repaid on the reimbursable projects? Would the gentleman kindly explain?

Mr. LEMKE. They are to be repaid now within the life of the project; that is, they are divided in two. As to irrigation the principal must be repaid within 40 years or such further extension as Congress may allow without interest. On the power side, under this bill, it will have to be repaid within 78 years with interest at 2½ percent on unpaid balances, or sooner, if the life of the project does not run and does not stand up for 78 years.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. PETERSON. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. BRADLEY. May I ask the gentleman an additional question? Is this principal repaid at a uniform rate or just as the Secretary of the Interior wishes it should be repaid?

Mr. LEMKE. It is paid back at a uniform rate, and it is paid back under contract made by the various projects with the Department of the Interior, and under that contract it is flexible. There may be certain different conditions. For instance, the present law says from the time that the project gets into operation, which may take 10 years from the time the contract is made. Then when the payments begin to run they are fixed and uniform. I know that from my own experience with irrigation in my own State. When we had the drought, and they were not able to pay, they got an extension from Congress.

Mr. BRADLEY. I thank the gentleman, and the gentleman from Florida for his extension of time.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from California.

Mr. HOLIFIELD. I would like to ask a question regarding that part of the bill on page 10 beginning with line 4:

> Nothing in this subsection shall be applicable to provisions in existing contracts, made pursuant to law.

On page 7 you give the Secretary the right to make a reanalysis of projects which have been heretofore authorized, but according to my understanding you, in this section, take away the right for any readjustment of rates to give existing projects the same beneficial right of repayment that you are now giving future projects.

Mr. LEMKE. Let me say to the gentleman that there are certain inequities, and so forth, that can be readjusted without further action by Congress. However, there are some of these projects that have been created by special act of Congress, like the Hoover Dam and others. If they wish to come under the similar provisions, I, for one, shall support them, unless they continue to obstruct this legislation and pull everybody down to their own situation. I do not believe that is necessary to gain their object. But, I know that the Hoover Dam and some other projects need help.

Mr. CARROLL. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Colorado.

Mr. CARROLL. I think what the gentleman from California has in mind is, say, for the Central Valley Authority, that their present pay-out period is approximately 50 years. I think his query is directed to this point. If this bill is passed, can they renegotiate to extend the pay-out period to 78 years?

Mr. HOLIFIELD. Providing it is necessary.

Mr. LEMKE. I am satisfied they can.

Mr. HOLIFIELD. Without additional legislation, or with it?

Mr. LEMKE. With additional legislation. They can extend it from the time it was started up to 78 years. I am satisfied that can be done by Congress if they desire it.

Mr. HOLIFIELD. The gentleman is aware of the fact that the contract between the Central Valley Authority and the farmers of the area is now on a 39-year basis?

Mr. LEMKE. It may be necessary that you come and ask Congress to give the same privileges to you and the Hoover Dam and other similar projects that this bill has. I, for one, shall be glad to join hands with you when that time comes. You cannot cover everything in one bill. I think the gentleman realizes that.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from California.

Mr. McDONOUGH. In regard to the renegotiation of the Hoover Dam and the Central Valley projects, is that the attitude of the committee that is opposing this bill?

Mr. LEMKE. What does the gentleman mean?

Mr. McDONOUGH. The gentleman is expressing his own opinion. Does he know what the opinion of the committee is?

Mr. LEMKE. I am expressing the opinion of a considerable number, if not the majority of the committee, when I say that I am satisfied that, if this bill passes, similar legislation for their projects and similar terms will be very seriously and gratefully received.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from California.

Mr. WELCH. I can say for the benefit of my California colleague, or colleagues [Mr. McDONOUGH], and the gentleman from California [Mr. PHILLIPS], also the gentleman from California [Mr. POULSON], that I concur with the gentleman from North Dakota and, as chairman of the committee, I will support legislation to extend the amortization period of the Colorado River to the full length of time provided for in the bill now pending before this House.

Mr. HOLIFIELD. May I ask the chairman of the committee if he would extend that same project to the Central Valley water project in case it was necessary?

Mr. WELCH. In case of necessity, absolutely.

Mr. HOLIFIELD. I thank the gentleman.

Mr. PETERSON. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. JOHNSON].

Mr. JOHNSON of California. Mr. Chairman, first I want to thank the gentleman from Florida for giving me this 5 minutes. I was reluctant to ask the members of the majority to give me 5 minutes because I know many members of the committee desire to discuss this very important bill.

Those who do not live out in the western part of the country do not really understand how vital water, backed up behind dams, is to our part of the country. We have no rain from roughly the 1st of April until the middle of November. By building these dams, we store the water necessary to give our lands water during the growing season.

To show you the importance of water and irrigation, I can cite you a very simple illustration. This is in figures as of before the war.

In my county bare land, without irrigation, was worth roughly $50 an acre. In the sixties, seventies, and eighties, that land raised very excellent grain, especially barley and wheat. With water on that land so that it would raise fruit, nuts, and vegetables which it does raise now, including thousands and thousands of tons of grapes, it went from $250 an acre to $1,000 an acre. In other words, the price rose from 5 to over 10 times in value due to the fact that we have irrigation.

I want to direct my attention to the matter contained in the provisions of the bill on page 9 which provides that there may be returned from the net power revenues one-fifth of the revenues derived from the interest component of power rates in addition to any and all other sums otherwise assigned for such purpose from power revenues. To me that is a very broad provision. What I am thinking about is this: It seems to give unlimited discretion to the Secretary of the Interior to turn over from the power revenues all of the money that he cares to to the irrigationists. I have thousands of irrigationists in my district, and I want them to get help from power revenues. But I likewise have a great many people who are going to buy this public electric power. The Sacramento Municipal Utility District which was just organized 2 years ago serves over 200,000 people. There are 60,000 meters in the district. We will be the first big customer for the hydroelectric power generated in the Central Valley project at the Shasta Dam. The power users whose power bills are going to pay for the power features of this dam plus some extra money to the irrigationists should not lose the benefit of the public ownership in that project and they will lose these benefits if there is too much of a diversion to the irrigationists.

You must remember that in the Central Valley of California there are dozens and dozens of independent local irrigation districts. In the very area that I represent there are probably 10 different districts. The ranchers using the water developed by these districts raised all the money that they required to develop their water and, in some instances, also electric power. They did not get one dollar from the Government. They got no help from anybody. They paid the interest on their bonds at rates ranging from 4 percent to 6 percent. They bonded themselves for 40 years and are gradually paying back the bonds dollar for dollar.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. BARRETT. May I say to my colleague from California that of course he recognizes the fact these power projects are wholly incidental to reclamation and that that is the basic authority upon which they were constructed originally. The law properly provides that the Secretary of the Interior shall take such proportion of the revenues from power as will make it possible to construct the reclamation end of the project.

Mr. JOHNSON of California. I understand that thoroughly, but I do not want the Secretary to go too far and rob the power consumers, who are going to pay for all this, of all of their benefits. There is danger of doing that very thing.

Mr. BARRETT. No, no; there is no danger of doing that because the Secretary of the Interior is limited by economic reasons. He has to sell this power at a very low rate in big blocks and consequently he has to keep that rate low. Therefore a project can only be determined to be feasible, first, if the power can pay for its way and also if it can pay enough so that the farmers can construct their reclamation projects.

Mr. JOHNSON of California. I agree with the principle.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PETERSON. Mr. Chairman, I yield two additional minutes to the gentleman from California.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. My time is all being taken up by members of the committee, but I yield to the gentleman from New Mexico.

Mr. FERNANDEZ. This bill does not extend in any way the amount which power has to pay in aid of irrigation, but it does limit the amount of interest which may have to be paid.

Mr. JOHNSON of California. I understand that thoroughly. That is just what I am afraid of. It does not limit it and the very cheap electricity that our people are looking for may be dissipated by diverting too much to irrigationists and thereby making the electric rate too high. If you get a Secretary of the Interior who wants to ride roughshod over the power consumers, that is what might happen. There ought to be a balance in there somewhere where they could not give too much money away and thus charge the electric consumers who are going to pay for these projects.

Mr. BARRETT. There is no change from the present law. That is the law at the present time.

Mr. JOHNSON of California. I know, but it has not been applied to my section yet and I am afraid that it could be applied to the detriment of some of my people.

I want to mention one other thing, just to raise the question. We have been talking about this reclamation law and have heretofore thought of its projects as being liquidated over a 40-year span. Often the question comes to my mind, What is going to happen to any particular project when all of the landowners have paid it all out? I understand the original idea of those who drafted the 1902 act was that the landowners would then take it over and operate it; but as far as I know, that has not yet occurred. The reason I mention that is this: I think we ought to lay down this principle, and I have gone so far as to introduce two bills, heretofore, covering the principle, that on intrastate rivers, like we have in California and other States, after the Government acts as banker and furnishes the money to build the projects and upon their completion then the United States should make a contract with the State, providing that the State may be substituted in place of the National Government to administer the project. In the contract providing for this arrangement, they would then provide that the State of California, for instance, would stand in lieu of the landowners who are paying the water bills, and the power consumers, and guarantee to the Federal Government every dollar provided to be repaid to it by this bill.

The CHAIRMAN. The time of the gentleman from California [Mr. JOHNSON] has expired.

Mr. PETERSON. Mr. Chairman, I yield the gentleman two additional minutes.

Mr. JOHNSON of California. And the administration would be in the hands of the local people. Without any derogatory reference against any member of the Department of the Interior, it is my firm conviction that we would have better administration by local people on the ground making the ultimate decisions than we can have from this far-off administration, 3,000 miles from the scene where the law is to be administered. Also, the Secretary of the Interior has so many important questions before him that he simply does not have enough hours in the day or enough days in the year to make decisions that he has to make and should make expeditiously. It is not in criticism of their administration, but it is trying to keep in the Department of the Interior the questions involving interstate rivers, and let the United States be the banker to start these intrastate river projects, and then leaving it up to the States who are willing to assume the responsibility of reimbursing the National Government for every dollar they have in the project. This would be more to the benefit of the landowners, would get more rapid decisions, and perhaps would even bring more economical administration. I hope to elaborate more on this proposition in the future.

The CHAIRMAN. The time of the gentleman from California [Mr. JOHNSON] has again expired.

Mr. ROCKWELL. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. PHILLIPS].

Mr. PHILLIPS of California. Mr. Chairman, what we are discussing this afternoon in the Committee is a specific bill and the wording of that bill. I say that in all seriousness. From noon today up to the present time, I have heard arguments on this floor in favor of the value of reclamation. I have heard discussions of the urgent need of water in the western part of the United States, but I have not heard all of the discussion that I wanted to hear on the specific detail of the bill before us.

Mr. Chairman, I served for 4 years as a member of the Committee on Irrigation and Reclamation. I served very happily on that committee, and was sorry to leave it, but I was one of the Members of the House who was compelled to give up certain committees, under the terms of the Reorganization Act. I served under the distinguished gentleman from Arizona [Mr. MURDOCK], and under his predecessor, the gentleman from Idaho [Mr. WHITE]. I regret that I cannot now serve as I would like to, under the distinguished gentleman from California [Mr. WELCH], nor on the subcommittee of the gentleman from Colorado [Mr. ROCKWELL].

This bill is not new to that committee. This bill has been discussed at length, and the arguments that are embodied on this bill are perhaps still not completely finished.

Laws are made by bringing bills before committees, and eventually and hopefully bringing them out of committees, and then discussing them on the floor, and then, in the wisdom of the Members of the House, sending the bill, if the House so decides, to the other body, in the form in which a majority of the Members want it.

For our discussion today we can divide this bill easily into three parts. There is the question of whether this House wishes to give more power to the Reclamation Bureau, an agency of the Department of the Interior. A great many Members of this House on both sides of the aisle have gone out in their campaigns in the last 5 years and have spoken very firmly on the subject of wanting to go down to Washington to do what they could to limit the powers of governmental agencies and of departments.

I think as I read the bill that that section beginning on page 4 and extending beyond that to about page 5 or 6 does in some ways extend the powers of the Department of the Interior and those of the Bureau of Reclamation and the Commissioner beyond the powers which these agencies or individuals previously had in their hands. Thus we have a question to decide here: Shall we extend the power of the Bureau of Reclamation in view of the fact that Congress has repeatedly committed itself to limiting the powers of governmental departments? I shall offer no amendment on that point, but I understand a member of the committee intends to offer an amendment to leave the powers of the Commissioner where they exist now and not to extend them; and I, as one Member of the House, will vote for that amendment.

Mr. D'EWART. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield.

Mr. D'EWART. I merely wish to state that the part to which the gentleman referred only extends the power as to the Secretary in determining the feasibility, not in determining the cost of construction or the construction of the dam.

Mr. PHILLIPS of California. I thank the gentleman, and I am glad that is now a part of the RECORD.

The second part of the bill—and this has been a subject of continuous discussion before the committee—has to do with what we refer to as the interest component. How much of the interest, as you heard this afternoon, shall be applied to reclamation, reduction of reclamation costs, and how much shall be applied to the reduction of power costs? As it appears in this bill, it is, in my opinion, a compromise, and I think the committee has done a commendable job to bring out on the floor a compromise on so highly controversial a subject as the interest component which has been discussed, to my personal knowledge, for 5 years before the present subcommittee and its predecessor committee.

I am not saying that I like this settlement; I am not saying that if I had written it, any more than I think if some members of the committee had written it as they wanted it, it would have been exactly this way; but it is what I call a compromise and it is my intention to support the distinguished chairman of the subcommittee, the gentleman from Colorado [Mr. ROCKWELL], in that compromise which we now find in the bill.

But when you come to the third feature in the bill, which is the extension of time in which a project may be declared feasible, by no stretch of the imagination—to me at least—can that be called a compromise. It has been called a compromise on this floor today. The Bureau of Reclamation either by law or by

custom is accustomed to declaring a project feasible if it can pay itself out in 40 years. The gentleman from Indiana [Mr. HARNESS] asked where that originated. I do not know, but I strongly suspect as a man who was formerly on city councils and local governmental agencies that it was adopted from the rule that Government securities, Government bonds, are usually required to run no more than 40 years.

Mr. D'EWART. If the gentleman from California will reread that particular section he will find that the 78 years does not apply to feasibility but applies only to the repayment of the money.

Mr. PHILLIPS of California. I am corrected. The bill applies to the ability of the district to repay for power only in this bill, in that length of time; but the All-American Canal, which has been referred to, is compelled by law to repay within 39 years.

The gentleman from Wyoming said this afternoon that a project had been permitted at 69 years. So this is not a compromise. Here is 78 years—beyond anything that we have discussed so far or accepted. I feel very strongly on the fact that 78 years is opening the door wider for projects than this Congress has ever before, or should now, open that door. It does not mean that a project cannot be built if it cannot be paid for in 40 years. It means that Congress must say it is willing it should be built, and not place authorizing power more strongly than it rests now in the hands of an agency of Government.

I understand an amendment will be offered to bring it back to 50 years, and that this amendment will be offered by the distinguished gentleman from Iowa, chairman of the Subcommittee on Appropriations having to do with the Department of the Interior, who is so familiar with this cost problem. I shall certainly support that amendment.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield to the gentleman from Wyoming.

Mr. BARRETT. Will the gentleman agree with me that under existing law there is no limitation whatsoever except the useful life of the project and it might well be over 100 years under the law at the present time?

Mr. PHILLIPS of California. I will agree with the gentleman that under existing law such a thing might be possible, but custom is one deterrent and the unwillingness of a Secretary of the Interior to take upon himself the responsibility of deciding that is another. But if you write into the law that he may have the right on some basis of the life of a project, or the ability of the people to pay, or specify 78 years, then you know full well that the Secretary of any department would think himself authorized to extend the time to the full limit specified and discussed by the Congress.

Mr. BARRETT. May I say to the gentleman that, as I understand it—and I think I am correct—it is true that the average life of the project as estimated is 50 years, but the average pay-out is more than 60 years at the present time.

Mr. PHILLIPS of California. I do not think that is an argument—to suggest that we weaken the financial integrity of the project or the financial integrity of the United States.

Mr. BARRETT. The gentleman is making it much worse.

The CHAIRMAN. The time of the gentleman from California has again expired.

Mr. ROCKWELL. Mr. Chairman, I yield the gentleman one additional minute.

Mr. LEMKE. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield to the gentleman from North Dakota.

Mr. LEMKE. Mr. Chairman, may I say that the gentleman and I formerly sat on the same committee. But he misses the entire point of the compromise which he would not have done if he had been on the committee, because I was at one end of that compromise. This bill takes away the 3 percent we get to help irrigation and I get only one-half percent, the other two going to help out projects as authorized by the bill. For giving up that 3 percent or 2½ percent, in return I get the 78 years, which works out not quite as good as the 2 percent or if it were 2½ percent to help irrigation. If the gentleman's amendment prevails it will defeat the very purpose of our compromise and it will do the very thing I am sure he would not want done if he were still a member of the committee.

Mr. PHILLIPS of California. The gentleman may call that a compromise, but I do not think giving more than anybody has had before is a compromise.

The CHAIRMAN. The time of the gentleman from California has again expired.

Mr. FERNANDEZ. Mr. Chairman, I yield 5 minutes to the gentleman from Colorado [Mr. CARROLL].

Mr. CARROLL. Mr. Chairman, I have been very much interested in hearing the discussion of the two gentlemen from California, both of whom have raised some very important points. The last speaker, it seems to me, has touched on a point that if a certain amendment is adopted will destroy the effect of the whole bill. As the gentleman from North Dakota has pointed out, the whole purpose of this compromise legislation is to preserve the economic feasibility of these great projects. I think it is very important, and I would like to speak to the gentleman from California on the point that he made. If this bill is now amended, reducing the pay-cut period to 50 years, the ultimate effect will be an increase in the power rates. The reason that this compromise has been made by the committee was to see that, first, we would not destroy the economic feasibility of projects and, second, that there would not be any increase in power rates. It is clear what we are talking about in this bill. Some of us feel very strongly about Mr. LEMKE's bill. Some of us felt that the National Reclamation Association had no business to come before this Congress and stir up this issue. We felt we were getting along all right under existing legislation.

Mr. JOHNSON of California. Mr. Chairman, if the gentleman will yield, how does the gentleman know that I am going to support the amendment?

Mr. CARROLL. I did not say that the gentleman would. I am talking about the increase in power rates.

Mr. PHILLIPS of California. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from California.

Mr. PHILLIPS of California. I think the gentleman's feeling that the power rates would necessarily be raised is not based on the evidence. That is the gentleman's point, is it not?

Mr. CARROLL. That is exactly my point.

Mr. PHILLIPS of California. For example, if I may illustrate very briefly the one project with which I am personally very thoroughly familiar, the Reclamation Bureau is charging up against that project 60 percent of the income as the cost of operation when other projects in the same area are not running any more than 21 percent or 27 percent, and that is what is being charged into the cost, and not 50 years or 39 years. My point is that I believe that that is not the only factor in the power rates that you should consider.

Mr. CARROLL. I can assure the gentleman from California that that is the chief factor. As a matter of fact, all of the testimony of the Secretary of the Interior and all his experts said, that if you destroy the rate structure that now exists you will stop irrigation in the West and you will stop some of the great hydroelectric projects in the West. Now, what did he mean by that? That there are certain costs allocated to irrigation. Those have already been set. The pay-out period is 50 years. Many witnesses came before us. They said that they objected to the interest component going to pay off the cost allocated to irrigation. They wanted that money to go into the miscellaneous receipts of the Treasury Department. We resisted, many of us, because we felt that when you do that, when you take away that money that was applied to the cost of irrigation, necessarily you place a greater burden on power revenue, and in order to get additional revenue you would have to increase the power rate. There is no doubt in my mind that that was the evidence, and that is a point on which every member of the committee will agree.

Mr. PHILLIPS of California. The gentleman understands that I am not opposing that part of the bill. The gentleman understands that I am talking primarily about the length of time—the 78 years.

Mr. CARROLL. But the point that the gentleman does not really understand—if I may be so bold—is the real purpose of this compromise. We extended the pay-out period so that we could give 2½ percent into the Treasury to pay the interest component into the Treasury. If we do not do that, then you will have to increase the power rate. The way that you do not increase the power rate is to extend the pay-out period 78 years, and I stand for correction if I am wrong on this to any member of the committee. Do I make myself clear on that?

Mr. PHILLIPS of California. I understand the gentleman but I do not neces-

sarily agree with him. But I will not take his time. A member of the committee, I think, will discuss it.

Mr. CARROLL. I am perfectly willing to answer questions.

Mr. PHILLIPS of California. I think this has been worked out previously under the Department, and I think also the gentleman should understand, as I understand it, that the adoption of the amendment, which I hope will be offered, for 50 years, does not necessarily mean that no project will ever be built. It would pay itself out in longer time. I believe that projects of that kind must come to the Congress if we are to preserve the integrity of the Congress, and the financial integrity of the Nation.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. FERNANDEZ. Mr. Chairman, I yield the gentleman four additional minutes.

Mr. CARROLL. The gentleman from Montana has very ably pointed out that we are talking about a pay-out, an extension of pay-out period for revenue purposes. Now, if you limit that to 50 years necessarily you must find the revenue to take care of the project. In order to do that, your revenue must come from some source. It cannot come from irrigation, it can come only from the sale of power, which means increasing the power rate. That is what the gentleman from New Mexico has been trying to tell this body, that there are influences working underneath trying to increase the power rates. I should think everybody in California will understand, with your great Central Valley Authority, what the basic issues here are.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from California.

Mr. WELCH. At the present time and under the ruling of the Solicitor of the Department of the Interior, 3 percent is allocated to irrigation. The bill reduces that to one-half of 1 percent.

Mr. CARROLL. That is exactly right.

Mr. WELCH. May I call the attention of my colleague from California [Mr. PHILLIPS] to the fact that if under the amendment proposed the time is set back from 78 years to 50 years, it destroys the effectiveness of the bill, it emasculates it.

Mr. CARROLL. Not only does it do that but the experts have testified that it will destroy the economic feasibility of future projects.

Mr. WELCH. Projects cannot be amortized in 50 years.

Mr. CARROLL. I did not like this bill but I accepted the compromise because I thought that the Committee on Appropriations was holding a club over the West, and if we did not take this it might interfere with future projects.

Mr. ENGLE of California. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from California.

Mr. ENGLE of California. I think the distinguished chairman of our committee made the point I have in mind, but is it not a fact that if the time specified in this bill is limited the whole effect of the bill is lost and we might as well send it back to committee, because it destroys the compromise and the whole integrated program upon which this bill is based?

Mr. CARROLL. There is no question about that. If they cut the limitation in this bill I will fight it as hard as I fought it originally in committee.

Mr. WELCH. Mr. Chairman, will the gentleman yield further?

Mr. CARROLL. I yield.

Mr. WELCH. I want to serve notice right now that if the amendment proposed by the gentleman from California to set back the amortization period from 78 to 50 years is adopted, as chairman of the committee I shall, with the approval of the committee, move to recommit the bill, because that destroys the effectiveness of the bill, and small irrigation multiple projects cannot be amortized.

Mr. D'EWART. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from Montana.

Mr. D'EWART. I do not believe the testimony before the committee shows that changing this time raises or lowers the interest rate. I do not think that was the purpose of extending the time. The purpose of extending the time, as I recall the testimony, was to make other projects feasible, not to affect the rate that will be charged. In other words, under the reclamation law the irrigator is going to have to pay according to his ability. Whether we have this law or the old one, the man using the electricity is going to pay the same rate under this law as under the old one, but by adding the two together and extending the time we make projects feasible that were not otherwise feasible.

Mr. CARROLL. Yes; I think the gentleman will agree with me that if we set a limitation of 50 years and change the interest component it necessarily means an increase in the power rate, because you have to have more revenue.

Mr. D'EWART. No; I do not think the evidence shows that.

Mr. CARROLL. I am sorry; I disagree with the gentleman. We discussed that for months. I take a different view.

Mr. ROCKWELL. Mr. Chairman, I yield 5 minutes to the gentleman from Nebraska [Mr. CURTIS].

Mr. CURTIS. Mr. Chairman, H. R. 2873 is a measure that will be of assistance to the West. I am for the development of our natural resources and, while this bill may not suit every individual, it is a good bill and I shall support it. As stated in the committee report, the bill is one which the Western States, the Federal Government, and the Nation as a whole can support wholeheartedly.

The extension of irrigation is a vital matter to many localities. From our national viewpoint it is a necessity. Our power development is needed also. There is a shortage of power in the country. The principle of public power has been well established. Believing that this bill will assist in these developments, I shall support it.

Mr. ROCKWELL. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. POULSON].

Mr. POULSON. Mr. Chairman, the statement made by our esteemed chairman the gentleman from California [Mr. WELCH], the very able chairman of the subcommittee the gentleman from Colorado [Mr. ROCKWELL], and our very able colleague the gentleman from North Dakota [Mr. LEMKE] that the committee voted unanimously to send this bill out is true. However, I should like to give a little background of the history of this legislation, and also to point out the fact that this so-called compromise was effected during the last 12 or 24 hours the bill was before the committee. There was need for legislation. There is no argument about that. There is no argument over the fact that we need lower interests. I agree with them on that. I am for the power projects. I believe in helping irrigation in every way possible. This bill was before the Seventy-ninth Congress. It has been before this Congress and was one of the first bills that came up. We discussed it for weeks and weeks. Then, finally, we had a bill on which we voted in the subcommittee and on which there was disagreement. Then overnight the very capable attorneys from the Reclamation Division of the Department of the Interior came down and talked to some of the leaders in our committee and we have this compromise.

Mr. LEMKE. Mr. Chairman, will the gentleman yield?

Mr. POULSON. I yield.

Mr. LEMKE. You are absolutely mistaken. That compromise was made here on the floor between the gentleman from Michigan [Mr. CRAWFORD], myself, and the gentleman from Wyoming [Mr. BARRETT], and was then submitted after we had agreed with the gentleman from Colorado [Mr. ROCKWELL] and he was satisfied with it. That is how the compromise was made.

Mr. POULSON. All right; I will stand corrected. But was not the compromise presented within the last few days after this bill had been before the committee an entire session?

Mr. LEMKE. There had been attempts at compromise made all along and one time I thought we had a compromise.

Mr. POULSON. But was not the bill passed out immediately after that? After this compromise was it not immediately passed out?

Mr. LEMKE. Yes. The committee was waiting for the subcommittee to agree and when the subcommittee was agreed it went through the committee, and you were present at that hearing and at other hearings.

Mr. POULSON. Did not some of the attorneys offer some of the wording of this legislation?

Mr. LEMKE. I will say that I called up the Department and asked them to figure out for me what would be a reasonable recompense in the extension of time so as to repay for agreeing to let the interest go into the Federal Treasury, that is, the 2 percent. That was the reason for the compromise and that is the reason for the extension of time.

Mr. POULSON. I cannot yield further, but I do want to say that after this bill was brought out, then the attorneys who represent the various groups in southern California, the largest municipally owned department of water and power, the Colorado River Board and the

Metropolitan Water District and all of these public agencies, saw in this legislation wording which they felt was definitely detrimental to the interests of southern California. For that reason and that reason alone, I found it necessary to oppose certain phases of this legislation. Why do I oppose it in certain particulars? As you all realize, this legislation definitely lowers the standards of feasibility for any project which would give the Director of Reclamation the power to authorize a project. We in southern California have one very serious problem confronting us. There is legislation in the Senate as well as in the House for a project for Arizona involving $800,000,000 to $1,000,000,000 which absolutely has no semblance of feasibility. The minute we start lowering these standards of feasibility to such a low level that the Director or Commissioner of Reclamation can then determine that this is feasible, then we will have brought upon ourselves one of the most serious problems that could possibly confront southern California.

Whether or not they planned this bill according to the best legal advice we were able to get, if you will turn to page 9 of the bill, you will find it reads as follows:

Page 9, line 2: "; (3) the return, without interest, within a reasonable period of years not exceeding the useful life of the irrigation features, and with respect to each irrigation block, in a period conforming so far as practicable to the period within which water users are required to repay their share of the irrigation costs, of that share of the investment found by the Secretary pursuant to subsection 9 (a) hereof to be properly allocable to irrigation but assigned for return from net power revenues."

Now, just last week the attorneys for the Reclamation Division of the Department of the Interior presented to the committee their versions of a bill which complements this bill, and which will absolutely lower the standards to such an extent that it will not be necessary for them to come before Congress to authorize any project. Let me read from this draft of a bill which their attorney presented when we had another piece of legislation up here, which definitely shows the fine hand of the Department, whereby they are going to attempt to take within themselves powers which we in Congress think we have today.

Quoting from this draft which was presented from Mr. Will, of the Reclamation Division, to Mr. Harris, page 2:

Each contract entered into under the provisions of this subsection shall provide for such rates as, in the Secretary's judgment, will produce revenues at least sufficient to cover an appropriate share of the annual operation and maintenance cost and an appropriate share of such fixed charges as the Secretary deems proper, due consideration being given to that part of the cost of construction of works connected with water supply and allocated to irrigation and to the recovery of the actual cost of such works in a reasonable period of years, consistent with the Secretary's findings regarding the financial capacity of the organization and within the useful life of the project.

We know that over in Egypt that project ran for about 2,000 years. They run for at least 200 years over in this country. Now, what are they attempting to do? They are definitely attempting to take full control out of the hands of Congress, and then be able—I will not say they would do this, but this is what they could do: They could go out on about October 15, and they could say, "I, representing the President of the United States, am going to authorize a project in your district." That is exactly the type of power that we are giving them when we pass this bill, unless we make some amendments which I am going to offer tomorrow.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. POULSON. I yield.

Mr. WELCH. My colleague from California is a member of the Committee on Public Lands.

Mr. POULSON. That is correct.

Mr. WELCH. Why did not the gentleman offer the amendment before the Committee on Public Lands?

Mr. POULSON. Because the bill went out so fast that I never had a chance to talk to the attorneys representing the publicly owned department of water power in Los Angeles; the Colorado River Board, the metropolitan water districts, and others. I am not an attorney. I do not understand these clever manipulations of words which can mean two or three different things, to be interpreted by attorneys again. My esteemed colleague can give me credit for not being able to understand that particular thing.

The CHAIRMAN. The time of the gentleman from California [Mr. POULSON] has expired.

Mr. D'EWART. Mr. Chairman, I yield the gentleman two additional minutes.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. POULSON. I yield.

Mr. WELCH. Did not the gentleman join with his colleagues on the committee in unanimously reporting this bill after the so-called opposition from the attorneys in southern California had made their opposition known?

Mr. POULSON. Yes; but, Mr. Chairman, I represent the people of southern California, and if we find there is legislation which is definitely detrimental, and which has been placed there by attorneys on the last minute of the committee hearings, we certainly have the prerogative and the right to come out and oppose it. Does the gentleman say that a member of a committee, once voting for it, then finding there is something detrimental to his district, does not have the right to get up and oppose the bill? Does the gentleman say that?

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. POULSON. Yes; I yield.

Mr. WELCH. The purpose of this bill transcends the interest of southern California, northern California, Maine, Florida, or Louisiana. It is a national bill and not a sectional bill.

Mr. POULSON. All right. I ask the chairman if he is in favor of giving the power to any man regardless of political party to determine whether there shall be a project or not? Is he in favor of having Congress absolutely give up its power, abdicate? The Committee on Public Works and the Committee on Public Lands absolutely abdicate their authority over these projects.

The CHAIRMAN. The time of the gentleman from California has again expired.

Mr. ROCKWELL. Mr. Chairman, there are no further requests for time on this side.

Mr. MURDOCK. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. MURDOCK. Mr. Chairman, the gentleman from California [Mr. POULSON] was very frank in stating his opposition to the present bill and also in indicating his intention to support certain amendments. His frankness leads him to say that he fears that the enactment of this bill would give encouragement or hope for a certain project in Arizona which he thinks might be harmful to southern California. I am very sorry the gentleman from California feels that way about it. I feel that it would be better for the gentleman from California to base his objections to any Arizona project on the merits or demerits of that project alone rather than to oppose a general reclamation bill which is intended to improve reclamation prospects in all of the 17 Western States.

This measure is indeed a general reclamation bill and applies under the given conditions to every one of the 17 reclamation States. It seems to me a part of wisdom to consider it on its own merit, as it affects all parts of the West—and I think beneficially—rather than raising objection to it because of the possible advantage which the gentleman from California thinks might accrue to the Central Arizona project on the passage of this bill.

Furthermore, perhaps the gentleman's fear that this bill, if it should become law, would help the central Arizona project to materialize is not well founded. No, if we pass this bill as it is it will have no effect whatsoever on the central Arizona project which the gentleman so positively opposes. No one thinks of the Secretary's finding of feasibility for a project like the central Arizona project. As the gentleman should know, the central Arizona project bill is now before the Public Lands Committee of the Senate in the form of an authorization. The proposal has been submitted to the States interested and it is my understanding that it would be impossible over the objection of any one State for the Secretary to make a finding of feasibility even if this bill were law.

I trust the gentleman from California will modify his objection to the Central Arizona project, but in any case his objection on that ground has no validity. Therefore, this objection might jeopardize the passage of this worthy measure for reasons that have no connection with the measure. If this bill is good for projects yet unborn in all the Western States—as I believe it is—it would indeed be a sad mistake to vote against it on the erroneous ground that to do so would

defeat a project one wanted to thwart. Such would be not only harmful but ineffectual.

Mr. PETERSON. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time the committee substitute bill will be read as an original bill.

The Clerk will read.

The Clerk read as follows:

That section 9 (a) of the Reclamation Project Act of 1939 (53 Stat. 1187) is amended to read as follows:

"SEC. 9. (a) No expenditures for the construction of any new project, new division of a project or new supplemental works on a project shall be made nor shall estimates be submitted therefor by the Secretary until after he has made an investigation thereof and has submitted to the President and to the Congress his report and findings on—

"(1) the engineering feasibility of the proposed construction;

"(2) the estimated cost of the proposed construction;

"(3) the part of the estimated cost which can properly be allocated to irrigation and probably be repaid by the water users;

"(4) the part of the estimated cost which can properly be allocated to irrigation and probably be returned to the United States in net power revenues and from sources other than the users of water for irrigation purposes to the end of providing the necessary measure of assistance in repayment of irrigation construction costs;

"(5) the part of the estimated cost which can properly be allocated to commercial power and which together with interest on the unpaid balance at a rate of not less than 2½ percent per annum can probably be returned to the United States in net power revenues;

"(6) the part of the estimated cost which can properly be allocated to municipal water supply or other miscellaneous purposes and probably be returned to the United States;

"(7) the part of the estimated cost which can properly be allocated to (i) preservation and propagation of fish and wildlife pursuant to the act of August 14, 1946 (60 Stat. 1080), or (ii) recreation, including recreation by reason of the provision of enlarged or improved facilities or conditions specifically and reasonably required for such purposes, or (iii) general salinity control, or (iv) silt control. Costs allocated pursuant to such findings, together with the annual operation and maintenance costs attributable to the same purposes, shall be nonreimbursable and nonreturnable;

"(8) the economic benefit-cost ratio of the proposed construction.

"If the proposed construction is found by the Secretary to have engineering feasibility and if the repayable and returnable allocations to irrigation, power, and municipal water supply or other miscellaneous purposes found by the Secretary to be proper pursuant to subdivisions (3), (4), (5), and (6) hereof, together with any allocation to flood control or navigation made under subsection (b) of this section, and together with any allocation made pursuant to subdivision (7) hereof, which shall be nonreimbursable and nonreturnable, equal the total estimated cost of construction as determined by the Secretary, then the new project, new division of a project, or supplemental works on a project, covered by his findings, shall be deemed authorized and may be undertaken by the Secretary. If all such allocations do not equal said total estimated cost, then said new project, new division, or new supplemental works may be undertaken by the Secretary only after provision therefor has been made by act of Congress enacted after the Secretary has submitted to the President and the Congress the report and findings involved. The Secretary may make findings with respect to projects heretofore authorized as to that part of the cost thereof which should be allocated in accordance with the provisions of subdivision (7) hereof and in accordance with subsection (b) of this section, and such part of said costs shall, after transmittal to the President and the Congress of a report containing such findings, be nonreimbursable and nonreturnable. Operation and maintenance costs attributable to the purposes enumerated in subdivision (7) hereof shall, after the transmittal of any such report, be nonreimbursable and nonreturnable."

Mr. CHENOWETH. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DONDERO, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939, had come to no resolution thereon.

EXTENSION OF REMARKS

Mr. JENSEN asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter to him from Mr. James Pearson, of Shenandoah, Iowa.

The SPEAKER. Under the previous order of the House the gentleman from California [Mr. BRADLEY] is recognized for 30 minutes.

AMERICAN MARITIME LABOR AND THE EUROPEAN RECOVERY PROGRAM

Mr. BRADLEY. Mr. Speaker, during the recent war, many a torpedo was fired at an American merchant ship, and when it struck its mark quite a few jobs for American seamen went up in smoke and flame. However, never before has a torpedo been fired with such possible dire consequences as the one launched by the State Department's European recovery program. A German or a Japanese torpedo might sink one ship and deprive a few men of their jobs—the State Department's model ERP, 1948, will do just 500 times better than the best German or Japanese weapon and, most amazing to relate, the model ERP, 1948, torpedo was not designed or fabricated by technicians who know naval ordnance, seamanship, or shipping, but, rather, at the technical level by two Rhodes scholars, three professors, an investment banker, and a career bureaucrat. Nevertheless, I must confess, that it is an amazingly efficient weapon of destruction for the American merchant marine.

On January 13, I invited the attention of the House to the fact that acceptance of the European recovery program, as submitted to the Congress by the State Department, would sound the death knell of an adequate American merchant marine. The transfer of 500 vessels to foreign flags, as proposed in the ERP, would nullify the policy declaration of the Merchant Marine Act of 1936 and would deplete seriously our national defense reserve of merchant vessels.

Today, I intend to discuss the personnel angle of this ERP proposal, for it takes men as well as ships to make a merchant marine. A knowledge of the effect of the State Department's proposals on our American seamen and our American shipyard workers is essential to an intelligent understanding of this shipping problem.

The appropriation bill passed by the Congress last month contained $1,300,000 for the reconversion unemployment program for seamen. This money was needed due to the exhaustion of a $900,000 appropriation made last spring. The initial appropriation was used up, after only 5 months of the fiscal year had passed, due to the unexpected return of 372 chartered American vessels to the laid-up fleet between July and November 1947. The causes of this marked decline in the United States flag merchant fleet were the numerous transfers of American war-built vessels to foreign flags and the considerable number of new vessels from foreign shipyards—notably from those of Great Britain. The world's supply today of dry cargo vessels, in the 7,000 to 10,000 deadweight ton category, is far in excess of the world's demands. Nevertheless, such ships are being built in quantity in European yards, in large measure with steel obtained from the United States. We are following the seemingly absurd policy of delaying essential construction of passenger and other types of vessels in American yards because of the steel shortage here while, at the same time, we are shipping large quantities of steel to Europe for the construction of similar-type vessels in foreign yards.

Our merchant fleet is the marginal fleet of the world. Every ship transferred by us to a foreign flag, every vessel constructed in a foreign yard, results in one more idle American ship and in added unemployment for at least 42 American seamen. The long-run effect of the shipbuilding race being carried on by the western European nations is sure to be a serious overbuilding of the world's merchant fleet. Under such a condition the world's resources are wasted and it is America that suffers most of all, for the merchant shipping so vital to our national defense withers and dies on the vine.

I am not one inclined to be an alarmist, but there is no use in minimizing the dangerous and explosive situation now existing between the United States and the Soviet Union. I sincerely hope we may find peaceful solutions to all of our disagreements and differences, but we failed to do so in the past when Germany, Italy, and Japan were concerned, and we may fail to do so with startling rapidity in the future where Russia is concerned.

One of the absolute essentials for the waging of successful war overseas is a big merchant marine. We may talk about air power as we will. We may believe that air power will deliver the first blows; we may believe that it will deliver tremendously effective blows; we may believe that it is the paramount arm of the fighting services. I care not how many such assumptions we concede, the fact still remains that now, and within the next few years, at least, a big merchant

marine is necessary for the successful conduct of overseas warfare on a large scale.

We have that merchant marine. Russia does not have it and cannot build it in the near future. The one way she can get a big merchant marine quickly is to capture it through the sudden conquest of western European nations and the taking over of their ships. You may say, perhaps, that this is utterly fantastic. The overrunning of Poland, and France, and Holland, and Belgium, and Norway, and Denmark were fantastic; yet they were also real. You may say that if this should occur these ships would be brought to the United States by their foreign crews. Well, perhaps; and again, perhaps not. Dictators have ways of treating the families of those who go over to their enemies—ways which might well be quite effective in bringing about the delivery of most of these 500 ships to European ports.

In such event, a major part of these ships might well spell the added number needed for extensive overseas operations on the part of the Soviet Union—might well spell disaster for the American people. Who knows? And, not knowing, why take this unnecessary risk in a world such as we have today? We do not have any sugar daddy to look out for us if we get into trouble. The world considers us to be grown up and able to look out for ourselves. I hope the world is right.

The loss of 372 vessels from the active fleet, during the last 6 months of 1947, threw about 16,000 American seamen out of work. Neither the initial $900,000 nor the supplemental $1,300,000 appropriated for the unemployment program for seamen is a measure of the direct cost of seamen's unemployment. These Federal appropriations cover only unemployment for seamen who served on Government-owned vessels. Great numbers of seamen are entitled to unemployment benefits from State funds on the same basis as shoreside workers. As the States do not segregate their unemployment figures by occupations the full cost of unemployment among our merchant seamen is not easily ascertainable.

But, Mr. Speaker, the cost in the terms of human suffering is ascertainable. Just consider the problems faced by the families of American seamen. Supported by an occupation which allows at best only 9 or 10 months of earnings during the year, the families of seamen even now are faced with long periods of existence on $18 to $21 per week, from unemployment insurance. In the light of present-day living costs, such benefits do no more than meet food bills—and perhaps they cannot even buy sufficient food for a wife and children in a seaport city. In the event of the adoption of the ERP plan, the lot of the seaman's family will be even more difficult and discouraging.

The transfer of 500 American vessels means immediate loss of 30,330 jobs in the seagoing branch of the maritime industry—22,750 officers and seamen will be deprived of billets on board ship; 7,580 men ashore awaiting employment will be deprived of decent opportunities to serve at sea—all of this supposedly in the best interests of the American people. Because it has been traditional to rotate employment in the maritime industry on a "first-in first-out basis," the effects of this surge of unemployment will be felt by every seaman. Time on the beach awaiting a ship, which now ranges from a week up to 5 or 6 weeks, varying according to rating and port, will be stretched to 8, 9, or 10 weeks in virtually every rating and every port.

And then the effects of this proposed ship transfer will be felt in ship-repair yards and in countless other industries which supply maritime needs.

Workers in private shipyards employed on new construction have fallen already from a wartime peak—from 1,700,000 to 33,000. The only employment now keeping minimum shipyard labor forces together, and preserving the core of the shipbuilding industry in this Nation, is the ship-repair work, which currently employs a little more than 70,000 men. With the transfer of 500 additional vessels to foreign flags—with repair work on these vessels being done in foreign yards—the bottom will drop out of American shipyard employment in some instances.

Employees of ship-chandlering firms, of steamship offices, of maritime insurance companies, and other such shoreside industries will be hard hit.

Let us make no mistake about current conditions. Our maritime labor is no longer made up of an expanded wartime force. During the war we had over 240,000 merchant seamen afloat simultaneously out of a total maritime labor force of about 275,000 officers and men. Today we are down to far less than half that number. Experienced former seamen, recalled for the war, and many thousands of seamen trained for the war, have returned to shore-side pursuits. The present-day force is composed of skilled men who desire to go to sea as a permanent occupation.

We entered the war with approximately 55,000 active seamen. The lives and health of these men were endangered gravely by their lack in number for they were spread so thinly over our rapidly expanding merchant fleet that their physical endurance was taxed to the limit. After doing their own jobs, they willingly went on and did much of the work of green men recruited to get the ships to sea. Eighty thousand seven hundred and fifty-nine men are required to operate the very minimum merchant fleet which the President's Advisory Committee on Merchant Marine deems essential for the national defense. We have these men now—a distinct element in the security of America—but we shall not have them long if the proposed shipping provisions of ERP are approved by Congress.

The Paris report of the 16 western European nations contemplates a 1951 maritime labor force for the United States which, at best, equals only our prewar number. I do not believe that this Congress should accept the responsibility for such a dissipation of our skilled maritime manpower.

We have heard much of an alleged $200,000,000 saving if we transfer 500 American vessels to foreign flags. Let me remind you of the appropriations for recruitment and training for maritime labor during the recent war. For the fiscal year 1943, $53,500,000; for the fiscal year 1944, $63,225,360; for the fiscal year 1945, $67,980,795; and for the fiscal year 1946, $39,598,710. Thus a total of $224,304,865 was expended on recruitment and training of maritime labor alone during those four war years, a figure in excess of the total alleged savings from the transfer of 500 vessels to foreign flags. This dollar total does not include the loss of vessels, the loss of life, the loss of cargoes, and the heavy accident and sickness tolls resulting from failure to maintain an adequate and skilled maritime labor force.

Then again, this figure does not include any part of the tremendous sums spent on the recruitment and training of shipyard labor.

Let us never forget that our seamen are Americans. They and their families spend most of their earnings for American products. Their taxes help finance this Government. If we add the cost of recruitment and training programs, the cost of unemployment benefits which will accrue, the losses in purchasing power and in tax payments from unemployment, and compare this sum with the alleged savings involved in the proposed transfer of vessels, I am sure that the alleged savings will look very seasick indeed.

American seamen, as do American ships, provide other nations with dollars for exchange. American seamen spend dollars in foreign ports. American ships spend dollars for dock charges, harbor duties, food, and many other items in overseas ports. We should keep this definitely in mind.

Let us, as Americans, now consider the wage standards and working conditions which will prevail in these ships if they are transferred to foreign flags.

In June 1946, the twenty-eighth session of the International Labor Organization, the International Maritime Convention, convened in Seattle, Wash. The convention had before it a series of international agreements establishing a minimum world-wide labor code for the maritime industry.

The convention on wages, hours, and manning was by far the most important of these proposed agreements.

The United States had a then-established monthly wage for an AB—able-bodied seaman—of $145 and, during the course of the convention, a new contract negotiated in the maritime industry, raised this minimum wage to $172.50 and reduced the working hours at sea to 48 per week. Today, the American AB receives $192 to $197 per month, and there is an arbitration proceeding in progress which may raise this figure. Minimum standards proposed for adoption at the Seattle convention were modest indeed. A basic monthly wage of £18 or $72 was suggested for able seamen with a maximum working week of 56 hours. The United States delegation sought a higher world-wide minimum wage and a shorter workweek. The European delegations, following the lead of the British, insisted upon a minimum of £16 or $64 per month and the convention adopted this figure for a 56-hour working week.

Our delegation was disappointed in the results, but was pleased by the fact that the principle of an international wage-and-hour minimum had been established, and that some progress had been made toward raising the level of seamen in the most substandard foreign fleets.

Within recent weeks the British Government has announced that it will not ratify the Convention of Wages, Hours, and Manning. It was recognized at Seattle that the ratifications of the United States and Great Britain are essential for the convention to have any real meaning. As the British are now paying a wage in excess of $64, their decision not to ratify is due apparently to their desire to avoid the maximum 56-hour week provisions of the convention. We are thus witnessing the very sorry spectacle of a labor government refusing to support a very minimum of labor standards. These are the wage standards and the working conditions to which we are being asked to transfer 500 American ships.

Mr. Speaker, does any Member of this House want to go on record as favoring a labor standard below a $64 minimum monthly wage and a working week in excess of 56 hours?

American labor is unalterably opposed to the proposals of the State Department in regard to the transfer of vessels as proposed in ERP. I believe American labor deserves the support of every Member of Congress in its battle to maintain our merchant fleet.

The Master, Mates, and Pilots, the Seafarers International Union, and the Sailors Union of the Pacific have consistently opposed the gift of American ships and of seamen's jobs to foreign nations. In testimony before congressional committees, in their own publications, and in countless letters to the Congress, the representatives and members of these organizations have stressed the sad effects of such a policy on the American merchant marine.

The CIO is equally firm in opposition to the proposed transfers. Many of the Members of this House are familiar with the informative and constructive suggestions advanced by the CIO maritime committee for the shipbuilding industry of this Nation. The day before President Truman called upon the Congress to deliver this ERP left-hook to the jaw of the American merchant marine, CIO's president, Philip Murray, presented to President Truman a program for the maintenance of a strong United States merchant marine. Although the program was completely ignored in the President's message, I believe it is well worth the attention of every Member of Congress, whether or not he finds himself in complete agreement with Mr. Murray.

The opposition registered by all labor organizations to further transfer of vessels is not a policy originating among labor leaders. Rather, it is a policy dictated by the rank and file of labor—a policy expressed in resolutions and letters from the crews of hundreds of American-flag vessels operating on the high seas of the world. It is a policy formulated by the leaders of labor in response to the demands of the common man.

Seamen are prolific letter writers. The journals of the seamen's organizations, the Pilot of the National Maritime Union; the Voice, of the National Union of Marine Cooks and Stewards; the Seafarers Log, of the Sailors Union of the Pacific; and many other such papers publish pages of letters from the membership of their respective organizations. A review of the letter columns of these publications shows that the most burning question today among American seamen is the proposed foreign-flag transfer of American vessels, and the threat of unemployment and want that such transfer holds for them and their families, for we should ever keep in mind that merchant officers and merchant seamen are married, just as you and I are married, and that they have homes and children, even as you and I have homes and children.

In recognition of the soundness of the position of the personnel of the American Merchant Fleet, in appreciation of their wartime services, in understanding of the contribution they have made and are continuing to make to the security and well-being of the Nation, the Congress should give heed to these voices coming to us from the sea and from the shipyards of America. There should be no further transfer of our vessels to foreign flags. Relief cargoes should be carried chiefly in American ships, for the well-being of all America.

REREFERENCE OF BILLS

Mr. MICHENER. Mr. Speaker, I ask unanimous consent that certain bills which I shall enumerate, which have been inadvertently referred to the Committee on the Judiciary, be rereferred to the Committee on Education and Labor, and that the Committee on the Judiciary be discharged from further consideration of the bills.

I may state that I have consulted with the Parliamentarian and am advised that these bills have been wrongly referred because the jurisdiction of the committees has been changed under the Reorganization Act. I have conferred with the author of each of the bills and also with the chairman of the Committee on Education and Labor, and there is no objection.

The bills are as follows:

H. R. 790, a bill to amend the act of September 7, 1916, by providing for a hearing of claims of employees of the United States before the United States Employees' Compensation Commission.

H. R. 970, a bill to increase the compensation for total disability granted employees of the United States under the United States Employees' Compensation Act of September 7, 1916,

H. R. 1872, a bill to amend the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, as amended.

H. R. 2047, a bill to amend the act of September 7, 1916, providing compensation for injuries to employees of the United States.

H. R. 2048, a bill to amend the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," as amended.

H. R. 3480, a bill to amend the United States Employees' Compensation Act of September 7, 1916, so as to increase the maximum and minimum monthly compensation.

H. R. 3596, a bill to amend the act of December 2, 1942, entitled "An act to provide benefits for the injury, disability, death, or enemy detention of employees of contractors with the United States, and for other purposes," to clarify the eligibility for benefits of certain employees detained by the enemy in the Philippine Islands.

H. R. 3673, a bill to extend the benefits of the United States Employees' Compensation Act of September 7, 1916, to active-duty members of the Civil Air Patrol, and for other purposes.

H. R. 3927, a bill to amend the act of September 7, 1916, to authorize certain expenditures from the employees' compensation fund, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXTENSION OF REMARKS

Mr. COOLEY. Mr. Speaker, I am advised by the Public Printer that the cost of printing a speech of the Honorable Josephus Daniels, which on yesterday I sought permission to print, will be approximately $177.50. I ask unanimous consent that this speech may be printed in the Appendix of the RECORD notwithstanding the cost.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

Mr. DINGELL asked and was given permission to extend his remarks in the RECORD and include a speech recorded by him and broadcast over Station WWJ on Monday, January 19.

The SPEAKER. Under previous order of the House, the gentleman from Massachusetts [Mr. LANE] is recognized for 5 minutes.

EIGHT HUNDRED DOLLARS SALARY INCREASE FOR POSTAL EMPLOYEES

Mr. LANE. Mr. Speaker, in 1945, postal employees received their first increase in pay in 20 years. This $400 per annum upward revision represented a 20-percent increase, which was long overdue. It was entirely inadequate to keep pace with rising living costs and it did not anticipate the feverish jump in prices which has taken place in the past year and a half.

The gap between the fixed salaries of postal workers and the income needed to maintain a decent standard of living is widening. The strain is beginning to tell. Many postal workers are being forced to take outside jobs, on time that should be spent in rest or recreation, in an attempt to bridge the deficit. This is making serious inroads on their health, their peace of mind, and their efficiency. They cannot carry this double burden for long without cracking. It is our responsibility to prevent this by providing for an immediate pay increase for our loyal and hardworking postal employees,

In 1945 they received a 20-percent raise, but since 1941 the cost of living has zoomed over three times this figure. What about the difference? How is it compensated for? By dipping into savings which are disappearing. By going into debt.

We are preparing to appropriate billions for European recovery and billions for national defense, with small regard for the inevitable element of waste involved and yet we raise the cry of penny-pinching economy when the security of our own essential and constructive Government services is at stake. Small wonder that there is restlessness among our people to the indifference of Government to their needs.

To the specious argument that if our postal workers will only hang on and endure, everything will return to normal at some unspecified time in the distant future, I say: this is cruel and dangerous.

Prices will never go all the way back to prewar levels. If and as our economy goes forward, most of the pay increases won by our industrial workers will become permanent. The forgotten segments of our workers must try to catch up or find themselves losing ground before the higher minimum standard for living.

Could it be that Government workers are being ground into poverty because they cannot strike?

Workers in industry have been forced to strike on two occasions since the end of the war in order to win necessary wage increases. And a third round of strikes is coming up. But postal workers and all other Government workers are caught in an economic squeeze that will impoverish them unless financial help is soon forthcoming.

Here are the facts.

Wages in retail trade have gone up nearly 70 percent since 1939.

In manufacturing, they have increased over 100 percent in a like period.

In coal mining, they have increased 175 percent.

In the postal service, 20 percent.

Profits interestingly enough have more than doubled since 1939.

As against these incomes, the prices of all items have climbed 65 percent above the 1935–39 average.

Apparel prices have been boosted 90 percent.

Food has skyrocketed in price over 100 percent.

Where does this leave the postal worker and his skimpy 20 percent increase? In a truly desperate situation, for which we, the Congress, must assume the responsibility. It is in our power to correct this intolerable situation at once, by enacting into law the Butler bill—H. R. 4640—which provides for a $800 yearly increase for postal workers. This, added to the $400 increase granted in 1945, will total up to an increase of 60 percent since 1925.

Indifference may be excused on the grounds of ignorance but ingratitude has no case. I prefer to assume that we have taken our loyal and hard-working postal workers for granted, and that it is time for us to wake up and see that justice is done in the matter of the pressing need for increased compensation.

Put yourselves in their position. How would you like to carry a heavy bag of mail all day long, or sort thousands of pieces of mail until one arm goes numb and you have to shift to the other for relief? Where is the incentive for working hard when a man finds that his pay is shrinking in its purchasing power? Is this the American method of rewarding conscientious service?

We, as Members of Congress, are doubly indebted to the men and women of the postal service. They do the work of delivering thousands of letters and pamphlets to our constituents at no cost to ourselves.

The postal service enables all the millions of people in this country to communicate with each other, and with friends and relatives all over the world. With each passing day, business and industry rely more heavily upon this dependable service.

What would happen if it broke down?

That is the measure of its importance and the reward which it should receive for serving us so well. Let business leaders and labor leaders speak up for their friends the carriers and clerks of the United States Post Office Department. Above all, let Congress appropriate sufficient funds to help them make both ends meet.

The President has called our attention to this problem of underpaid Government workers.

The next move is ours, and there is only one move. Give to the men and women who make Government function the increased pay which they deserve and need.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 3342. An act to promote the better understanding of the United States among the peoples of the world and to strengthen cooperative international relations; and

H. J. Res. 232. Joint resolution providing for membership and participation by the United States in the South Pacific Commission and authorizing an appropriation therefor.

ADJOURNMENT

Mr. JENSEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 29 minutes p. m.) the House adjourned until tomorrow, Wednesday, January 21, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1222. A letter from the Chairman, Federal Power Commission, transmitting a copy of its newly issued FPC Reports, volume 5, which contains all opinions issued by the Commission during the period of January 1 to December 31, 1946, and in addition contains selected orders in the nature of decisions; to the Committee on Interstate and Foreign Commerce.

1223. A letter from the Chairman, Reconstruction Finance Corporation, transmitting a report covering its operations for the period from the organization of the Corporation on February 2, 1932, to June 30, 1947, inclusive; to the Committee on Banking and Currency.

1224. A letter from the Under Secretary of Agriculture, transmitting the Annual Report of the Administrator of the Rural Electrification Administration, covering operations for the fiscal year of 1947; to the Committee on Agriculture.

1225. A letter from the Secretary of Agriculture, transmitting a draft of a proposed bill to give the Secretary of Agriculture permanent authority to make payments to agricultural producers in order to effectuate the purposes specified in section 7 (a) of the Soil Conservation and Domestic Allotment Act; to the Committee on Agriculture.

1226. A letter from the Under Secretary of the Interior, transmitting a draft of a proposed bill, to extend the public-land laws of the United States to certain lands, consisting of islands, situated in the Red River in Oklahoma; to the Committee on Public Lands.

1227. A letter from the Acting Secretary of the Treasury, transmitting a draft of a proposed bill to consolidate and revise the laws relating to the Coast Guard; to the Committee on the Judiciary.

1228. A letter from the Secretary, Department of the Air Force, transmitting the certified flying pay report, showing the average number of officers above the rank of major receiving flight pay during the period April 1 to October 1, 1947; to the Committee on Armed Services.

1229. A letter from the Under Secretary, Department of State, transmitting a draft of a proposed bill to authorize the furnishing of services and the temporary detail of United States employees to public international organizations; to the Committee on Foreign Affairs.

1230. A letter from the Chairman, Interstate Commerce Commission, transmitting the Sixty-first Annual Report of the Interstate Commerce Commission; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ANDREWS of New York: Committee on Armed Services. H. R. 4505. A bill to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes; without amendment (Rept. No. 1246). Referred to the Committee of the Whole House on the State of the Union.

Mr. DONDERO: Committee on Public Works. H. R. 4836. A bill to authorize the purchase of a new post-office site at Omaha, Nebr.; without amendment (Rept. No. 1247). Referred to the Committee of the Whole House on the State of the Union.

Mr. DONDERO: Committee on Public Works. H. R. 3506. A bill to provide for the acquisition of a site for a new Federal building in Huntington, W. Va., adjoining existing Federal buildings there, as an economy measure, before land values have increased as a result of improvements; with amendment (Rept. No. 1248). Referred to the Committee of the Whole House on the State of the Union.

Mr. DONDERO: Committee on Public Works. H. R. 4967. A bill to provide for

the acquisition of a site and preparation of plans and specifications for a new postal building and for remodeling of the existing main post-office building in Portland, Oreg., and for other purposes; without amendment (Rept. No. 1249). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JENNINGS: Committee on the Judiciary. H. R. 5055. A bill for the relief of sundry claimants and for other purposes; with amendments (Rept. No. 1245). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 3 of rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 3596) to amend the act of December 2, 1942, entitled "An act to provide benefits for the injury, disability, death, or enemy detention of employees of contractors with the United States, and for other purposes," to clarify the eligibility for benefits of certain employees detained by the enemy in the Philippine Islands; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 3480) to amend the United States Employees' Compensation Act of September 7, 1916, so as to increase the maximum and minimum monthly compensation; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 2048) to amend the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," as amended; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 2047) to amend the act of September 7, 1916, providing compensation for injuries to employees of the United States; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 1872) to amend the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, as amended; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 970) to increase the compensation for total disability granted employees of the United States under the United States Employees' Compensation Act of September 7, 1916; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 790) to amend the act of September 7, 1916, by providing for a hearing of claims of employees of the United States before the United States Employees' Compensation Commission; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 3673) to extend the benefits of the United States Employees' Compensation Act of September 7, 1916, to active-duty members of the Civil Air Patrol, and for other purposes; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

A bill (H. R. 3927) to amend the act of September 7, 1916, to authorize certain expenditures from the employees' compensation fund, and for other purposes; Committee on the Judiciary discharged, and referred to the Committee on Education and Labor.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FERNÓS-ISERN:

H. R. 5029. A bill to provide for certain payments to States, Territories, and possessions, and their political subdivisions as compensation for loss of revenues occasioned by the acquisition of real property by the United States for military purposes; to the Committee on Public Lands.

By Mr. BARTLETT:

H. R. 5030. A bill to provide for a Federal building at Kodiak, Alaska, for use as a jail and other Federal purposes; to the Committee on Public Works.

By Mr. BUFFETT:

H. R. 5031. A bill to restore the right of American citizens to freely own gold and gold coins; to return control over the public purse to the people; to restrain further deterioration of our currency; to enable holders of paper money to redeem it in gold coin on demand; to establish and maintain a domestic gold-coin standard; and for other purposes; to the Committee on Banking and Currency.

By Mr. DONDERO:

H. R. 5032. A bill authorizing the modification and expansion of the flood-control project for the Clinton River, Mich., to include improvements for flood control and other purposes on Red Run, a tributary of the Clinton River, Mich.; to the Committee on Public Works.

By Mr. FOOTE:

H. R. 5033. A bill to amend section 7 (b) of the Classification Act of 1923, as amended, to advance the effective date of within-grade salary advancements; to the Committee on Post Office and Civil Service.

By Mr. JOHNSON of California:

H. R. 5034. A bill to amend sections 3 and 15 of the Immigration Act approved May 26, 1924, as amended; to the Committee on the Judiciary.

By Mr. JONKMAN:

H. R. 5035. A bill to authorize the attendance of the United States Marine Band at the eighty-second national encampment of the Grand Army of the Republic, to be held in Grand Rapids, Mich., September 26 to 30, 1948; to the Committee on Armed Services.

By Mr. KERSTEN of Wisconsin:

H. R. 5036. A bill to authorize the attendance of the United States Marine Corps Band at the national assembly of the Marine Corps League, to be held at Milwaukee, Wis., September 22 to September 25, inclusive, 1948; to the Committee on Armed Services.

By Mr. McCORMACK:

H. R. 5037. A bill to exempt from the manufacturers' excise taxes articles sold to hospitals not organized for profit; to the Committee on Ways and Means.

By Mr. McDONOUGH:

H. R. 5038. A bill to terminate the war excise tax rate on theater tickets and other types of amusement; to the Committee on Ways and Means.

By Mr. MICHENER (by request):

H. R. 5039. A bill to increase the fees of jurors and witnesses in the United States courts and before United States Commissioners; to the Committee on the Judiciary.

H. R. 5040. A bill to amend the Contract Settlement Act of 1944, to provide that claims under section 17 must be filed within 6 months to be allowable, to stop further accrual of such claims, and for other purposes; to the Committee on the Judiciary.

By Mr. NODAR:

H. R. 5041. A bill to amend the Internal Revenue Code, act of February 10, 1939; to the Committee on Ways and Means.

By Mr. PATTERSON:

H. R. 5042. A bill to amend and extend the maximum-rent provisions of Public Law 129, Eightieth Congress, and for other purposes; to the Committee on Banking and Currency.

H. R. 5043. A bill to extend the educational benefits of the Servicemen's Readjustment Act of 1944 to the eldest children of veterans of World War II where the veterans have received no educational benefits under such act; to the Committee on Veterans' Affairs.

By Mr. POTTS:

H. R. 5044. A bill to repeal the tax on oleomargarine; to the Committee on Agriculture.

By Mrs. ROGERS of Massachusetts:

H. R. 5045. A bill to amend the National Service Life Insurance Act to protect the insurance against lapse by crediting to the insured dividends from the excess of premiums over death costs chargeable thereto and by automatic payment of premiums from the accumulated credits; to the Committee on Veterans' Affairs.

By Mr. BEALL:

H. R. 5046. A bill to grant an exemption from income tax in the case of retirement pensions and annuities; to the Committee on Ways and Means.

H. R. 5047. A bill to grant a cost-of-living increase in the salaries of the Metropolitan Police, the United States Park Police, the White House Police, and the members of the Fire Department of the District of Columbia; to the Committee on the District of Columbia.

By Mr. BENNETT of Missouri:

H. R. 5048. A bill to direct the Secretary of Agriculture to convey certain mineral rights; to the Committee on Agriculture.

By Mr. ELLSWORTH:

H. R. 5049. A bill to reopen the revested Oregon & California Railroad and reconveyed Coos Bay Wagon Road grant lands to exploration, location, entry, and disposition under the general mining laws; to the Committee on Public Lands.

By Mr. LYLE:

H. R. 5050. A bill to authorize the Secretary of Agriculture to initiate and to increase and intensify research in the perfection of a vaccine for hoof-and-mouth disease; to the Committee on Agriculture.

By Mr. FERNÓS-ISERN:

H. R. 5051. A bill to add section 3a to the Organic Act of Puerto Rico; to the Committee on Public Lands.

By Mr. GEARHART:

H. R. 5052. A bill to exclude certain vendors of newspapers or magazines from certain provisions of the Social Security Act and Internal Revenue Code; to the Committee on Ways and Means.

By Mr. HARDIE SCOTT:

H. R. 5053. A bill to provide for the establishment of the Philadelphia National Historical Park, and for other purposes; to the Committee on Public Lands.

By Mr. WALTER:

H. R. 5054. A bill to provide for the establishment of the Philadelphia National Historical Park, and for other purposes; to the Committee on Public Lands.

By Mr. COLMER:

H. J. Res. 299. Joint resolution to quiet the titles of the respective States, and others, to lands beneath tidewaters and lands beneath navigable waters within the boundaries of such States and to prevent further clouding of such titles; to the Committee on the Judiciary.

By Mr. YOUNGBLOOD:

H. J. Res. 300. Joint resolution relating to the authority to allocate the use of grain for the production of distilled spirits or neutral

spirits for beverage purposes; to the Committee on Banking and Currency.

By Mr. SADLAK:

H. J. Res. 301. Joint resolution authorizing the President of the United States to proclaim October 11, 1948, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

By Mr. MILLER of Connecticut:

H. J. Res. 302. Joint resolution to effectuate the principles of the President's Committee on National Employ the Physically Handicapped Week; to the Committee on Appropriations.

By Mr. KELLEY:

H. J. Res. 303. Joint resolution to effectuate the principles of the President's Committee on National Employ the Physically Handicapped Week; to the Committee on Appropriations.

By Mr. HOFFMAN:

H. Con. Res. 131. Concurrent resolution against adoption of Reorganization Plan No. 1 of January 19, 1948; to the Committee on Expenditures in the Executive Departments.

By Mr. ANDREWS of New York:

H. Res. 436. Resolution authorizing the Committee on Armed Services to make investigation on matters coming within jurisdiction of the committee; to the Committee on Rules.

By Mrs. ROGERS of Massachusetts:

H. Res. 437. Resolution providing for the consideration of H. R. 4244; to the Committee on Rules.

H. Res. 438. Resolution providing for the consideration of H. R. 3565; to the Committee on Rules.

H. Res. 439. Resolution providing for the consideration of H. R. 4243; to the Committee on Rules.

H. Res. 440. Resolution providing for the consideration of H. R. 3748; to the Committee on Rules.

H. Res. 441. Resolution providing for the consideration of H. R. 3016; to the Committee on Rules.

H. Res. 442. Resolution providing for the consideration of H. R. 1335; to the Committee on Rules.

H. Res. 443. Resolution providing for the consideration of H. R. 4309; to the Committee on Rules.

H. Res. 444. Resolution providing for the consideration of H. R. 4212; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. JENNINGS:

H. R. 5055. A bill for the relief of sundry claimants, and for other purposes; to the Committee on the Judiciary.

By Mr. COUDERT:

H. R. 5056. A bill for the relief of Lewyt Corp.; to the Committee on the Judiciary.

By Mr. DEVITT:

H. R. 5057. A bill for the relief of Mrs. Elizabeth DeCourcy and minor children; to the Committee on the Judiciary.

H. R. 5058. A bill for the relief of Walter Wetteschreck; to the Committee on the Judiciary.

By Mr. FERNÓS-ISERN:

H. R. 5059. A bill to authorize Martin Travieso, chief justice of the Supreme Court of Puerto Rico, to accept a decoration from the French Government; to the Committee on Foreign Affairs.

By Mr. LEWIS:

H. R. 5060. A bill for the relief of John S. Steber; to the Committee on the Judiciary.

By Mr. REDDEN:

H. R. 5061. A bill for the relief of James B. DeHart; to the Committee on the Judiciary.

By Mr. YOUNGBLOOD:

H. R. 5062. A bill for the relief of Peter Kristian Kristensen; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1170. By Mr. ELSTON: Petition of Robert C. Reigert and 214 other veterans, students at the University of Cincinnati, in support of an increase in subsistence rates under Public Laws 346 and 16; to the Committee on Veterans' Affairs.

1171. By Mr. GRAHAM: Petition of 75 residents of Butler County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1172. Also, petition of 16 residents of New Castle, Pa., in favor of S. 265, a bill to abolish liquor advertisements in magazines, radio programs, etc.; to the Committee on Interstate and Foreign Commerce.

1173. By Mr. LEWIS: Petition of 36 residents of Somerton, Ohio, and vicinity, in support of legislation establishing a system of universal military training; to the Committe on Armed Services.

1174. Also, petition of 225 residents of Steubenville, Ohio, and vicinity, circulated by the American Legion Auxiliary of Argonne Post, No. 33, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1175. By Mr. MILLER of Maryland: Petition of 54 residents of Snow Hill, Md., and 2 residents of Pocomoke City, Md., in support of S. 265, a bill to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1176. Also, petition of 20 citizens of Crisfield, Md., in support of S. 265, a bill to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1177. By Mr. TIBBOTT: Petition of citizens of Indiana County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1178. Also, petition of citizens of Armstrong County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1179. Also, petition of citizens of Cambria County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1180. By Mr. TOWE: Petition of Roy C. Morgan, commander, New Milford Post, No. 217, American Legion, and 80 members of that post, urging the establishment of a system of universal military training; to the Committee on Armed Services.

1181. Also, petition of F. C. Hazard, adjutant, Teaneck Post, No. 128, American Legion, Teaneck, N. J., and 61 members of that post, urging the establishment of a system of universal military training; to the Committee on Armed Services.

1182. By the SPEAKER: Petition of Mary Strobel and others, of Brooklyn, N. Y., petitioning consideration of their resolution with reference to enactment of legislation to lower foreign postage rate; to the Committee on Post Office and Civil Service.

1183. Also, petition of Jewish Peoples Fraternal Order of New York City, petitioning consideration of their resolution with reference to enactment of H. R. 2848; to the Committee on Post Office and Civil Service.

SENATE

WEDNESDAY, JANUARY 21, 1948

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

O Lord most high and very near, to whose mind the past and the future meet in this very day, hear us as we pray.

The great questions that stand unanswered before us defy our best wisdom.

Though our ignorance is great, at least we know we do not know.

When we do not know what to say, keep us quiet.

When we do not know what to do, let us ask of Thee, that we may find out.

We dare to ask for light upon only one step at a time.

We would rather walk with Thee than jump by ourselves.

We ask this in the name of Jesus Christ, who promised to send us a guide into all truth. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 21, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. WILLIAM F. KNOWLAND, a Senator from the State of California, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. KNOWLAND thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous request, the reading of the Journal of the proceedings of Monday, January 19, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 84. An act for the relief of Mrs. Clinton R Sharp;

S. 99. An act for the relief of John T. Hollandsworth, Jr.;

S. 136 An act for the relief of Ioannis Stephanes;

S. 166. An act for the relief of Anna M. Kinat (Mrs. John P. Taylor);

S. 167. An act for the relief of Mrs. Yoneko Nakazawa;

S. 185. An act for the relief of Thomas Abadia;

S. 186. An act for the relief of Santiago Naveran;

S. 187. An act for the relief of Antonio Arguinzonis;

S. 189. An act for the relief of Simon Fermin Ibarra;

S. 190. An act for the relief of Pedro Ugalde;

S. 191. An act for the relief of Julian Uriarte;

S. 192. An act for the relief of Juan Llona;

S. 258. An act for the relief of Troy Charles Davis, Jr.;

S. 298. An act for the relief of certain Basque aliens;

S. 339. An act for the relief of Lucy Jefferson Weil;

S. 851. An act for the relief of Belmont Properties Corp.;

S. 944. An act for the relief of Oran Curry;

S. 957. An act for the relief of Col. William J. Kennard;

S. 1039. An act for the relief of Ada B. Foss;

S. 1043. An act for the relief of Frank J. Shaughnessy, collector of internal revenue, Syracuse, N. Y.;

S. 1324. An act to amend the Civil Service Retirement Act so as to make such act applicable to the officers and employees of the National Library for the Blind; and

S. 1579. An act for the relief of Damian Gandiaga.

The message also announced that the House had passed the following bills of the Senate, each with an amendment in which it requested the concurrence of the Senate:

S. 929. An act to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564); and

S. 1100. An act for the relief of Frankie Stalnaker.

The message further announced that the House had agreed to the amendment of the Senate to the bill (H. R. 3111) for the relief of Louis H. Deaver.

The message also announced that the House had agreed to the amendments of the Senate to the joint resolution (H. J. Res. 232) providing for membership and participation by the United States in the South Pacific Commission and authorizing an appropriation therefor.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 1799) for the relief of Eva L. Dudley, Grace M. Collins, and Guy B. Slater; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. JENNINGS, Mr. CASE of New Jersey, and Mr. CRAVENS were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1020) to amend the Philippine Rehabilitation Act of 1946, as amended.

The message further announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H. R. 108. An act to authorize the conveyance of the United States military reservation at Fort Schuyler, N. Y., to the State of New York for use as a maritime school, and for other purposes;

H. R. 358. An act for the relief of Hilario A. Goitia;

H. R. 387. An act for the relief of Hayato Harris Ozawa;

H. R. 420. An act for the relief of Esther Ringel;

H. R. 421. An act for the relief of Betty Isabel Schunke;

H. R. 560. An act to record the lawful admission to the United States for permanent residence of Wilhemina Piper Enz;

H. R. 892. An act for the relief of Michel Ferapontow;

H. R. 896. An act for the relief of Viktor A. Kravchenko;

H. R. 899. An act for the relief of Mrs. Keum Nyu Park;

H. R. 927. An act for the relief of the estate of Mary D. Briggs, deceased;

H. R. 1009. An act for the relief of Mrs. Florence Byvank;

H. R. 1139. An act for the relief of Dr. Gisela Perl (Krausz);

H. R. 1169. An act for the relief of Samuel W. Poorvu;

H. R. 1189. An act to establish the methods of advancement for post-office employees (rural carriers) in the field service;

H. R. 1286. An act for the relief of Lawrence Reves;

H. R. 1298. An act for the relief of Anastasios Panage Ioannatos (known as Anastasios Panage Ionnetos or Tom Panage Yanatos);

H. R. 1516. An act for the relief of A. S. Osten, certifying officer, and for the relief of Guy F. Allen, former chief disbursing officer;

H. R. 1572. An act for the relief of Basque aliens;

H. R. 1653. An act for the relief of Edward W. Bigger;

H. R. 1747. An act for the relief of Mrs. Margaret Lee Novick and others;

H. R. 1809. An act to facilitate the use and occupancy of national-forest lands, and for other purposes;

H. R. 1859. An act for the relief of Philip Lee Sjoerdt Huizenga;

H. R. 1912. An act for the relief of John A. Dilboy;

H. R. 1927. An act for the relief of Margaret Katherine Hume;

H. R. 2009. An act for the relief of the estate of Vito Abarno;

H. R. 2218. An act for the relief of Lawrence Edgar Edwards;

H. R. 2250. An act for the relief of Mrs. Daisy A. T. Jaegers;

H. R. 2269. An act for the relief of Frank A. Constable;

H. R. 2303. An act for the relief of Mitsu M. Kobayashi, who is the wife of Edward T. Kobayashi, a citizen of the United States;

H. R. 2425. An act for the relief of August Dane Tetuaero;

H. R. 2479. An act for the relief of Hardy H. Bryant;

H. R. 2489. An act for the relief of James W. Adkins and Mary Clark Adkins;

H. R. 2502. An act to provide for the general welfare and advancement of the Klamath Indians in Oregon;

H. R. 2557. An act for the relief of Mable Gladys Viducich;

H. R. 2729. An act for the relief of the legal guardian of Rose Mary Ammirato, a minor;

H. R. 3039. An act for the relief of Mrs. Marian D. McC. Plein;

H. R. 3061. An act for the relief of Victor C. Kaminski (also known as Victor Kaminski);

H. R. 3067. An act for the relief of E. J. Brennan and Janet Howell;

H. R. 3159. An act for the relief of Mae H. Fitzgerald;

H. R. 3218. An act to authorize an emergency fund for the Bureau of Reclamation to assure the continuous operation of its irrigation and power systems;

H. R. 3224. An act for the relief of Frank and Maria Durante;

H. R. 3263. An act for the relief of Tech. Sgt. Tsuyoshi Matsumoto;

H. R. 3300. An act for the relief of Martin A. King;

H. R. 3538. An act to authorize the Department of Agriculture to investigate and report on projects for reclaiming lands by drainage;

H. R. 3550. An act for the relief of Jesse L. Purdy;

H. R. 3742. An act for the relief of Robert Wilhelm Gerling;

H. R. 3778. An act to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25);

H. R. 3814. An act to provide for the establishment of a veterans' hospital for Negro veterans at the birthplace of Booker T. Washington in Franklin County, Va.;

H. R. 3849. An act for the relief of Domingo Gandarias;

H. R. 3930. An act to amend the act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, as amended, in relation to extensions made pursuant to wage earners' plans under chapter XIII of such act;

H. R. 3937. An act for the relief of William C. Reese;

H. R. 4141. An act to amend subsection 602 (d) (5) of the National Service Life Insurance Act of 1940, as amended, to extend for 2 years the time within which eligible persons may apply for gratuitous insurance benefits;

H. R. 4236. An act to amend the Civil Service Act to remove certain discrimination with respect to the appointment of persons having any physical handicap to positions in the classified civil service;

H. R. 4331. An act for the relief of Bertha M. Rogers;

H. R. 4403. An act for the relief of Ladislao Vaida, Elena Vaida, and Stefano Vaida; and

H. J. Res. 251. Joint resolution to authorize the issuance of a special series of stamps commemorative of the one-hundredth anniversary of the coming of the Swedish pioneers to the Middle West.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also further announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the Acting President pro tempore:

H. R. 3111. An act for the relief of Louis H. Deaver;

H. R. 3342. An act to promote the better understanding of the United States among the peoples of the world and to strengthen cooperative international relations; and

H. J. Res. 232. Joint resolution providing for membership and participation by the United States in the South Pacific Commission and authorizing an appropriation therefor.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

FURNISHING OF SERVICES AND DETAIL OF UNITED STATES EMPLOYEES TO PUBLIC INTERNATIONAL ORGANIZATIONS

A letter from the Under Secretary of State, transmitting a draft of proposed legislation to authorize the furnishing of services and the temporary detail of United States employees to public international organizations (with an accompanying paper); to the Committee on Foreign Relations.

CONSOLIDATION AND REVISION OF LAW RELATING TO THE COAST GUARD

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation to consolidate and revise the laws relating to the Coast Guard (with accompanying papers); to the Committee on the Judiciary.

REPORT OF BONNEVILLE POWER ADMINISTRATION RELATING TO TRANSMISSION AND SALE OF ELECTRIC ENERGY

A letter from the Secretary of the Interior, transmitting, pursuant to law, the report of the Bonneville Administrator covering the transmission and sale of electric energy for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Public Works.

GOVERNMENT-OWNED ALCOHOL PLANT, MUSCATINE, IOWA

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation

to provide for making available the Government-owned alcohol plant at Muscatine, Iowa, for the production of products from agricultural commodities in the furtherance of authorized programs of the Department of Agriculture, and for other purposes (with an accompanying paper); to the Committee on Agriculture and Forestry.

AMENDMENTS OF SOIL CONSERVATION AND DOMESTIC ALLOTMENT ACT

A letter from the Secretary of Agriculture, transmitting drafts of proposed legislation to extend the period within which the Secretary of Agriculture may carry out the purposes of the Soil Conservation and Domestic Allotment Act by making payments to agricultural producers, and to give the Secretary of Agriculture permanent authority to make payments to agricultural producers in order to effectuate the purposes specified in section 7 (a) of the Soil Conservation and Domestic Allotment Act (with accompanying papers); to the Committee on Agriculture and Forestry.

REPORT OF RURAL ELECTRIFICATION ADMINISTRATION

A letter from the Under Secretary of Agriculture, transmitting, pursuant to law, the annual report of the Administrator of the Rural Electrification Administration for the fiscal year 1947 (with an accompanying report); to the Committee on Agriculture and Forestry.

FLIGHT PAY OF CERTAIN OFFICERS OF THE AIR FORCE

A letter from the Assistant Secretary of War for Air, reporting pursuant to law, the average number of officers above the rank of major receiving flight pay during the period April 1 to October 1, 1947, with the average monthly flight pay authorized by law to be paid to such officers; to the Committee on Armed Services.

REPORT OF INTERSTATE COMMERCE COMMISSION

A letter from the Chairman of the Interstate Commerce Commission, transmitting, pursuant to law, the sixty-first annual report of that Commission for the period November 1, 1946, to October 31, 1947 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

REPORT OF CIVIL AERONAUTICS BOARD

A letter from the Acting Chairman of the Civil Aeronautics Board, transmitting, pursuant to law, the annual report of that Board for the period ended November 1, 1947 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

REPORT OF RECONSTRUCTION FINANCE CORPORATION

A letter from the Chairman of the Reconstruction Finance Corporation, transmitting, pursuant to law, a report covering its operations for the period from the organization of the Corporation on February 2, 1932, to June 30, 1947, inclusive (with an accompanying report); to the Committee on Banking and Currency.

OPINIONS AND DECISIONS OF FEDERAL POWER COMMISSION

A letter from the Chairman of the Federal Power Commission, transmitting volume 5 of its reports, pertaining to the opinions and decisions of that Commission for the calendar year 1946 (with an accompanying volume); to the Committee on Interstate and Foreign Commerce.

PROMOTION OF FOREIGN RELATIONS BY INTERCHANGE OF PERSONS, KNOWLEDGE, ETC.

A letter from the President of the United States Civil Service Commission, recommending an amendment to the bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotion of the interchange of persons, knowledge, and skills between the people of the United States and other countries, and by means of public dissemination abroad of information about the United States; to the Committee on Foreign Relations.

PETITIONS

Petitions, etc., were laid before the Senate by the Acting President pro tempore and referred as indicated:

A letter from Representative RICHARD B. VAIL transmitting a letter from Ohio Bell, of Chicago, Ill., relating to certain changes in a petition heretofore presented to the Senate by him (with an accompanying paper); to the Committee on Armed Services.

The petition of Vergil D. McMillan, of Washington, D. C., praying for an investigation of the administration of the National Capital Housing Authority; to the Committee on Banking and Currency.

A petition of sundry citizens of the United States, praying for the enactment of legislation providing for universal military training; to the Committee on Armed Services.

AMENDMENT OF LAWS AND REGULATIONS PERTAINING TO CERTAIN WIDOWS OF VETERANS

Mr. LODGE. Mr. President, I have received a resolution from the Doucette-Lingard Post, No. 1624, Veterans of Foreign Wars, of Gloucester, Mass., requesting Congress to amend all present laws and regulations pertaining to widows and other dependents of the veterans of any wars to authorize these widows and other dependents existing pensions without regard to any other income which they may be receiving from other sources. This resolution further requests that all income received by any widow or other surviving dependent be made free from Federal taxation.

I present the resolution and ask unanimous consent that it may be printed in the RECORD and referred to the Committee on Labor and Public Welfare, which has charge of this matter.

There being no objection, the resolution was received, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it resolved in regular meeting assembled of the Doucette-Lingard Post, No. 1624, Veterans of Foreign Wars, Gloucester, Mass., That the Congress of the United States be petitioned to amend all existing laws and regulations pertaining to widows and other dependents of veterans of any wars participated in by the armed forces of the United States to allow (authorize) the previously mentioned widows and other dependents to draw the existing pensions regardless of any other income which they may be receiving from any source whatsoever; also be it

Resolved, That the Congress of the United States be petitioned to make all income received by any widow or other dependent of any veterans exempt from all taxation by Federal Government.

Unanimously passed, December 10, 1947.

DOUCETTE-LINGARD POST,
No. 1624, VFW.

ST. LAWRENCE SEAWAY—RESOLUTION OF PENNSYLVANIA STATE GRANGE

Mr. CAPPER. Mr. President, I have received a resolution from Joab K. Mahood, secretary of the Pennsylvania State Grange, Harrisburg, Pa., setting forth the stand taken by his group in opposition to the construction of the St. Lawrence seaway.

I do not agree with the stand taken in this matter by this group, but send their resolution to the desk, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the recurrent floods which sweep down the Missouri and Mississippi Rivers and their tributaries have for many years taken a heavy toll of life and property; and

Whereas the floods along these rivers during the present year were among the worst on record, destroying crops, inundating millions of acres of farm lands, washing away the fertile topsoil, and inflicting heavy damages on other forms of property; and

Whereas Congress has approved a comprehensive plan for harnessing these rivers and putting an end to this wanton waste of our natural resources, which is sapping the life of the Nation and endangering the food supply of this and succeeding generations of Americans: Therefore be it

Resolved, That the Pennsylvania State Grange urge the appropriation of adequate Federal funds to translate the plan in this connection into reality as speedily as the work can properly be done; and be it further

Resolved, That we believe it would be in accord with sound public policy to hold in abeyance an international project like the development of the St. Lawrence seaway while we devote our money, materials, and energies to the completion of this urgently needed and vitally important domestic undertaking.

Adopted by the Pennsylvania State Grange at New Castle, Pa., October 30, 1947.

APPOINTMENT OF MAJ. GEN. LAURENCE S. KUTER TO CIVIL AERONAUTICS BOARD

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement made by me as a member of the Senate Armed Services Committee in connection with the appointment of Maj. Gen. Laurence S. Kuter to the Civil Aeronautics Board.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HARRY F. BYRD, OF VIRGINIA, MEMBER OF THE SENATE ARMED SERVICES COMMITTEE, IN CONNECTION WITH THE APPOINTMENT OF MAJ. GEN. LAURENCE S. KUTER TO THE CIVIL AERONAUTICS BOARD

The significance of the unusual legislation requested by the President with respect to the appointment of Maj. Gen. Laurence S. Kuter, a general officer of the Army of the United States, to membership on the Civil Aeronautics Board is emphasized by the invitation of the President to the membership of the Armed Services Committee to discuss this matter with him.

I think it is important that the real issue should be clearly defined, and I want my own position known.

The President requested Chairman GURNEY, of the Armed Services Committee, to introduce a special bill which would allow General Kuter to be appointed as a member of the Civil Aeronautics Board (a civilian agency) and retain military emoluments of his active status as a major general in the Army, including pay, retirement, etc. These financial emoluments are: Base pay, $8,800; flight pay, $4,400; rental and subsistence allowance, $1,944; making a total of $15,144, while the civilian members of the Board would receive only $10,000.

I am informed that by informal agreement with the Air Corps, General Kuter could continue to draw flight pay without military flying. This would be a special exception, which I especially disapprove. General Kuter would receive his pay from the Army and, in turn, the Army would be reimbursed

from the appropriation made for the Civil Aeronautics Board.

I fully concur in what has been said as to the ability of General Kuter, but I think it is a most unwise procedure to transfer officers from active service in the military branches of the Government, where they owe primary allegiance to civilian duties, and then pay them, as in this case, $5,000 annually more than is received by those appointed from civilian life.

Not only is the principle of unequal compensation involved, but, likewise, if such appointments are continued, they would develop a dangerous dominance by military services over civilian departments. The Armed Services Committee unanimously disapproved the bill when it was first proposed.

With regret, therefore, I am unable to agree to the President's additional request today that I withdraw my opposition to this special legislation for General Kuter.

We must be careful not to militarize the civilian functions and agencies of the Government.

REPORTS OF A COMMITTEE

The following reports of a committee were submitted:

By Mr. REVERCOMB, from the Committee on Public Works:

S. 1545. A bill to authorize a bridge, roads and approaches, supports and bents, or other structures, across, over, or upon lands of the United States within the limits of the Colonial National Historical Park at or near Yorktown, Va.; with amendments (Rept. No. 827); and

S. 1611. A bill to extend the time for completing the construction of a bridge across the Mississippi River at or near Sauk Rapids, Minn.; without amendment (Rept. No. 828).

REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES RELATING TO FEDERAL PERSONNEL

Mr. BYRD. Mr. President, I present an additional report of the Committee on Reduction of Nonessential Federal Expenditures relating to Federal personnel during November 1947. I ask unanimous consent that the report, together with a statement by me, may be printed in the RECORD.

There being no objection, the report, together with the statement by Mr. BYRD, was ordered to be printed in the RECORD, as follows:

FEDERAL PERSONNEL IN THE EXECUTIVE BRANCH, NOVEMBER 1947, AND COMPARISON WITH OCTOBER 1947

(The following report is compiled from signed, official personnel reports by the various agencies and departments of the Federal Government. Table I of the report shows personnel employed outside continental United States, by agency. Table II shows personnel employed outside continental United States, by agency. Table III shows total personnel employed inside and outside continental United States, by agency. Table IV gives, by agency, the industrial workers employed by the Federal Government. For purposes of comparison, figures for the previous month are shown in adjoining columns.)

According to monthly personnel reports submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures, the total Federal personnel for November decreased 14,145 from the October total of 2,014,008 to the November total of 1,999,853. (See table III.)

Exclusive of the National Military Establishment, there was a decrease of 3,929 from the October total of 1,172,705 to the November total of 1,168,776.

Total employment for the National Military Establishment showed a decrease of 10,216 from the October total of 841,303 to the total of 831,087 in November.

The Department of the Army reported a net decrease of 10,222 from its October total of 390,406 to the November total of 380,184. Inside continental United States there was an increase of 2,264, while outside the United States the decrease amounted to 12,486. The bulk of the overseas decrease was reported by the Mediterranean theater, which is now in the process of closing down operations.

The Navy Department decreased its total employment 940 from the October figure of 340,159 to the November figure of 339,219.

The Air Forces increased employment 924 from the October figure of 110,305 to the November figure of 111,229. These figures do not include Air Force personnel overseas who are reported by the Department of the Army.

INSIDE CONTINENTAL UNITED STATES

Federal personnel within the United States decreased 1,054 from the October total of 1,778,972 to the November total of 1,777,918. (See table I.)

Excluding the National Military Establishment, personnel inside the United States decreased 3,878 from the October figure of 1,119,278 to the November figure of 1,115,400.

Total employment for the National Military Establishment is 662,518 for November, an increase of 2,824 over the October figure of 659,694.

Department of the Army personnel within the United States increased 2,264 from the October figure of 252,878 to the November figure of 255,142.

Navy Department personnel within the United States decreased 386 from the October figure of 296,078 to the November figure of 295,692.

The Air Force Department increased 924 from the October total of 110,305 to the November total of 111,229.

OUTSIDE CONTINENTAL UNITED STATES

Outside the continental United States, Federal personnel decreased 13,091 from the October total of 235,036 to the November total of 221,945. (See table III.)

A reduction of 51 was reported in overseas personnel by the departments and agencies other than the National Military Establishment.

Total overseas employment for the National Military Establishment is 168,569, a decrease of 13,040 from the October figure of 181,609.

The Department of the Army reported a decrease of 12,486 from the October total of 137,528 to the November total of 125,042, most of which occurred in the Mediterranean theater.

The Department of the Navy reported a reduction of 554 overseas employees.

INDUSTRIAL EMPLOYMENT

Total industrial employment during the month of November decreased 11,942 from the October total of 561,671 to the November total of 549,929. (See table IV.)

The departments and agencies, exclusive of the National Military Establishment, decreased 524.

The National Military Establishment increased a net amount of 11,418 from its October total of 540,129 to the November figure of 523,711.

The Department of the Army decreased its industrial employment a total of 10,635. Inside United States there was an increase in industrial employment of 2,008. Outside United States industrial employment decreased 12,643.

The Department of the Navy decreased its industrial employment 783.

The term "industrial employees" as used by the committee refers to unskilled, semiskilled, skilled, and supervisory employees paid by the Federal Government who are working on construction projects such as airfields and roads, and in shipyards and arsenals. It does not include maintenance and custodial employees.

TABLE I.—*Federal personnel inside continental United States employed by executive agencies during November 1947, and comparison with October*

Department or agency	October	November	Increase (+) or decrease (−)
EXECUTIVE DEPARTMENTS (EXCEPT NATIONAL DEFENSE ESTABLISHMENT)

[1] Including Air Force industrial employees. For month of November, the Air Force employed 95 industrial workers.

STATEMENT BY SENATOR HARRY F. BYRD, OF V GINIA, CHAIRMAN OF THE JOINT COMMIT ON REDUCTION OF NONESSENTIAL FEDE EXPENDITURES

Although civilian employment in the ecutive agencies of the Federal Governm dropped during November to below 2,000, for the first time since 1941, more than h of the agencies reporting to the Joint Co mittee on Reduction of Nonessential Fede Expenditures showed employment increa inside continental United States.

Fifty-six reporting agencies certified a to civilian employment in November of 1,999,8 a net reduction of 14,145 under the total the preceding month of October, but creases in nonmilitary employment ins the country were reported by 29 agencies.

The major portion of the net reducti was accounted for by a decrease of 12,643 civilian industrial personnel employed by Army overseas. This reduction was said have been occasioned largely by the disco tinuance of the Mediterranean theater operations, but it was partially offset by increase of 2,264 civilian employees taken by the Army inside the United States.

Continuing the unbroken trend of both Army and the Air Force since the milit unification law became effective last summ the civilian employment of the Air Fo also increased in November by 924.

Other agencies reporting major increa inside the country included the Inter Justice, and Post Office Departments, Ato Energy Commission, Civil Service Comm sion, and the Maritime Commission. Oth reported smaller increases.

Those reporting substantial decreases cluded Agriculture, Treasury, and Navy partments, Office of Housing Expediter, V Assets Administration, General Account Office, Housing and Home Finance Age Panama Canal, Reconstruction Finance C poration, and Tennessee Valley Authority.

operation of the hospitals and in the conservation of the health of the Indians of Alaska than under the present system.

The repeal of the Wheeler-Howard Act as it applies to Alaska is imperative in order that Alaska may be developed. The said Wheeler-Howard Act provides for creation of Indian reservations by the Secretary of the Interior with approval by the Indians, and that such reservations shall not be allotted in severalty to any Indian.

Under authority of the Wheeler-Howard Act, large areas in Alaska comprising more than a million and a half acres have been set aside and created as Indian reservations. Proposals for creation of additional Indian reservations in Alaska, totaling millions of additional acres, are now under consideration by the Interior Department.

The Indian people of Alaska through their organization, the Alaska Native Brotherhood, have gone on record against reservations.

The Indians or natives of Alaska get along very well with the other citizens. Some of these Indians are leading businessmen of their communities; others earn above the average annual income for Alaska residents and are fully capable of managing their own affairs. Many have been and are members of the Territorial legislature.

The excellent relationship between the Indians or natives of Alaska is evidenced by the fact that the Legislature of the Territory of Alaska, on February 16, 1945, enacted the so-called equal rights law, which provides:

SECTION 1. All citizens within the jurisdiction of the Territory of Alaska shall be entitled to the full and equal enjoyment of accommodations, advantages, facilities, and privileges of public inns, restaurants, eating houses, hotels, soda fountains, soft drink parlors, taverns, roadhouses, barber shops, beauty parlors, bathrooms, resthouses, theaters, skating rinks, cafes, ice cream parlors, transportation companies, and all other conveyances and amusements, subject only to the conditions and limitations established by law and applicable alike to all citizens.

SEC. 2. Any person who shall violate or aid or incite a violation of said full and equal enjoyment; or any person who shall display any printed or written sign indicating a discrimination on racial grounds of said full and equal enjoyment, for each day for which said sign is displayed shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished or imprisoned in jail for not more than 30 days or fined not more than $250, or both.

This would indicate that there is no discrimination or segregation of the Indians of Alaska.

The solution of the Indian problem in Alaska is not to set them apart from the other people or from modern life, but to give them the tools with which to compete on an equal footing with other people.

Education and equal opportunity with other people of Alaska is the solution of the Alaskan Indian problem.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. LANGER. Do I correctly understand that the Senator from Nebraska proposes that the Indians in Alaska be treated differently from the Indians in the United States?

Mr. BUTLER. I would say that the Indians of Alaska come in a different category from the Indians in the States. Our relationship with the Indians in the States is controlled by treaties which are provided for in the Constitution of the United States. There is no such provision with relation to the Indians of Alaska, and therefore we are attempting to act on the Alaska Indian situation separately from the situation of the Indians in the States.

Mr. LANGER. Mr. President, will the Senator further yield?

Mr. BUTLER. I yield.

Mr. LANGER. Let me call attention to the fact that there are approximately 12,000 employees of the Bureau of Indian Affairs at the present time, and we are trying to get rid of thousands of them. I particularly call attention to the Indians of Oregon, especially those at Klamath Falls. There is a school there—I think it is called the Sherman School—where in my opinion the situation is deplorable.

I wish to commend the distinguished Senator from Nebraska, Mr. President, for the fine job he is doing in connection with the Indians in Alaska, but I hope it will include all the Indians in the United States of America.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. MORSE. I wish to associate myself with the views expressed by the Senator from North Dakota in regard to commending the Senator from Nebraska for the points he has just made on the floor of the Senate with regard to the Alaskan Indian problem. I also wish the record to show that I share the views of the Senator from North Dakota in regard to the need for immediate action in connection with the problems of the Klamath Indians.

Mr. BUTLER. Mr. President, in connection with the remarks just made by the distinguished Senator from North Dakota and the distinguished Senator from Oregon, I may say that the Subcommittee on Indian Affairs, in charge of the Senator from Utah [Mr. WATKINS], has under consideration—and we hope for action on at least one of the proposals—the liberation or the emancipation, if you will, of certain Indian tribes, in cases in which it has been publicly admitted by the Bureau of Indian Affairs that they are ready for emancipation; and let me point out that the tribe to which both Senators have referred, namely, the Klamath Indians, is one of that group.

Mr. President, I ask unanimous consent that the bill which I have introduced be printed in the body of the RECORD.

There being no objection, the bill (S. 2037) to transfer to the Territorial government of Alaska the administration within such Territory of laws relating to Indians, and for other purposes, was received, read twice by its title, referred to the Committee on Public Lands, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That, except as provided in section 2, (a) all powers, duties, and functions of the Secretary of the Interior and the Commissioner of Indian Affairs with respect to the administration, within the Territory of Alaska, of laws relating to Indians are hereby transferred to and shall be exercised by or under the direction of the Territorial government of Alaska.

(b) All records and property of the Department of the Interior or the Office of Indian Affairs used primarily in the exercise of powers, duties, and functions transferred under subsection (a) are hereby transferred to the Territorial government of Alaska.

(c) All unexpended balances of appropriations, allocations, or other funds available for use in the exercise of functions transferred under subsection (a) are hereby made available to the Territorial government of Alaska for carrying out such functions.

(d) This section shall become effective on the first day of April 1949.

SEC. 2. (a) All functions, responsibilities, and duties of the Secretary of the Interior, the Office of Indian Affairs, and the Commissioner of Indian Affairs relating to the maintenance and operation of hospitals in the Territory of Alaska and the conservation of the health of Indians in such Territory are hereby transferred to and shall be administered by the Public Health Service and the Surgeon General, respectively.

(b) All personnel, records, and property (including office equipment) of the Office of Indian Affairs or the Department of the Interior used primarily in the performance of functions transferred under subsection (a) are hereby transferred to the Public Health Service.

(c) All unexpended balances of appropriations, allocations, or other funds available for use by the Department of the Interior or the Office of Indian Affairs in the exercise of functions transferred under subsection (a) are hereby made available to the Public Health Service for use in carrying out such functions.

(d) This section shall become effective on the first day of April 1949.

SEC. 3. There are hereby authorized to be appropriated to the Territorial government of Alaska such sums as may be necessary to enable such government to provide education for children of Indians, Eskimos, and other natives of Alaska.

SEC. 4. (a) Section 13 of the act entitled "An act to conserve and develop Indian lands and resources; to extend to Indians the right to form business and other organizations; to establish a credit system for Indians; to grant certain rights of home rule to Indians; to provide for vocational education for Indians; and for other purposes," approved June 18, 1934 (48 Stat. 984), is amended by striking out the following: "except that sections 9, 10, 11, 12, and 16 shall apply to the Territory of Alaska."

(b) Section 19 of such act of June 18, 1934, is amended by striking out the following: "For the purpose of this act Eskimos and other aboriginal peoples of Alaska shall be considered Indians."

(c) The act entitled "An act to extend certain provisions of the act approved June 18, 1934, commonly known as the Wheeler-Howard Act (Public Law No. 383, 73d Cong., 48 Stat. 984), to the Territory of Alaska, to provide for the designation of Indian reservations in Alaska, and for other purposes," approved May 1, 1936 (49 Stat. 1250), is hereby repealed.

Mr. LANGER. Mr. President, I wish to call attention to the fact that the Bureau of Indian Affairs originally opposed the emancipation or liberation of any tribe of Indians; and it was only after long hearings that the Indian Bureau finally agreed to the emancipation or liberation of 10 tribes. However, I call attention to the fact that instead of only 10 tribes, in my opinion there are

at least 20 tribes, including at least 2 tribes in North Dakota, that at the present time are ready for emancipation, just as the Klamath Indians in Oregon are. I hope that when the Indian Bureau states that only 10 tribes—some in California and some in other places—are ready for emancipation at the present time, the distinguished Senator will carefully look into the situation of other tribes, because I think if he does so, he will find that a number of other tribes are likewise ready for emancipation today.

Mr. BUTLER. Mr. President, I wish to commend the Senator from North Dakota for the interest he has shown and the effective work he did as a member of this committee and also under the committees existing under the former committee organization of the Senate, and I also commend him for the continued interest he maintains in all affairs relating to the emancipation of the Indians in the United States. The solution of this question should be arrived at as quickly as is possible, without further delay.

STANDARD TIME

Mr. OVERTON. Mr. President, I introduce for appropriate reference a bill to require that the standard time now prevailing throughout the United States shall be used in connection with all business affecting commerce and also affecting all offices and departments of the United States Government, legislative, judicial, and executive. This bill is intended by me as a counterattack against the daylight savings bill for the District of Columbia which was enacted last March. It was not observed by the railroads or other common carriers. It is opposed by the National Association of Broadcasters, and most of the district committees of that association have gone on record in opposition. It has produced much confusion and much trouble.

We should have a regular standard time prevailing throughout the United States, and that is the purpose I have in offering this bill. I wish to have it appropriately referred, and I should like to have it acted upon as soon as possible.

The bill (S. 2041) to amend the act of March 19, 1918, so as to require that the standard times fixed therein shall be used in connection with all businesses affecting commerce, introduced by Mr. OVERTON, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

CENTENNIAL ANNIVERSARY OF ESTABLISHMENT OF DEPARTMENT OF THE INTERIOR

Mr. BUTLER. Mr. President, on behalf of the Senator from New Mexico [Mr. HATCH] and myself, I introduce for appropriate reference a joint resolution which provides for the creation of a commission of 24 members to arrange for and to carry out the observance of the centennial anniversary of the establishment of the Department of the Interior.

The Commission would be composed of the President of the United States, the President of the Senate, the Speaker of the House, the respective chairmen of the Public Lands Committees of the two Houses, six other members of each of these committees appointed by the President of the Senate and the Speaker of the House, respectively, and six distinguished citizens appointed by the President.

The Commission is directed to make a report to the Nation of 100 years' stewardship of its natural resources, their exploration and conservation, their present condition and extent, and their future availability and development.

The Commission is also directed to prepare plans for the celebration of the centennial anniversary of the Department, and to make a report to the Congress not later than May 15, 1948, in order that any legislation necessary to enable it to carry out its plans may be enacted.

An appropriation is authorized to defray the expenses of the Commission.

The joint resolution (S. J. Res. 175) providing for the preparation and completion of plans for a comprehensive observance of the one hundredth anniversary of the creation of the Department of the Interior as an executive department of the Federal Government, introduced by Mr. BUTLER (for himself and Mr. HATCH), was read twice by its title, and referred to the Committee on the Judiciary.

CIVIL SERVICE RETIREMENT BENEFITS—AMENDMENT

Mr. TAFT submitted an amendment in the nature of a substitute intended to be proposed by him to the bill (S. 637) to amend the Civil Service Retirement Act of May 29, 1930, as amended, which was ordered to lie on the table and to be printed.

ACCOMPLISHMENTS OF THE EIGHTIETH CONGRESS—ADDRESS BY SENATOR WHERRY

[Mr. REVERCOMB asked and obtained leave to have printed in the RECORD an address by Senator WHERRY relating to the accomplishments of the Eightieth Congress, before a meeting of the Republican National Committee, at the Mayflower Hotel, Washington, D. C., January 20, 1948, which appears in the Appendix.]

REPUBLICAN NATIONAL COMMITTEE DINNER ADDRESS BY SENATOR KNOWLAND

[Mr. SALTONSTALL asked and obtained leave to have printed in the RECORD an address by Senator KNOWLAND on January 19, 1948, at the dinner of the Republican National Committee, Mayflower Hotel, Washington, D. C., which appears in the Appendix.]

ADDRESS BY HON. JAMES A. FARLEY BEFORE LYNCHBURG CHAMBER OF COMMERCE

[Mr. BYRD asked and obtained leave to have printed in the RECORD an address delivered by Hon. James A. Farley before the annual meeting of the Chamber of Commerce of Lynchburg, Va., on January 15, 1948, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—LETTER FROM LELAND OLDS

[Mr. WILEY asked and obtained leave to have printed in the RECORD a letter from Leland Olds, Chairman of the Federal Power Commission, relating to the St. Lawrence seaway, which appears in the Appendix.]

TAX ON VEGETABLE OILS—LETTER FROM H. K. THATCHER

[Mr. FULBRIGHT asked and obtained leave to have printed in the Appendix of the RECORD a letter relative to tax on vegetable oils, addressed to him under date of January 16, 1948, by Mr. H. K. Thatcher, director of the Arkansas Resources and Development Commission, which appears in the Appendix.]

THE CASE AGAINST COMPULSORY ARBITRATION — ARTICLE BY SENATOR MORSE

[Mr. MORSE asked and obtained leave to have printed in the RECORD an article entitled "The Case Against Compulsory Arbitration," written by himself, which appears in the Appendix.]

ST. LAWRENCE SEAWAY—STATEMENT BY THE POWER AUTHORITY OF THE STATE OF NEW YORK

[Mr. AIKEN asked and obtained leave to have printed in the RECORD a statement relating to development of the St. Lawrence seaway, issued by the Power Authority of the State of New York January 21, 1948, which appears in the Appendix.]

COMMUNISM DEFINED—EDITORIAL FROM THE YOUNG REPUBLICAN NEWS OF WASHINGTON, D. C.

[Mr. CAPPER asked and obtained leave to have printed in the RECORD an editorial entitled "Defines Communism," published in the Young Republican News of Washington, D. C., of January 15, 1948, which appears in the Appendix.]

CONSTITUTION IS IGNORED IN CIVIL RIGHTS HYSTERIA—ARTICLE BY DONALD R. RICHBERG

[Mr. BYRD asked and obtained leave to have printed in the RECORD an article entitled "Constitution Is Ignored in Civil Rights Hysteria," by Donald R. Richberg, published in the Washington Star of January 4, 1948, which appears in the Appendix.]

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following House bills and joint resolution were severally read twice by their titles and referred as indicated:

H. R. 108. An act to authorize the conveyance of the United States military reservation at Fort Schuyler, N. Y., to the State of New York for use as a maritime school, and for other purposes; to the Committee on Armed Services.

H. R. 358. An act for the relief of Hilario A. Goitia;

H. R. 387. An act for the relief of Hayato Harris Ozawa;

H. R. 420. An act for the relief of Esther Ringel;

H. R. 421. An act for the relief of Betty Isabel Schunke;

H. R. 560. An act to record the lawful admission to the United States for permanent residence of Wilhemina Piper Enz;

H. R. 892. An act for the relief of Michel Ferapontow;

H. R. 896. An act for the relief of Viktor A. Kravchenko;

H. R. 899. An act for the relief of Mrs. Keum Nyu Park;

H. R. 927. An act for the relief of the estate of Mary D. Briggs, deceased;

H. R. 1009. An act for the relief of Mrs. Florence Byvank;

H. R. 1139. An act for the relief of Dr. Gisela Perl (Krausz);

H. R. 1169. An act for the relief of Samuel W. Poorvu;

H. R. 1286. An act for the relief of Lawrence Reves;

H. R. 1298. An act for the relief of Anastasios Panage Ioannatos (known as Anastasios Panage Ionnetos or Tom Panage Yanatos);

H. R. 1516. An act for the relief of A. S. Osten, certifying officer, and for the relief of Guy F. Allen, former chief disbursing officer;

H. R. 1572. An act for the relief of Basque aliens;

H. R. 1653. An act for the relief of Edward W. Bigger;

H. R. 1747. An act for the relief of Mrs. Margaret Lee Novick and others;

H. R. 1859. An act for the relief of Philip Lee Sjoerdt Huizonga;

H. R. 1912. An act for the relief of John A. Dilboy;

H. R. 1927. An act for the relief of Margaret Katherine Hume;

H. R. 4141. An act to amend subsection 602 (d) (5) of the National Service Life Insurance Act of 1940, as amended, to extend for 2 years the time within which eligible persons may apply for gratuitous insurance benefits; to the Committee on Finance.

REPORT OF NATIONAL ADVISORY COUNCIL ON INTERNATIONAL MONETARY AND FINANCIAL PROBLEMS

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read by the Chief Clerk, and, with the accompanying report, referred to the Committee on Foreign Relations:

To the Congress of the United States:

I transmit herewith a report of the National Advisory Council on International Monetary and Financial Problems covering its operations from April 1, 1947, to September 30, 1947, and describing, in accordance with section 4 (b) (5) of the Bretton Woods Agreements Act, the participation of the United States in the International Monetary Fund and the International Bank for Reconstruction and Development for the above period.

Previous reports of the National Advisory Council were transmitted to the Congress on March 1, 1946, March 8, 1946, January 13, 1947, and June 26, 1947, respectively. Previous reports on the participation of the United States in the International Monetary Fund and the International Bank were included in the reports of January 13, 1947, and June 26, 1947, respectively.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 19, 1948.*

AMENDMENT OF REGULATIONS FOR SOLDIERS' HOME, WASHINGTON, D. C.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House to the bill (S. 929) to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564), which was, in line 11, to strike out "War" and insert "the Army."

Mr. GURNEY. Mr. President, when the Senate passed Senate bill 929, the bill inadvertently named the Secretary of War, instead of giving the correct name, "Secretary of the Army." Therefore this amendment is necessary.

I move that the Senate concur in the House amendment.

The motion was agreed to.

EVA L. DUDLEY ET AL.

The ACTING PRESIDENT pro tempore laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H. R. 1799) for the relief of Eva L. Dudley, Grace M. Collins, and Guy B. Slater, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WILEY. Mr. President, I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Acting President pro tempore appointed Mr. WILEY, Mr. COOPER, and Mr. MCCARRAN conferees on the part of the Senate.

THE CALENDAR

The ACTING PRESIDENT pro tempore. The calendar, under rule VIII, is in order.

Mr. WHERRY. Mr. President, I ask unanimous consent that the call of the calendar be dispensed with, inasmuch as we have a unanimous-consent agreement that it shall be called next Monday for the consideration of measures to which there is no objection, starting with No. 863, where the consideration of calendar measures was concluded on January 12.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONTROL OF USE OF GRAIN FOR PRODUCTION OF SPIRITS

Mr. TOBEY. Mr. President, I am taking the floor at this time to ask for the immediate passage by the Senate of Senate bill 1842, a bill to amend the Second Decontrol Act of 1947, which was referred to the Committee on Banking and Currency last December.

As originally introduced, the bill would have amended the Second Decontrol Act of 1947, approved July 15, 1947, by adding to section 3 of that act a new subsection 1501 (b) (1) (g). This new subsection would have added grain to the enumerated articles that are not decontrolled under the Second Decontrol Act of 1947. Therefore it would have recontrolled grain by adding to the controlled items the following language:

(G) Grain, except grain on the farm where raised and except that no grain may be allocated or released, and no grain or grain products may be used, for the production of distilled spirits for beverage purposes, including whisky, unless the President or the Congress by concurrent resolution shall find that the amount of grain available for more essential domestic uses and for exports to carry out the foreign policy of the United States is such that grain can safely be made available for distilled spirits, in which event the President may authorize the use of grain from time to time for the production of distilled spirits for beverage purposes for limited, specified periods of time. In considering the relative essentiality of uses of grain, consideration shall be given to the availability of adequate supplies of distilled spirits.

Mr. President, this bill went to the Committee on Banking and Currency, and the Senator from Vermont [Mr.

FLANDERS] was appointed chairman of a subcommittee to consider the matter. There is wide interest in the proposed legislation. Under the present law, the President will have the powers specified until January 30. That fact indicated the need of haste in holding hearings on this very complex subject. It is the opinion of the subcommittee of the Committee on Banking and Currency, as expressed through its chairman, the Senator from Vermont [Mr. FLANDERS], that adequate hearings should be allowed, in order to be fair to all interested parties. Therefore, in this situation, the Committee on Banking and Currency met and unanimously approved a bill extending for 30 days the time the President now has, and the 30 days will be used in order to afford full and fair hearing to all interested parties.

Therefore, Mr. President, I am making a motion that the bill be taken up at this time for consideration.

Mr. WHERRY. I wonder if the distinguished Senator will not withhold his motion, in view of the fact that the bill will be placed on the calendar, and will be up for consideration Monday. That will give ample time for those who have not had an opportunity to consider the matter to look into it. As I understand, the bill provides only for the extension of the President's authority for 30 days.

Mr. TOBEY. The Senator is correct. All interested parties have expressed agreement in the proposal. It relieves their minds, because they will have this time for hearings on this complex subject.

The ACTING PRESIDENT pro tempore. The Chair points out that the bill was reported Monday, and is on the calendar.

Mr. WHERRY. Yes; it is on the calendar.

Mr. TOBEY. I ask that it be taken up at this time.

Mr. TAFT. Mr. President, will the Senator yield?

Mr. TOBEY. I yield to the Senator from Ohio.

Mr. TAFT. Does the Senator say it meets the approval of all the distilling interests, as well as others?

Mr. TOBEY. The Senator from Vermont advised me that the day the hearing was held the distillery interests had asked for more time, and in view of that he asked for 30 days more.

Mr. TAFT. I think it would be very unfair to take this bill up without further consideration. I do not know whether I would be against it or for it, but this is the situation: Without hearings, in December we imposed a restriction on the particular industry here involved, without giving the members of that industry a chance for a single hearing. I advocated the action myself, because we were right up against the deadline and the necessity for action within 1 or 2 days. But it does seem to me that there is enough time between now and February 1 to have full hearings, and that we should hold hearings and take action before the 1st of February after the hearings have been held.

I do not care to say absolutely that I would not vote for the bill, but I think it merits more consideration than merely taking it up and passing it without consideration of any kind by the Senate. The distillers seem to be completely divided. None of them can agree with others, so far as I can discover. I do not know whether they should have a particular form of allocation, whether Mr. Anderson's form of allocation is fair or not fair. I think the committee should try to afford hearings before February 1, so that we may act intelligently. The House must act, and, I think certainly the House is not going to act before Monday, if the Senator will let it go over until Monday. That is my own impression at the present time from the way the Banking and Currency Committee of the House is proceeding.

Mr. LANGER. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. Does the Senator from New Hampshire yield for the purpose of permitting the Senator from North Dakota to ask a question?

Mr. TOBEY. I am glad to yield.

Mr. LANGER. I received a telephone call from the distillers, who are having a meeting in Minneapolis, informing me that they want to be heard. I do not know which side I am going to be on.

Mr. TOBEY. I may say to the Senator that it is just such considerations that motivate the committee. In response to the comments of the distinguished leader from Ohio, the time between now and February 1 is 10 days. The Committee on Banking and Currency is overwhelmed with the magnitude and the amount of legislative matters under consideration. We are working. We are to hold a night session tomorrow night. To ask that this bill go over now is unfair and unjust to the committee. If there are any interests to be affected, there is to be a 30-day period for extended hearings, for the very purpose the Senator from Ohio mentions, namely, so that all parties can be heard. That is the primary purpose of the bill. It is the unanimous consensus of the Committee on Banking and Currency that that is the wise procedure, in view of all they have to do, to conserve the rights of the people who are interested. I yield further to the Senator from North Dakota.

Mr. LANGER. Does not the Senator think the members of the industry ought to be heard? They are meeting at Minneapolis.

Mr. TOBEY. That is just exactly why we are postponing the matter, so they can be heard. That is the purpose.

Mr. LANGER. If the Senator is not so very busy, I wonder if he would take up that $10,000 bill of mine for hearing.

Mr. TOBEY. We cannot take up anything so small as $10,000. We deal only in millions.

Mr. BARKLEY. Mr. President, I wish to supplement the statement made by the Senator from Ohio. As a matter of fact, hearings were set down in the subcommittee for yesterday. I represent a State whose people are vitally interested in this legislation. A request was made for a postponement of the hearing from yesterday, because of the short notice. The hearing was called anyway, and a good many of those who wanted to be heard came on to Washington. On yesterday, or the day before yesterday, the Senator from Vermont [Mr. FLANDERS], chairman of the subcommittee, decided to postpone the hearing, because there was not sufficient time to have a full hearing between now and the 1st day of February, and he proposed the extension now sought.

I am sure the Senator from New Hampshire would not intentionally make a misstatement, but it is not accurate to say that all interests have agreed on this 30-day extension, even. Whether it would be possible to hold a comprehensive hearing between now and the 1st day of February is problematical. That is only 10 days off. The suggestion has been made by the particular industry involved even in this extension, that the power to allocate be extended to other beverage industries besides merely the distilled-beverage industry, to include industrial alcohol or beer or other forms of distilled or fermented liquors that are made from grain. I think they would like to present that viewpoint to the committee. Whether the committee would adopt it is a matter about which I express no opinion. But if the Senator undertakes to get this bill up today, it will undoubtedly arouse controversy, and also uncertainty as to whether it ought to be amended, to what extent it ought to be amended, whether for the 30-day period, even, because when we passed it in December, it was only for a 30-day period, practically speaking. It is to expire on the 31st day of this month, which is now 10 days hence. But the extension the Senator proposes is no more than the provision in the bill that was adopted here in the latter part of December, which provided that the law should expire on the 31st day of January. So what the Senator is really doing is practically asking now, without a hearing and without much debate or consideration or opportunity to be heard, for an extension practically equal to the provision of the law as it was adopted in December. I think that to try to get the bill up today might be a little unfair to some of us who perhaps do not know exactly the extent to which the time ought to be extended, or how much should be covered in the extension.

Mr. ROBERTSON of Virginia. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. Does the Senator from Kentucky yield to the Senator from Virginia?

Mr. TOBEY. Has the Senator from Kentucky finished?

Mr. BARKLEY. I have concluded for the moment. I yield.

Mr. ROBERTSON of Virginia. Mr. President, I am on the subcommittee to which this matter was referred. It was first proposed that we have hearings on Thursday or Friday of this week. We felt that if we did, we could not complete them in 1 day, that time was of the essence, and that we would not get any legislation through in time to meet the dead line of January 31. We had already gone into the matter very fully. We knew that 85 percent of the consumption now is bourbon whisky, which is made primarily from corn, with some wheat and rye mixed; that corn was critically short; there could not be any argument

about corn being short. We then said we would have hearings for 1 day, on Tuesday, which was yesterday. Numerous representatives of the industry complained that they could not adequately present their viewpoint in 1 day. Unfortunately, one member of our subcommittee had to be out of the city this week. The chairman and I wanted to accommodate him in the fullest way. In deference to his wishes, and to afford an adequate hearing to a large industry, some elements of which did not want any control at all, others of which wanted proper standards written into the act, to bring it more in line with decisions of the Supreme Court in NRA and similar cases, wherein they said the Congress had not set up proper standards, we decided there was but one practical thing to do, and that was to continue an emergency control for 1 month. That is a short month, even though it falls in a leap year. That would give us time to hear adequately the viewpoint of the distillers.

Mr. President, I think I am sufficiently familiar with the viewpoint of the American people, and I can say, I think, without successful contradiction, that the overwhelming majority of them want us to put food first in the present emergency. There are in bonded warehouses now 480,000,000 gallons of whisky. There are 60,000,000 gallons of neutral spirits. The distillers last year made twice as much whisky as they sold. They have a supply, on the basis of the present consumption of about 60,000,000 gallons a year, that will last 5 or 6 years. The distilling interests were shut down completely for 22 months during the war, and yet during that period and the succeeding period they made unprecedented profits. I think it would be the most selfish and most unpatriotic attitude for any distilling interests—and I can only say it does not represent all of them—not to be willing to make any concession to this emergency for food and especially for corn, the scarcity of which no one can deny. I understand that the allocation now being made by the Secretary of Agriculture is adequate to produce all the whisky the country will consume, and that the restrictions will not unduly depress the profits of the operations of the industry. So I hope very much my distinguished leader, the Senator from Kentucky, will not attempt to block consideration of this 30-day extension. When the bill was passed last month, I do not believe there was a dissenting voice in this entire body. I have never heard anybody say, "I want the distillers to use all the corn they want, it does not make any difference whether you can feed your cattle, or whether you have corn bread, or how much wheat would have to be diverted; I want the distilleries to run; I want them to make twice as much whisky as they can sell; I want them to pile it up; in their warehouses, where they have 480,000,000 gallons, let them put 580,000,000 gallons; we must fill these warehouses."

The point I wish to mention now is that during the war emergency it was not possible to get new oak-stave barrels, which are necessary for the aging of that superior product which is manufactured in the State of the distinguished Senator from Kentucky [Mr. BARKLEY]. So about 100,000,000 gallons of whisky were put in old whisky barrels, the char of which had already become so soaked with fusel oil that it would not properly age the whisky in those barrels. The producers cannot sell that whisky now under the established brands, because it is not the same kind of whisky. The pure-food laws will not permit the producers to sell that whisky under the established brand names. The only practical way to utilize that 100,000,000 gallons of whisky, which is more than a year's supply, is to redistill it, and when that whisky is redistilled and the pure alcohol gotten out again, if they want to, they can use it in blended whisky, which some say the majority of the people now prefer, because it is a light-bodied whisky and has a flavor to which people became educated when bonded whisky was sold at such a high price, and the producers learned to put a quart of whisky in a fifth bottle. That 100,000,000 gallons would take care of all visible needs.

I hope very much, Mr. President, that our distinguished majority leader will recognize the position in which the subcommittee is placed. We are trying to do what is best for the Senate and for the Congress and for the people of this Nation. We do not want to work any injustice on any industrial group, but we do want to put first things first. That would be to put our need for food above our need for liquor.

Mr. BARKLEY. Mr. President, will the Senator from New Hampshire yield to me?

Mr. TOBEY. Yes; I yield gladly to the Senator from Kentucky.

Mr. BARKLEY. I do not intend that the Senator from Virginia shall put me in the attitude of standing here and advocating the manufacture of liquor as opposed to bread. I do not think anything I ever did or said justifies the imputation to me of any such preference.

Mr. President, discussion of this subject came up in December. The manufacture of whisky is a very technical procedure. The difference between bonded whisky and blended whisky, and whisky made with neutral spirits, in which a comparatively small proportion of whisky may go into the blend, and all of that, is a very technical matter. When the subject came up in December I offered an amendment, which I thought would cure a situation that might operate as a loophole, by including neutral spirits also in the power to allocate grain for manufacture. The amendment was placed in the bill on the floor without very much consideration. Whether it was adequate or whether it met the situation I am still a little undecided. But since authority to allocate has been in effect, there has been a suggestion that other forms of alcoholic beverage ought to be included. I do not know whether they ought to be or not. I am not in possession of sufficient information to enable me to present an amendment which has been suggested at least by some of those who are affected by the allocation.

I am not seeking in any way to block the legislation. I do not think any harm would come if it went over a day or two so that we might look into the wisdom of offering some amendment here, rather than be compelled to take the bill as it is.

Mr. ROBERTSON of Virginia. Mr. President, will the Senator from New Hampshire yield to me so that I may make an explanation to the Senator from Kentucky?

Mr. BARKLEY. Just a moment, please.

Long before any agreement was entered into about the shutting down of the distilling industry, many of the distilling interests in the State which I happen to represent entered into a voluntary shut-down agreement themselves. They did so months in advance of the agreement that was entered into generally throughout the country. They have undertaken honestly and patriotically to observe and live up to every requirement. Whether they made money during the 2-year period when they were operating about 6 days a month I do not know. I have not looked into that, and I am not in any position to say whether they did or did not. But if we are going to conserve food, and grain that goes into food, there certainly is nothing insidious about a suggestion that all forms of liquor which consume the grain that goes into food, might well be considered.

The only thing I had in mind by following the suggestion of the Senator from Ohio [Mr. TAFT], who was the first to speak on the subject, was that there might be a legitimate reason for giving a day or 2 days to look into the question to see whether the authority should be extended as it is, or whether the law should be amended so as to include other forms of grain consumed in the making of liquor.

Mr. WHERRY and Mr. ROBERTSON of Virginia addressed the Chair.

Mr. BARKLEY. Mr. President, if the Senator from New Hampshire will yield further, I might say in that connection that since the allocation was made under the law as it now exists, one very large distilling interest in this country has brought a lawsuit in the Federal court to attack the constitutionality of even the 30 days' provision which was in the legislation passed in December. I do not know what will be the result of that litigation. I do not think that one particular interest represents the general body of those engaged in the industry. That particular interest has a right to bring a lawsuit, which I suppose it will be decided some time in the future, perhaps too late to be of any value in the present situation.

Mr. WHERRY. Mr. President——

Mr. ROBERTSON of Virginia. Mr. President, will the Senator from New Hampshire permit me to clarify one statement?

The ACTING PRESIDENT pro tempore. Does the Senator from New Hampshire yield; and if so, to whom?

Mr. TOBEY. I yield to the Senator from Virginia.

Mr. ROBERTSON of Virginia. I want to say to my distinguished colleague from Kentucky that he knows that I not only

admire him, but I love him, and I would be the last individual in the world to say anything from which any inference might be drawn that I was placing him in the position of putting liquor above food. That was not my intention at all.

Mr. BARKLEY. I am sure the Senator from Virginia meant no such implication.

Mr. ROBERTSON of Virginia. Oh, absolutely not.

Mr. BARKLEY. And I appreciate his statement.

Mr. ROBERTSON of Virginia. There was only one thing I wanted to develop. Unfortunately, I did not hear the opening statement made by the Senator from Ohio [Mr. TAFT] or the first statement of the Senator from Kentucky [Mr. BARKLEY], but, as a member of the subcommittee, I wanted to impress upon the Senate the fact that if it were proposed that the subcommittee should hear the witnesses who desired to be heard, and to consider all the phases which we think properly should be considered of legislation which would extend this measure until the new corn crop comes in in the fall of 1948, we could not do that in time to complete action on the legislation in January.

Mr. TOBEY. I may say, Mr. President, before the Senator from Kentucky proceeds further, that I appreciate that all the Senator has said was said absolutely in good faith and in all sincerity. But he is arguing the matter of control of grain for distilling purposes. That is not the purpose of the measure which is before us today. Naturally the committee of the Senate responsible for the subject matter, burdened with other work as it was, found the congestion such that in an important matter such as this there was not adequate time between now and February 1, 10 days, to give all the people interested in this salient matter the opportunity to present their cases. So, under the jurisdiction of the chairman of the subcommittee, the Senator from Vermont [Mr. FLANDERS], who is now in the Chamber, a hurried meeting was called, the Senator placed the situation before the subcommittee, and the subcommittee voted unanimously to ask that the matter go over for 30 days more, which will give sufficient time for all interested parties to come and be heard fully, with justice to all. That, Mr. President, is all there is to it.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. TOBEY. I yield.

Mr. BARKLEY. I appreciate that situation. I have not for a long time been a member of the distinguished committee now presided over by the Senator from New Hampshire. I know with what sincerity it approaches every subject with which it deals. It was contemplated last week, however, when the hearing was set down for yesterday, that there would be such a hearing conducted as would enable the committee to act permanently on the subject, and not simply for 30 days. It developed that that was not sufficient time.

Mr. TOBEY. That is correct.

Mr. BARKLEY. And as between the program of continuing the legislation indefinitely without an adequate hearing, and the proposal now submitted to the Senate, I think the latter is preferable, although it was not expected that the subject would be brought up today, and it might make it difficult, without adequate information, for Members of the Senate who in good faith may want to suggest an amendment or two, to do so.

Mr. TOBEY. Of course, all Senators will have an opportunity to offer amendments when the bill is reported from the Committee on Banking and Currency.

Mr. BARKLEY. That is, the permanent legislation. I am speaking now of the 30-day proposal.

Mr. TOBEY. Yes.

Mr. BARKLEY. So far as the House is concerned, I have no information as to whether it will or will not act. Last week I received 150 to 250 telegrams with reference to a Morton bill which had been introduced in the House of Representatives by a Member of the House from the State of Kentucky, requesting information as to when hearings would be had on the Morton bill. I have no information about when hearings will be had on that bill. I tried to find out from the author and from the committee of the House, and so far as they know, no hearings are scheduled on the Morton bill or any other bill on the subject, and whether there are to be any hearings or whether any action will be taken on the bill I do not think anyone knows.

Mr. TOBEY. That is not our responsibility, of course.

Mr. President, I ask that at the conclusion of my remarks there be inserted a statement which I had prepared, and also two paragraphs from a letter from the Acting Secretary of the Department of Agriculture, Mr. N. E. Dodd, bearing on the subject.

There being no objection, the statement and the extracts from the letter referred to were ordered to be printed in the RECORD, as follows:

On December 15, 1947, S. 1842 was referred to the Committee on Banking and Currency. As originally introduced, S. 1842 would have amended the Second Decontrol Act of 1947, approved July 15, 1947, by adding to section 3 of that act a new subsection 1501 (b) (1) (g). This new subsection would have added grain to the enumerated articles that are not decontrolled under the Second Decontrol Act of 1947. Therefore, it would have recontrolled grain by adding to the controlled items the following language:

"(G) Grain, except grain on the farm where raised, and except that no grain may be allocated or released, and no grain or grain products may be used, for the production of distilled spirits for beverage purposes, including whisky, unless the President or the Congress by concurrent resolution shall find that the amount of grain available for more essential domestic uses and for exports to carry out the foreign policy of the United States is such that grain can safely be made available for distilled spirits, in which event the President may authorize the use of grain from time to time for the production of distilled spirits for beverage purposes for limited, specified periods of time. In considering the relative essentiality of uses of grain, consideration shall be given to the availability of adequate supplies of distilled spirits."

As S. 1842 was referred to the Senate Banking and Currency Committee on December 15, 1947, there remained very little time to act upon it before the end of the special session. On December 16, 1947, the Senate Banking and Currency Committee favorably reported Senate Joint Resolution 167 and added an amendment to section 4 of the joint resolution by adding a new subsection (b), which revived and reenacted the original authority vested in the President by title III of the Second War Powers Act of 1942. However, it limited such authority to the allocation of grain for the production of distilled spirits for beverage purposes. The authority invested in the President was made to expire on January 31, 1948. When Senate Joint Resolution 167 was taken up on the floor of the Senate, the Senate added the words "neutral spirits" so that the authority conferred on the President was enlarged to control over the use of grain for the production of distilled spirits or neutral spirits for beverage purposes. Senate Joint Resolution 167 as enacted by the Senate and by the House contained that language.

The Banking and Currency Committee gave early consideration to S. 1842 at the opening of this present session. It was apparent that the period, during which the use of grain for the production of distilled or neutral spirits for beverage purposes might be controlled, would have to be extended. On January 12, 1948, during a hearing upon stabilization measures, I asked Secretary Clinton P. Anderson the following question:

"As a result of your experience in imposing restraints on the use of grain for distilling of neutral spirits, and for beverage purposes, what is your opinion of the need for extension of the allocation and rationing power for that purpose?"

Secretary Anderson's reply was as follows:

"I think it is necessary to continue the allocation and rationing power on the distilled spirits. I only point out the fact that I limited them to about 2,500,000 bushels, and I think unrestrained they would have used at least 7,500,000 bushels; and possibly more, of grain during the same period. I think the saving of that 5,000,000 bushels is important."

It became evident that the Senate Banking and Currency Committee would need more time to consider the matter of grain allocations. S. 1842 would authorize the allocation of grain for all purposes, except that it would not allow allocation of grain where raised. It would set up new rules with respect to the allocation of grain for the use of distilled spirits for beverage purposes. As S. 1842 would take the form of an amendment to the Second Decontrol Act of 1947, it would expire on February 29, 1948, along with that act.

S. 1842 would provide for the controlling of grain for a 1-month period only. It would require complex regulations that could not be set up in time to take effect during that 1-month period. The question whether grain should be allocated for all purposes would require longer hearings than could possibly be held before the termination of the present law on this subject (January 31, 1948). The committee has received a flood of requests from witnesses who wish to testify on this matter.

Accordingly, the committee has without objection agreed to continue section 4 of the present law (Public Law 395, 80th Cong.) for an additional month by making the termination date of the present law February 29, 1948. This was done in order to afford this committee the opportunity to consider the subject matter of S. 1842 in connection with general allocations before the expiration date of the Second Decontrol Act of 1947 (February 29, 1948). To accomplish this, the committee has amended S. 1842 in the following respects:

"First committee amendment: Strike out all after the enacting clause and insert in lieu thereof the following:

"That section 4 (b) of the joint resolution entitled 'Joint resolution to aid in the stabilization of commodity prices, to aid in further stabilizing the economy of the United States, and for other purposes,' approved December 30, 1947 (Public Law 395, 80th Cong.), is amended by striking out 'January 31, 1948' and inserting in lieu thereof 'February 29, 1948'."

Second committee amendment: Amend the title so as to read:

"A bill to extend to February 29, 1948, the period during which the use of grain for the production of distilled spirits or neutral spirits for beverage purposes may be controlled under title III of the Second War Powers Act, 1942."

To summarize in a few words, the effect of S. 1842, as reported by the Senate Banking and Currency Committee, is to continue the present law which vests authority in the President to allocate grain for the production of distilled or neutral spirits for beverage purposes, for 1 month by making the termination date of the present law February 29, 1948, instead of January 31, 1948, so that the Banking and Currency Committee may hear more witnesses upon this matter.

[Extract from letter of N. E. Dodd, Acting Secretary of Agriculture]

JANUARY 21, 1948.

This is in reply to your telephone request of January 20 for a statement with respect to S. 1842, reported out by the Senate Banking and Currency Committee, with amendments. As amended, the bill extends until February 29, 1948, the provisions of section 4 (b) of Public Law 395, Eightieth Congress, first session. This section authorizes the exercise of the powers, authority, and discretion conferred upon the President by title III of the Second War Powers Act, with respect to the use of grain for the production of distilled spirits or neutral spirits for beverage purposes.

As you know, grain continues to be in critically short supply, and its conservation is a matter of urgent necessity in order that the most essential domestic requirements be met first and in order that the United States be in a position to fulfill commitments made pursuant to our foreign policy. During the fiscal year 1947 the distilling industry used approximately 59,000,000 bushels of grain. From information now available to us it is estimated that in the absence of controls distillers would use at least 7,500,000 bushels of grain per month. By virtue of the allocation order now in effect, issued under section 4 (b) of Public Law 395, approximately 2,500,000 bushels of grain are allocated to the distilling industry for the month of January. It is imperative that distillers limit their use of grain during the next few months. Since the distilling industry is unable to agree upon any plan of voluntary allocation, it is our opinion that statutory authority for that purpose, is provided in S. 1842, as amended.

Mr. FLANDERS rose.

Mr. TOBEY. I now yield to the Senator from Vermont.

Mr. COOPER. Mr. President——

The ACTING PRESIDENT pro tempore. Is the Senator from New Hampshire yielding for an inquiry or surrendering the floor?

Mr. TOBEY. Let me put it this way: The Senator from Vermont was called away from the Chamber in an emergency. He came to me and asked me, as a brother Senator and as a member of his committee, if I would be good enough to present this matter. I have done so in my humble way. Under the whip and spur of the agitation which has arisen in the Senate today on this question, he has patriotically and unselfishly returned to the Chamber and is now present. I ask him to speak for himself as chairman of the subcommittee.

The ACTING PRESIDENT pro tempore. So far as the parliamentary situation is concerned, the Chair does not care to surrender the power of the Chair to recognize Senators. A Senator has a perfect right to yield for a question, if a question is addressed to him.

Mr. TOBEY. I yield for a question; and I suggest that the question be, "How are you doing?"

Mr. WHERRY. Mr. President, I make the point of order that we should adhere to the rules relative to yielding the floor. I do not wish to take the Senator from New Hampshire from the floor. He can present his case if he cares to do so. I asked him in the beginning if he would withdraw his motion, feeling that there would be no debate on the issue, and that the bill would undoubtedly be passed on Monday. That is the easiest way to expedite the procedure. If we are to have a full-dress debate, I think in fairness to the Senator from New Hampshire and to the chairman of the subcommittee, we should have a quorum call and debate the question, because we would require a quorum before taking a vote on the question. In view of what has been said by the distinguished Senator who is working so hard on this committee, that the report is unanimous, that there will be no debate upon it, and that the bill will pass, I ask the Senator if he will not permit the bill to come up on the call of the calendar on Monday. If he feels that he cannot do so, I think the only thing to do is to have a quorum call and a debate on the question whether or not we are to take up this proposed legislation ahead of other legislation with respect to which certain plans have been announced to the Senate, and upon which Members of the Senate have informed themselves.

Mr. TOBEY. Mr. President, if I were commenting on the proceedings here today, I would say, in the language of Holy Writ, "How great a matter a little fire kindleth."

I submit to the Senator from Nebraska that the Senator from New Hampshire is doing a perfectly natural thing. When the Senator who asked him to present the case now returns to the Chamber, he should have the courtesy of making a few remarks on this question. So I yield to my friend the Senator from Vermont [Mr. FLANDERS]. He may ask a formal question, and he may ask additional questions; but I think the courteous thing to do is to allow him to proceed.

Mr. WHERRY. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

During the calling of the roll,

Mr. WHERRY. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with, because I feel that an arrangement has been made which will be satisfactory relative to calling up the bill which has been discussed. It is the intention to ask unanimous consent, before the close of business today, that the civil service bill, Senate bill 637, be made the unfinished business. I have been in touch with the chairman of the Committee on Post Office and Civil Service the Senator from North Dakota [Mr. LANGER] who has agreed that on Friday, when that bill comes up for consideration, he will not object to a motion to set it aside temporarily until the question just discussed has been settled. If that is in agreement with the understanding of the Senator from North Dakota and of the Senator from New Hampshire, I suggest that we proceed on that basis.

Mr. TOBEY. That is agreeable to me.

The ACTING PRESIDENT pro tempore. Is there objection to the request for the suspension of further proceedings under the quorum call? The Chair hears none, and it is so ordered.

CIVIL-SERVICE RETIREMENT BENEFITS

Mr. WHERRY. Mr. President, I ask unanimous consent that at the conclusion of business today Calendar No. 144, Senate bill 637, to amend the Civil Service Retirement Act of May 29, 1930, as amended, be made the unfinished business, and that it be understood that when the Senate convenes on Friday following the recess, the unfinished business, which will then be Senate bill 637, will be temporarily set aside for the consideration of Senate bill 1842.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. FLANDERS. Mr. President, it is perfectly satisfactory to me, as chairman of the subcommittee dealing with the Kilgore-Aiken bill, that the Senate defer considering it until Friday.

EUROPEAN FEDERATION

Mr. FULBRIGHT. Mr. President, on Tuesday, January 20, Mr. Foster Dulles, appearing before the Foreign Relations Committee of the Senate, made a powerful and, I believe, unanswerable argument that this country should encourage the unity of Europe. I hope all the Members of the Senate will take the time to read Mr. Dulles' statement before the committee. His emphasis is noteworthy, and the several points which he brought out in his speech, particularly that as to the attitude this Government ought to take toward the creation of a federated Europe, I think are worthy of study by every Member of the Senate.

Mr. President, on Monday last Mr. Bernard Baruch, one of our country's wisest elder statesmen, also recognized the importance of promoting the unification of Europe. Also on Monday, Mr. Drew Pearson, in an article entitled "U. S. of Europe Held Only Solution," presented powerful arguments in favor of a federation of Europe. The Times-Herald, of Washington, which is not generally regarded as being idealistic in its approach to international matters, expressed similar views on Saturday, January 17, in an editorial entitled, "Europe Needs a United States." This morning the Washington Post commented favorably again, as it has many times in the past, on the subject of European unity.

These expressions are the most recent, but by no means the only, support that has been given the idea of European federation during the past year. It is significant that the only strong and bitter opposition to European federation comes from the Communists. That in itself should be persuasive to those among us who are too busy to take the time to study the affirmative reasons for federation.

Mr. President, in order to refresh the memory of the Members of the Senate and of the people, I wish to point out that on March 21, 1947, the senior Senator from Utah and I introduced a resolution, Senate Concurrent Resolution No. 10, providing:

That the Congress favors the creation of a United States of Europe, within the framework of the United Nations.

The resolution was referred to the Committee on Foreign Relations, where it rests today.

Following the introduction of the resolution, the press of this country commented on the proposal favorably. Practically all of the papers expressed their strong approval of the idea, but many felt that it could not be achieved because of the ancient prejudices and rivalries that have in the past kept the nations of Europe apart. Since that time, however, I think the actions of the Europeans themselves have gone far to dissipate this defeatism. The unprecedented response to Secretary Marshall's speech at Harvard last June, by the 16 European nations, has brought the unification of Europe within the realm of possibility. Mr. Dulles, on Tuesday, had a great deal to say in answer to direct questions. He said positively he thought it possible to achieve the purpose within the near future, and that really all that was required was a "push," which I interpret to mean some encouragement from this country.

Secretary Marshall, in his statement at Harvard and in his letter to the chairman of the Foreign Relations Committee, commenting on the resolution (S. Con. Res. 10) prior to his speech, seemed to recognize the importance of unification to the future of Europe. He stated in his letter of June 4, 1947, that he was "deeply sympathetic toward the general objective of the resolution." Since June, however, I have not seen any statement of the Secretary's or of any other important member of the administration, following up or developing this point. On the contrary, the usual discussions of the Marshall plan, in the press and by the people, have centered around the amounts involved the effect upon our economy, and, generally speaking, the view that it is a relief or reconstruction plan for the individual nations involved. In other words, the objective of a unified, federated Europe has been forgotten or overlooked.

Mr. President, for my own part, while I have made many speeches in support of the Marshall plan, I have done so because I believed that an indispensable consideration or objective of the plan was a federated Europe. If the same old prewar Europe of many impotent, independent states is rehabilitated, I do not think we shall have achieved anything of lasting value, or anything commensurate with the sacrifice that we shall have made. To put it another way, unless our Government and the Europeans accept the idea that some form of political federation, as well as economic cooperation, is a proper objective of the Marshall plan, I shall have great difficulty in bringing myself to support the plan. If our Government is unwilling to recognize, and to accept, federation as a necessary and legitimate goal, I think the entire concept of European reconstruction is a futile gesture bound to result in disaster for Europe, as well as for ourselves.

My reasons for this conclusion are too involved to discuss in detail at this time, but I shall sum them up with this thought: If we reconstruct Europe within the framework of her medieval political and economic structure, and she does not achieve unity, she can protect herself from neither alien domination nor internal quarrels. Standing alone, none of the 16 nations can withstand the determined pressures of the Russians. While they think they can take refuge in neutrality, the last war has proved how futile that is. We cannot afford permanently to protect them from foreign domination. They must find a way to protect themselves and to stand on their own feet, economically.

If we reequip their industrial plants and they do not at the same time achieve federation, we are likely to find that very industrial power turned against us. How often have we regretted selling scrap iron to Japan before the last war. But that was nothing compared to the industrial power that we shall have furnished our opponents if Europe should succumb to Russia after we have rebuilt her under the Marshall plan.

I am hopeful that the Committee on Foreign Relations will incorporate in the bill that is reported to the Senate the sense of Senate Concurrent Resolution 10. If it is overlooked by the committee, I intend to offer it as an amendment to the bill.

Mr. President, on December 9 and 10, I gave the Marfleet lectures at the University of Toronto. The subject of those lectures was the federation of Europe. In them I have attempted to give more fully the reasons why this country and our neighbors in the New World have a vital interest in seeing a strong, self-sufficient Europe created out of the chaos of the war.

I ask unanimous consent that the lectures be incorporated in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Is there objection?

There being no objection, the lectures were ordered to be printed in the RECORD, as follows:

THE NEW WORLD LOOKS AT THE OLD WORLD

I

When the United Nations was created in 1945, we believed that, at long last, a rational world order was in the making. We remembered, of course, in our more thoughtful moments, that once before, in 1920, a former effort to bring peace to the world was fatally crippled by the absence of one of the great powers. But this time all the great powers are participants and we thought that people had surely learned something from the Second World War. Such does not seem to be the case. This time, instead of a refusal by a great power to participate, we are confronted with a participant, relentless and aggressive in its efforts to obstruct and to destroy the effectiveness of the undertaking.

In view of the rather obvious fact that the United Nations cannot operate effectively under existing conditions, it seems to me the better part of wisdom for the people of the New World, particularly of your country and my country, to take a good look at the Old World and see if we cannot find a gleam of hope in that dismal scene. I do not suggest that we abandon the machinery or the concept of the United Nations. But I do suggest that, while that organization is temporarily stalemated, we should look elsewhere for the means to stop the persistent aggression of Russia and for a way to reestablish a semblance of order and freedom in the world.

In my own country we have, I think, finally recognized that appeasement and half measures lead only to futility and failure. As a result of Secretary Marshall's suggestion last June, we are developing slowly and painfully a positive and affirmative program to give the free peoples of western Europe an opportunity to rebuild their stricken countries, and thereby to avoid the tyranny of Russian domination. The so-called Marshall plan, as it is presently conceived, is the correct approach; but it alone is not enough to create a strong and stable community in Europe. Something new is needed. That something, I believe, is the federation of the nations of Europe.

It is my conviction that the New World can help Europe along the road to federation. Europe is ripe for a change. She has just passed through the most devastating war in history, which left chaos and discontent in its wake. Europe, at this moment, is wallowing in the backwash of the Second World War and needs help desperately; but, so long as Europe remains a senseless conglomeration of separate economic and political entities there is little hope for the peace and prosperity of Europe or of the world.

Very seldom, if ever, have people achieved any notable progress in their social or political structures just because it was the reasonable or wise thing to do. The progress they have made in these fields has usually resulted from a serious threat to their very survival. Social and political traditions are not easily changed by rational methods alone.

The most propitious time to move forward is just after society has been disturbed by some great upheaval, which leaves it in an unstable and fluid state. At such a time vested interests disappear; the established order is disestablished; old prejudices soften as new ones begin to evolve; the old rulers lose their power to others; and new patterns of society begin to take shape. Thus, after the Thirty Years War, modern Europe began to emerge from medieval feudalism. After the Napoleonic conflicts, the concert of Europe and a multitude of peace organizations flourished. Out of the First World War came the League of Nations and out of the second, the United Nations.

As a result of the upheaval, from which she has not yet emerged, Europe as I have said, is ripe for a change. It is our job to see that the change is forward to a system of freedom and self-government, rather than backward to slavery and tyranny; forward to unity and peace, rather than to nationalistic particularism and impotent fragmentation which leads to war and probably to domination by an alien power.

The idea of a federation of Europe is not new. For centuries it has been advocated by some of the wisest men of the Western World. The point is that the circumstances of the present are more compelling, the necessity is greater, than at any time in history. No one has expressed this more eloquently than Winston Churchill when, at a meeting in London in May of this year, he said:

"This is the hour of choice, and surely the choice is plain. If the peoples of Europe

resolve to come together and work together for mutual advantage, to exchange blessings instead of curses, they still have it in their power to sweep away the horrors and miseries which surround them and to allow the streams of freedom, happiness, and abundance to begin again their healing flow.

"This is the supreme opportunity, and, if it be cast away, no one can predict that it will ever return or what the resulting catastrophe will be * * *.

"We hope to reach again a Europe purged of the slavery of ancient days in which men will be as proud to say, 'I am a European,' as they were to say, 'Civis romanus sum.' We hope to see a Europe where men of every country think as much of being a European as of belonging to their native land, and wherever they go in this wide domain will truly feel 'Here I am at home'."

Why it is important to us that Europe be united

There are many reasons why it is to the interest of the Western Hemisphere that Europe should recreate the unity which, in ancient and medieval times, permitted her people to live in relative peace and happiness. Overshadowing all other considerations is the supreme interest that we have in creating a peaceful world. But there is also the hard, materialistic fact that we have made, and are committed to make additional, enormous loans and grants to the nations of Europe; and as a consequence we are faced with such a terrific drain upon our national resources through these services, that we are forced to take stock of our wealth lest we impoverish ourselves in helping the world. It would be strange if we did not take a selfish interest in the possibilities of a United States of Europe. But whatever malicious propaganda the Kremlin may spread to the contrary, the fact remains that the primary reason for our loans and grants is our wish to create a stable and orderly world in which we, and all peoples of the world, may live in peace. I am convinced that the uniting of Europe is a fundamental pillar of a stable world order.

Our concern is not simply an idealistic dream of bringing relief to suffering Europe; nor is it the hard-shelled manipulations of economic imperialism. We have a deep and inescapable interest in the welfare of Europe. Twice, in 25 years, we have shed our blood and spent our treasure in world wars which grew out of European feuds and power politics. We know that the policy of isolation, which allowed us to flourish and grow great, is no longer possible. We know that our present well-being will be short lived unless Europe recover and can carry on normal commercial, social, and political relations with us. Rich as our two countries are, indeed, rich as are all the Americas, we in the New World cannot indefinitely subsidize an impoverished, non-self-supporting Europe. That continent must learn again how to take care of itself.

Three choices lie before us:

1. We might withdraw from western Europe, in which case we would in all likelihood abandon Europe to communism. There can no longer be any doubt as to Russia's international program; her army, secret police, and fifth columns have established domination over one small country after the other along her borders and beyond. She is interfering in the domestic affairs of many other countries. While she professes faith in the United Nations, her actions, in and out of that organization, belie that profession. She is abusive, belligerent, uncompromising, and aggressive. While she shouts imperialism at the Anglo-Saxon countries, especially the United States, she is busily engaged in grabbing Sinkiang and northern Korea and threatening Greece and Iran and I may say France and Italy. Her expansion is so great that she threatens to control all independent nations except our own. If the United Nations is to succeed as a voluntary union of peoples, it is imperative that, pending the realization of its objectives, the existing power relationships among the great nations be preserved. The United States cannot tolerate the expansion of Russia to the point where she can control, directly or indirectly, all the resources and manpower of Europe, Asia, and Africa; for such control would spell the end of a voluntary association of nations and the issue would certainly be decided by war.

A United States of Europe cannot conceivably threaten Russia's security; but, on the contrary, it would mean a substantial contribution to Russian development and well-being. There is nothing aggressive in the uniting of Europe for economic, social, and political purposes. The objectives are the rehabilitation of that unhappy region in the interests of peace and the prevention of war. There is ample reason to believe that the Russian objections to a united Europe are based upon the imperialistic intentions of Russia herself. One of her political techniques is to create disturbances in the world so that she may fish in troubled waters. In short, Russia does not object to a United States of Europe because it would menace her security; she objects to it because it would mark the end of what she thinks is a profitable fishing season.

If Russia were not so bent on establishing a communistic world at any cost, she would readily see that a revived western Europe would mean an increase in trade for eastern Europe. It would mean political and economic stability and therefore greater buying power. It would give Russia a chance to develop her resources and would furnish her with new markets for her goods and raw materials.

However, this course of action does not appeal to Russia and, as long as that is the case, we dare not abandon Europe to her mercies, which we have come to know so well.

Obviously, the easy course of isolationism is not the proper one for the United States, nor for the New World states, to follow with regard to Europe. It would permit Russia to consolidate her power in Europe to such an extent that she would achieve domination over an additional 270,000,000 people. In view of the Kremlin's policies, no one can doubt that such a consolidation of power by Russia in Europe would ultimately spell war for the world, and that the two primary belligerents would be Russia and the United States. Such enormous power and unlimited resources under the control of one autocratic government, when geared to an emotional drive to world revolution, would be accompanied by an irresistible urge to conquer and dominate the world. If it should succeed, it would mean the conquest of mankind by the greatest slave state in all history, a catastrophe beyond the power of description. The nature of the regime in Russia is such that I do not believe it has within it the power to stop of itself. Each success only adds fuel to the fire of its fanaticism. Until it is halted, the urge to greater expansion only becomes stronger each time she scores a triumph.

2. The second course of conduct open to us is the piecemeal approach, which we have been following. This aid, offered on a restricted scale, presents basic difficulties in the formulation and administration of policy; for it seems to have no further aim than the reconstruction of the same old crazy-quilt pattern of European sovereignties, the same redevelopment of highly industrialized communities burning with economic nationalism, and seething with historical wrongs and ambitions. Such a reconstructed Europe would be built upon the same foundation that has produced conflict after conflict and an ever-increasing suspicion, hatred, and distrust among her peoples.

Many scientists and statesmen believe that the traditional national states will have to make way for a broader cooperation among the people of the world. Contemporary international affairs are marked by our going through a great historical transition, which is modifying the old state system into another form of political control. Sound foreign policy dictates the reexamination of the characteristics of the nation state, particularly calling for the elucidation of how states have come into existence and passed into oblivion; what conditions affect the growth of nation states; colonial systems; national economies; the factors which create world crises; the decline of the nation state in terms of international economic dependence; the logistics of heavy industrial concentration; the logic of the drive toward autarchy, and the modern state as a commonwealth or a political economy. Without attempting to evaluate any of these, we cannot fail to recognize that we have entered upon an era when we must explore the possibility of an organized cultural community without terminal associations, an example of which was medieval Europe.

Again without suggesting what the outcome will be in the broader field we cannot escape the conclusion that the piecemeal approach to the settlement of Europe's problems is short-sighted, unstatesmanlike, and blind to the trend of the times.

3. That leaves us with the third and last choice of policy, namely, the promotion, with all our power of persuasion and with all our economic and industrial strength, of an economic and political union of the western European nations. Such a policy would preserve intact and free that Europe which has been the mother of political and religious freedom, the creator of modern industry, the builder of the world's great empires, and the author of some of the greatest literature, science, art, and drama of contemporary life. It need not destroy the cultural autonomy of the individual states which have made these contributions to our civilization.

Our encouragement of a United States of Europe cannot reasonably be construed as the unsolicited meddling of one country in the internal affairs of another. Our interests are personal; they are immediate; they are real. But there is another very urgent reason for our interest. If western Europe were to succumb to the Russians, then the systems, institutions, and forces which have made all North and South America—but especially our two countries—great, will be imperiled. A healthy, prosperous, rehabilitated, and united Europe is one of the best guarantees that our own two countries, and all they stand for, will continue to prosper and flourish.

But we should be remiss in our discussion were we to fail to note that our interests in Europe are also filial. We are simultaneously the trustees and the exponents of European civilization. It is natural law that children shall grow into adults, and, upon reaching maturity, assume their share of responsibilities. So it is with states. We, in the New World, are the children of Europe; and we must assume our share of the burdens which Europe hitherto has carried. As the physical, cultural, and spiritual children of Europe, we inherited at national birth both the blood and the spirit of Europe. While our New World climate has been more invigorating, our resources far richer, and our lands vastly larger than those of Europe—nevertheless our environment is inescapably conditioned by Europe. With limited exceptions, our languages, religions, schools, music, literature, philosophical concepts, social institutions, political phenomena, architectural styles, dress, habits of thought, and ways of living, are fundamentally and inescapably European. Europe has played a leading role in the creation of our commerce, in the opening of our mines, in the building of our railroads, and in the

fashioning of thousands of our enterprises. Europe has performed these services for every country in North and South America. It is no wonder then that we should simultaneously reflect our Old World heredity and our New World environment.

It is not surprising that, as the grown children of Europe, we, in the New World, are now the trustees of a heritage of European civilization and that our future is bound up with that of Europe. Once a European monarch transferred to our shores the seat of his empire; and other European rulers from time to time have fled here for safety. It was here that crucial revolutions occurred through which European doctrines of freedom were tested. New World dynamism has constantly given life to Old World ideas. There is no escaping the link which binds our worlds together. The League of Nations and the United Nations Organization were European in concept; but they came into being chiefly as a result of New World effort and vision. We need not go further to show how completely we, as children of Europe, are interested in what happens to that, at present, unhappy continent, and how inextricably our fate is bound up with hers.

We are more than the mere recipients of a European heritage. Here, and through us, many things which began in Europe have been brought to fruition. With due humility we may observe that in much we are the exponents and maximizers of European civilization. Take, for example, industry and finance. In these fields we are much more than a branch of Europe. Not only have we achieved world leadership; but our strength in these areas, in a very substantial measure, contributed to the United Nations' victory in the Second World War. It was also because of this strength that we in the New World were able to help England survive the ravages of the total war just ended. If we turn to the field of social welfare we note that we have attained the highest standard of living in the world. But we must simultaneously note that the pattern of our social life and institutions is essentially European.

Need we go further in the exploration of the necessity and compulsion of our interest in Europe and in her well-being? That interest may be confused but it is nevertheless there. It is the interest of the adult individual in the security and well-being of his parents, of the pupil in the welfare of the teacher, of the businessman in the prosperity of those with whom he must do business, of the benefactor in the recovery of the person he is assisting, and of one man in the well-being of other men.

We are bound to Europe by the same civilization, and we are set apart from the rest of the world thereby. There are three main bonds which hold us together: (1) The scientific method; (2) the rule of law; and above all (3) the integrity of the individual human being.

The example of the New World

We, here in the New World, have a real contribution to make and a constructive example to set for Europe to unite and to federate for her own best interest. In no small measure are the successes of Canada and the United States to be attributed to their form of government. Indeed, it is my conviction that the most important single reason why our two countries have succeeded in overshadowing other similar areas of the world in growth and development in many fields is that we have a Federal form of government and thus avoid the countless frictions and internal frustrations of national fragmentation. Had Canada, Quebec, British Columbia, and the Maritime Provinces, and had each of the Thirteen Original Colonies, which rebelled against the British and which later jointly became the United States, insisted upon retaining its independent sovereignty, political and economic dismemberment of this great continent would have taken place, and it would have been beset by jealousies, suspicions, and distrust so that now North America, like Europe, would have been the scene of political strife and of economic and social frustration.

We often hear it said that the problems of European unification cannot be compared with the problems involved in the federation of our two countries; and I would be among the last to deny that it was considerably easier for us to unite than it will ever be for Europe to do so. But, in spite of this, it should not be overlooked that all of the difficulties, under which Europe now labors, were in some measure to be found here prior to federation. There were boundary problems, currency difficulties, and tariff squabbles and a vast number of other issues which had to be adjusted before unions could be achieved. There were differences of language, religion, and social institutions.

In my own country the issue of slavery could not be solved in the beginning and finally had to be purged by a bloody civil war. Slavery was no small obstacle to unity. Then, too, in the self-sufficient provincial economy of 1776, with its slow means of communication and its limited power of mass destruction, I doubt that the compelling necessity for federation was anything like as obvious to the citizens of that time as it should be to anyone who knows there are supersonic planes and atomic bombs in the arsenals of today.

We solved the problems of that era. With our help, Europe can solve hers, too.

Many years ago we blazed the trail for Europe to follow. If the English of Canada and the French of Quebec, if the Dutchman of New York and the Englishman of Connecticut, if the Frenchman of Louisiana and the Spaniard of California, if the Swede of Delaware and the German of Pennsylvania, could be molded into a single body politic, living amicably with each other, striving for common national purposes, then there is every reason to believe that the Frenchman of France and the Englishman across the Channel, that the Dutchman of Holland and the German of Germany, and even the Spaniard of Spain, with all their neighbors, if given the right conditions, can unite for a reconstructed and rehabilitated Europe.

In other ways, too, we in the New World may be able to furnish Europe with useful examples. Our southern neighbors of Latin America have, over the years, reached among themselves and with us an understanding which is operating in the interest of peace and the settlement of disputes on these two continents. The Pan American Union, looking back to Bolivar for conception and to Blaine for realization, is now much more than an institution for the clarification of information about the countries of the Western Hemisphere. It is a truly international institution on the broadest basis, which, since the beginning of the Second World War, when taken in conjunction with the arrangements entered into between our two countries, has developed into a system of continental security. The Pan American states have accepted responsibility for the administration of the Monroe Doctrine and hemispheric defense. The Act of Chapultepec, supplemented by the Treaty of Rio de Janeiro, has created an American system of hemispheric defense.

In trade, in transportation, and in many other ways the countries of the New World have blazed the trail for Europe, showing her how to reach effective and creative federation. In addition to these examples and the several more general inducements mentioned above, there are two particular reasons why states are driven into federation. One is the danger from foreign powers; the other is the inconvenience and inefficiency of economic separation. These reasons impelled both of our governments to adopt a unified federal form of political organization. Both reasons are impelling forces of utmost urgency in Europe today.

Why Europe must and can unite

We have now seen why it is of the utmost importance to us that Europe unite. Let us next see why it is of the greatest importance to Europe herself that she unite.

It was C. B. Fawcett, one of the world's leading geographers, who said in 1941, when discussing the bases of a world commonwealth:

"There are but two unchangeable natural units of human organization—the individual and the whole of mankind. All intermediate units, such as the family, clan, tribe, or nation, church or state, or other association, are changeable or changing."

I agree with this observation, but, at the same time, it would be unrealistic for us to disregard the power of racial, historical, cultural, and other prejudices which have divided Europe into seemingly permanent units called states. In spite of the forces making for separation, there are many compelling factors which are working for the eventual termination of European differences, and for the wiping out of racial trade, and other barriers that for centuries have afflicted European politics.

It is not necessary to canvass them all here, but a few might be mentioned. The political frontiers of Europe are largely historical and seldom follow geographical lines. Racial groups, as a rule, cannot be separated from each other by any clear-cut line, but, rather, one group merges into the other through a zone of intermarriage and mixed population. No boundary line can do justice to all. The railroads of Europe, in response to economic requirements, cut across the Continent with complete disregard for geographical and political boundaries. The inland waterways, both natural and artificial, make Europe a single economic whole; and it is not by chance that effort after effort has been made to internationalize the major rivers such as the Danube, the Rhine, and the Elbe. Europe's industry and her skilled populations are located where iron, coal, and other mineral deposits have made it possible for the industrial life to develop. Europe's food supply is derived from a number of countries, regardless of political frontiers. The bread basket of Europe lies in the east. That basket comprises in whole, or in part, at least nine states distinguished for the liveliness of their politics. Together they are deeply affected by a constant common need—the need for food and the need for economic unification. It is the need for the agricultural areas to support the industrial. It is the need for the latter to supply the former with tools and necessaries. It is the need for bringing to the industrial areas the benefit of tremendous water-power resources in other countries.

There are signs that Europe realizes the need for union. At the moment plans are being drawn for a customs union of western Europe. In making these plans European statesmen must be mindful that the foundation of the modern German Reich, which a short while ago was the most powerful continental state, was the merging of common economic interests into customs unions. Out of these unions came the political integration which unified the German states into a single empire. Europe should be able to reach unification by the same road.

One of the chief reasons why Europe needs to unite is that the Continent, in its present fragmentary form, is a large power vacuum which Russia is striving to fill. The people of Europe could easily lose faith in our ability to protect them from Communist infiltration and subjugation. Some have come to believe that Russian domination is inevitable. The success of the recent coups in Hungary and Bulgaria will speed the process.

All the millions of dollars sent in aid to Greece and Turkey, and to be sent to Italy and France, will be unsuccessful unless some positive program of action on Europe's part gives evidence that she means to help herself and does not intend to succumb to the spirit of defeatism which has been too evident in her life.

A United States of Europe is the answer to the dilemma. We must encourage its formulation. Russia, of course, will oppose it bitterly. Even though such a federation would not threaten Russia, it would interfere with the spread of communism and it is to be expected Russian opposition will be exerted in many ways, especially through Moscow's influence over the Communist party in France. This opposition is certainly one of the important obstacles to the achievement of a European federation. But that does not mean that we should give up hope, for, even in France, the Communists control less than one-third of the votes and, therefore, with strong leadership in the democratic parties, France could take the lead in promoting a European union. Although France is torn by internal dissension, she is not through as a great nation and she will again develop statesmen of the caliber of Briand and Jaures, who worked so hard for European federation. It is this France, united with England, which must take the lead in uniting Europe in spite of Russia's opposition.

Let us be under no illusions. If Russia obtains control of western Europe, the control of Africa, the Near East, and the Middle East will fall into her lap like a ripe plum. She will thus be able to carry into full effect the geopolitical objectives of Haushofer and Rudolf Hess. The only difference will be that Russia—not Germany—will become the master of Europe. Russia will then control not only the heartland but the whole world island, and Europe, Asia, and Africa will become the arsenal of the Slavs. That, in rather naked terms, is the fundamental power issue which lies behind the federation of Europe. It is no longer a question of Europe's ruling, or not ruling, dependencies and tropical and backward countries. The question now is, Will Europe in her turn be ruled? The answer lies with Europe. But Europe cannot give it alone; she needs our moral and tangible help if she is to answer it with imagination, courage, and determination.

THE NEW WORLD LOOKS AT THE OLD WORLD

II

In the first lecture last evening, I discussed in some detail some of the reasons why Europe must unite for her own salvation as well as for ours. I alluded to certain other aspects of the question which I should like to develop further tonight. It may be that some of these arguments will seem repetitious to you, but I think the subject is of such vital importance to the future of our countries that some repetition will not be amiss.

Last spring, on March 21, when I introduced a resolution in the Senate of the United States endorsing the idea of a United States of Europe, there was a great deal of editorial comment throughout the country. Most of the comment was favorable and a few editors were enthusiastic but, generally, they seemed to think the idea was too good to be practicable. In other words, while they recognized the need and the good sense of the proposal, they were defeatists regarding its achievement. It was obvious from many of the articles that the writers had never seriously considered the proposal before and were unaware of its ancient and respectable lineage. I think, therefore, that some further reference to its ancestry and to the considerations favorable and unfavorable to its adoption may be appropriate.

History of European federation

Since the beginning of the Middle Ages, two contradictory forces have been pulling Europe in opposite directions. One has been a strong tendency toward local particularism, which has produced small feudal entities and new national states. The other has been the slow-growing desire for the unification of European peoples on a continental basis.

The pages of western history are filled with philosophical discussions of how Europe should be organized in order to achieve unity and to eliminate recurrent warfare. These need no repetition here, but I am sure that in this connection a number of illustrious names will come to your minds: The medieval Pierre Dubois, the fourteenth century Dante, King Podebrad of Bohemia, Erasmus, Dean John Colet, Sebastian Franck, Sir Thomas More, William Pestel, Comines, Emeric Cruce, Hugo Grotius, William Penn, Abbé Saint-Pierre, and Immanuel Kant, to mention only a few of the more outstanding. I would like to impress upon you that these men were not idealistic dreamers. They were thoughtful and practical men.

Statesmen, too, have tried their hand at unification. One immediately recalls the grand design of Henry IV, Elizabeth, and the Duke of Sully in this connection. Occasionally statesmen resorted to force to compel Europe to combine as did Charlemagne, Louis XIV, and Napoleon.

However, it was not until after the First World War that the movement for a European federation became widespread. Since then not only has the subject been discussed extensively but many books dealing with it and a new journal called Pan-Europa have appeared. France took the lead in exploring the practical aspects of the idea, and in 1925 Premier Herriot seriously considered having his country assume responsibility for the establishment of a European federation. In 1926 a federation conference was called in Vienna, in 1930 a second was convoked in Berlin, and in 1932 a third met in Basle. During 1929 and 1930 Foreign Minister Briand, of France, became the leader of the unified continental forces working for federation and unification. In calling together the 1926 Congress the following statement was issued:

"Anarchy is indeed the only appropriate description for a society of 34 states without law, without organization, without common organs or authorities, without a court of justice, without a police force, and without a solidarity; a society the members of which are in perpetual strife with one another and pile up murderous weapons against one another; a society in which might takes precedence over right, and in which the normal methods of negotiations are threats and blackmail; a society in which the members are ruled by club law, as were states and castles in the darkest days of the Middle Ages."

Although the efforts of the twenties did not result in the creation of a unified and federated Continent, the acceptability of the idea to many Europeans was made clear in the numerous efforts at economic unification. Even Hitler made it the heart of his economic propaganda program; and it is fair to say that many Europeans, who later laid down their lives in war against Hitler, were in full agreement with him on the idea of a European federation.

Actually, as I have said before, Europe has had many experiences with federation in the past—the Holy Roman Empire, the Confederation of the Rhine, Austria, Hungary, Switzerland, and Germany. Federation is therefore a tried and tested arrangement, not only on this continent but Europe also has used it on a limited basis and with success.

Requirements for federation

Federation has been given so much thought, in the past, that patterns of organization have been thought out and are ready for adoption. Obviously, Europe does not need a universal empire nor a constitution like that of the United States. Nor does she require a Canadian system. She must have her own brand of union which gives effect to national peculiarities and aspirations. It must be something more than the utopian concepts of the nineteenth-century Lorimer and his predecessors, who reechoed Saint Pierre and lacked the realism of Sully and Henry IV.

One of the organizations advocated for Europe recommends the establishment of an upper house, a house of representatives, and the assignment to the federated government of matters concerned with foreign policy, justice, and security of the federation.

Duncan and Elizabeth Wilson, in their thought-provoking Federation and World Order, published in 1940, suggested an international federal government, with a house of representatives, an upper house or senate, an international civil service, an international army, an international judiciary, all based upon a fundamental constitution or charter.

William Ivor Jennings, in 1940, devoted several pages of his excellent work, A Federation for Western Europe, to a draft constitution for such a federation. In that constitution he covered membership in the federation, the constitution as supreme law, the guaranty of territorial integrity to the federated states, citizenship in the states and in the federation, the president, the council of ministers, the federal legislature consisting of a peoples' house and a states' house, and the control of the federation over external relations, defense, dependencies, and a number of other items.

Thus the patterns of federalism have been extensively explored. Even the United Nations Organization provides in its Charter the basis for a European federation under the heading of "regional organizations."

I do not wish to leave the impression at any point in this discussion that I am unaware of, or minimize, the seriousness of the obstacles to federation. There are powerful influences obstructing the path to unity, but I do not think they are insuperable. Let us summarize the obstacles which appear to be the most potent.

The obstacles in the way

1. The basic difficulty which must be overcome is the intensity of national feeling, attended by prejudices, fears, and animosities deeply ingrained in Europe's people by patriotism and past history. National feelings are so powerful that they keep Europe divided, even though geographically it is less broken by barriers than China. We can ascribe lack of political and economic unity to human obstacles alone. In spite of the fact that Europe is a single permanent regional division of the habitable world, and in spite of the fact that not one of her political divisions can make a claim to a similar status, nevertheless every national group in Europe regards itself as a permanent entity. Nationalistic hatreds have kept European peoples apart for centuries, and as long as the present nation-states remain unmodified they will continue to do so.

2. A second obstacle in the way of union is the seeming danger that a union of Europe will be an occasion for the domination of the whole Continent by the German people. Other nationalities cannot help noting that, since the middle of the nineteenth century, the Germans have become the most numerous people on the Continent. They substantially outnumber the French or the Italians or the English. It should be pointed out, however, that in spite of their being the most numerous people they still constitute less than one-third of the population of the contemplated federation of western Europe. Working together, there is no reason why the

other peoples in the federation could not avoid domination by the Germans.

3. A third obstacle consists of Soviet Russia's efforts to unite the Continent in her own interests by power methods similar to those used by Louis XIV, Napoleon, the Kaiser, and Hitler. Russia is bending every effort short of war to achieve unification of the states under her domination. She is turning the full force of her economy and propaganda toward preventing the federation or unification of Europe by any other means than her own.

4. A fourth and important obstacle is the language problem. It makes difficult the ordinary intercourse of the citizens and hampers the free movement of persons and the flow of ideas and information so important to the achievement of understanding and unity. But you in Canada have overcome that difficulty, and so have the Swiss.

5. A fifth obstacle is incompatible political ideologies, which are still active and which cannot be considered as conducive to cooperative or unified actions between or among states. Authoritarian states still exist in western Europe. Both communism and fascism have holds upon large sections of the populations.

6. A sixth obstacle is cultural differences, which oftentimes are much stronger than blood differences.

7. A seventh obstacle is religious differences, which are especially pronounced in eastern Europe.

8. But overshadowing all other obstacles in European history, from the nationalistic standpoint, is a ledger of unrequited injuries from the past, which each state keeps to be settled at some future date.

These by no means exhaust the list of obstacles, but they will serve to show how great is the task of federating Europe. C. B. Fawcett said six years ago:

"It is to this anarchic Europe, of conflicting sovereign independent states and incompatible political ideologies, of uneasy majorities and rebellious minorities, of peace-loving peoples and aggressive tyrants, that any proposals for a United States of Europe are to be applied."

It is entirely possible that the obstacles may be overemphasized.

In 1878, looking upon a scene no less difficult, the great Swiss scholar, J. K. Bluntschli, as he advocated the union of Europe, said:

"The need for a solution of the problem (of a European confederation) is today present and imperative and will grow more so from year to year. I do not know when another serious effort at solving the problem will be undertaken but I am firmly convinced that one or more European statesmen, in the not too distant future, will undertake the task and bring it to completion. The work is much easier than has been the establishment of the German Reich. The great danger which always prevented union, namely, the hegemony of one state over another, has now finally been overcome."

When those optimistic thoughts were expressed, Europe was a prosperous paradise compared to what she is today. The necessity for drastic reform was far less obvious or compelling then than it is today. The present and the future of Europe, in the absence of some really significant reform, is scarcely bright. Winston Churchill with his usual talent for forceful descriptions put it very well when he said:

"But what is Europe now? It is a rubbleheap, a charnel house, a breeding ground of pestilence and hate. Ancient nationalistic feuds and modern ideological factions distract and infuriate the unhappy, hungry populations."

The new situation in Europe—Russian opposition

All through the Second World War the federation idea persisted in some form, and as the conflict drew to an end and the United Nations Charter was being formulated it was deemed expedient to incorporate into the Charter article 52, the provision which encouraged "regional arrangements for peace and security consistent with the purpose and principles of the United Nations." While this presumably was meant to cover the Monroe Doctrine, it had special significance for Europe.

It is not clear now if any European participant in the Dumbarton Oaks and San Francisco Conferences had a united states of Europe in mind as the subject of article 52. Certainly Soviet Russia did not, for she was opposed to all efforts at European unification. Ever since 1917 Soviet Russia has distrusted and opposed all plans for the unification of Europe. Lenin condemned federation as a threat to Russian security and his successors have followed his line meticulously.

And so it is today. Russia still opposes all plans for European recovery including customs unions. She has warned the Scandinavian states against cooperation and confederation, presumably because cooperative action among European states will make more difficult Russian plans for the domination of the Continent.

The Russian fear must be understood in terms of what appear to be Soviet interests and purposes. Political fragmentation and war have reduced European states to near impotence in the face of the power of the United States and the Union of Soviet Socialist Republics. This suits Russia perfectly, for it gives her great freedom of action on the Continent. She fears, however, that Europe will discover that it has at hand the means for achieving power comparable with that of Russia if Europe will only take advantage of the opportunity to unite. Soviet statesmen naturally fear the revival of German military strength. They know that now the German people are slowly starving, the country is stripped of industrial resources, the agricultural land is depleted, and the military system is dead. But they fear the unified revival of the Continent because they believe that it will provide German industry and agriculture with an opportunity once again to create another powerful military force with which to challenge Soviet preponderance in the future. Naturally, therefore, there is continued Russian skepticism about and opposition to a United States of Europe.

But it is my conviction that it is precisely in a United States of Europe that the security of Russia and the world must be sought. Federation is a most powerful guaranty against a resurgent German military power. Indeed, I can see no other way in which to solve the German problem. Today, because of the fear of Germany, we have been forced to impose levels of production on her economy which are disastrous not only to that country but to all of western Europe. We know that the holding of German production down to a fraction of its prewar level has caused starvation in Germany and costs to England and ourselves of enormous sums of badly needed resources. The curtailment in the production of coal and steel essential to construction and the resulting idleness and destitution have set the stage for communism. We are not blind to the fact that the unleashing of German energy and industrial skill and productive power will produce better conditions on the continent of Europe, but we must be assured that it will not simultaneously renew war and militarism. Again I say that this assurance can be found in a United States of Europe.

Federation is the solution of both the European problem and of the German problem. "If," as Churchill says, "without prejudice to any future question of German federation * * * individual (German) states * * * (are) * * * invited to take their place in the council of Europe," that is, if they operate as individual states in a European federation, then France and England participating in such a confederation can guarantee peace and security to the Continent, for they will more than offset the German states acting singly or in combination. Moreover, the economic pattern will be such that no single element or state or combination of states in the federation can conceivably break away and carry on a successful war against the others.

The conclusion is that the best solution for the dilemma of lagging European production is the merging of European states into a larger union, a union so large that there will be no danger of German domination or aggression. If this is done, the productive power of Germany will be the spark to light the furnaces of industry and to speed the movement of trade throughout western Europe. Europe can once again become self-supporting and resume her proper role in the society of nations. No country with peaceful intentions can, with reason and logic, object to such a development. Opposition can only come from aggressive power-political interests whose purpose is the domination of European states individually and collectively.

Europe as an idea implies confederation

Having viewed some of the obstacles in the way of a successful federation of Europe, let us look again at some of the reasons why a federation will ultimately come about and why it is neither chimerical nor an idle dream.

In order to succeed, federations require something more than lands and people living in close proximity. There must be a force holding the member states together which impels them to union.

Perhaps the most important single force both in the United States and in Canada which operated in favor of federation was the feeling in all of the colonies that they belonged together and that they individually constituted segments of a single whole. Even today that feeling is hard to define, but we know it was there at the time of union. For about 150 years, the Thirteen Colonies, which later became the United States, were associated in common perils, objectives, and struggles. Later they were united in a revolutionary war, whose purpose was political freedom. Economic, social, and political forces finally compelled them to unite. So it was with your people. Even British Columbia, which for a time seemed lost, eventually had to decide that its proper course lay in union with Canada, Quebec, and the Maritime Provinces rather than in annexation to the United States. Thus, in both our countries an undefinable bond, which can only be described as a common consciousness of belonging to the same group, knitted our people into a single whole.

I believe that I can discern a similar force operating in Europe today. It has operated unnoticed for a long time. Again I quote from Bluntschli:

"In spite of all the language and national differences, which separate European people, and in spite of the many struggles in which they are engaged against each other, they are permeated by a feeling of being the same sort and possessing common interests as a European people; and they are bound together in spite of all these things into an ancient European brotherhood of states."

More recently, Winston Churchill said of Europe:

"It has been finely said by a young English writer, Mr. Sewell, that the real demarcation between Europe and Asia is no chain of mountains, no natural frontiers, but a system of beliefs and ideas which we call western civilization."

"In the rich pattern of culture," says Mr. Sewell, "there are many strands; the Hebrew belief in God, the Christian message of compassion and redemption, the Greek love of truth, beauty, and goodness, the

Roman genius for law. Europe is a spiritual conception. But if men cease to hold that conception in their minds, cease to feel its worth in their hearts, it will die.

"These are not my words, but they are my faith."

Thus Europe is an idea, a concept, a belief, a feeling which has been held by the people of that Continent for generations, which has enabled them to shape and dominate history for the last few hundred years, and which has permitted their sons and daughters to carry Europe's message and institutions, its religion, art, law, science, and industry to all parts of the world.

In the light of this common feeling, it is not strange that the idea of a continental federation should have attracted Europeans for hundreds of years. Occasionally some form of unification has been achieved. The Roman Empire united western Europe by force, and in the ninth century, Charlemagne welded the Continent into a great empire stretching from Spain to the Elbe River. Later, the Holy Roman Empire and the Catholic Church knit European society into a loose yet effectual whole, held together by social and spiritual bonds.

Even the national particularism, which appeared with the dawn of modern states in the fifteenth century, was unable to destroy the European concept here described. It is true that the rise of the national state and its armies, as well as the appearance of the nation in arms, which reached its extreme form in modern totalitarianism, produced the political fragmentation of Europe for over 500 years. But in spite of this, the European people have retained their common consciousness. They know that from prehistoric times they have belonged to the same white race whose branches are to be found in north Africa and south Asia. They still believe that they once possessed a common primitive civilization going back to neolithic times, and they are aware of the significance of the statement of philologists that with one exception all their languages have been derived from a common mother tongue. Their political organizations and customs have developed along similar lines and their histories have been distinguishable from the unchanging lethargy which has characterized oriental despotism. All this is reflected in European thoughts and attitudes.

Within the last 6 months two incidents have occurred which indicate that both my country and Europe have sensed the necessity for joint and cooperative action in Europe if the rehabilitation of that region is to be achieved. The first of these incidents was Secretary of State Marshall's speech at Harvard in June.

Implicit in his statement that "any assistance that this Government may render in the future should provide a cure rather than a mere palliative," is the idea that more than mere relief of the present distress, and revival of the same old order, must be accomplished. His emphasis upon cooperative or joint planning and action by the European nations, indicates to me that he recognized that, in order to achieve a cure, their problems must be viewed as a whole and solved as a whole. It seems only common sense that to try to rehabilitate each nation individually, without regard to the whole, would be excessively wasteful, extravagant and ineffective in the long run. If it requires joint action to rehabilitate Europe, it is equally important that they continue to act together if they are to remain strong enough to preserve their freedom and independence from foreign domination.

In response to Secretary Marshall's suggestion, representatives of 16 of the western European nations gathered in Paris last summer and, with an extraordinary spirit of good will and cooperation, unanimously issued a report in September. That report gives us the most recent indication of the trend of thinking of European statesmen, and gives us good reason to believe that they do not regard economic and political federation as impracticable or unrealistic as some of our people have supposed. In that report the cooperating states pledged themselves in part as follows:

"(v) To cooperate with one another and with like-minded countries in all possible steps to reduce the tariffs and other barriers to the expansion of trade both between themselves and with the rest of the world, in accordance with the principles of the draft charter for an international trade organization.

"(vi) To remove progressively the obstacles to the free movement of persons within Europe;

"(vii) To organize together the means by which common resources can be developed in partnership."

Elsewhere the signatory powers (p. 39) pledged that—

"When production sufficiently increases, countries at present maintaining export restrictions will abolish them. As regards import restrictions, an essential condition for the freer development of European trade, on a multilateral basis, is that balance of payments difficulties should be progressively reduced. These difficulties will diminish as production increases, internal stability is reestablished, and export trade expands. As they diminish, the participating countries will reduce progressively restrictions on their mutual trade. This would be facilitated by the adoption of a system of transferability, designed to make European currencies interchangeable, as proposed by the committee of financial experts in chapter II of their report, on which a meeting of experts is to be held in London on September 22."

This bible of European recovery recognizes that the problem does not end with recovery; but that much more is implied in the so-called Marshall plan. While it does not develop the theme in so many words, the report does give time and space to two recent and notable instances of European cooperation: (1) The customs convention signed in London on September 5, 1944, to which Belgium, Luxemburg, and the Netherlands were parties, and (2) Scandinavian cooperation discussed at Copenhagen on August 27 and 28, 1947.

The report further develops the idea of the need for closer economic cooperation than in the past, observing—

"That the present division of Europe into small economic units does not correspond to the needs of modern competition and that it will be possible with the help of customs unions to construct larger units on the strictly economic plane."

Of exceptional significance is that part which deals with the development of hydroelectric resources. It reads in part as follows:

"This work involves the cooperative development of resources cutting across frontiers and the decisions are being taken without regard to national frontiers. Preparation of periodic revisions of a survey of European large-scale power resources and the study of the desirability of establishing an international high-tension network represent similar fields for continuing common planning."

Much the same philosophy and attitude may be discerned in the passages dealing with steel production. Here is an example (p. 39):

"In view of the high cost of installation of steel-producing capacity, arrangements are being made for the interchange of information by the steel-producing countries about their programmes of modernization and extension so that each country, in developing its programme, may take account of the plans made by the others."

These pledges, I submit, are unique in European history and if properly nurtured and directed in the administration of the Marshall plan could result in the unification of the signatory powers.

Another cause for hope occurred on September 12, 1947, when it was announced that 14 states, namely, Austria, Belgium, Britain, Denmark, Ireland, France, Greece, Iceland, Italy, Luxemburg, The Netherlands, Portugal, Turkey, and Rumania (10 additional eastern European countries, including Russia, were probably to be invited), were arranging meetings for a discussion of closer cooperation and the possibilities of a customs union embracing them all.

The cynics may scoff at these pledges and these conferences. They can point to broken pledges and many failures in the past, but failures are an important part of the whole of human experience. In a negative way they are the guideposts to success rather than proof that success is unattainable.

Human institutions develop slowly and painfully. Rarely are they completed at one time and set into successful motion immediately upon their conception. It took 150 years of colonial experiences, and centuries of English background, to create the Constitution of the United States of America. That instrument was anticipated by many conferences and efforts at union before it was ever consummated. Therefore we recognize that Europe, complicated in structure, diverse in population, and confused in economic activity, cannot create at one stroke an international order of peace and security. The important thing is that many thoughtful men of both the Old and the New World have recognized the objective toward which we should move if western civilization is to avoid self-destruction or domination by the East.

It was not pure accident that the World Wars of 1914 and 1939 originated in Europe. Such conflicts are the logical result of the inconsistencies, the clashing of national interests which inhere in the confinement of modern industrialism within the restrictions of a medieval political system. An effective universal system such as the United Nations could adjust these conflicts, but, until that organization develops, the adjustment must be made on a more limited scale if self-destruction is to be avoided.

Federation is also the answer to the threat of Russian domination. William Henry Chamberlin, in his book, The Cockpit of Europe, shows with convincing clarity how communism has spread over eastern Europe. Ruthless minorities in different countries, by a combination of sabotage, terror, and force, have seized power in one country after another and established police states. It would be unlikely that such tactics could be used successfully against a United States of Europe.

There are many other reasons why we have cause for hope that federation will come about. The last one to which I shall call your attention is the compelling character of economic forces working for union. Prior to the Second World War, Europe, over the centuries, had developed a highly integrated economy which possessed a unique balance of agriculture, industry, and trade. That balance was shattered by 6 years of campaigns. The present difficulties of Europe are merely manifestations of the impossibility of maintaining national particularism in the face of continental economic forces which, in order to operate, must disregard national frontiers. The industrial Ruhr, the coal-mining Saar, and the industrial Silesia, are not German, French, and Polish alone. They belong to all of Europe and are the heritage upon which the whole Continent should build.

The Europe of the future, if it is to rise from its ashes, must find some way by which the steel and coal of Germany, the shipping of England, the surplus labor supply of Italy, and the many other contributions of the individual countries can be pooled for

the common continental good. A United States of Europe, I am convinced, is the answer, and I believe that is borne out by the report of the Committee on European Economic Cooperation. Here are three additional significant passages.

On page 2:

"(viii) The participating countries * * * further stated their belief that the establishment of a joint organization to review the progress made in carrying out the recovery program will be necessary. On page 12 the signatory states announce that the production program provides for mutual help between the participating countries over a wide field, and for a number of practical steps for specific action, such as the international power project. In addition broader proposals are made for the reduction of trade barriers and the removal of financial obstacles to intro-European trade."

But the most significant passage of all is the one which deals with the obliteration of national boundaries as they may stand in the way of satisfactory arrangements for the hydroelectric plants of Italy and France. The report says that the committee "examined many projects and chose a plan which comprises six hydroelectric plants in Italy, France, and on the Austro-Italo-Swiss frontier together with two lignite thermal plants in Germany and one geothermal plant in Italy. These projects have been selected without regard to national frontiers and involved in some cases the cooperative development of resources cutting across frontiers."

But, why labor the point further? These and a whole series of measures providing for closer cooperation and the ultimate elimination of difficulties affecting trade, industry, and the free flow of goods and people across national frontiers are but the beginning of closer European cooperation, which should end in only one way—a United States of Europe.

Where do Britain and Canada stand?

By now several of you must be asking yourselves, where does Britain fit into the picture? If Britain were to join a federated Europe, what would happen to her relations with members of the British Commonwealth of Nations? What would Ireland's role be in such a new arrangement? Would she remain aloof while Britain entered, or would she join side by side with Britain? Specifically, what would be the effect upon Canadian-British relations? Would there be any change in Canada's relations with Europe and with the other dominions?

The answers to these questions would tax the powers of a seer, and I make no claims in that direction. I have assumed throughout that a European union without Britain would lack realism, and for that reason British membership would be a sine qua non of federation. It seems to me that there are no insurmountable obstacles in the way of Britain fulfilling her obligations in both federations with injury neither to herself nor to any other state. Indeed, there is reason to believe that by her possession of membership in both, Britain would play a larger role in the quest for world peace.

Ireland would have to decide for herself whether she would join or not, but the advantages of union would be so pronounced that she would probably join at the outset. If, for any reason, she deemed it best not to join a European union immediately, it could only be a question of time before she ultimately would join. The Irish economy is bound to that of the rest of the British Isles and to that of the Continent. The isolation resulting from aloofness would cause disadvantages in trade and discriminations, which Ireland would find too onerous to bear.

As for Britain's relations with the members of the British Commonwealth of Nations, the bonds which tie the group together are so flexible that there should be no difficulty in finding an adjustment which would allow Britain to be a member of both. It will be recalled that the reciprocity arrangements of 1911 between our two countries presented no serious constitutional obstacles for Canada. Empire preference could be made consistent with obligations in a new European union. In short, to an outsider there seems to be no insurmountable reason why Britain could not accept membership in a European union consistent with her position in the British Commonwealth of Nations.

If this view is correct, a Europe, into which Britain was federated, could offer only advantages to Canada, the other dominions, and to the world at large. Britain would be a tie between two of the most economically significant groups in the world. Her dual membership would give her the opportunity to bring the two closer together. Politically and militarily the dual membership could eventually become a great force for peace and stability.

In closing, permit me to emphasize a few points. In recent weeks the Russians have directed a vicious and clever attack upon the motives of the United States in granting assistance to Europe. I am fully aware of the delicacy of the situation. Gestures of good will on the part of the strong, or measures of enlightened self-interest are easily misrepresented and misconstrued. The fact is that our fundamental interest in the creation of a strong, prosperous, and free European community is that such a Europe can make a powerful contribution to the keeping of the peace. Britain and the Commonwealth were the great stabilizing influence in the last century. The New World must now assume much of that burden, but we need the help of a strong Europe. The small and, relatively speaking, impotent nations of Europe, unless they are welded into a federation, can contribute little to the keeping of the peace. If they do not, separately, become mere pawns in the game of power politics, at best they will become ineffective neutrals which, to that extent, will weaken western civilization in its resistance to the unlimited expansions of Russia. A strong, independent Europe would not encourage us to seek the domination of the world, and at the same time it would discourage such an undertaking by any other great power.

The criticism has been made that advocating a federation of Europe is officious intermeddling by Americans. At the same time, however, we are told that we have a responsibility to use our power and our wealth to rehabilitate the stricken areas of the world. These views are inconsistent. If we grant that we have this obligation, then we must also be obliged to see that the rehabilitation is sensible and effective. There can be no obligation to recreate the same old divided Europe, from which two world wars have emerged to afflict us. Surely we have a legitimate interest in the purposes for which the products of our land and the work of our people are to be expended.

We have sympathy for the Europeans in their distress. We have, I believe, consideration for their pride and self-respect, but as partners in undertaking to preserve in the world an opportunity for men to be free, we are entitled, if not obliged, to use our best judgment and all our powers of persuasion.

It is not proposed that we force our ideas upon any country, but I do propose that, insofar as we are able, we persuade the Europeans to follow the path to political unity. Many of the wisest Europeans of the past and of the present have advocated it, so it is not an alien idea. There are many obstacles, but with the example and the generous assistance of the New World, I am sure that Europe can surmount all of them.

Finally, may I say that in this confused and troubled world, stricken by two utterly senseless and stupid fratricidal wars within a quarter century, there is one hard fact that stands out clear and reassuring and that is the friendship and good will that exists between your country and my country and, in truth, among all the peoples of the New World. This example of self-restraint and good sense has been, and will continue to be, not only our own salvation, but gives us the right, I believe, to look to the Old World and offer it our advice and our help to go and do likewise.

THE MARSHALL PLAN—ARTICLE BY WALTER LIPPMANN

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD as part of my remarks a very able and penetrating article which appeared yesterday, written by Walter Lippmann, entitled "Evil for Good Ends," dealing with the whole question of the argument of fear as a premise upon which to base support for the Marshall plan.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

(See exhibit A.)

Mr. MORSE. In connection with this article, I wish to say, Mr. President, that I think Mr. Lippmann performs a great service for the thinking of the American people by pointing out that all history records that no nation can live by the sword, and that no nation can hope, of course, to survive on the doctrine of fear. It is well to point out that, as we come to analyze and debate the Marshall plan, we ought to consider it solely and entirely from the standpoint of the economic merits of the plan, the contribution of the plan to winning the peace, and the soundness of the plan in carrying out the idealism of our belief in the brotherhood of man which has always characterized the American democracy.

I would particularly emphasize the next to the last paragraph in Mr. Lippmann's article. It seems to me it ought to sink through the cortexes and deep into the brains of the thinking people of America, because I think he is unanswerably sound in the premises he lays down in that paragraph when he says:

> Fear is a bad motive in diplomacy and fright is a poor substitute for argument in dealing with a democratic people like our own. The genuine motive of the Marshall plan is an interest in the revival of great nations and in the unity of Europe and in the peace of the world. In arguing the case for the Marshall plan, it is a mistake to rely upon fright. This plan calls for a sustained effort over a period of more than four years, and if it has no better foundation in American life than fear, the effort will not be sustained. It is not possible to maintain a state of hysteria and fear over a period of 4 years.

Mr. President, as one in the Senate who sincerely believes that without the Marshall plan the hope of winning the peace becomes most remote, I am going to argue consistently and constantly in the Senate and throughout the Nation for the adoption of the plan on the basis of its economic soundness, and on the basis of its carrying out the idealism of America, for if we ever lose the idealism, then we become a lost Nation. Also I shall support the plan on the ground that from the standpoint of national self-interest it is essential to winning the peace.

EXHIBIT A

EVIL FOR GOOD ENDS

(By Walter Lippmann)

There is a notion, held by some in Washington, that the only way to win the support of Congress for the Marshall plan is to frighten it. I believe that nothing but mischief can come of that, and that to organize a propaganda of fear would be wrong in itself, would not deserve to work, and would not in fact work.

A campaign of fear designed to ride roughshod over all doubts and hesitations would be at bottom an attempt to rob the Congress of its right to be convinced and its duty to deliberate. The notion, though it is put forward by fervent, even frantic, opponents of the totalitarian system, is profoundly undemocratic. It lacks a decent respect for the dignity of representative government, and it rests on the self-righteous assumption that the true believers in whatever it is that is to be stampeded through Congress are entitled to do evil that good may prevail.

The practitioners of this notion have been operating for nearly a year, ever since the crisis of last March during which the Truman doctrine was improvised. That crisis, which arose out of a diplomatic failure to anticipate and to prepare for the recession of the British power in the Eastern Hemisphere, caused a panic within the administration. The panic caused it to stampede Congress into voting aid to Greece. The campaign of fear employed to stampede Congress, though it may have been successful in lining up the votes, committed the United States so publicly and so irretrievably that it was then impossible to make a success of the Greek policy.

In order to frighten Congress, the administration put itself in a position where in fact it was married indissolubly to any Greek government in Athens which, no matter what else it did or did not do, proclaimed its anticommunism. The propaganda employed to sell the Truman doctrine for Greece deprived the United States of its leverage and influence in Greece.

An intervention may have been necessary. It might, if we had remained free agents, have been successful. But because of the way it was sold to Congress, it has become an entanglement in which American prestige is at stake on the outcome of a civil war in which the Government we are supporting can and does compel us to support it on its terms, not on ours.

Something of the same sort is happening in Germany. The net practical effect of telling the world that we are going to stop communism by subsidizing anti-Communists is that we are losing control over western Germany. Whereas we can still spend 6 months debating whether we shall give aid to our great allies, the British and the French, in western Germany we no longer have any such freedom of decision.

For we have committed ourselves to, and have staked our prestige so completely on making Bizonia a going concern, that we must now subsidize the Germans no matter what they do or fail to do. We cannot bargain with the Germans as we propose to bargain with the British and the French, saying that we shall furnish assistance provided they in their turn carry out the engagements they have made.

In Germany we have to furnish the assistance, and we cannot withhold it if the Germans do not fulfill their part of the bargain. There is no bargain in Germany because we have made ourselves so wholly responsible for the condition of life among our Germans. We have therefore deprived ourselves of the power to say to the Germans that we shall stop the subsidy if Bavaria and Lower Saxony choose to put their food into the black market rather than into the Ruhr.

Fear is a bad motive in diplomacy and fright is a poor substitute for argument in dealing with a democratic people like our own. The genuine motive of the Marshall plan is an interest in the revival of great nations and in the unity of Europe and in the peace of the world. In arguing the case for the Marshall plan, it is a mistake to rely upon fright. This plan calls for a sustained effort over a period of more than 4 years, and if it has no better foundation in American life than fear, the effort will not be sustained. It is not possible to maintain a state of hysteria and fear over a period of 4 years.

Either our people will decide that they are being bamboozled by the cry of wolf—wolf, or they will decide that they prefer the horrors of war itself to living a life of unending anxiety. In either event they will not give the Marshall plan the kind of support which it must have if it is to be successful.

CIVIL AERONAUTICS BOARD—PROPOSED APPOINTMENT OF GENERAL KUTER TO BE CHAIRMAN.

Mr. MORSE. I wish to speak on another matter, Mr. President, quite unrelated to the remarks just made. I have been—and I think the word properly to be used in this instance is the word "deluged"—I have been deluged in recent hours with communications from various parts of the country, including my home State, in protest form, in criticism form, and in inquiry form as to whether or not the position I took in opposition to the appointment of General Kuter as Chairman of the Civil Aeronautics Board meant that I was serving notice by implication that I am opposed to the boom for General Eisenhower for the Republican nomination for the Presidency. I am at a complete loss, Mr. President, to figure out why anyone could make the interpretation that I am necessarily opposed to the Eisenhower boom because of the position I took on the Kuter matter. But being a neophyte in American politics, Mr. President, I daily marvel at the mysteries and the wonders of political strategy.

If anyone thinks he or she is putting me on the spot by the inquiries I am receiving about my position on Eisenhower, he has another thought coming, because one is never on the spot, Mr. President, when his position is as crystal clear as my position is on either the Eisenhower or Kuter issues. My opposition to the Kuter appointment does not subject itself in the slightest degree whatsoever to any interpretation that the junior Senator from Oregon will necessarily oppose for the Republican nomination any military official who has become a civilian at the time the matter of his possible nomination is under advisement by the convention.

I suppose I ought to be flattered or highly complimented over the fact that any interest is shown by any substantial number of people as to my position in regard to who should be the Republican nominee. I suppose it is because many progressives and independent voters seem to share my views on political issues. I want to say to these inquirers who are after me to clarify my position on Eisenhower that I have taken no position on General Eisenhower, and I do not intend, Mr. President, to take any position on General Eisenhower until I know where he stands on the great issues that face this country, domestic and international. I want to know what his labor program is. I want to know where he stands on matters of social security. I want to know what his policy is in regard to inflation. What is his agricultural program? Where does he stand on reclamation, soil conservation, power development, and taxes? I want to know his position on the legion of vital questions which Members of the United States Senate are going to have to stand up and be counted on in the weeks immediately ahead. When those interested in his boom give me answers to those questions covering the fundamental question as to the general's position on the great legislative problems which face this country—or, in other words, as to what his platform is—then I shall answer the inquiries received today as to just where I stand on the Eisenhower boom.

I may say, as I said to the press the other day, that I think a great many progressives in America will show considerable interest in General Eisenhower if they can receive any assurance that he shares the views on social and economic questions held by my very good friend and a distinguished Member of this body, the Senator from New Hampshire [Mr. TOBEY], who is recognized as one of the official spokesmen of the Eisenhower boom.

Now, what about my position in the Kuter case? So that there may be no misunderstanding as to my position in regard to the transfer of military officers to civilian positions, and their being permitted to retain at the same time their active status in the Army and their salaries in the Army, which in the case of General Kuter would have been some $5,000 more than the salary he would receive as a civilian, as chairman of a civilian commission, the Civil Aeronautics Board, I want to read into the RECORD at this time a statement I have prepared on the issue. I hope this statement will be a complete answer to the inquiries I am receiving on the matter of why I opposed the Kuter appointment.

The statement is as follows:

I offered the motion in the Armed Services Committee meeting to reject the President's proposal that General Kuter be appointed Chairman of the Civil Aeronautics Board but be allowed to keep his active Army status and higher Army pay. I offered this motion because I think the basic principle of the President's proposal is unsound.

I raised objection to the proposal last week when it first reached the Armed Services Committee, and no new factors have been presented in the meantime which in my opinion justified a reversal of the position taken by the committee at that time.

My position on the matter is summed up by the following points:

1. One of the basic principles of representative government which our founding fathers safeguarded when they wrote the Constitution was to make certain that our form of government would be a civilian government free of military domination. It doesn't seem to me we can justify making exceptions to that principle simply because the President is finding it difficult—because of low salaries—to secure civilians to fill civilian posts.

If the salaries for our top administrative positions are too low, then the remedy is to increase the salaries; but not to transfer

to those civilian posts military personnel, unless and until those military men resign from the Army and return to full civilian status.

In other words, I have insisted in this controversy that the principle of filling civilian jobs with civilians stems from the constitutional origin of our Government.

2. The proposal to transfer General Kuter to the chairmanship of the CAB, and still permit him to retain his active Army status and his much higher Army pay, would result in an unfair discriminatory wage policy on the Civil Aviation Board.

It certainly is not fair to the other Commissioners on that Board to pay the Chairman of the Board better than $5,000 more than they receive. Such a policy does not encourage either good feeling or the greatest of efficiency in Government service.

3. I opposed the transfer of General Kuter because I assume that when the Congress passed the appropriation budgets for the various branches of the military, those budgets were not watered with surplus personnel; but rather the services of all the officers are needed in connection with carrying out the work and duties of the Military Establishment.

However, the frequency with which it is suggested that civilian posts be filled with military personnel raises a question with me—and I know with a good many other Senators—as to whether we should not look into the question of decreasing the number of generals and admirals in the Army and the Navy if so many of them are so readily available for the filling of civilian posts. Perhaps the time has come to get a large number of them back to civilian status by legislation.

4. The committee was presented with a few precedents involving the transfer of military men to civilian posts and, as is usual under such circumstances, the argument was made that Kuter's appointment should be approved because of previous precedents.

My answer to that was and is that two wrongs never have made a right; and, further, I believe the time has come to put an end to such precedents.

I believe, if I hear the voice of the American people correctly—and as a Member of the Senate it is part of my job to keep my ear to the ground and listen to the will of the people—there is an overwhelming sentiment in support of putting an end to the practice of placing military personnel in civilian posts.

I am perfectly willing to vote to confirm any competent ex-military official to a civilian post, but I shall insist that he be in civilian status and not in active military status before I shall vote to confirm him.

5. It also is my position that it would have been no true service to the President if we had reversed ourselves on the Kuter case because, as I told the committee—and there was general agreement with me on the point—had we voted to approve of the transfer of General Kuter, it only would have resulted in a very controversial debate on the floor of the Senate; and, in my judgment, a majority of the Senate would have refused to sustain the committee.

I say that because a good many Members of the Senate not on the Armed Services Committee have informed me, personally, since the issue first arose that they would oppose this confirmation on the floor of the Senate. I think general opposition has developed in the Senate to the idea of appointing military men, still active in the Military Establishment, to civilian posts and permitting them to retain their active status in the Army or the Navy.

I wish to emphasize that the position I have taken in this case is completely nonpartisan. I am satisfied that the same attitude of nonpartisanship characterized each and every member of the Armed Services Committee. I think my record shows that I never hesitate to support the President of the United States, irrespective of partisanship, when I think he is right on any issue—even subjecting myself to great criticism within my party for doing so at times. My record also shows that I never hesitate to vote against him when I think he is wrong. To my way of thinking, that is only carrying out the basic obligation which rests upon a Member of the Senate if he is to live up to the principles of representative government.

Because of the inquiries, communications, and protests which I have received since the action of the Armed Services Committee, I make this statement in order to make unequivocally clear the reasons for my action on the Kuter case, and the basis for my statement that not even by a stretch of the imagination can anyone justify inferring from my position that it means that I am for or against General Eisenhower as a possible nominee of the Republican Party for the Presidency.

REPORT OF JOINT ECONOMIC COMMITTEE—VETERANS' LEGISLATION

Mr. MORSE. Mr. President, I should like to invite the attention of the Senator from Ohio [Mr. TAFT] to what I am about to say, if he is present. If not, he can read it in the RECORD.

In the New York Times of last Sunday, I read the following news items:

ECONOMIC COMMITTEE TO DELAY ITS REPORT

WASHINGTON, January 17.—The Joint Economic Committee agreed today that it would not have time to make an adequate report on President Truman's economic message by February 1, as required by law. The group consequently authorized its chairman, Senator ROBERT A. TAFT, of Ohio, to prepare a measure for congressional enactment postponing the dead line until March 1.

Senator TAFT indicated that similar steps might have to be taken with respect to the legislative budget. The joint Budget Committee is required to report to Congress February 15 its recommendation of a ceiling on Federal expenditures in the 1949 fiscal year beginning July 1.

Republicans were criticized in some quarters for the economic committee's failure to make a report last year and for the failure of the Senate and House to agree on terms of the legislative budget.

The Economic Committee's report is required by the Employment Act of 1946, under which it and the President's Council of Economic Advisers were established. The committee was not able to organize its staff in time to make a report last year.

The legislative budget procedure was set up under the Legislative Reorganization Act of 1946. The Budget Committee, consisting of members of the Senate and House taxing and appropriating committees, met the February 15 dead line last year and recommended an expenditure ceiling representing a $6,000,000,000 cut in the President's budget. But while the House approved it, the Senate scaled down the cut to $4,500,000,000, and the two Chambers never did agree on a compromise.

I think all of us can recall the interesting situation of last year, which developed over our failure to ever reach an agreement within the Republican majority as to what the budget cut should be in total amount. We ended up the session by failing to come forward with a legislative budget, as required under the law. What I wish to address myself to for a moment is the newspaper report of the intention of the Joint Committee on the Economic Report to prepare some legislation extending the time both for the legislative budget and for the committee's economic report.

I suppose there is some truth in the old saying, "Better late than never." I think it is applicable to a great deal of the work of the Economic Report Committee to date. I say that most respectfully. I want the RECORD to show that on May 19, 1947, the junior Senator from Oregon commented on this very problem, and on the importance of our then and there taking action to postpone the date for filing the committee's economic report and for submitting a legislative budget. I introduced a joint resolution, which I judge it is quite proper for me to bring to the attention of the Joint Committee on the Economic Report at this time. I do so because apparently from the newspaper story I have read the committee is not aware that my May 19, 1947, joint resolution is a pending joint resolution, and was introduced in order to cover the very problem which the committee apparently discussed when it instructed my good friend from Ohio to prepare some legislation on this point. The joint resolution is brief. It reads as follows:

Resolved, etc., That (a) the last sentence of section 138 (a) of the Legislative Reorganization Act of 1946, as amended, is amended by striking out "February 15" and inserting in lieu thereof "March 15."

(b) Section 5 (b) (3) of the Employment Act of 1946, as amended, is amended by striking out "February 1" and inserting in lieu thereof "March 1."

Although my resolution has been pending on the calendar for a great many months, I invite the attention of the committee to it now, and urge the committee to assist me in obtaining early action on the joint resolution. I judge from the New York Times story that the resolution would accomplish what the committee wishes to accomplish. I wish to add that I think the Joint Committee on the Economic Report has a great job to do. I think the country is watching it in connection with the whole question of inflation. We have a right to look to the committee to come forward with a constructive program which deals with inflation. The weeks which have passed since the special session of Congress have not resulted in any significant downward movement in prices. They have not resulted in any check on inflation. In many, many instances prices are climbing and climbing.

Although it is not very comfortable or personally pleasing for me to constantly be saying, "I told you so," nevertheless, attention must be called to what the RECORD shows as to the position which some of us took in the special session of Congress. Three of us on this side voted against the bill which was put through in the special session. As the RECORD shows, we stated in that debate that it would not accomplish any effective check on inflation; and it has not. I repeat: it never will. So, as I say, I am looking to the joint committee coming forward

with a program which has some really effective chance of doing something about inflation, which remains, as of this hour, the No. 1 domestic problem facing the country. It is the No. 1 political obligation of the Republican Party, which has a majority in the Congress in this session, to do something about checking inflation and the rising cost of living.

We must answer to those veterans, for example, who are writing to us a large number of letters containing such sentiments as are expressed in a paragraph from a letter which I received this morning from a veteran in college. He says:

I trust the Republican Party will do something effective about the spiraling cost of living. It is getting critical. We have hamburger once a week for our meat dish, and the prediction is higher prices yet. I got a job this week after living off savings all fall term.

He is a veteran in school. I digress a moment to say that our party has the responsibility on the House side of doing something about the veterans' legislation which remains bottled up in the House of Representatives. As the author of that legislation on this side, I say again what I have said before, that until my party does something about it in the House and gets that legislation on the way to the White House, it must assume responsibility for its nonpassage. I will take my chances on a Presidential veto once the bills are passed by the House of Representatives and sent to the President.

This veteran is one of the students who would benefit from that legislation. I think he should have had the benefits of it at the beginning of the fall term. I feel that we should have done something about the problem in the special session of Congress, so that he could have had the benefits of it at the beginning of the winter term. We certainly should do something now so that he may get the benefits of this legislation which has passed the Senate, in the spring term.

I read further from the veteran's letter:

We thought we might give school work full time for 9 months and then try to recoup our savings in the summer, but it became all too apparent that our savings were dwindling too fast.

Mr. President, I do not like a "hatchet" job any better than does anyone else, but so long as I feel that we Republicans have bogged down with regard to coming forward with a constructive program on the critical domestic issues facing the country, I shall continue to needle and needle, if that is what is necessary in order to get some action in support of a sound, constructive, progressive Republican program. The alternative is running the risk of another Democratic administration, which to date has certainly failed miserably in meeting the needs of our postwar economy insofar as effective stabilization is concerned. However, I think a majority of our people believe and I agree that at least the President is trying to secure the adoption by Congress of either his program or a better one, if we on this side of the aisle will devise it.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. GURNEY, from the Committee on Armed Services:

Lt. Gen. Joseph Lawton Collins, Army of the United States (brigadier general, U. S. Army), to be Deputy Chief of Staff, United States Army, with the rank of general;

Maj. Gen. Willard Stewart Paul, Army of the United States (brigadier general, U. S. Army), to be Director, Personnel and Administration, United States Army, with the rank of lieutenant general;

Maj. Gen. Stephen J. Chamberlin, Army of the United States (brigadier general, U. S. Army), to be Director of Intelligence, United States Army, with the rank of lieutenant general;

Maj. Gen. Manton Sprague Eddy, Army of the United States (brigadier general, U. S. Army), to be Director of Army Education System and Commandant, Command and General Staff College, with the rank of lieutenant general;

Col. Wendell Westover, Army of the United States (colonel, Cavalry Reserve), for temporary appointment as brigadier general in the Army of the United States under the provisions of section 515 of the Officer Personnel Act of 1947; such appointment to continue in force only for the duration of his assignment as executive for Reserve and ROTC affairs, Special Staff, United States Army;

Samuel T. Rhodes, Infantry, Andrew J. Roach, Quartermaster Corps, and Robert K. Weaver, Infantry, for appointment in the Regular Army of the United States in the grade of second lieutenant and arm or service specified, with dates of rank to be determined by the Secretary of the Army, under the provisions of section 506 of the Officer Personnel Act of 1947;

First Lt. Charles S. Gersoni, Medical Service Corps, for promotion in the Regular Army;

Maj. Gen. Henry Spiese Aurand, Army of the United States (brigadier general, U. S. Army), for appointment as Director, Service, Supply, and Procurement, United States Army, with the rank of lieutenant general under the provisions of section 504 of the Officer Personnel Act of 1947;

Gordon M. Johnson and sundry other officers for appointment in the Regular Army of the United States;

Maj. Gen. Leslie Richard Groves, Army of the United States (brigadier general, assistant to the Chief of Engineers and lieutenant colonel, U. S. Army), for appointment as Army member of the Military Liaison Committee to the Atomic Energy Commission and Chief of the Armed Forces Special Weapons Project with the rank of lieutenant general under the provisions of section 504 of the Officer Personnel Act of 1947;

Lt. Gen. Hoyt Sanford Vandenberg (major general, U. S. Air Force), Air Force of the United States, to be Vice Chief of Staff, United States Air Force, with the rank of general with rank from October 1, 1947;

Maj. Gen. Lauris Norstad (brigadier general, U. S. Air Force), Air Force of the United States, to be Deputy Chief of Staff for Operations, United States Air Force, with the rank of lieutenant general with rank from October 1, 1947;

Maj. Gen. Curtis Emerson LeMay (brigadier general, U. S. Air Force), Air Force of the United States, to be commanding general, United States Air Force in Europe, with the rank of lieutenant general with rank from October 1, 1947;

Maj. Gen. Idwal Hubert Edwards (brigadier general, U. S. Air Force), Air Force of the United States, to be Deputy Chief of Staff for Personnel and Administration, United States Air Force, with the rank of lieutenant general with rank from October 1, 1947;

Maj. Gen. Howard Arnold Craig (brigadier general, U. S. Air Force), Air Force of the United States, to be Deputy Chief of Staff for Matériel, United States Air Force, with the rank of lieutenant general with rank from October 1, 1947;

Maj. Gen. Benjamin Wiley Chidlaw (lieutenant colonel, U. S. Air Force), Air Force of the United States, to be Deputy Commander, Air Matériel Command, with the rank of lieutenant general with rank from October 1, 1947;

Maj. Gen. Elwood Richard Quesada (major, U. S. Air Force), Air Force of the United States, to be commanding general, Tactical Air Command, with the rank of lieutenant general with rank from October 1, 1947;

Maj. Gen. Edwin William Rawlings (major, U. S. Air Force), Air Force of the United States, to be Air Comptroller, United States Air Force, with the rank of lieutenant general with rank from October 1, 1947;

Brig. Gen. Franklin Otis Carroll, and sundry other officers, for temporary appointment in the Air Force of the United States;

Brig. Gen. Doyle Overlton Hickey, and sundry other officers, for temporary appointment in the Army of the United States;

Maj. Gen. Manton Sprague Eddy, and sundry other officers, for appointment in the Regular Army of the United States;

Maj. Gen. Raymond Hartwell Fleming, and sundry other officers, for appointment in the National Guard of the United States of the Army of the United States;

Maj. Gen. William Henry Draper, Jr., and sundry other officers, for appointment in the Officers' Reserve Corps of the Army of the United States;

Earl E. Stone, and sundry other officers, to be rear admirals in the Navy;

Vice Adm. John L. McCrea, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as deputy commander in chief, Pacific Fleet;

Rear Adm. Arthur C. Miles, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as Chief of the Material Division, Office of the Under Secretary of the Navy;

Maurice E. Curts and Dixwell Ketcham, for appointment to the permanent grade of rear admiral in the Navy;

Capt. Homer N. Wallin, United States Navy, for temporary appointment to the grade of rear admiral in the Navy;

Admiral DeWitt C. Ramsey, United States Navy, to have the grade, rank, pay, and allowances of an admiral while serving as commander in chief, Pacific and United States Pacific Fleet;

Vice Adm. Forrest P. Sherman, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as commander, United States Naval Forces in the Mediterranean;

Vice Adm. John D. Price, United States Navy, to have the grade, rank, and allowances of a vice admiral while serving as Deputy Chief of Naval Operations (Air);

Vice Adm. Harold B. Sallada, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as commander, Air Force, United States Pacific Fleet;

Capt. Howard M. Shaffer, and sundry other staff officers, for appointment to the permanent grade of rear admiral in the Navy;

Midshipman John C. Shannon (Naval Academy), to be ensign in the Navy;

Charles R. Mischke and Charles B. Teal (Naval Reserve Officers' Training Corps);

Jerry W. Bates to be an ensign in the Navy from the 6th day of June 1947 in lieu of appointment as ensign in the Supply Corps of the Navy as previously nominated and confirmed;

Edward F. Krueger to be an ensign in the Civil Engineers Corps of the Navy from the 4th day of June 1948 in lieu of appointment as ensign in the Navy as previously nominated;

Lowell K. Cunningham and several other civilian college graduates to be lieutenants (junior grade) in the Medical Corps of the Navy;

Marshall V. Perry (civilian college graduate) to be an ensign in the Civil Engineer Corps of the Navy;

Thomas H. Boothman, and sundry other civilian college graduates to be ensigns in the Supply Corps of the Navy;

Robert C. Doerpinghaus and William E. Nims, civilian college graduates, to be lieutenants (junior grade) in the Civil Engineer Corps of the Navy;

Patricia L. Ratcliffe to be ensign in the Nurse Corps of the Navy, to correct spelling of name; and

William L. Eagleton and sundry other officers to be commander, lieutenant commanders, and lieutenants in the Navy.

Maj. Gen. Thomas E. Watson to have the grade, rank, pay, and allowances of lieutenant general in the Marine Corps while serving as commanding general, Fleet Marine Force, Pacific;

Maj. Gen. Clifton B. Cates to be the Commandant of the Marine Corps with the rank of general for a period of 4 years from the 1st day of January 1948; and

Maj. Gen. William P. T. Hill to be Quartermaster General of the Marine Corps, with the rank of major general, for a period of 2 years from February 1, 1948.

INTER-AMERICAN COFFEE AGREEMENT—REMOVAL OF INJUNCTION OF SECRECY FROM PROTOCOL

The ACTING PRESIDENT pro tempore. As in executive session, the Chair lays before the Senate Executive A, Eighteth Congress, second session, a protocol for the extension for 1 year from October 1, 1947, subject to certain conditions, of the Inter-American Coffee Agreement, signed in Washington on November 28, 1940.

The Chair wishes to call the attention of the Senate to the requirement that the injunction of secrecy be removed from the treaty. Is it satisfactory to the Senator from Michigan that the injunction of secrecy on the treaty be removed?

Mr. VANDENBERG. That is entirely satisfactory.

The ACTING PRESIDENT pro tempore. Without objection, the injunction of secrecy will be removed from the protocol, and it will be referred to the Committee on Foreign Relations and printed in the RECORD, together with accompanying papers.

The matters referred to are as follows:

To the Senate of the United States:

To the end that I may receive the advice and consent of the Senate to ratification, I transmit herewith a protocol for the extension for 1 year from October 1, 1947, subject to certain conditions, of the Inter-American Coffee Agreement, signed in Washington on November 28, 1940. The protocol was open for signature at the Pan American Union in Washington from September 11, until November 1, 1947. It was signed during that period for the United States of America, subject to ratification, and for the 14 other American Republics which became parties to the Inter-American Coffee Agreement.

I transmit also for the information of the Senate a report by the Secretary of State with respect to the protocol.

Inasmuch as the previous extension of the Inter-American Coffee Agreement expired on October 1, 1947, and in view of the fact that the present protocol will extend the agreement for only 1 year from that date, I recommend that early consideration be given to the protocol by the Senate.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 21, 1948.*

(Enclosures: (1) Report of the Secretary of State; (2) Protocol for the extension of the Inter-American Coffee Agreement—certified copies in the English, Spanish, Portuguese, and French languages.)

DEPARTMENT OF STATE,
Washington, January 20, 1948.

The PRESIDENT,
The White House:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a certified copy of a protocol for the extension for 1 year from October 1, 1947, subject to certain conditions, of the Inter-American Coffee Agreement signed in Washington on November 28, 1940. The protocol, in accordance with the provisions of article 4 thereof, was open for signature at the Pan American Union in Washington from September 11, 1947, until November 1, 1947, and during that period was signed for the United States of America, subject to ratification, and for the 14 other American republics which became parties to the Inter-American Coffee Agreement.

The protocol retains the framework of the Inter-American Coffee agreement for a 1-year period, but suspends the provisions of articles I to VIII, inclusive, of that agreement, which relate to coffee quotas.

Article 3 of the protocol provides that the Inter-American Coffee Board shall undertake to complete by April 1, 1948, its recommendations regarding the type of cooperation which appears most likely to contribute to the development of sound and prosperous conditions in international trade in coffee equitable for both consumers and producers. Article 3 of the protocol provides further that the Inter-American Coffee Board shall undertake to make arrangements prior to October 1, 1948, for the transfer of its functions, assets, and records to an appropriate inter-American or other international organization.

The 1-year extension provided for by the protocol has been recommended by an interdepartmental committee consisting of representatives of the interested agencies of the United States Government. The domestic coffee trade has indicated that it considers that the extension of the agreement for 1 year under the terms set forth in the protocol would be a desirable measure.

Information on the background and purposes of the coffee agreement is set forth in the report of January 8, 1941, by the Secretary of State to the President (Senate Executive A, 77th Cong., 1st sess.).

Advice and consent to ratification of the coffee agreement was given by the Senate on February 3, 1941. The agreement was ratified by the President on February 12, 1941, and the instrument of ratification by the United States deposited with the Pan American Union on April 14, 1941. On April 15, 1941, a protocol was signed at Washington, bringing the agreement into force on April 16, 1941, among the governments which had up to that time deposited ratifications or approvals of the agreement. The Congress of the United States, by joint resolution approved April 11, 1941, provided for the carrying out of the obligations of the United States under the agreement on and after the entry into force of the agreement and during the continuation in force of the obligations of the United States thereunder (55 Stat. 133).

The agreement, which was to expire on October 1, 1943, was twice extended without modification for 1-year periods by unanimous approval of the signatory countries. That action was taken pursuant to the provisions of article XXIV of the agreement, which authorize the continuation of the agreement upon acceptance by all participating governments of a recommendation by the Inter-American Coffee Board that the duration of the agreement be extended. By a protocol open for signature at the Pan American Union from September 1, 1945, until November 1, 1945, the agreement was extended, with certain modifications, for an additional 1-year period from October 1, 1945. By a protocol open for signature at the Pan American Union from September 3, 1946, until November 1, 1946, the agreement was extended, subject to certain conditions, for a further 1-year period from October 1, 1946. Those extensions also were approved by the domestic coffee trade.

Inasmuch as the previous extension of the agreement expired on October 1, 1947, and in view of the fact that the present protocol will extend the agreement for only 1 year from that date, the Department of State recommends its early approval on behalf of the Government of the United States of America.

Respectfully submitted.

G. C. MARSHALL.

PROTOCOL FOR THE EXTENSION OF THE INTER-AMERICAN COFFEE AGREEMENT FOR 1 YEAR FROM OCTOBER 1, 1947

Whereas an Inter-American Coffee Agreement (hereinafter referred to as "the Agreement") was signed in Washington on November 28, 1940; and

Whereas by a Protocol signed in Washington April 15, 1941, the Agreement was brought into force on April 16, 1941, in respect of the Governments on behalf of which the Protocol was signed on April 15, 1941; and

Whereas article XXIV of the said Agreement provides that it should continue in force until October 1, 1943; and

Whereas by unanimous consent the Governments signatory to the Agreement twice extended the said Agreement unchanged for 1-year periods, these extensions being duly attested by two certified and signed Declarations passed by the Inter-American Coffee Board on May 12, 1943 and July 25, 1944, respectively, which were duly deposited in the Pan American Union on June 11, 1943, and September 11, 1944, respectively, in accordance with the provisions of article XXIV of the Agreement; and

Whereas by a Protocol signed and deposited with the Pan American Union under date of October 1, 1945, the said Agreement was extended for one year from October 1, 1945, with certain changes recommended by the Inter-American Coffee Board; and

Whereas by a Protocol signed and deposited with the Pan American Union under date of October 1, 1946, the said Agreement was extended for one year from October 1, 1946, subject to certain conditions recommended by the Inter-American Coffee Board.

Now, therefore, in support of a recommendation made by the Inter-American Coffee Board on September 11, 1947, the Governments signatory to the present Protocol, considering that it is feasible, pending further efforts toward completion of international and inter-American arrangements for dealing with commodity problems, that the Agreement should be prolonged for one additional year, subject to the conditions stated below, have agreed as follows:

ARTICLE 1

Subject to the provisions of Article 2 hereof, the Agreement shall continue in force between the Governments signatory to the present Protocol for a period of one year from October 1, 1947.

ARTICLE 2

During the period specified in Article 1 above, the Governments signatory to the present Protocol agree that the provisions of Article I through and including VIII of the Agreement shall be inoperative.

ARTICLE 3

(a) During the period specified in Article 1 above, the Inter-American Coffee Board shall undertake to complete by April 1, 1948, its recommendations for the consideration of the governments now participating in the Agreement and of other governments that might be interested in participating in an understanding regarding the type of cooperation, whether inter-American or other international, that appears most likely to contribute to the development of sound and prosperous conditions in international trade in coffee equitable for both consumers and producers.

(b) Such recommendations shall be in accordance with general principles of commodity policy which are embodied in the Chapter on Inter-governmental Commodity Arrangements drafted in the First Session of the Preparatory Committee on the United Nations Conference on Trade and Employment or which may be embodied in the Charter for an International Trade Organization if such Charter is concluded prior to the submission of such recommendations by the Board.

(c) The Inter-American Coffee Board shall undertake to make arrangements prior to October 1, 1948, for the transfer of its functions, assets and records to an appropriate inter-American or other international organization.

ARTICLE 4

The present Protocol shall be open for signature at the Pan American Union from September 11, 1947, until November 1, 1947, provided, however, that all signatures shall be deemed to have been affixed under date of October 1, 1947, and the Protocol shall be considered as having entered into force on that date with respect to the governments on behalf of which it is signed.

In witness whereof the undersigned, being duly authorized thereto by their respective Governments, have signed the present Protocol.

Done at the City of Washington in the English, Spanish, Portuguese and French languages. The original instrument in each language shall be deposited in the Pan American Union which shall furnish certified copies to the Governments signatory to this Protocol.

I hereby certify that the foregoing document is a true and faithful copy of the original, in English, of the Protocol for the Extension of the Inter-American Coffee Agreement for one year from October 1, 1947, deposited in the Pan American Union.

Washington, D. C., December 4, 1947

[SEAL] WILLIAM MANGER,
Secretary of the Governing Board of the Pan American Union.

RECESS TO FRIDAY

Mr. SALTONSTALL. I move that the Senate take a recess until Friday, January 23, at 12 o'clock noon.

The motion was agreed to; and (at 1 o'clock and 35 minutes p. m.) the Senate took a recess until Friday, January 23, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 21, 1948:

DIPLOMATIC AND FOREIGN SERVICE

A. Ogden Pierrot, of Virginia, for appointment as a Foreign Service officer of class 2 and a secretary in the diplomatic service of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 3, consuls, and secretaries in the diplomatic service of the United States of America:

Francis A. Flood, of Oklahoma.
Owen T. Jones, of Ohio.

John W. Henderson, of Iowa, for appointment as a Foreign Service officer of class 4, a consul, and a secretary in the diplomatic service of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 5, vice consuls of career, and secretaries in the diplomatic service of the United States of America:

Elleard B. Heffern, of Missouri.
Charles E. Higdon, of Tennessee.
Samuel Owen Lane, of California.
Richard F. Lankenau, of Indiana.
William L. Magistretti, of California.
Armin H. Meyer, of Illinois.
Clinton L. Olson, of California.
David Post, of Pennsylvania.

The following-named persons for appointment as Foreign Service officers of class 6, vice consuls of career, and secretaries in the diplomatic service of the United States of America:

Thomas J. Corcoran, of New York.
William D. Craig, of California.
Wayne W. Fisher, of Iowa.
Francis C. Grant, Jr., of Pennsylvania.
Matthew J. Looram, Jr., of New York.
Eugene V. McAuliffe, of Massachusetts.
James D. Moffett, of Minnesota.
John F. O'Donnell, Jr., of Massachusetts.
Howard W. Potter, Jr., of New York.

RECONSTRUCTION FINANCE CORPORATION

The following-named persons to be members of the Board of Directors of the Reconstruction Finance Corporation for terms of 2 years from January 22, 1948:

Harvey Jones Gunderson, of South Dakota.
Henry T. Bodman, of Michigan.
Henry A. Mulligan, of New York.
John D. Goodloe, of Kentucky.
Harley Hise, of California.

UNITED STATES MARSHAL

Rupert Hugo Newcomb, of Mississippi, to be United States marshal for the southern district of Mississippi, vice Wyatt T. Reese, term expired.

UNITED STATES PUBLIC HEALTH SERVICE

The following-named candidates for appointment in the Regular Corps of the Public Health Service:

To be surgeons (equivalent to the Army rank of major), effective date of acceptance:

Frank S. French
Emanuel E. Mandel

To be pharmacist (equivalent to the Army rank of major), effective date of acceptance:

George B. Hutchison

COAST AND GEODETIC SURVEY

The following-named employees of the Coast and Geodetic Survey to the positions indicated:

To be ensign in the Coast and Geodetic Survey, from the date indicated:

Ward A. Kemp, October 10, 1947.

To the rank of captain in the Coast and Geodetic Survey, from the date indicated:

Jack Senior, January 1, 1948.
Ronald D. Horne, March 1, 1948.
Charles K. Green, March 1, 1948.

To the rank of commander in the Coast and Geodetic Survey, from the date indicated:

Henry C. Warwick, January 1, 1948.
Benjamin H. Rigg, March 1, 1948.
Albert J. Hoskinson, March 1, 1948.

To the rank of lieutenant commander in the Coast and Geodetic Survey, from the date indicated:

Ernest B. Lewey, January 1, 1948.
John C. Mathisson, March 1, 1948.
George E. Morris, March 1, 1948.

IN THE NAVY

Rear Adm. Cato D. Glover, Jr., United States Navy, for permanent appointment to the grade of rear admiral in the Navy.

Rear Adm. Henry R. Oster, United States Navy, for permanent appointment to the grade of rear admiral in the Navy.

The following-named officers for appointment in the Supply Corps of the Navy in the grades hereinafter stated:

LIEUTENANT

James A. Warren

LIEUTENANTS (JUNIOR GRADE)

Charles F. Grad
Harvey E. Lewis
John E. Aicken
Leon J. Dura
Elbert S. Rawls, Jr.

ENSIGNS

Stewart W. Damon
Robert A. Evans, Jr.
Fritz H. Hediger
Robert S. Haley
Richard J. O'Brien

IN THE MARINE CORPS

The following-named officers for appointment to the permanent grade of major general in the Marine Corps:

Alfred H. Noble
Graves B. Erskine

The following-named officers for appointment to the permanent grade of brigadier general in the Marine Corps:

Edward A. Craig
Thomas J. Cushman

HOUSE OF REPRESENTATIVES

WEDNESDAY, JANUARY 21, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Blessed Lord, in meditation and prayer we would ponder these great injunctions: Know thyself, control thyself, give thyself. Through the dawning of each day may their growth be determined in our lives, thus fulfilling our God-given best.

O Lord, the greatness of a nation depends not upon its resources but how it uses them; forbid that we should waste or foolishly dissipate them. Let our thoughts be centered in a passion for higher things; make us strong in Thy strength, wise in Thy wisdom, and loving in Thy love. Give us the spirit of courage to overcome our faults, casting out the beam from our own eye, and extending our horizons of brotherhood and understanding. In the name of our Saviour. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS

Mr. MURRAY of Wisconsin asked and was granted permission to extend his remarks in the RECORD and include a table from the Department of Agriculture.

Mr. MACK asked and was granted permission to extend his remarks in the RECORD and include a radio speech made to the people of his district.

Mr. CROW asked and was granted permission to extend his remarks in the RECORD and include a statement by James F. O'Neal, national commander of the American Legion, made before the Foreign Relations Committee of the Senate.

Mr. SNYDER asked and was granted permission to extend his remarks in the RECORD and include an editorial from the Martinsburg Journal on the subject They Are Not Broke.

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a magazine article. I am advised by the Public Printer that the length of the article is in excess of the amount allowed under the rules to the extent of $177. Notwithstanding, I ask unanimous consent that it may be printed.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. AUCHINCLOSS. Mr. Speaker, 2 days ago I received permission to extend my remarks in the RECORD. I am advised by the Public Printer that the remarks exceed the usual amount allowed to the extent of $230.75. Notwithstanding the excess amount, I ask unanimous consent that the extension may be made.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey [Mr. AUCHINCLOSS]?

There was no objection.

Mr. MORTON asked and was given permission to extend his remarks in the Appendix of the RECORD on the subject of grain allocation for the beverage distilling industry.

Mr. BAKEWELL asked and was given permission to extend his remarks in the Appendix of the RECORD.

Mr. MILLER of Nebraska asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances, in one to include an address by Mr. Straus, of the Reclamation Bureau, and in the other to include resolutions passed by the Nebraska Reclamation Association.

Mr. BOGGS of Delaware asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

Mr. TWYMAN asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial from the Peoria Journal of January 4.

Mr. TOLLEFSON asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

Mr. VAN ZANDT asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article entitled "Naval Air Service Has Record of No Passenger Fatalities During 1947."

Mr. RICH asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial from the Bristol Courier entitled "The Tariff Issue."

THE CRIPPLED CAB AND CAA

Mr. BAKEWELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. BAKEWELL. Mr. Speaker, I noticed in the morning paper that there has been another air accident near Boston. Fortunately, no lives were lost, but this seems to be due to the courage and the pluck of the passengers and crew. While we have continuous air crashes in the United States of America, the Civil Aeronautics Board is without a chairman. The Chairman of the Civil Aeronautics Authority has offered his resignation.

At a press conference within the last 2 weeks, it was indicated that the appointing authority did not even realize that another vacancy existed on the CAB. And this morning's papers announce the resignation of still another member. Another member of the CAA has asked for a 4-year leave of absence. The CAB is 2 years behind in its docket. Employee morale is at a very low ebb. Here we have two of the most responsible boards that are subject to the appointing power of the President in a state of inefficiency and disintegration. The President recently suggested the name of an Air Forces man to be head of the CAB, but that was not satisfactory because it was proposed that he be chairman of a civilian board but at the same time draw his Air Force pay as a general of the Air Forces. The CAB could have come under the control of the Army Air Force. How can one man serve two masters?

The situation is one which should receive prompt attention by the Congress, for the appointing authority is either unable or unwilling to designate competent personnel to insure the carrying out of the air safety program. The lives and safety of the air-traveling public should no longer be endangered by politics, indecision, or callous indifference.

RETIRED RAILROAD EMPLOYEES AND THEIR SURVIVORS ARE IN THE FORGOTTEN CLASS

Mr. VAN ZANDT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. VAN ZANDT. Mr. Speaker, since the Eightieth Congress convened in January 1947, hours have been consumed with oratory designed to indoctrinate the American people with the plight of those in various parts of the world who have been victims of the war and, as a result, deprived of the necessities of life. In response, this Congress has already appropriated millions of dollars to aid unfortunate people in various countries, to say nothing of billions of dollars appropriated by previous Congresses.

While these acts of world-wide charity were being practiced at the direct expense of the American taxpayers, millions of our own citizens are in dire and desperate straits because of their inability to purchase the bare necessities of life on account of the present high cost of living. According to the Bureau of Labor Statistics, the increase in the cost of living reached an all-time high of 67.2 percent above the August 1939 level.

Mr. Speaker, in my congressional district there are thousands of retired employees under the Social Security and Railroad Retirement Acts. These groups are suffering greatly because of the meager benefits they are receiving. It should be remembered that these groups represent the stalwart citizens of yesterday, who, by their labor and the payment of taxes, played such an important role in building this great Nation.

In the President's recent message on the state of the Union, he endorsed the sentiment of many of us in Congress that the provisions of the Social Security Act should be liberalized.

It is common knowledge that veterans' benefits have been increased at two different intervals the past several years.

There is also legislation pending in Congress to liberalize the benefits to retired civil-service employees.

A group of retired employees and their survivors, who are under the provisions of the Railroad Retirement Act, have not received adequate increases in benefits. It is true that the Crosser amendments to the Railroad Retirement Act provided some improvement, but they do not give an adequate increase in the face of the present high cost of living. The cost of the Crosser amendments is borne by the employer and employee, whose dual contributions to the railroad-retirement fund were increased to meet the liberalization of the existing law.

According to the Railroad Retirement Board, for the fiscal year 1947 there were 240,026 persons on the retirement rolls, whose average monthly benefit was $61.10. Widows 65 years and over on the retirement rolls received a monthly payment of $28.34; widowed mothers $25.27 monthly; children an average monthly payment of $15.70 and dependent parents $16.84 monthly.

Recipients of railroad-retirement benefits are in the same plight with retired employees under the Social Security Act, since it is evident that the average monthly benefit of $61.10 to retired railroad employees is insufficient to meet the present cost of living.

With the largest railroad shops in the world located at Altoona, Pa., in my congressional district, naturally, I am deeply interested in the living conditions of the retired employees and their survivors. There is hardly a day in the week that I do not receive pathetic letters from retired employees or their survivors informing me of their dire circumstances.

In the hope of providing at least temporary relief, and without increasing the pay-roll tax on management and employees now working, I have introduced H. R. 5000 in Congress to increase present benefits under the Railroad Retirement Act by a flat 30 percent. This increase is to remain in effect as long as the cost of living exceeds the 1935–39 cost-of-living level of 100. As previously mentioned, the cost-of-living level is now 167.2 percent, which is 67.2 percent above the August 1939 level of 100.

It is estimated by the Railroad Retirement Board that the minimum cost per year will be approximately $72,000,000. It is the intent of my bill that the necessary money to pay the cost of the proposed increase will be appropriated annually to the railroad-retirement account from the general funds of the Treasury of the United States.

The provisions of H. R. 5000 are as follows:

H. R. 5000

A bill to increase all benefits under the Railroad Retirement Act, as amended

Be it enacted, etc., That, effective July 1, 1948, each benefit payable with respect to any calendar month, or part thereof, under the provisions of the Railroad Retirement Act, as amended, shall be increased by 30 percent if the consumers' price index of the Bureau of Labor Statistics with respect to the preceding calendar month exceeded the 1935–39 base of 100.

SEC. 2. The Secretary of Labor shall certify to the Railroad Retirement Board on or before the 10th day of July 1948, and on or before the 10th day of each calendar month thereafter, whether or not the consumers' price index of the Bureau of Labor Statistics for the preceding calendar month exceeded the 1935–39 base of 100. Such certifications shall be conclusive on the Railroad Retirement Board and for the purposes of judicial review under section 11 of the Railroad Retirement Act, as amended.

SEC. 3. If, pursuant to the provisions of sections 1 and 2 above, an increase in benefits with respect to any month is required, the Railroad Retirement Board, after computing the benefits with respect to that month in accordance with the provisions of the Railroad Retirement Act, as amended, shall add to each benefit amount so computed the required increase, and shall certify each benefit amount as so increased as the benefit with respect to that month under the Railroad Retirement Act, as amended.

SEC. 4. If the award made in any calendar month by the Railroad Retirement Board is a lump sum payable under section 5 (f) of the Railroad Retirement Act, as amended, and the certification from the Secretary of Labor, required under section 2 hereof, shows that the consumers' price index of the Bureau of Labor Statistics with respect to the preceding calendar month exceeded the 1935–39 base of 100, the Board shall add to the lump sum an amount equal to 30 percent thereof prior to certification.

SEC. 5. In addition to the amounts authorized to be appropriated to the railroad retirement account under the provisions of sections 15 (a) and 4 (n) of the Railroad Retirement Act, as amended, there is hereby authorized to be appropriated to the railroad retirement account from the general funds in the Treasury of the United States, not otherwise appropriated, for the fiscal year 1949, and for each fiscal year thereafter, an amount sufficient to cover the cost of the increases provided by this act.

YOUR BUSINESS AND MY BUSINESS

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, it is my business when we pay the President of the United States $75,000 a year. For the amount of work he does I question sometimes whether he is getting paid enough for what he is doing, and for the responsibility he has to assume. But it is not my business when the House of Commons of England grants Princess Elizabeth and Prince Philip a $200,000 a year allowance just for being Princess and Prince; and it is not any of my business when they pay the King $2,000,000 a year. But it is my business when this country furnishes the money to pay those salaries. It is my business when we furnish free the coal for the people of England when the people of England will not mine their own coal. It is my business when we furnish free the oil to keep those people warm when they do not try to get their own oil and our people run short of oil here at home. It is my business when we are now proposing to spend something like $17,000,000,000 to take care of a lot of royalty over there who are getting many times what they are worth and we have to pay the bill. It is your business too. Let us look after our own business here at home. It was our business when you gave Britain $4,400,000,000 2 years ago, and they have spent it to buy up their coal mines, their railroads, their public utilities, creating a socialistic government. It was to put them in position to get on their feet. Now they want billions more and it is my business to see that they do not get it from my constituents or any part of it, especially for nothing. You cannot pay people not to be Communists. If they intend to be communistic, money will not stop them. The food we send there for nothing creates high prices for food here; the fuel, coal and oil create high prices for those things here at home and create a scarcity. I am not trying to run Britain's government. I want them to do that. It is my business to look after America and the American people and as long as I am in Congress I will do that. That is my business, that is your business. Let us attend to our business and take care of America. Take care of them now. Stop giving our resources away. Be wise. You must economize.

EXTENSION OF REMARKS

Mr. BUCHANAN asked and was given permission to extend his remarks in the Appendix of the RECORD and include a statement of the Congress of Industrial Organizations on the 40-hour week.

Mr. LANE asked and was given permission to extend his remarks in the Appendix of the RECORD and include a newspaper item.

Mr. TEAGUE asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances and include a letter and a newspaper editorial.

Mr. CELLER asked and was given permission to extend his remarks in the RECORD.

FAIR LABOR STANDARDS ACT

Mr. BUCHANAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include a letter from the president of the Congress of Industrial Organizations.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BUCHANAN. Mr. Speaker, it is the conviction of the Congress of Industrial Organizations that any move toward nullifying or diluting essential sections of the Fair Labor Standards Act would not merely hamper our national effort to increase production but would serve to discredit our altruistic professions in respect to legislation implementing the Marshall plan. People abroad would interpret attacks on the wages-and-hours law as proof that our Government was more responsive to pressure for increased profits than to pleas for human needs.

None of the current production difficulties or underutilization of facilities has anything to do with the necessity for paying time-and-a-half rates after 40 hours. The basic shortages to be overcome in carrying through a foreign-aid program are in such products as steel, food, fertilizer, freight cars, and power. Basically, these bottlenecks are due to the failure of industry to foresee needs and to expand to meet them.

Mr. Speaker, the letter from the president of the Congress of Industrial Organizations follows:

Hon. FRANK BUCHANAN,
House Office Building,
Washington, D. C.

DEAR CONGRESSMAN BUCHANAN: I am writing you this letter to express the concern of the CIO in regard to the current attacks on the Fair Labor Standards Act. Testimony offered by employer groups makes it very evident that an effort is being made to eliminate the overtime provisions of the FLSA. We have prepared a brief memorandum, herewith enclosed, summarizing labor's conviction that this particular section of the act, and indeed the law as a whole, should be strengthened and not weakened.

In regard to the basic provisions of the Fair Labor Standards Act, please let me rest te our general position:

1. The minimum wage should be raised to at least 75 cents an hour.

2. There should be no weakening of present provisions for the payment of overtime after 40 hours a week at the rate of one and a half times the regular rate of pay.

3. Present child labor provisions should be improved.

4. Coverage should be extended to certain additional groups.

American labor performed miracles of production during the war while the overtime and other provisions of this act were in effect. Through cooperation between management and labor the United States can similarly produce abundantly to meet home needs and to aid other less fortunate nations. The law is sufficiently flexible to meet any contingency. Current record-breaking profits provide ample margin for the wage provisions.

The basic shortages to be overcome in carrying through a foreign-aid program are in such products as steel, food, fertilizer, freight cars, and power. None of the current production difficulties or underutilization of facilities has anything to do with the necessity for paying time-and-a-half rates after 40 hours. Basically, these bottlenecks are due to the failure of industry to foresee needs and to expand to meet them. In December 1947, there were 1,643,000 unemployed in this country and a manpower reserve of at least 4,000,000.

It is our conviction that any move toward nullifying or diluting essential sections of the Fair Labor Standards Act would not merely hamper our national effort to increase production, but would serve to discredit our altruistic professions in respect to legislation implementing the Marshall plan. People abroad would interpret attacks on the wage and hour law as proof that our Government was more responsive to pressure for increased profits than to the pleas for human needs.

Sincerely yours,

PHILIP MURRAY,
President.

DETROIT'S NATURAL GAS SHORTAGE

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and include therein an excerpt from the record of the proceedings of the Common Council of the City of Detroit on Thursday, January 14, 1948, an editorial appearing in the Detroit News on January 16, 1948, and an article that appeared in the Detroit Times on January 16, 1948, written by James Inglis, city hall reporter—all of which pertain to the natural-gas shortage in the Detroit area—and to revise and extend my remarks in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. LESINSKI. Mr. Speaker, it has been my honor and privilege to represent the Sixteenth Congressional District of Michigan since it was originated. The Sixteenth Congressional District of Michigan is comprised of two wards on the west side of the city of Detroit, the city of Dearborn, and a number of important communities known as the Detroit down-river area, which includes the heavily industrialized city of Wyandotte. This is the largest industrialized district in the entire world. It includes the gigantic Ford Motor Co.'s River Rouge plant and hundreds of other nationally known corporations.

During the wartime, the Detroit area was referred to as the Arsenal of Democracy. The very heart of the "arsenal" is in the Sixteenth Congressional District, and its importance in production in peacetime is equally as vital to the welfare and security of this Nation as it was in wartime. We hear from every side that if inflation is to be licked and our country is to continue to prosper, it must be done by production at the lowest possible cost and in the greatest volume.

Mr. Speaker, I submit that management and labor cannot produce materials necessary to satisfy the country's needs and prevent inflation and do their full share in maintaining the prosperity of the country if certain selfish interests are permitted to strangle the very fuel supply so essential to accomplish these ends. The entire Detroit area is confronted with a fictitious natural gas shortage brought about by the powerful and ruthless Michigan Consolidated Gas Co. This company has recently secured the approval of the Federal Power Commission to construct a new gas line from the Texas fields to Detroit. This new pipe line, if it is ever constructed, will cost approximately $136,000,000, which will be principally paid for by the gas consumers of the Detroit area. These gas consumers are not, however, all nationally known corporations—83,000 families in the Detroit area heat their homes with gas—more thousands of families are asking for natural gas for heating purposes, and nearly a half million families in the Detroit area are using natural gas for domestic purposes.

It is the contention of the city of Detroit that the natural gas shortage is fictitious in its origin and has been deliberately created by the Michigan Consolidated Gas Co., the local gas distributor, as a means of deceiving the public into support of its scheme to bring in, through its holding company, the American Light & Traction Co., a separate and wholly owned natural gas pipe line which would serve to link together various gas subsidiary companies in Michigan and Wisconsin which, except for such pipe-line device, would be severed from the holding-company structure through enforcement of the Public Utility Holding Company Act.

It is also the contention of the city of Detroit that Michigan Consolidated Gas Co., as a part of this scheme, is attempting to deprive the industries of the Detroit area and the public generally of the continued use of the existing natural gas supply brought to Detroit by the Panhandle Eastern Pipe Line Co., whose rates have been greatly reduced and are under effective Federal regulation, and which reduced rates also reflect a virtual equity held by the rate payers in the Panhandle Eastern system—an equity amounting to approximately $30,000,000. In its place Michigan Consolidated would impose upon the public an absolute monopoly from the gas well to the burner tip and thereby deny competitive pipe-line rates, depriving the public of this benefit. Michigan Consolidated's proposed new pipe-line system will cost in the neighborhood of $136,000,000. Its proposed rates are still unknown, but will undoubtedly be much higher than the present rate, perhaps as high as 35 cents as compared to present 18½ cents per thousand cubic feet. The Common Council of the City of Detroit is determined to prevent this monopolistic imposition of increased gas costs, and it is my own opinion that the intervention of Congress in support of the city of Detroit may become necessary. In the Sixteenth Congressional District, where the existing Panhandle Eastern system terminates, my constituents look with urgency to me for protection.

Mr. Speaker, in order that the Congress be apprised of the attitude of the common council, as well as the arbitrary position taken by Michigan Consolidated Gas Co. against the public interest, I submit at this point the information you have permitted me to place in the RECORD.

[Excerpt from the record of the proceedings of the Common Council of the City of Detroit on Thursday, January 15, 1948]

Chairman OAKMAN. How much gas did you take from Panhandle for the Detroit area in 1947?

Mr. MONTGOMERY. Mr. Fink will answer that; 1946 is probably the best year.

Mr. FINK. 1946? About 43,000,000,000.

President EDWARDS. My personal opinion of this matter is that neither of your companies is going to be, in the immediate future, in a position to supply the estimated needs which you have represented as the sales capacity of this area alone; that only by continuing to keep the source of supply that we have, getting an expansion on gas in this area, are you going to be able to meet it. And it beats me——

Mr. MONTGOMERY (interposing). That is all we want.

President EDWARDS. Yes; but you don't want that. You don't want to keep the source of supply you now have. You want to keep a portion of it.

Mr. MONTGOMERY. We want to keep the amount we took in 1945. Now, we built the new line——

Councilman SMITH (interposing). Is that the maximum you have ever taken from them?

Mr. MONTGOMERY. Up until the time of our hearing before the Federal Power Commission, when the case started.

Councilman SMITH. Forty-five.

Mr. MONTGOMERY. Yes; we planned our new line on that basis, that we could continue to take—or, I should put it the other way, that when it came to a question of whether Panhandle should be allowed to continue to

serve in this district, the Federal Power Commission asked us if we could continue to take all that Panhandle was giving us. Well, the last year up to that time was 32,000,000,000, so we said, "Yes, we will take all that we have been getting." We have laid all our plans on that.

Mr. MAGUIRE. Who asked you to do that?

Chairman OAKMAN. Now, it seems you are afraid of an oversupply or overabundance. Your company is on friendly terms with the Edison Co., are you not? I mean, you know the people, you know who they are. You are the biggest consumer of fuel in the city of Detroit. Isn't it possible if you were stuck with too much gas you might sell it to the Edison Co., you might sell the Edison Co. some fuel or power?

The city of Detroit buys enormous quantities of fuel. If you had this surplus of natural gas, the public lighting commission and the water board are all potential customers.

We know that the Ford Motor Car Co.—they told us they are wanting 27 billions alone. And in your own statement, you said there are 100,000 additional homes and 30 factories, and if you had the gas you would have 200 more factories screaming for it, and yet you are afraid here of a little 13,000,000,000 of gas.

Mr. FINK. Mr. Oakman, all of our financing, all of our SEC records, all of the evidence we presented there is based on this 32,000,000,000. As I mentioned earlier in my discussion here, to change that figure, as you are asking us to do, would put serious obstacles in the way of carrying out the financing as we are having it approved.

Councilman NOWICKI. Mr. Fink, it would improve your situation, wouldn't it?

Mr. FINK. No.

Councilman NOWICKI. Wouldn't it improve your situation?

Mr. FINK. No.

Chairman OAKMAN. He means he would probably have to go back and file for a new application with the SEC.

Councilman NOWICKI. It seems to me if your financing, your construction, your improvements, and your extensions were predicated on a minimum supply—or maximum supply from Panhandle of 32,000,000,000, and now because of an adjustment in the source of supply, in the market and other causes, you can build up your picture with an assured stand-by of 45,000,000,000, then it seems to me your condition is not being aggravated but being improved, that any additional facilities Michigan Consolidated might expand on its own would increase or improve the picture.

I have difficulty following your reasoning, where you seem to imply the position of Michigan Consolidated Gas Co. would be jeopardized if you moved over from your position to accept 32,000,000,000 and agreed to accept 45,000,000,000 from Panhandle, as offered this morning.

Councilman GARLICK. You are right from the standpoint of the distributing company, Michigan Consolidated Gas Co., but you are talking strictly about financing the Michigan pipe line.

Councilman NOWICKI. I am also thinking of Mr. Montgomery's very generous estimates of what this area can absorb. Certainly, if I understood him correctly, he is thinking in very optimistic terms, to say the least, as to what gas consumption in the future will be.

Councilman SMITH. As I see it, the limit of Panhandle Eastern's capacity is what they furnished in 1946 or 1945; that they can't furnish any more than that unless they construct new facilities. It seems to me it is useless to attempt to take into consideration what they are undertaking as far as future facilities, when the Michigan Consolidated Gas Co. is already prepared to do it.

Mr. MAGUIRE. No; that is not correct. We have the capacity to furnish that 125,000,000, and we are doing it, and we have furnished more new facilities, and we have 45,000,000 more capacity than we had in 1945 or 1946.

President EDWARDS. Mr. Chairman, personally I have got to leave for a radio broadcast that has been set up for a long time. I would like to sum up where we are at the present stage of the game and see if there is any chance of getting any place else.

I would like to ask Mr. Fink once again whether his company will consider entering into a contract with the Panhandle Eastern Co., calling for the delivery of 45,000,000,000 cubic feet of gas per year, or more than that, in meeting the offer which Panhandle has made to furnish 45,000,000,000 and more than that as stated in the first portion of the meeting.

Chairman OAKMAN. I think if he agreed to do that, we would step out as an intervener.

Mr. FINK. Not at this time, Mr. Edwards.

President EDWARDS. You are not willing even to consider that?

Mr. FINK. Not at this time. We are willing to sign—well, as a matter of fact, we signed this contract to take 32,000,000,000.

President EDWARDS. Let me ask one other thing, then—well, Mr. Chairman, the best we had from the other side of this table is that the Panhandle Co. would be willing to consider, they might offer a contract for as little as 45,000,000,000. Could we ask for a statement of their position at this time in relation to that? They offered 45,000,000,000.

Mr. MAGUIRE. Forty-six, I think it was; with a 90-percent load factor.

Mr. LEE. On the present rate schedule.

Mr. MAGUIRE. Whatever the rate schedule is at that time; yes.

President EDWARDS. You are willing to sign a 15-year contract therefor?

Mr. MAGUIRE. Yes.

Mr. MONTGOMERY. Not under the present rate schedule.

Mr. MAGUIRE. Wait a minute. Whatever the rate schedule is.

President EDWARDS. We understand.

Mr. MAGUIRE. You are getting 30 cents for your gas. Why don't you talk about what your rate schedule will be?

President EDWARDS. I think everybody understands the rate schedule is controlled by the Commission.

Mr. MAGUIRE. We will be glad to do that. We will be glad to sell that gas at what Michigan-Wisconsin Pipe Line Co. is going to charge for that gas, less the depreciated amount we have in our present system. We will be glad to do that.

Councilman NOWICKI. Less the depreciated amount?

Mr. MAGUIRE. Why, certainly; we would be tickled pink. We would be then getting something like 32 cents for the gas. Tickled pink. Because that is what you are going to pay for this.

President EDWARDS. Mr. Chairman, it is my personal opinion, and I want to state it before I leave this hearing, that unless Michigan-Wisconsin Pipe Line Co. and Michigan Consolidated were prepared to tell this council that they were willing to contract for the supply which is now available to them through the existing pipe line now serving Detroit, that they have little equity in asking this council to withdraw the city's intervention in the pending appeal, and I certainly wouldn't vote for doing so under these circumstances.

Chairman OAKMAN. Gentlemen, if there is any opportunity of your getting together between now and Saturday, I, for one, would be glad to come down here and meet Saturday morning, or—tomorrow the president and two of our other members will be in Washington.

President EDWARDS. I would like to have this statement of policy printed in the record, Mr. Chairman.

Chairman OAKMAN. Mr. Maguire, will we have a copy of the statement you read this morning?

Mr. MAGUIRE. Yes; you may have it.

Chairman OAKMAN. We would like that for our record.

Mr. MAGUIRE. Certainly.

President EDWARDS. I am sorry, I have to leave.

(President Edwards then left the council chambers.)

For clarification of the foregoing it should be stated that Messrs. Henry Montgomery and Henry Fink are, respectively, public-relations adviser and president of Michigan Consolidated Gas Co. Mr. W. G. Maguire is chairman of the board of the Panhandle Eastern Pipe Line Co. I have been informed that Mr. William G. Woolfolk, chairman of American Light & Traction Co., which controls Michigan Consolidated, was also invited to attend the Detroit Common Council proceedings, but, for obvious reasons, did not make his appearance.

[Editorial appearing in the Detroit News on January 16, 1948]

WHAT IS NEEDED IS MORE GAS

The common council made a good try at solving the gas-shortage problem, and it is not its fault that the companies vying for the privilege of bringing natural gas to Detroit from the Texas fields refused to agree.

Maybe it is nobody's fault. There is no question, however, that the Michigan Consolidated Gas Co., which has the franchise to distribute gas at retail in Detroit, has put itself in a regrettable position.

Consolidated refused at the council hearing a firm offer by Panhandle Eastern, its present supplier of natural gas, to furnish 27,500,000 additional cubic feet daily, beginning a year from now.

Consolidated had its own sound reasons for refusing. It plans to build its own pipe line from the Texas fields, claimed to be capable of completion by 1950.

It has obtained its go-ahead for the project from the Federal Power and Securities Commissions on the basis of buying no more of its requirements from Panhandle than it now is able to buy from that source.

Panhandle has its own additional pipe-line facilities under construction or at the planning stage. Its offer to supply Consolidated additional gas was made contingent on the signing of a 15-year contract.

If Consolidated signed, it would be pretty sure of having to delay indefinitely and possibly abandon its own pipe-line plans. In that case, Detroit, too, would lose an additional future source of natural-gas supply.

However, as stated, Consolidated is put in the position of refusing additional gas when gas is needed, and that is not, for a public utility, an enviable position.

The council tried to bring the two companies together on a basis that would give Detroit both sources of supply.

Detroit rate payers in effect have a $30,000,000 equity in Panhandle's pipe line, which was planned to supply Detroit with an eventual 180,000,000 cubic feet of gas daily. If Consolidated does not take that amount, Detroit gas consumers will go on paying for a part of the expanded Panhandle facilities, while getting no use of them.

There is little doubt that Detroit will need both the Panhandle facilities and those planned by Consolidated. Apart from the home-heating demand, a generous supply of natural gas is vital to the city's industrial growth. By 1950, a market almost certainly will exist for all the gas both companies would be in a position to supply.

Having tried for a solution and failed, the council should not give up. The obstacles in

the way, however valid they may appear to the rival companies, are at odds with the common sense of the situation.

The council should continue its effort to assure Detroit, now and in the future, a capacity gas supply from both sources.

[Article that appeared in the Detroit Times on January 16, 1948, written by James Inglis, city hall reporter]

SEEK COURT BAN ON CONSTRUCTION—CITY PUSHES FIGHT ON SECOND PIPE LINE

Common council will continue to fight the construction of a second natural-gas pipe line to Detroit until there is an ironclad guaranty that the flow of gas through the present pipe line continues for at least 18 years.

Assistant Corporation Counsel James H. Lee will appear in Federal court in Washington Monday to support a lawsuit seeking to stop work on the Michigan-Wisconsin pipe line, now under construction from Kansas to Michigan.

FIVE-YEAR STALEMATE

Common council failed yesterday in an attempt to break the stalemated negotiations between the two big utility firms that have been fighting for more than 5 years over the Detroit gas market.

W. G. Maguire, chairman of the board of the Panhandle Eastern Pipeline Co., Detroit's present supplier, was summoned from New York City for a face-to-face showdown with Henry Fink, president of the Michigan Consolidated Gas Co.

After an angry exchange of conflicting views the session broke up in complete disagreement.

Council President George Edwards informed the two utility chieftains that they owed it to the people of Detroit to sign a new 15-year contract starting in 1951 which would guarantee that gas would continue to flow through the old pipe line to Detroit in at least its present volume.

In behalf of the local gas company, Fink offered to sign up for 32,000,000,000 cubic feet a year, the amount that Panhandle furnished Detroit in 1945.

CITY'S DEMAND

Edwards with the tacit support of the other members, insisted that the city would settle for nothing less than 45,000,000,000 cubic feet a year, approximately the amount of gas supplied by Panhandle in 1947.

Panhandle officials, including Edward Budrus, president, and Fred H. Robinson, attorney, offered to supply Detroit with any amount from 45,000,000,000 up to 60,000,000,000 cubic feet a year for the 15-year period after the present contract expires in 1951.

They contended that with the underground storage facilities in central Michigan this would be sufficient to take care of all of Detroit's future needs.

The Panhandle pipe line is being enlarged at present from a daily capacity of 125,000,000 cubic feet to 180,000,000 cubic feet, Panhandle officials said.

Maguire told the council his company wanted to use most of this new pipe line capacity to serve Detroit.

"We don't propose to be used merely as a stand-by facility for the new Michigan-Wisconsin pipe line," he added.

Lee, the city's authority on natural gas matters, provided the clinching argument which put the council in Panhandle's corner.

"We have Panhandle under regulation now," Lee declared.

"We fought a long, tough rate case from the Federal Power Commission clear through the Supreme Court to get the rate for gas at Detroit reduced to 18½ cents.

"It has meant millions of dollars in savings to Detroit gas users and will mean millions more in the years to come.

"Why should we throw all this away? We have no guaranty whatsoever what the price of gas would be from the new pipe line."

Maguire charged that the wholesale price of gas from the new pipe line would be 32 cents instead of the 18½-cent rate now in effect.

The new Michigan-Wisconsin pipe line which will be owned by Michigan Consolidated Gas Co., is actually being constructed at present. The 1,200-mile line from Kansas to Michigan by way of Wisconsin will cost $105,000,000 and is scheduled for completion by the end of 1949.

The Federal Power Commission and the Securities and Exchange Commission have given their approval. The lawsuit in Washington is an appeal by Panhandle from the Federal Power Commission order authorizing the new line.

Up to this point the city government of Detroit, largely at the insistence of Lee and former Corporation Counsel William E. Dowling, has opposed the new line.

Yesterday's common council debate was the result of an effort by Michigan Consolidated to get the city government to change its position.

THE OIL SITUATION IN NEW ENGLAND

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I am very happy to be able to make a different kind of a report this morning not only to the New England delegation but to the membership of the House as a whole than those I have had to make in the last few days. Just before I left my office I received a letter from Mr. John R. Steelman with reference to the recommendation as to reconversions from oil to coal which had been made December 13, 1947, by a subcommittee of the New England delegation. I understand a similar letter has been sent to each member of the subcommittee.

The letter is as follows:

THE WHITE HOUSE,
Washington, January 19, 1948.

The Honorable JOHN W. HESELTON,
United States House of Representatives,
Washington, D. C.

MY DEAR MR. HESELTON: This is further in reference to my letter of December 19 regarding the investigations being undertaken in connection with possible conversion from oil to coal in Government buildings.

The Federal Works Agency, which is conducting this investigation, has sent me an interim report, and I attach copy hereto for your information. Their final report should be available to us shortly after January 22.

I have inquired of the Department of the Army regarding the two conversions from coal to oil reported by Mr. Drew Pearson, concerning which you inquired in your letter of January 13. I am advised that the conversion at Fort Myer, Va., was planned and contracted for, but has been stopped by the Department of the Army since the fuel-oil shortage became evident. Stewart Field, N. Y., is under the United States Military Academy, West Point, and information regarding activities at this field is not immediately available. However, on December 6 the Department of the Army issued a similar stop order on all such conversions, except on specific approval. They are inquiring as to the current status of this reported conversion, and I will write to you again as soon as I have full information.

Sincerely,

JOHN R. STEELMAN.

I also insert the letters of J. W. Follin, Assistant Administrator, Federal Works Agency, to Mr. Steelman, January 13, 1948 and January 16, 1948, and of Acting Secretary of the Navy to General Fleming, January 9, 1948:

FEDERAL WORKS AGENCY,
Washington, January 13, 1948.

Hon. JOHN R. STEELMAN,
Assistant to the President,
The White House, Washington, D. C.

MY DEAR DR. STEELMAN: Reference is made to my letter of December 31 which reported to you the holding of a meeting in this office on the subject of possible conversion of oil-burning plants in the Government buildings to the use of coal, pursuant to your request of December 19.

In my letter I advised that we had requested an interim report by January 8 from the various Government agencies represented at the meeting advising of their accomplishments in surveying the various buildings under their supervision to determine the possibilities of making such conversions.

We have received responses from a number of the departments and agencies which convey the results of their studies to date and report their actions in circularizing their field offices to secure the desired information. These preliminary reports indicate that in locations where it is practicable to convert from oil to coal this work would require from 2 months upward. This would indicate that in hardly any case would it be possible to convert a plant in sufficient time to affect any appreciable saving this year. However, if, as forecast by Mr. Max Ball at our meeting, the present shortage should continue for a period of 5 years, it would appear that those conversions deemed advisable could be completed before the next heating season.

Our preliminary reports bear out also the points made in my letter that a great majority of Government buildings are already heated by coal; also that the cost of making conversions from oil to the use of coal would be very considerable, and that in the case of such changes it would be necessary to consider the employment of firemen to operate the plants, which would entail still more expense.

Being provided at this time with incomplete returns, we will defer the making of any recommendations as to the general policy to be followed and will summarize all of the information and make such recommendations as appear reasonable after receipt of the remainder of the reports on January 22.

Sincerely yours,

J. W. FOLLIN,
Assistant Administrator.

FEDERAL WORKS AGENCY,
Washington, January 16, 1948.

Hon. JOHN R. STEELMAN,
Assistant to the President,
The White House, Washington, D. C.

MY DEAR MR. STEELMAN: Reference is made to my letter of January 13 which advised you of the contents of interim reports received from the various Government agencies in connection with their survey of their building operations throughout the country to determine the practicability of converting buildings now heated with oil to the use of coal.

Since that date I have received a letter from the Office of the Secretary of the Navy which reports their ability to save substantial amounts of fuel oil without delay or cost since the plants involved are at present equipped to burn oil or coal without modification. I am sending you a copy of this letter since I believe it will be of interest to you and without waiting for a final report as of January 22.

After receiving all of the reports from the departments, we will submit the summary

of the data contained for your information along with any recommendations which may appear appropriate.

Sincerely,

J. W. FOLLIN,
Assistant Administrator.

JANUARY 9, 1948.

Gen. PHILIP B. FLEMING,
Administrator, Federal Works Agency.

MY DEAR GENERAL FLEMING: The Navy Department was represented at the conference held December 30, 1947, in the Federal Works Agency on the subject of converting from fuel oil to coal in Government buildings, both in Washington and in the field. All agencies represented at the conference were requested to conduct surveys and to submit reports to the Administrator of the Federal Works Agency of reductions in fuel-oil consumption possible within available appropriations.

The information required for the report desired is available in the Navy Department obviating the necessity of conducting a survey of field activities. The Navy Department has taken positive steps as a routine procedure to conserve all utilities including fuel oil, directly and indirectly. Reports received from the field indicate the fuel-conservation program is being administered effectively through special attention to temperature control and avoiding wasteful practices. It is believed this program has no effect on the present fuel-oil situation, since the conservation of all utilities is the continuing objective of the Department as a matter of economy without regard to availability of fuel.

A substantial reduction in the present rate of fuel-oil consumption can be made by the Navy Department at certain shore establishments presently equipped to burn either fuel oil or pulverized coal. The activities and the estimated quantities of coal and fuel oil involved in this category are listed below:

Field activity	Annual consumption, bunker C fuel oil	Equivalent consumption, bituminous coal
	Barrels	*Tons*
Norfolk naval shipyard, Portsmouth, Va.	590,000	135,000
Naval Station, Norfolk, Va.	610,000	140,000
Naval Air Station, Quonset Point, R. I.	210,000	48,000
Boston Naval Shipyard Annex, South Boston, Mass.	10,000	2,300
	1,420,000	325,300

The change can be accomplished as soon as adequate coal supplies are provided, and should result in a substantial reduction in fuel-oil consumption during the current heating season.

Further reduction in the consumption of fuel oil in succeeding years would result if certain facilities presently equipped to burn only fuel oil were equipped to burn also pulverized coal or gas. Funds are not presently available for projects in this category.

Sincerely yours,

W. JOHN KENNEY,
Acting Secretary of the Navy.

Obviously, the most constructive and most encouraging development is the action of the Navy Department. You will note the estimated annual saving of bunker C fuel oil of 1,420,000 barrels. The conservation of more than 118,000 barrels of this type of oil monthly at these four installations will help. Too, the release of tanker space should be helpful.

I call your attention particularly to the sentence:

The change can be accomplished as soon as adequate coal supplies are provided and should result in a substantial reduction in fuel-oil consumption during the current heating season.

This, following the Navy's attempt to help by saving from its stocks at Melville, R. I., is a shining example for other Government departments and agencies.

Next, in terms of encouragement, is the news in Mr. Steelman's letter that the plans and contracts for conversion to fuel oil at Fort Myer, Va., has been stopped by the Department of the Army, "since the fuel shortage became evident." While the date of the order is not clear, it is only indirectly a matter of concern. The important thing is that an unknown amount of fuel oil has been saved by this action. The further report on the current status of the conversion to oil planned for Stewart Field, N. Y., will be welcome. And it is good news that the Department of the Army issued a similar stop order on all such conversions, "except on specific approval." Of course, the question arises why the Army has taken only the limited step of stopping conversions to oil, with possible exceptions, when the Navy has been able to go so much further and convert existing oil heating installations to coal.

However, the action of both these Departments stand out in marked contrast to the many doubtful reasons given by other departments and agencies for their inability to help. Obviously, no buildings now being heated by coal are of importance. But it is certainly debatable as to whether the cost of converting from oil to coal or of employing a few firemen can be weighed against the shortage of fuel oil in parts of this country and be held by any reasonable person to be of any validity. The existing cost of trying to meet this emergency upon individual citizens and upon States, counties, and municipalities would far outrun the cost to the Federal Government for its efforts. The Navy is not bringing up that sort of specious objection. The Army is not. It will certainly be entrusted to the people who have been cold, are cold now, and may be cold throughout this winter to know all the facts. Is it beyond reason to ask the heads of those agencies and departments to reexamine the facts on both sides of this problem and try to take a little more interest in the individual citizen? Maybe they could even find a way to save a few dollars in their terrific budgets to absorb the costs they parade as excuses for not wanting to act.

Mr. Follin's doubt as to the feasibility of action because of the time element is answered by his own reference to Mr. Ball's forecast of a shortage for 5 years. May I point out that our telegram to the President was sent on December 13. This is January 21. Apparently, if prompt action had been taken some conversions could have been completed by the middle of next month. We have cold winters in parts of this country which do not end until April. If we have continued subnormal temperatures in New England until then we are not going to be very grateful to those agencies who could have helped us by converting by mid-February and thereby lent us a hand to get by until spring up our way.

But most important is the possibility of a 5-year shortage. You all recall Secretary Forrestal's testimony Monday on this problem. I hope the reluctant dragons who head these agencies will read his testimony and that they will follow the example of the Navy and Army in filing their final reports tomorrow. It is not too late yet.

SPECIAL ORDER GRANTED

Mr. REES. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore entered, I may be permitted to address the House for 10 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

PERMISSION TO FILE REPORT

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to have until midnight tonight to file a report.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

REDUCING THE PUBLIC DEBT

Mr. POAGE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. POAGE. Mr. Speaker, every honest citizen of this country recognizes the necessity of paying his debts, even when it hurts. Every citizen knows it is much easier to pay his debts while his income is high. Some people find it hard to understand that it is just as necessary for a government to pay its debts as it is for an individual to do so, and that it is equally desirable that payments be made while income is high. Actually in the case of a government there is not only the pressure of honesty and of maintenance of credit but there is the not too widely understood fact that the existence of a large public debt tends to destroy the value of money and to increase the cost of living. The use of tax money to pay the public debt during periods of high income is one of the most effective deflationary devices.

Most Members of this House will agree that we should make substantial reductions in our public debt while incomes are high. Many Members recognize the inflationary effect of drastic tax cuts, but say that it is impossible to give any assurance that the debt will be reduced even if taxes are kept high. They feel that as a body we would succumb to the same temptation to spend that assails many individuals who have cash on hand. I fear that there is much justification for this attitude.

The President has estimated that we will have something in excess of $7,000,000,000 surplus at the end of the next fiscal year should we retain our present tax income and appropriate in keeping with his suggested budget. I have, therefore, introduced a bill to appropriate the $7,000,000,000 to the payment of the public debt.

If we will do this now at the beginning of the session, we can assure ourselves and the people that the debt will be reduced. Should we refuse, I fear we may succumb to the temptation to court po-

litical support through the promise of excessive tax reduction at the expense of debt retirement. If we are sincere about wanting to pay the debt, let us begin paying it.

EXTENSION OF REMARKS

Mr. JONES of Alabama asked and was given permission to extend his remarks in the RECORD and include an editorial appearing in the Huntsville Times entitled "Tax Reduction Not Everything."

AMENDING PHILIPPINE REHABILITATION ACT OF 1946

Mr. VORYS. Mr. Speaker, I call up the conference report on the bill (S. 1020) to amend the Philippine Rehabilitation Act of 1946, as amended, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1020) entitled "An act to amend the Philippine Rehabilitation Act of 1946, as amended", having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

"$12,000,000"; and the House agree to the same.

JOHN M. VORYS,
WALTER H. JUDD,
JAMES G. FULTON,
JAS. P. RICHARDS,
MIKE MANSFIELD,
Managers on the Part of the House.

HUGH BUTLER,
SHERIDAN DOWNEY,
ERNEST W. MCFARLAND,
GEO. W. MALONE,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1020) entitled "An Act to amend the Philippine Rehabilitation Act of 1946, as amended", submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House amendment reduced the sum available to pay the expenses of the Philippine War Damage Commission from $16,000,000 to $8,400,000. The committee of conference recommends that the Senate recede from its disagreement to the amendment of the House, with an amendment increasing the amount to $12,000,000, and that the House agree to the same. This increase is one of allocation only, and does not increase the total authorization of $400,000,000 already provided by law for settling Philippine war damage claims.

JOHN M. VORYS,
WALTER H. JUDD,
JAMES G. FULTON,
JAS. P. RICHARDS,
MIKE MANSFIELD,
Managers on the Part of the House.

Mr. VORYS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

SPECIAL ORDER GRANTED

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore entered, I may be permitted to address the House for 10 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CALL OF THE HOUSE

Mr. JENSEN. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Obviously a quorum is not present.

Mr. HALLECK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 2]

Barden	Gary	Morgan
Bland	Gavin	Morrison
Bloom	Granger	Nicholson
Boggs, La.	Harrison	Nixon
Buckley	Hart	Norton
Bulwinkle	Hartley	Passman
Byrne, N. Y.	Hébert	Pfeifer
Byrnes, Wis.	Heffernan	Philbin
Cannon	Hendricks	Potter
Chapman	Hinshaw	Powell
Chiperfield	Horan	Reed, Ill.
Clark	Jenkins, Pa.	Rivers
Clippinger	Jones, N. C.	Rooney
Coudert	Judd	Sasscer
Cox	Kee	Scoblick
Cravens	Kefauver	Scott, Hardie
Davis, Wis.	Kennedy	Shafer
Dawson, Ill.	Kilday	Short
Dirksen	Lemke	Stratton
Domengeaux	Ludlow	Thomas, N. J.
Dorn	McMillen, Ill.	Vail
Douglas	Marcantonio	West
Fellows	Mathews	Wigglesworth
Foote	Merrow	
Fulton	Miller, Calif.	

The SPEAKER. On this roll call, 357 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

EXTENSION OF REMARKS

Mr. LEWIS asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD.

Mr. KLEIN asked and was given permission to extend his remarks in the RECORD and include a resolution and an editorial.

SPECIAL ORDER GRANTED

Mr. KLEIN. Mr. Speaker, I ask unanimous consent that on tomorrow, at the conclusion of the legislative program of the day and following any special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDING CERTAIN PROVISIONS OF THE RECLAMATION PROJECT ACT OF 1939

Mr. ROCKWELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2873, with Mr. DONDERO in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday, January 20, the Clerk had read the first section of the committee amendment.

Are there any amendments to the first section of the bill?

Mr. JENSEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JENSEN: On page 6, strike out line 11 to the word "new" in line 25 and insert the word "A" before the word "new" in line 25.

Mr. JENSEN. Mr. Chairman, the purpose of my amendment I am sure is very clear to those who have read this section of the bill. Section 9 of the Reclamation Act of 1939, in the opinion of many who are closely associated with and have dealings with the Interior Department, gives the Secretary of the Interior more power than any man in Government should have. This section which I propose to strike out by my amendment gives the Secretary additional power, if not in specific wording in that section at least by inference.

Starting in line 23, here are some words I should like to read: "shall be deemed authorized and may be undertaken by the Secretary."

This means that any project would be authorized if the Secretary felt that it should be authorized and, by the simple fact that he says it is authorized, it has the effect of law, and circumvents the prerogatives of the Congress of the United States.

I call your attention to the fact that right now in the files of the Interior Department you can find several hundred projects which they hope to have authorized, amounting to some $6,000,000,000.

If this section remains in the bill, I am thoroughly convinced that all the Secretary of the Interior would have to do would be to say, "I am in favor of those projects, and I recommend that they be authorized." Then the folks who are interested in these projects would feel that they were authorized because the word would go out that the Secretary's word was equal to an authorization, and then they would pour it on Congress to appropriate money to build those projects. I think that is too much power to give any man.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. JENSEN. I am glad to yield to the gentleman.

Mr. FERNANDEZ. The provision to which the gentleman has referred, as is shown by the report on page 5, is word

for word the language now contained in existing law. Therefore, this bill does not give the Secretary any more power than he now has under existing law. The effect of the gentleman's amendment would be to restrict considerably the powers now given to the Secretary of the Interior.

Mr. JENSEN. If that were the case, then I certainly believe that this amendment is justified. If it would restrict the Secretary in the authority that he has under section 9 of the Reclamation Act of 1939, then I certainly believe that this amendment is justified.

Mr. MILLER of Nebraska. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the amendment offered by the gentleman from Iowa is one of several that will be presented to the committee for their consideration. I would like to point out that the Subcommittee on Irrigation and Reclamation of the Committee on Public Lands has been considering this legislation for at least 3 years. I have been a member of the committee now going on 6 years. The committee has for at least 3 years carefully considered legislation which might clarify and set up a yardstick not only for reclamation projects, but for the development of electrical energy. The amendment offered by the gentleman from Iowa does in his opinion restrict the Department of the Interior. I think if you read the report on page 5, which is available to you, you will find that there are very few changes from the existing law. There are a few minor changes. But the thing that I would like to point out to the committee is that the bill as presented to you today represents the composite judgment, of all groups interested in reclamation development. It has had careful, complete study—the judgment of the committee presenting this bill to you ought to have careful consideration. This is a technical bill. It is difficult to understand. We have had to compromise in the committee and have had to compromise with the people out in the field. It does clarify, for instance, the Solicitor's opinion which was handed down in June 1944. The opinion was not pleasant to any of us. We did not like it. Yet the Department of the Interior had to follow the Solicitor's opinion until changed by Congress. It clarifies the Solicitor's opinion. The bill sets up new yardsticks for reclamation projects. Many of the present projects would not be feasible unless a new, more flexible yardstick be established.

In my opinion that should have considerable weight with the committee. The yardstick that is set up ought to be a little more flexible today than it was 20 years ago.

Money appropriated for irrigation is paid back, without interest, and money for electrical-power projects is paid back with interest. This brings new wealth to the United States. This bill affects the 17 Western States. There is a shortage of electricity in those States. Remember this money is paid back to the Treasury of the United States with interest.

The bill does spell out and settle some long-standing conflicts over the application of the interest rates on power investment. This has been needed, and I think the gentleman from Iowa, who is a member of the Committee on Appropriations, has been disturbed from time to time as to how the interest rates are being applied to these power projects.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Nebraska. I prefer not to yield at this point.

Mr. JENSEN. I just wanted to say that I am in perfect harmony with that section of the bill that recaptures the interest component.

Mr. MILLER of Nebraska. I am glad the gentleman is in harmony with that part of the bill.

There is another section of the bill that sets up a longer period—78 years, or the life of the project. That sounds like a long time, but it is not a serious thing. I would also point out to you who are objecting to this type of legislation that the last section of the bill sets up a provision that does not alter or amend or modify in any way the provisions of the act of December 22, 1944, which was the O'Mahoney-Millikin Act, which this Congress adopted. The committee should be supported and this bill adopted.

The CHAIRMAN. The time of the gentleman from Nebraska [Mr. MILLER] has expired.

Mr. McDONOUGH. Mr. Chairman, I rise in support of the amendment. I want to read the section of the bill that this amendment will strike out, so that those who have any doubts about the authority that the Secretary of the Interior now has under the present Reclamation Act may understand what this amendment would do to correct that. The section that this amendment strikes out begins on line 11, page 6, and reads as follows:

> If the proposed construction is found by the Secretary to have engineering feasibility and if the repayable and returnable allocations to irrigation, power, and municipal water supply or other miscellaneous purposes found by the Secretary to be proper pursuant to subdivisions (3), (4), (5), and (6) hereof, together with any allocation to flood control or navigation made under subsection (b) of this section, and together with any allocation made pursuant to subdivision (7) hereof, which shall be nonreimbursable and nonreturnable, equal the total estimated cost of construction as determined by the Secretary, then the new project, new division of a project, or supplemental works on a project, covered by his findings, shall be deemed authorized and may be undertaken by the Secretary.

Evidently that is a repetition of what is now in the 1939 Reclamation Act as far as authority is concerned. This amendment amends that out and gives to the Congress the power to determine whether these projects shall be feasible and shall be initiated.

In my opinion, the original act should be amended. The authority was too extensive and if we are attempting to reduce bureaucratic authority in the Government of the United States, here is an opportunity to do it. I do not want to appear in any way to be opposed to the extension of reclamation or to the extension of hydroelectric power, or to the development of the national resources of the Nation. I certainly do not want to usurp the authority that Congress is supposed to have and turn it over to the head of a Department who may very justifiably and very conscientiously, and in many instances do a good job, but nevertheless the people of the United States would like for us to do that job and not give it to the head of any department.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. McDONOUGH. I yield.

Mr. FERNANDEZ. This would enlarge the scope of the bill. Does not the gentleman believe that if that were to be done it should be submitted to the committee and the committee consider it, and the gentleman should appear before the committee asking to broaden the scope of this bill? I do not think that should be done on the floor on such brief consideration as we can give it on the floor.

Mr. McDONOUGH. I do not agree with the gentleman from New Mexico on that theory for the reason that certainly the Members of Congress can understand if the language is as plain as it is in this section and the amendment proposes to remove that section of the bill, the Members can understand that our authority is being taken out of our hands and has been out of our hands for a long time, since the 1939 Reclamation Act, and given to the Secretary of the Interior.

The people send us here. They want and expect us to decide whether or not projects are feasible or not feasible and whether they should be undertaken.

I do not quarrel with that section of the bill which leaves authority with the Secretary as to the 3-percent interest allocation for new projects under the Solicitor General's opinion; I agree with that. It has been reduced to one-half of 1 percent and to a 2½-percent interest rate. That is fine; but I certainly do not think we should leave the authority that the Secretary of the Interior has under the Reclamation Act in this bill. Here is an opportunity in the House to reduce that authority and bring it back to the Congress of the United States.

Mr. MILLER of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. McDONOUGH. I yield.

Mr. MILLER of Connecticut. I am not an expert on reclamation and irrigation projects, but it seems to me there is quite a similarity between reclamation works and the river and harbors works and flood-control projects. They have to come to Congress for authorization for flood-control projects and river and harbor projects. Why should not reclamation projects be handled in the same way?

Mr. McDONOUGH. By all means they should be. We should follow normal procedure that is followed in these other categories and let committees of Congress and the Congress itself decide the feasibility of projects.

Mr. MILLER of Connecticut. We have the Board of Army Engineers in whom we have great confidence and certain funds are turned over to them each year for river and harbor projects.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. BARRETT. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am opposed to this amendment. The gentleman from California [Mr. McDONOUGH] made the statement that this provision of law has been in effect since 1939. I believe he is mistaken, as I am informed this provision has been an existing law for 22 years. I see no reason why it should be repealed at this time. The Congress has several checks on the discretionary power that is lodged with the Secretary of the Interior. The Secretary has exercised that discretion very well for the last 22 years. The gentleman from Iowa [Mr. JENSEN] can finally determine if the power has been exercised correctly. He is the one man in this Congress who has more power and authority than the Secretary of the Interior himself, because after the Secretary of the Interior makes an exhaustive study and determines that the project comes within the formula as set forth by the Congress then he must come to the Appropriations Committee and report that the project is sound and feasible and that it will pay out under the provisions of law as outlined by the Congress itself, and therefore request the money to build the project. Then is when the Appropriations Committee of this House may interrogate the Secretary of the Interior and it can turn down the project if it so determines.

What is the effect of the amendment? The amendment changes the whole procedure that Congress has adopted and approved since 1926, and says that the Secretary of the Interior and the Representatives from the West must get authorization from the Congress for every project that is proposed. That will be such a cumbersome undertaking that it will make it difficult if not impossible to authorize these projects.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from Iowa.

Mr. JENSEN. This amendment takes nothing away from the weight and effect of the present law, specifically referring to section 9 of the Reclamation Act. It leaves that intact but simply provides and assures us that no additional authorization and power will be given to the Secretary of the Interior to authorize more projects.

Mr. BARRETT. I am very much afraid that the gentleman is entirely mistaken because existing law provides for all of the elements that are outlined on page 6, from line 11 to the bottom of the page. That is in existing law at the present time and you are repealing it.

Mr. JENSEN. Even if it does take some power away from the Secretary of the Interior it is right and proper that that be done and the gentleman should not worry about that for a minute.

Mr. BARRETT. That is where we differ. The gentleman says in the first instance it takes away no power. I say it takes the entire power away from him. I say that the Congress of the United States for the last 22 years has adopted a different policy and it has followed it with approval. The Appropriations Committee has appropriated for these projects year after year; it has worked successfully, and I can see no good reason why we should change it at this time.

Mr. ELLIOTT. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from California.

Mr. ELLIOTT. If we had this same kind of amendment in effect to take power away from the Secretary of the Interior, we could have taken care of the gentleman's Jackson Hole Monument. Does he remember that?

Mr. BARRETT. The Jackson Hole Monument was an outrageous abuse of the discretion delegated to the Executive, and the Congress so determined when it repealed the order creating the monument.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from California.

Mr. McDONOUGH. Would the gentleman agree that if this power is granted to the Secretary of the Interior the same power should be granted, we will say, to the Secretary of National Defense in the Cabinet, if he thinks it proper, to determine the feasibility of putting any particular project he wanted in the United States into effect without coming to the Congress? Does the gentleman think that would be proper?

Mr. BARRETT. The Congress of the United States since the early days has taken the position it cannot carry on all the clerical work of the Government. The Constitution of the United States says that the Congress alone shall coin money, for instance, but of course the Congress doesn't actually print the bills. It leaves that work to others.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. HARNESS of Indiana. Mr. Chairman, I offer a substitute for the pending amendment.

The Clerk read as follows:

Substitute amendment offered by Mr. HARNESS of Indiana to the amendment offered by Mr. JENSEN: On page 4, line 15, to page 7, line 15, delete all and substitute "Section 9 (a) of the Reclamation Act of 1939 is hereby repealed."

The CHAIRMAN. I will say to the gentleman from Indiana that is not a substitute for the Jensen amendment. The Jensen amendment applied only to the section at the bottom of page 6 of the bill.

Mr. HARNESS of Indiana. It is the same section that I am striking out by my amendment.

Mr. CASE of South Dakota. Mr. Chairman, I make a point of order against the substitute amendment.

The CHAIRMAN. The gentleman may offer his amendment after the Jensen amendment is disposed of.

Mr. HARNESS of Indiana. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HARNESS of Indiana. Mr. Chairman, the Jensen amendment proposes to strike out, beginning on page 6, line 11, all of that section down to line 25 and add the word "a." My amendment strikes out that same section and also provides for the repeal of the same section which is in the 1939 act.

The CHAIRMAN. The Chair must hold that the amendment is not germane to the Jensen amendment. The gentleman's amendment can be offered after the Jensen amendment is disposed of.

Mr. HARNESS of Indiana. Mr. Chairman, a further parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HARNESS of Indiana. May I offer this as an amendment to the Jensen amendment?

The CHAIRMAN. That is the same thing in other language.

Mr. HARNESS of Indiana. I proposed it as a substitute.

The CHAIRMAN. I wil say to the gentleman that he will have an opportunity to offer his amendment after the Jensen amendment is disposed of.

Mr. CARROLL. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I think the gentleman from Indiana has placed his finger on what is really happening before this body. He wants to repeal all of section 9–A. Now, the point that the gentleman from Wyoming [Mr. BARRETT] makes is that this law has been in effect 22 years. The repeal of that law is not the real issue before this Committee. We are talking about other things, but in order to draft this legislation we have incorporated in this bill a part of an act that has been in existence for 22 years. The gentleman from Iowa [Mr. JENSEN] now comes before this body and moves to strike out a section of the law that has been in existence for 22 years, and the gentleman from New Mexico [Mr. FERNANDEZ] says, "Give the committee a chance to pass upon that."

I say to the Members here that that is not the real issue; that is not the real reason that this bill comes from the Public Lands Committee, and if the gentleman from Iowa [Mr. JENSEN], or any other Member of this body, wants to bring this issue up in a separate piece of legislation, then it ought to come before our committee, and we ought to have an opportunity to examine and to call witnesses in, and then we can debate that issue as to whether or not we are going to modify the existing reclamation law.

Mr. HARNESS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from Indiana.

Mr. HARNESS of Indiana. This section that the gentleman from Iowa proposes to strike is substantially the same wording as section 9–A of the 1939 act, is it not?

Mr. CARROLL. That is right.

Mr. JENSEN. Now, the 1939 act is the one that gives the Secretary the power and the authority to enlarge existing authorized programs or modify them, and it gives him the right to instigate new ones. It is a complete departure from every other procedure we

have in our system of government, such as the War Department on flood control, where we authorize the engineers to make a report as to its feasibility, and then authorize the project.

Mr. CARROLL. I think the gentleman from Indiana will find, as expressed by the gentleman from Wyoming [Mr. BARRETT] that this has been the existing practice for approximately 22 years. This is a delegation in a sense, to the Secretary of the Interior, to examine the economic feasibility of various projects and then to make a determination and authorization which, as the gentleman from Wyoming said, has been the practice for 22 years, without any great burden on the Congress, without any great burden on the Committee on Appropriations. Now, actually Congress retains the purse strings. Congress retains the controls, because Congress must appropriate the money.

Mr. HARNESS of Indiana. Mr. Chairman, will the gentleman yield further?

Mr. CARROLL. Yes.

Mr. HARNESS of Indiana. Does the gentleman agree with the policy where an agent of the executive department may agree upon a certain project, deem it to be feasible and, in a measure, start upon that project before the Congress has ever authorized it?

Mr. CARROLL. It is entirely dependent, in my judgment, when you talk about economic feasibility, upon whether or not that project can pay its way out. If it can pay its way out—and the Secretary must be considering all the time what the Committee on Appropriations will do, too—then he makes that authorization. If it does not pay its way out he cannot make the authorization, and you have a double check when it comes before the Congress.

Mr. HARNESS of Indiana. I would like to say this, that I am one of the friends of reclamation and irrigation. I am heartily in accord with the program, but I am unalterably opposed to delegating the power of Congress to a bureau chief or to the Secretary of the Interior, who may obligate the Congress before he has been authorized to do so.

Mr. CARROLL. Will the gentleman agree with me that if we are going to debate the issue, we ought to do it when it is germane? We ought to have a piece of legislation before a committee. Then we can call in witnesses and explore that particular issue. You may have an important point, but it is not the chief issue under consideration in this bill.

Mr. CASE of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from South Dakota.

Mr. CASE of South Dakota. I think it should be perfectly well understood by the House that even if the Secretary made a finding of feasibility he could not obligate any funds. All he could do would be to present estimates to Congress. There would be no funds available until appropriations had been made.

Mr. CARROLL. Exactly.

Mr. CASE of South Dakota. Mr. Chairman, I move to strike out the last word.

Mr. WELCH. Mr. Chairman, will the gentleman yield briefly?

Mr. CASE of South Dakota. I yield to the gentleman from California.

Mr. WELCH. Mr. Chairman, when members of the Committee on Public Lands take the floor in behalf of this bill, which was reported unanimously by the committee, they should not be interrupted to the degree that nearly their whole 5 minutes is occupied by the opponents of the bill.

The CHAIRMAN. The Chair may say to the gentleman that that is entirely in the control of the gentleman who has the floor.

Mr. CASE of South Dakota. Mr. Chairman, if I may have the attention of the chairman of the Committee on Public Lands, yesterday I asked a question but unfortunately there was not time to get the answer. The question I asked yesterday I should like to ask again now for the purpose of the record. I address it to the chairman of the committee reporting the bill. Does the phrase "estimated cost of construction," which is in subparagraph 2 at the top of page 5, contemplate and mean that the estimated costs of the proposed construction will include the liquidation of damages resulting from the construction and the relocations, alterations, and replacements incident to or required by the proposed construction?

Mr. WELCH. Mr. Chairman, the Committee on Public Lands met this morning. The gentleman from South Dakota [Mr. CASE] appeared before the committee. The committee is of the unanimous opinion that it is the intent of the language used that the Secretary shall include all of the costs in making his report on the proposed construction.

Mr. CASE of South Dakota. I thank the chairman for that statement.

With respect to the issue which has been under debate under this pending amendment, the point I raise is of course important to that because it bears upon what the estimated cost would be.

Now, then, with respect to the issue here. The record should be clear that if the Secretary makes a finding of feasibility, he cannot then go out and obligate funds on the basis of that. All he gets authority to do is to submit estimates to the Congress. Not until appropriations have been made can he obligate funds. So the decision rests in the hands of Congress as to whether or not you want to take up any project even though a finding of feasibility has been made.

Mr. HARNESS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. CASE of South Dakota. I yield to the gentleman from Indiana.

Mr. HARNESS of Indiana. Does not the gentleman know that under that authority the Secretary may go so far with the project that the Congress then is obligated to make the authorization and the appropriation?

Mr. CASE of South Dakota. No; I do not know that at all, because he does not have a dollar to spend on it.

Mr. HARNESS of Indiana. In other words, it is taken out of the hands of the Congress.

Mr. CASE of South Dakota. No; it is not taken out of the hands of the Congress. The Congress is going to sit there and determine whether it wants to appropriate any money.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. CASE of South Dakota. I yield to the gentleman from Iowa.

Mr. JENSEN. I wish the gentleman would explain why there is so much noise about my amendment and why this section was placed in the bill, since the very first wording of the bill is that section 9 (a) of the Reclamation Project Act of 1939 is amended to read as follows, and that language is almost identical with section 9 (a) of the Reclamation Act of 1939. My amendment does not disturb it.

Mr. CASE of South Dakota. There are two reasons, as far as I know. I am not a member of the Committee on Public Lands, which really should answer the gentleman's question, but as I understand it, and as I have heard this debate, the first reason is that the Committee on Public Lands finds it has a lot to do, and it wants to have advice based on the engineering investigations. So it says, we ask the Secretary of the Interior through the appropriate engineers and technicians he has, to make an investigation and find out whether or not this is a feasible project. The committee is not composed entirely of engineers, so it proposes that the Secretary determine whether or not a project has engineering and economic feasibility and what the proposed costs are, and if he finds that it is feasible, then he is our agent to the extent of making a finding. He can submit estimates to the Congress and if Congress wants to make appropriations, they may do so.

The second reason, I understand, is that the present law is not explicit enough in items covered in subparagraph 7 which refers to fish and wildlife costs and other things of that sort. The committee merely felt that the present law should be extended and clarified in a particular or two to be sure that those things would be included in the report.

I yield to the gentleman from Wyoming [Mr. BARRETT] a member of the committee.

Mr. BARRETT. The gentleman from South Dakota is eminently correct. Will he not agree with me, in addition, that in this and other programs the Secretary of the Interior after he determines that the project is feasible, it must be submitted to the Bureau of the Budget, and it must concur in the findings. In addition to that, it must be submitted to the governors of the States in which the projects are located and they must, in a measure, concur, and, after all, the Committee on Appropriations of the Congress and the Congress itself must concur.

Mr. MURDOCK. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, during the debate yesterday the gentleman from southern California [Mr. POULSON] expressed some opposition to the bill and indicated that one of his lines of opposition was fear that the passage of the bill as is would permit the Secretary of the Interior to make a finding of feasibility for the central Arizona project, which is a large

project, and about which there is some controversy. I had no time at the moment on the floor to answer, but I extended my remarks in the RECORD in partial answer, and they will be found on page 366 of yesterday's RECORD.

However, I would like to settle this matter by showing that such fear is unfounded. I talked privately with the gentleman from California [Mr. POULSON] and see that he is present and listening. Wanting to clarify this matter, I phoned the Commissioner of Reclamation and asked that very question: If this bill now before the House should become law, would it make possible a finding of feasibility on the central Arizona project, which was the one that the gentleman from California [Mr. POULSON] particularly mentioned? That phone call was yesterday, that is, last night. I received my reply just a few moments ago and want to read a part of it.

Mr. WELCH. Mr. Chairman, I hope the members of the committee will give strict attention to the communication which the gentleman from Arizona is now about to read.

Mr. MURDOCK. I thank my chairman. I do think this answer is very pertinent because two Members admitted or indicated that they feared the passage of this bill would have certain effects which I feel sure it would not have.

Commissioner Straus said:

In our telephone conversation of yesterday afternoon, you asked me whether the central Arizona project could or would be authorized by the Secretary's finding of feasibility under H. R. 2873, assuming that this bill is enacted or under any other legislation. Your question is prompted by the fear—

He used the wrong word there so far as I am concerned, because I have no fear of such. Continuing quotation:

Your question is prompted by the fear which seems to be entertained by some Members of Congress that the enactment of H. R. 2873 would be used to accomplish authorization of the central Arizona project without an opportunity for the Congress to pass on it. My answer to your question is "No."

Then he gives an elaborate explanation why the answer is "No." I will not take time to read all of it now. The full letter is as follows:

UNITED STATES
DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington, D. C., January 21, 1948.

HON. JOHN R. MURDOCK,
House of Representatives.

MY DEAR MR. MURDOCK: In our telephone conversation yesterday afternoon, you asked me whether the central Arizona project could or would be authorized by a secretarial finding of feasibility under H. R. 2873, assuming that that bill is enacted, or under any other legislation. Your question was prompted by the fear which seems to be entertained by some Members of Congress that enactment of H. R. 2873 would be used to accomplish authorization of the central Arizona project without an opportunity for the Congress to pass on it.

My answer to your question is "No."

Without prejudice to consideration of the central Arizona project on its merits, my answer to your question is predicated upon the following:

1. Any finding of feasibility by the Secretary, whether under H. R. 2873 or existing law, would require a finding that there is an adequate water supply for the project. All of us in the Bureau of Reclamation are keenly aware of the controversy between California and Arizona over the availability to Arizona of this supply of water and of the difficult and delicate questions involved in the controversy. The Bureau of Reclamation is not in a position to make the final and authoritative determination of these questions that must be made before the central Arizona diversion can be considered to be on safe grounds. If for no other reason than this, therefore, there will be no attempt to secure authorization by secretarial finding of feasibility.

2. The proposal to authorize construction of the central Arizona project is already before the Congress, and the Bureau's report on it is being prepared pursuant to a request from the chairman of the Subcommittee on Reclamation and Irrigation of the Senate Public Lands Committee. The Bureau's forthcoming report is not intended as a vehicle for secretarial authorization and would not serve that purpose if it were so intended.

3. Even if some future Commissioner of Reclamation had a different notion from that which I have and could convince the then Secretary of the Interior that he ought to find the project feasible, a report containing that finding would have, under the provisions of section 1 of the Flood Control Act of 1944, to be sent to all of the States of the Colorado River Basin—that is, to Wyoming Colorado, Utah, New Mexico, Nevada, California, and Arizona—for review and comment and an objection by any of the States to any of the plans or proposals contained in the report would automatically require the Secretary to secure congressional authorization before undertaking construction of the project or before asking for appropriations for such construction. In other words, California, like every other State of the Colorado River Basin, has the power to veto any proposal for secretarial authorization of a reclamation project on the Colorado River, no matter how good or poor it may be, and to require that its authorization be by act of Congress. H. R. 2873 does not change this provision of the Flood Control Act of 1944 one whit.

To all this, I may add for the sake of the record that neither you nor any other member of the Arizona delegation has ever requested that authorization of the central Arizona project be accomplished by a secretarial finding of feasibility. None of you has ever so much as hinted that this might be done if H. R. 2873 were enacted. I assure you that authorization of the central Arizona project will not be accomplished in this fashion and that I do not and have never had any intention of recommending to the Secretary that it be so accomplished.

I hope that this explanation will prove helpful in any discussion that may arise concerning the effect of enactment of H. R. 2873 on the central Arizona project. Please feel free to use it as you see fit and call on me for any further information that I can give you.

Sincerely yours,
MICHAEL W. STRAUS,
Commissioner.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. JENSEN. I would like to have you explain what the letter means. I have not yet been able to figure out what that letter means. It means nothing to me.

Mr. MURDOCK. This is it. The charge was made yesterday that very likely, if this bill passed as is, the Secretary of the Interior could make a finding of feasibility for the central Arizona project, thus authorizing its construction without the Congress taking any action. Now, this answer is that, under the bill as is, should it become law, the Secretary of the Interior could make no such finding or authorize the project without the action of Congress. That seems to some Members the very crux of this matter and I want to show it to be erroneous. Why does the Secretary of the Interior not have the power? Commissioner Straus says it is because we passed legislation in 1944 that makes it necessary to submit all such proposals to the States involved and interested. In this case all the States in the Colorado Basin are involved. So that the Secretary of the Interior must submit any projects in the Colorado River Basin to the governors of the 7 States, and any governor would have a chance to veto it. The President or the Secretary of the Interior, under existing law, could not possibly submit a finding of feasibility and authorize such project without submitting it to the Congress.

Mr. POULSON. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. POULSON. If I obtain additional time for you, will you read this letter, which will explain some of the problems?

Mr. Chairman, I ask unanimous consent that the gentleman may be allowed to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California [Mr. POULSON]?

There was no objection.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. JENSEN. Does the gentleman know that the Colorado River Board is opposed to most every section of this bill except the interest component pay-back? Does the gentleman know that?

Mr. MURDOCK. Do you mean the Colorado River Board of California is opposed to the bill?

Mr. JENSEN. The Colorado River Board that speaks for all the Colorado River area, for most of the people.

Mr. MURDOCK. No. I fear the gentleman is misinformed.

Mr. JENSEN. I certainly am not. I can produce a telegram to that effect, if the gentleman would like to read it.

Mr. MURDOCK. You are probably referring to the Colorado River Board of the State of California. I know their stand on it, but that Colorado River Board of California does not speak for all the seven basin States of the Colorado River Basin.

Mr. JENSEN. It speaks for the State of Colorado very plainly.

Mr. SMITH of Ohio. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I cannot yield until I have read a little more from this letter.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. ROCKWELL. I wanted to correct the statement made by the gentleman from Iowa [Mr. JENSEN]. It is not the State of Colorado but the State of California to which he referred. The State of Colorado is very definitely in favor of this bill.

Mr. PETERSON. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. PETERSON. I want to point out that the distinguished chairman of the subcommittee and the distinguished gentleman from Colorado on this side are both supporting this bill.

Mr. MURDOCK. I will ask that the entire letter be placed in the RECORD, but I will just read a portion of it now.

On page 1:

The proposal to authorize construction of the central Arizona project is already before the Congress, and the Bureau's report on it is being prepared, pursuant to a request from the chairman of the Subcommittee on Reclamation and Irrigation of the Senate Public Lands Committee. The Bureau's forthcoming report is not intended as a vehicle for secretarial authorization, and would not serve that purpose if it were so intended.

3. Even if some future Commissioner of Reclamation had a different notion from that which I have and could convince the then Secretary of the Interior that he ought to find the project feasible, a report containing that finding would have, under the provisions of section 1 of the Flood Control Act of 1944, to be sent to all of the States of the Colorado River basin—that is, to Wyoming, Colorado, Utah, New Mexico, Nevada, California, and Arizona—for review and comment, and an objection by any of the States to any of the plans or proposals contained in the report would automatically require the Secretary to secure congressional authorization before undertaking construction of the project or before asking for appropriations for such construction.

In other words, California, like every other State of the Colorado River Basin, has the power to veto any proposal for secretarial authorization of a reclamation project on the Colorado River, no matter how good or poor it may be, and to require that its authorization be by act of Congress. H. R. 2873 does not change this provision of the Flood Control Act of 1944 one whit.

Now, I want in fairness to myself and the Arizona delegation to read one further paragraph:

To all this I may add for the sake of the record that neither you nor any other member of the Arizona delegation has ever requested that authorization of the central Arizona project be accomplished by a secretarial finding of feasibility. None of you has ever so much as hinted that this might be done if H. R. 2873 were enacted. I assure you that authorization of the central Arizona project will not be accomplished in this fashion and I do not and have never had any intention of recommending to the Secretary that it be so accomplished.

Mr. HARLESS of Arizona. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I yield.

Mr. HARLESS of Arizona. Is it not true that under the law as it now exists the Department of Irrigation and Reclamation uses the power vested in it to carry out repairs and minor projects? And would it not be true that if we repealed this section of the law it would not be possible to go ahead and make any repairs without getting authorization? The Department could not put in a bolt or drive a nail without getting authorization from Congress.

Mr. MURDOCK. I should like to elaborate on that for it certainly would hamper the Bureau's work, but I want in the short time I have remaining to plead with my friends from California, including the gentleman from California [Mr. POULSON] and the others who have indicated their fear of this Arizona project coming under this bill—which it will not—I want to plead with them to remove their objection to the bill on that basis because that basis is not valid. I hope my friends will do that and support the bill without amendment. Of course, I am interested in the central Arizona project and also in this general reclamation bill, but I do not regard this measure as necessary to make the other possible. They are different matters.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. ROCKWELL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I should like to get back to the meat of this argument that we have here on this amendment. There seems to be a misapprehension as to the power that the Secretary of the Interior has over reclamation projects. In the first place, for those of you who do not come from the West, may I say that we are talking about projects that are to be entirely repaid, either power or irrigation, and in the case of irrigation the money is paid back without interest. In the case of power the money is repaid with interest. Congress adopted the formula for this repayment in the Reclamation Act of 1939 and it was in the act before that to some extent. In addition to that, if a project cannot be paid out in full under that program it must take the same procedure as flood control and come to Congress for authorization.

It is very difficult to get authorization under the formula that this amendment would take out of the bill. First, it must satisfy and be approved by the State where the project is to be built, and if the water affects several States it must also have the approval of the other States using the water. The gentleman from Arizona [Mr. MURDOCK] mentioned that in a letter which he read. A matter that affects the water of Arizona must be approved by all of the upper division and the lower division States because they use that water. In the course of investigation and study the Bureau must keep in constant touch with local groups, the Board of Army Engineers, and any others who might be affected in any way.

After a report is completed the Bureau must submit it to the governors of all the affected States on that stream. Ninety days is allowed to review that report.

If the Bureau does not approve the report or if the States do not approve it, it must be so reported to Congress with objections. In Colorado the State conservation board receives these investigation reports and handles these matters for the Governor. They in turn take it up with the local water users and local committees before making a reply.

New projects generally cannot be built unless they have the help of power or a longer time to repay.

In my opinion, this is a great protection and saves the Congress a lot of work. I might say you might just as well ask Congress to approve every loan made by every agency of the Government.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield to the gentleman from California.

Mr. McDONOUGH. Will the gentleman explain what the duties or privileges of the Secretary of the Interior are under the 3-percent component, according to the Solicitor General's opinion, insofar as initiating new projects without authorization of the Congress? Is he not privileged to use some of that money to initiate a new project without the authorization of the Congress and would he not be given additional authority under this amendment to do likewise with the one-half percent given him?

Mr. ROCKWELL. I do not think it is additional authority. In my opinion, it is a little less authority than under the present situation, according to the Solicitor's opinion. The 3 percent to which the gentleman refers, which is charged, may be used to help amortize and pay out the project. Under this bill 2 percent of that is paid in interest and one-half percent may be used for that purpose. That may be figured in as help to irrigators to pay off a project.

Mr. McDONOUGH. Right, but this section of the bill we are debating says he has authority to proceed then on a new project, a new division of a project or the supplemental works on a project covered by his findings. It does not refer to repairs and alterations and correction of a job. It says it has authority to proceed on a new project.

Mr. ROCKWELL. I think that is the same law that has been in existence since 1939 under which we have been working out West all these years.

Mr. McDONOUGH. It does not limit the amount of the cost of the new project, so that he could authorize, we will say, a project costing $50,000,000 without the authorization of the Congress, then go to the Appropriations Committee and say, "Well, the people out there need this, we have found it feasible, and we have to have the money."

Mr. ROCKWELL. It will have to show it can be paid out.

Mr. D'EWART. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended 5 minutes. The gentleman is chairman of the subcommittee in charge of this bill, also author of the bill. A large number of Members wish to ask him questions and the gentleman is doing a good job.

The CHAIRMAN. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. PHILLIPS of California. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield to the gentleman from California.

Mr. PHILLIPS of California. I have two questions. Will the gentleman tell us exactly how much additional power, in the gentleman's opinion, is given to the Secretary of the Interior or the Commissioner of Reclamation in this bill as compared to what he would have under the Jensen amendment? Does the gentleman see what I have in mind? The second question: Is it not a fact that in

the letter read by the gentleman from Arizona [Mr. MURDOCK] the Commissioner referred only to his authorization of construction. He has never authorized construction without money, but he has authorized a project to be brought down for future construction.

There is a very different point involved which I do not think is covered in the Commissioner's letter. Will the gentleman from Colorado please discuss those two points?

Mr. ROCKWELL. Here is my understanding in reference to the additional power, if the gentleman wants to call it that. I do not call it power. I would call it discretion. The Secretary in his discretion would have the authority in figuring out the ultimate cost of a project, if it is feasible and will pay out in full, to add certain other nonreimbursable costs, such as silt control, general salinity, and recreation features. Under the present law, those are not considered as part of the feasibility of a project. As I understand, the only difference in this present rewriting and the other bill is that those reimbursable parts will be added. I think I am correct in that, am I not?

Mr. JENSEN. I am not so sure.

Mr. LECOMPTE. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield to the gentleman from Iowa.

Mr. LECOMPTE. May I ask the gentleman this? We have under consideration the amendment of our good friend and colleague the gentleman from Iowa [Mr. JENSEN], a friend of reclamation. Is it not a fact that what he is trying to do with his amendment—and I think it will do it—is trying to restore to Congress the power to make authorizations rather than for that power to be vested in the Secretary of the Interior.

Mr. ROCKWELL. I think that is correct.

Mr. LECOMPTE. Should it not be vested in Congress rather than in the Secretary of the Interior?

Mr. ROCKWELL. The point I make is that that has been the law for many years.

Mr. LECOMPTE. Well, that does not justify it alone.

Mr. ROCKWELL. It has worked out successfully. I believe you might compare it to a loan. Congress does not approve every loan that the RFC makes. We authorize them to make these loans under certain reservations. Now, the loans that are made under this act are to be repaid in full. They are not a gift, like flood control, but they are to be repaid.

Mr. LECOMPTE. But the Secretary of the Interior can inaugurate the authorization.

Mr. ROCKWELL. In other words, if you follow me, before he can even authorize a project, he must first have the approval of all the other agencies, and of the States, and of the little communities where the project is to be built; and if anybody objects, that has to be put in the record.

Mr. LECOMPTE. He can come to the Committee on Appropriations and ask for money that has never been authorized by the Congress for these projects; is that not right?

Mr. ROCKWELL. Well, no more so than he can under the present bill. He can do it now under that formula.

Mr. LECOMPTE. That is what the gentleman from Iowa is trying to take out.

Mr. ROCKWELL. I agree with the gentleman that that is what the gentleman from Iowa [Mr. JENSEN] is trying to do; and the reason we do not favor it out there, or one of the reasons, is that we would have every little project come before our committee, with engineers, and so forth, to decide whether or not they are correct. Even now that has all got to be approved by the Committee on Appropriations.

Mr. CASE of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield to the gentleman from South Dakota.

Mr. CASE of South Dakota. The point that I think should be made clear is this: This does not go so far as you do with the Reconstruction Finance Corporation. There you give them money and let them make loans. They can go ahead and put this money out. Here you are not giving anybody authority to put out any money. You are merely giving authority to make a finding of economic feasibility. Congress still controls every dollar. There is not a dollar that the Secretary of the Interior can put out or spend until it has been appropriated.

The CHAIRMAN. The time of the gentleman from Colorado has again expired.

Mr. JACKSON of Washington. Mr. Chairman, I ask unanimous consent that the gentleman may be permitted to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. JENSEN. Mr. Chairman, will the gentleman yield further?

Mr. ROCKWELL. I yield.

Mr. JENSEN. I am sure the gentleman who is now addressing the House knows that the Bureau of Reclamation employs thousands of engineers and assistant engineers and great staffs to look into all of these projects. Just how much they do that is worth the chips that the taxpayers are handing out to them, I am not sure; I am satisfied we have got too many of them on the pay roll. Now, the gentleman also knows that the salaries of a number of those come out of the taxpayers of the United States which is never reimbursable on your reconstruction work and your planning, and so on. You also know that a lot of their salaries are chargeable to these projects that are going to be constructed or that are under construction. Of course, if my amendment is not adopted, the Interior Department will say, "Why, you gave us orders to go into all these projects and determine their feasibility. It is going to take another 1,000 or 2,000 or 3,000 or 5,000 engineers, assistant engineers, metallurgists, geologists, and what have you." How can the gentleman or anyone else think we are ever going to reduce the administrative costs of this Government if we do not start now and cut out such practices?

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield to the gentleman from Wyoming.

Mr. BARRETT. I want to make this observation: The gentleman from Iowa [Mr. LECOMPTE] and all of his colleagues from Iowa stood on the floor of this House and urged rather persuasively that this House authorize the Rural Electrification Administration to go to the Reconstruction Finance Corporation and borrow approximately $225,000,000 to build thousands of different projects all over the country, and, of course, I was wholly in favor of the legislation; but this House and the Committee on Appropriations do not pass on those particular projects one after the other. Why should you apply a different rule to the Bureau of Reclamation? That is what I want to know.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield to the gentleman from California.

Mr. WELCH. This bill has been before the Committee on Public Lands and its subcommittee, presided over by the distinguished gentleman from Colorado [Mr. ROCKWELL], roughly 2 years. The gentleman from Iowa [Mr. JENSEN] and the gentleman from California [Mr. MCDONOUGH] knew that this language was written into the bill months before the bill was reported to the House. They did not ask at any time to appear before the committee, which they could have done and been welcome, and they could have made known their objections to the language written in the bill. However, they waited until this late date to come here to confuse the minds of the Members of the House who are not familiar with some of the technical aspects of the matter.

Mr. JENSEN. Mr. Chairman, will the gentleman yield, since my name has been mentioned?

Mr. ROCKWELL. I yield.

Mr. JENSEN. I want the gentleman to know that I did appear before his committee over a year ago and gave my idea as to what should be in this bill and what should not be in the bill, and the gentleman knows it.

Mr. WELCH. The gentleman interposed no objection to what was known as the Rockwell bill, reported unanimously by the Committee on Public Lands to this House.

Mr. JENSEN. How did I know you were going to report the bill, at that time?

Mr. WELCH. Congress was in session.

Mr. JACKSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield to the gentleman from Washington.

Mr. JACKSON of Washington. Mr. Chairman, I should like to ask the chairman of the subcommittee, the author of the bill, a question in connection with the next section, as long as he is explaining this particular section.

As I read section 2 of H. R. 2873, and in particular lines 12 to 25 of page 8,

I see possibilities that the administration of this act can be such as to raise Federal power rates in the Pacific Northwest. Let me briefly explain. This section provides for 50-year power contracts and 78-year repayment period, with no reference how the power component cost is to be calculated. Now if the power pay-out is deferred to, say, the difference between 50 and 78 years, and staggered or placed at the end of the period, compound interest on the unpaid power cost component can amount to such a value as to require rate elevation. Since, as I read it, multiple legal construction is possible, I want to inquire if the legislative intent is to elevate rates in the Pacific Northwest.

Mr. ROCKWELL. Absolutely not.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. POULSON. Mr. Chairman, I ask unanimous consent that the gentleman from Colorado be permitted to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. JACKSON of Washington. That is not the legislative intent?

Mr. ROCKWELL. That is not the intent. I am not a lawyer and I am not an engineer, but the testimony before our committee would indicate that this does not in any way affect the present rates or anything that is already under construction, and it is felt that it would be probably as cheap or certainly no higher than the present rates.

Mr. JACKSON of Washington. They would not be increased?

Mr. ROCKWELL. No.

Mr. JACKSON of Washington. I am concerned about that particular section. I am certain the committee had no such intention. With the chairman's explanation, I am sure the legislative intent, then, is not to elevate or in any wise authorize the elevation of rates as it affects the Pacific Northwest.

Mr. ROCKWELL. That is my understanding.

Mr. POULSON. Mr. Chairman, will the gentleman yield?

Mr. ROCKWELL. I yield.

Mr. POULSON. According to the letter of Mr. Straus and according to the discussion we had in our committee today, was it not brought out that if any State or any section protests, then the matter has to come before the Congress for an authorization? So that in turn would give any section a chance to protest and automatically bring it before the Congress?

Mr. ROCKWELL. That is my understanding. I am not too familiar with the legalistics of this bill because I am not a lawyer. But my understanding is that any objection made by any State or any municipality would be handled in that way. In a case like this, I understand that every State on the Colorado River is affected, and therefore the report would come in from the Governor of every State, and if any of them opposed it that report would have to come to the Congress with the objection. Then Congress acts upon it and does as it sees fit.

Mr. Chairman, I yield back the balance of my time.

Mr. PHILLIPS of California. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, we seem to be arriving at a delightful state of confusion in regard to the bill. I would like to see if I can add still further to that confusion. I trust the gentleman from Indiana will not press his proposed amendment, as high regard as I have for him, because I think that it confuses the present issue, which is consideration of the amendment offered by the gentleman from Iowa [Mr. JENSEN].

I asked the chairman of the subcommittee a question regarding the letter written to the gentleman from Arizona. The letter written to the gentleman from Arizona does say that the Commissioner will not authorize construction. I think one of the issues is as to the authority of the Commission to investigate and to spend money for investigation. When the chairman of the Committee on Public Lands said to the gentleman from Iowa that he should have come before the committee and presented what is now being talked about on the floor, the gentleman from Iowa actually had, had he cared to use it, the perfect answer, and that is that this provision was not in the Rockwell bill when it was under consideration by the committee in the form in which it now appears. The bill as we have it is what the committee calls the compromise bill which was accepted, as a member of the committee has said, within the final 24 or 48 hours before the committee voted. A great many people did not have a chance to consider it in detail.

The intent of some Members, as expressed on this floor, seems to be to allow all these authorizations to go through, many of them good and reasonable, with no objection to the authority in the hands of the Commissioner, until they reach the Committee on Appropriations and then to say to the Committee on Appropriations, "You are our only line of defense. No matter what approval has been given it and no matter what authority has been given, you must be the one to find out if this is really sound." It seems to me as a member of the Committee on Appropriations, and as one who is tremendously interested in reclamation, since my district is dependent on irrigated water, it seems that that is putting a severe burden upon the Committee on Appropriations. My position as a member who is interested in reclamation, and a former member of the Committee on Irrigation and Reclamation, is that I shall vote for the amendment offered by the gentleman from Iowa [Mr. JENSEN], but that I would not vote for the amendment offered by the gentleman from Indiana, if he were to offer it.

Mr. Chairman, I now yield to the distinguished gentleman from Arizona [Mr. MURDOCK], who has been so patient.

Mr. MURDOCK. This is the question I had in mind: Are you satisfied with the Commissioner's answer in the letter which I read in part, that the passage of this bill would not permit the authorization of such a project as the central Arizona water project?

Mr. PHILLIPS of California. I am satisfied with it. I think it is good that it should be included as a matter of record as the Reclamation Commissioner's opinion. I am not satisfied that the Commissioner is saying that he would not spend money on proposed projects before he came to the Congress for authorization for construction. I think that should be covered in the letter.

Mr. MURDOCK. I think the gentleman's fears are somewhat unfounded as applied to the lower Colorado Basin. No project needs money appropriated in the Colorado River Basin, because annually by existing law we take $500,000 out of the power revenues from Hoover Dam, the Boulder Canyon project, to make such investigations, and the Secretary has that fund on which to draw.

Mr. PHILLIPS of California. I thank the gentleman. This is entirely a matter of principle with me. I am not opposed to the Commissioner nor the Department. I think we should curb the powers of agencies of government and bring the powers back to Congress.

Mr. CASE of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield.

Mr. CASE of South Dakota. As a matter of principle, will the gentleman advocate that each rural electrification project be required to come before a committee of Congress for investigation and study before you authorize it?

Mr. PHILLIPS of California. I would have to study the question before answering it. I am inclined to think the answer would be "Yes," if large and involved projects are to be allowed.

The CHAIRMAN. The time of the gentleman from California [Mr. PHILLIPS] has expired.

Mr. HARNESS of Indiana. Mr. Chairman, I move to strike out the last two words.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield that I may propose a unanimous-consent request that all debate on this amendment close in 10 minutes?

Mr. HARNESS of Indiana. I decline to yield for that purpose at the moment, Mr. Chairman.

Mr. Chairman, this bill comes before the House after a compromise was reached. I doubt if it is satisfactory to any member of the committee that reported it. As a matter of fact, it came here from the Rules Committee by the skin of its teeth.

There are three things that are bad about this bill. One is the very thing the gentleman from Iowa [Mr. JENSEN] is trying to correct, and I shall support his amendment. I am afraid, however, that it does not do what he wants to accomplish. If you will examine the report, you will find that the language which this amendment would strike out, is substantially that part of section 9 (a) of the 1939 act. It is that act from which the power and authority of the Secretary stems, and I feel that the entire section in the 1939 act should be repealed. It has been stated here today that this

practice is similar to that exercised by RFC, and my good friend from South Dakota says the Rural Electrification is authorized to do the same thing. But that is not the fact. Congress authorized the RFC to make sound business loans. The projects in Rural Electrification are not in fact projects of the Federal Government. The Rural Electrification Administration is a separate entity and that may and does borrow money from RFC on a sound business basis. Here you have a situation that is a complete departure from every other principle of government, in which the Congress is not asked to authorize a project until after the project has been established. In other words, we are delegating to the Secretary of the Interior the power to place the Congress under obligation to authorize and appropriate after he has decided on a specific project.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. HARNESS of Indiana. No; I decline to yield for the moment.

Mr. CASE of South Dakota. The gentleman referred to my statement. Certainly he wants to be corrected there.

Mr. HARNESS of Indiana. I will give you an opportunity to correct it, if you will allow me to continue for a moment.

I do not think it is sound for Congress to place this extraordinary power in the hands of an appointive official of the executive department. This extraordinary power authorizes the Secretary of the Interior to modify, to extend, to enlarge, or to establish new projects that have never been authorized by Congress.

What do we do in flood control? Before the Army engineers may investigate the feasibility of a project there must be an authorization directing them to make the survey. They report back to the committee. If the committee then determines that it is good for the country, that it is feasible, then the Congress authorizes it and the money is made available. But here we designate an individual in the executive department to act for the Congress and obligate us so that we must eventually appropriate the money to carry out the project, and that is neither good government nor good law.

I urge you to support the amendment of the gentleman from Iowa, but I would prefer another amendment that would definitely correct the situation. I would strike out that part of this section proposed by the pending amendment and also section 9 (a) of the 1939 act which is the origin of this authority. I am a friend of irrigation and reclamation. I spent a number of years in the West. I know how desperately they need these projects. I know that water to them is vital to their economic existence. This method of establishing projects, however, is a disservice to the friends of reclamation and irrigation and the people of the West may find appropriation committees denying funds that otherwise might be granted if authorized by law. I think we should recapture that power and keep it in Congress where it belongs.

Mr. CASE of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. HARNESS of Indiana. I yield to the gentleman from South Dakota.

Mr. CASE of South Dakota. I believe the gentleman is somewhat in error in comparing the REA with this situation. This is the situation, as I understand it, that Congress appropriates money to the Rural Electrification Administration or in some instances says it can borrow money from the RFC; in any event, the REA gets money and makes individual allocations without any review by Congress.

This authorization is not an authorization——

Mr. HARNESS of Indiana. All right, now——

Mr. CASE of South Dakota. Let me finish the comparison—is not an authorization for the Secretary to spend one dollar. It really creates an authorization so that a project would not be subject to a point of order when and if Congress ever comes to appropriate.

Mr. HARNESS of Indiana. I have not the time to yield further.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. HARNESS of Indiana. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HARNESS of Indiana. The gentleman from South Dakota knows very well that the set-up in REA is entirely different from this; that is a separate entity. The REA goes to a bank, the RFC, that we set up, and borrows money and obligates itself for repayment, and that situation is entirely different from the one we are talking about here.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. HARNESS of Indiana. I cannot resist yielding to my dear friend from California after I have made just one other statement.

My Committee on Publicity and Propaganda has been investigating the Bureau of Reclamation for some time; and reports of our investigators show that today in the city of Denver there are 1,000 engineers on the pay roll of the Bureau of Reclamation—who may go out at the instance of the Secretary and make surveys without any authority of the Congress other than the authority of section 9a of the Reclamation Act of 1939. We know, too, that Mr. Straus and Mr. Krug have called the field men into Washington and directed that they must see to it that all funds must be expended before the end of the fiscal year, in order that more money may be justified.

Mr. Chairman, if we are to truly represent the people who have entrusted us with our seats in Congress, we must recapture this delegated power and assume our obligation of exercising it solely in the people's interest.

I now yield to the chairman of the committee.

Mr. WELCH. Mr. Chairman, the distinguished gentleman from Indiana stated in his opening remarks that this bill was reported to the House with indifference by the Committee on Public Lands. He also stated it got by the Committee on Rules by the skin of its teeth. The gentleman is a member of the Committee on Rules and he has the right to speak for his committee, but the gentleman has no right to speak for the Committee on Public Lands.

This bill originally was reported to the House unanimously. The committee met again this morning, Mr. Chairman, and the members reaffirmed their faith in this bill and ask to have it passed by the House without crippling amendments such as the amendment under consideration.

Mr. HARNESS of Indiana. The gentleman is one of my very dear friends. What I said about this bill coming from the Committee on Public Lands I reiterate now. In discussing the matter with members of the committee and in listening to testimony before the Rules Committee several of the members said there were features of this bill they did not like, but they had to compromise in order to get anything.

What were the compromises? You have a provision in here to increase the amortization period from 50 to 78 years, giving this agency the right to use the money that ought to be paid back to the Government under the loans for an additional 28 years. There is another provision in the bill that reduces the interest rate from 3 percent to 2½ percent but only 2 percent of the interest is covered back into the Treasury. They leave in the hands of the Secretary one-half of 1 percent to play with, to employ engineers, if you please, or to promote wildlife, for instance.

Mr. CARROLL. Mr. Chairman, will the gentleman yield?

Mr. HARNESS of Indiana. I yield to the gentleman from Colorado.

Mr. CARROLL. The gentleman has referred to authorizations for flood control. Are those reimbursable or not?

Mr. HARNESS of Indiana. No; they are not.

Mr. CARROLL. Is it not true that every authorization for the West is reimbursable and has to be paid back?

Mr. HARNESS of Indiana. Yes; and that is as it should be.

Mr. CARROLL. That is right. Now, the gentleman has made reference to the city of Denver. I may say to him that his information is not correct about the Denver engineering office. As a matter of fact, in the last session of this Congress a limitation was placed upon the appropriation for the Denver engineering office and they have destroyed and dispersed that office.

Mr. HARNESS of Indiana. Effective the next fiscal year. Our investigators have reported that last summer the Denver office of the Bureau had 1,000 engineers on the pay roll.

Mr. CARROLL. They were on the pay roll, but they were not in Denver.

The CHAIRMAN. The time of the gentleman from Indiana has again expired.

Mr. BARRETT. Mr. Chairman, I ask unanimous consent that the gentleman may have two additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. HARNESS of Indiana. I yield to the gentleman from Wyoming.

Mr. BARRETT. I know the gentleman wants to be fair, but I think he is wholly mistaken when he says that the effect of this bill is to raise the limitation of the life of the project and the pay-out on the project from 50 to 78 years.

Mr. HARNESS of Indiana. That will come later.

Mr. BARRETT. May I say to the gentleman that he is wholly mistaken. Under existing law there is no limitation whatsoever. The law does not provide 50 years. It provides that it shall be repaid, and that means within a reasonable period of time.

Mr. HARNESS of Indiana. The policy of the agency has been 50 years.

Mr. BARRETT. No; the law does not say so.

Mr. HARNESS of Indiana. I did not say the law so provided. I said the policy of the agency has fixed it on the basis of 50 years.

Mr. BARRETT. The average pay-out is 60 years.

Mr. HARNESS of Indiana. Let us debate that when we get to it.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. HARNESS of Indiana. I yield to the gentleman from New York.

Mr. TABER. As I understand it, the gentleman was interrogated a moment ago with reference to repayment of flood-control moneys.

Mr. HARNESS of Indiana. Yes.

Mr. TABER. I may say to the gentleman that there is just as much flood-control money spent out in the western part of the country as there is anywhere else in the country without reimbursement.

Mr. HARNESS of Indiana. Yes.

Mr. Chairman, it is unwholesome and fundamentally wrong for Congress to leave in the hands of the Secretary of the Interior the right to obligate us and the people's money without first coming to Congress for it. The Jensen amendment will accomplish in part what we should do here, but I still think we ought to go to the roots of the thing and repeal section 9 (a) of the 1939 act.

Mr. Chairman, the Jensen amendment should be adopted.

The CHAIRMAN. The time of the gentleman from Indiana has again expired.

Mr. FERNANDEZ. Mr. Chairman, I move to strike out the last word.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I yield to the gentleman from Colorado.

Mr. ROCKWELL. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. On the pending section and all amendments thereto?

Mr. ROCKWELL. Yes.

Mr. PICKETT. Mr. Chairman, do I understand the gentleman is requesting that all debate on this section and all amendments thereto close in 10 minutes?

Mr. ROCKWELL. Yes.

The CHAIRMAN. I will say to the gentleman from Colorado that there are five more amendments on the Clerk's desk to this section.

Mr. ROCKWELL. Then, Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. FERNANDEZ. Mr. Chairman, I am not going to take the full 5 minutes. I just want to point out that if the Jensen amendment is adopted it may have one result, and that is that it will open the door to logrolling, which evidently the Congress, which passed the original 1939 law, wanted to avoid. This is particularly true with respect to the amendment which the gentleman from Indiana proposes to offer, because the amendment proposed by the gentleman from Indiana strikes out the entire section which requires the Secretary to make certain calculations, certain investigations as to costs and as to feasibility, before any bill can be presented to Congress or to the Committee on Appropriations. The result will be that a group of people on the river somewhere, having a little project, would have to come to Congress without the aid of the Secretary of the Interior and ask that their project be approved. Why, you would have hundreds of these projects up here without a proper investigation and the result would be, of course, logrolling. I would say to Colorado, "You help me with mine and I will help you with yours." The Committee on Public Lands would be under terrific pressure. Perhaps it is a good thing; I do not know; but if it is, I think the Committee on Public Lands ought to take this particular section and take this particular amendment into consideration, call witnesses, debate it fully, present it to the House for its consideration, and it ought not to be done here on the spur of the moment on the floor of the House.

Furthermore, it will endanger the bill which has been presented here for the purpose of correcting one of the greatest objections to the reclamation law raised by the gentlemen on the Committee on Appropriations, which I discussed yesterday. Let us stay with that and cure that objection, and if this other thing needs to be amended, and if we want to have a little logrolling, well, let us take that to the committee later on and I am sure the committee will give it very careful consideration.

Mr. ENGLE of California. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I yield to the gentleman from California.

Mr. ENGLE of California. In looking at the report on page 4 and comparing clause 9 of the existing law with section 9 in this bill, I do not see how striking out the language which is stricken by the amendment of the gentleman from Iowa would change the existing law anywhere. Section 9 of the existing law will be just as it is. All this is a reiteration, is it not?

Mr. FERNANDEZ. Oh, no. The striking out by this amendment would in effect amend the existing law by striking it out of the existing law also.

The CHAIRMAN. The time of the gentleman from New Mexico has expired.

The Chair recognizes the gentleman from Michigan [Mr. CRAWFORD].

Mr. CRAWFORD. Mr. Chairman, my approach to this problem is going to be institutional rather than technical. Sometime in the past the Congress of the United States adopted a policy of going west and harnessing those rivers for the benefit of the general welfare of the United States, and while I used to live out there in the West and operated industries, where we sent our own men into the hills and picked out our own spots, and where we, with our own private funds, built dams and impounded water, and later carried it out on our fields and irrigated our crops on a big scale, I went out this summer and looked over the field and found this new form of operation going on wherein the people of the United States, through the Irrigation and Reclamation Act, puts up hundreds of millions and proposes to put up billions of dollars.

You have harnessed the Columbia River, you are harnessing the Sacramento River, and you are harnessing the Colorado River in the interest of the general welfare of the United States. If you go to Grand Coulee and Bonneville you will find that about 65 percent of the kilowatt-hours you use in the Pacific Northwest is being produced from the waters harnessed by Federal funds, where the people are being charged rates on the consumption of kilowatts to reimburse those funds.

We are shifting our population and our industry to the western section of the United States at a very rapid rate, and by shifting I mean you have built and you are building new industries which are to take care of new populations. There are 20,000 people going into California per month. If we want to get our necks out—and there is some other language I could use that you would understand—just let us rewrite the Irrigation and Reclamation Act here this afternoon by two or three amendments such as are being proposed. I am not going to scuttle that operation out there and I am not going to be a party to scuttling that operation in such a manner. As a member of this committee, I feel that if you do not want to pass this bill, instead of cutting its throat, send the bill back to the committee and let this operation die.

If you want to go ahead with those projects and maintain the national defense of this country as wrapped up in the Colorado and Columbia Rivers, you had better be careful how you deal with this organic law, and not start out to rewrite it here on the floor.

Who is going to go out and make this initial work unless it is some department of the Government? The committee of

which I am a member is not going to do it, and I will bet you the Appropriations Committee is not going to do it, and I will bet you there is no special investigating committee of the House or the Senate that will do the job. You have the highest policy of government involved in the irrigation and reclamation operation of this country. You have your whole power project of the West, the entire water supply of the West, you have the Central Valley of California involved in this, which is an empire upon which this country is going to depend substantially for its food supply in the coming years; where you are going to build literally billions of dollars worth of irrigation canals, dams, and things of that kind, or you are going to surrender the western half of the United States and let it go back to the grasshoppers. You are going to put water out there; there is no question about that. If you are going to do away with the irrigation and reclamation project and jerk it back to a one-horse affair, you are starting out on it in a good way here this afternoon.

Mr. ENGLE of California. Mr. Chairman, will the gentleman yield?

Mr. CRAWFORD. I yield to the gentleman from California.

Mr. ENGLE of California. Is it not perfectly clear to the gentleman that this proposed amendment does not take out of the bill an additional power which is given by the bill to the Secretary of the Interior, but what it is doing is going back and taking away from the Secretary of the Interior the power he has had for a long, long time?

Mr. CRAWFORD. It is a power which is now in section 9 of the existing law. You are proposing to rewrite the organic Irrigation and Reclamation Act here by these proposed amendments. That is no way to do it.

Mr. ENGLE of California. In other words, to make it perfectly clear, this amendment is not stopping an additional power which this committee undertakes now to give to the Secretary of the Interior, the amendment seeks to go back to the law as it existed and now exists prior to the passage of this bill and take out a power which the Secretary of the Interior has always had.

Mr. CRAWFORD. That is exactly what is being proposed.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. JENSEN].

The question was taken; and on a division (demanded by Mr. JENSEN) there were—ayes 51, noes 52.

Mr. JENSEN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. ROCKWELL and Mr. JENSEN.

The Committee again divided; and the tellers reported that there were—ayes 66, noes 74.

So the amendment was rejected.

Mr. COTTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COTTON: On page 6, line 23, after the word "authorized", insert "when adopted by Congress."

Mr. CASE of South Dakota. Mr. Chairman, I make the point of order that the amendment involves the question just previously voted upon and decided.

The CHAIRMAN (Mr. DONDERO). This is an entirely different matter. The Chair believes the amendment is germane, and the Chair overrules the point of order.

The gentleman from New Hampshire will proceed.

Mr. COTTON. Mr. Chairman, in offering this amendment I recognize the fact that I come from a section of the country which is not directly interested or involved in reclamation, but I am none the less anxious to be able to vote for this bill.

I realize further that it would be presumptuous for a new Member to attempt by amendment to tamper or tinker with a bill which, as has been said by members of the committee, is the result of long months and years of study. I would therefore call the attention of the committee to the fact that this amendment, unlike the previous amendment, does not in any way change the machinery of the bill. It simply preserves the authority of Congress, as the ultimate arbiter of the expenditures of government.

Mr. Chairman, I suggest that this principle far transcends anything involved in this particular measure or any other measure that comes before us on this floor. We have seen the vain endeavors of Congress to stem the tide of governmental expenditures; to dispense with needless employees; to reduce bureaucracy; again and again it has been impressed upon us that until we have the cooperation of departments and bureaus in the executive branch of the Government we are, to a certain extent, powerless to accomplish the result which we desire to accomplish and which the people desire we should accomplish. We cannot force that cooperation, of course, without invading the realm of the executive branch of the Government. But I insist that this is indeed a poor time for the Congress to formally abrogate and surrender any of its prerogatives in controlling the expenditures of the Federal Government.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. COTTON. I yield.

Mr. ROCKWELL. The gentleman understands, of course, that this would accomplish the same thing as the amendment that was just defeated? You are trying to amend a law that has been in existence since 1939. In other words, this is nothing new. It is a custom that has been the practice for many, many years.

Mr. COTTON. I will say to the gentleman in answer to his first question that I do not concede that this simple amendment calling for the approval of Congress without disturbing the machinery set up in the bill is identical with the amendment that has just been voted upon.

In answer to his observation about the length of time this situation has existed I would suggest that if a principle is wrong it is not made right by the length of time it lasts. Adam committed the first sin long ago in the Garden of Eden but antiquity does not justify it.

If it has been in the law of the land that the Secretary of the Interior may spend without approval of Congress we should take it out when we are reviewing it. Certainly we should not now place the stamp of approval on such a policy. Let us write into this bill that Congress must ultimately approve of all expenditures. Let us not be satisfied by passing that responsibility on to the Committee on Appropriations. This is the purpose of this amendment.

Mr. PICKETT. Mr. Chairman, I move to strike out the last word and rise in support of the amendment.

Mr. Chairman, the fundamental principle involved in this amendment offered by the gentleman from New Hampshire I think is clearly understood by every member of the committee. I say to you that there is scarcely a Member of this House, I doubt if there is a single Member of this House, who at some time on the political hustings has not inveighed against and decried bureaucracy. When you were out seeking the votes of your constituents you told them that when they elected you to Congress you would come down here and take away the powers of the bureaus, the agencies, and the commissions that had been surrendered by the previous Congresses; and perhaps if your opposition in that election was a sitting Member, you pointed your finger directly at him when you made that statement.

This is not a new thing. It has been before us time and again in various respects. There is neither rhyme nor reason why the Secretary of the Interior or some inferior official in that Department should exercise that power, duty, and responsibility this Congress ought to shoulder itself and has shouldered in every parallel situation that we deal with down here.

You have heard expressed time and again today a similar criticism and the parallel drawn that when you are dealing with flood-control projects, when you are dealing with rivers and harbors authorizations, in order to get a survey made you have got to come to Congress and get it approved.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. PICKETT. I yield.

Mr. JOHNSON of California. Does not the gentleman think that the real check on unbridled discretion of the Secretary is the Committee on Appropriations which reviews the request for moneys for projects they approve?

Mr. PICKETT. That is one check and certainly we ought to have that check. We ought to have other checks on these fellows who want to do something without the authorization of Congress. That is what is proposed by this amendment.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. PICKETT. I yield.

Mr. JENSEN. There has been so much said about the appropriate committee having the final say. That is all well and good, but when some committee of the Congress and the Congress of the United States passes a bill which authorizes some agency to go out and authorize these projects, then the people say, "Why, for goodness' sake, the Congress authorized this. Do you mean to say that you are not going to give us this money?" And they bring down the house on us. That is why during so many late years we have had these great appropriations which never should have been made.

Mr. PICKETT. All right; now let us get back to the fundamental proposition here. Are the Members of this House going to endorse a proposition that is fundamentally wrong simply because it has been the custom for 20 years to do it? That is one reason advanced by those who are in opposition to this amendment. That is no reason at all, and you know it. Are you going to endorse the continuation of a bad practice simply because, as some say, that to require you to go through a legislative process and require the Department of the Interior to justify these authorizations would also demand a great deal of work by the Subcommittee on Irrigation and Reclamation or the Committee on Public Lands? And certainly the charge and assertion which was made by my friend from New Mexico a few moments ago, that if you changed the policy of authorization from existing law to what is proposed here, there would result a considerable amount of logrolling, is one of the most astounding things I have ever heard. I do not know of any better opportunity to do logrolling than you would have if you wanted a group of projects in several States and you run down to the Secretary of the Interior or his delegated official and everyone pitched in and helped everybody else out. The custom for years—the practice for years and the law for years—has been that those who want flood-control projects authorized in their districts or their States or sections, those who want rivers and harbors authorizations, must come to the Congress and get them. I know of no instance, and there has been none referred to here, where there has been any logrolling. If there has been, somebody ought to mention it, and we ought to help eliminate it. Certainly the adoption of this amendment would return us to one of the fundamental conceptions of the duties and responsibilities of the Congress.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HARLESS of Arizona. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, the whole purpose and intent of this amendment is the same as the last amendment. Every other amendment will have the same purpose. That is, to knock a hole in the irrigation and reclamation law.

It is a fact, and you know it to be, that we make large appropriations here for the REA and we delegate authority to that agency to approve projects. Is it not just as reasonable for the Bureau of Irrigation and Reclamation to use the same judgment? There has not been one instance cited here where the Bureau has misused its judgment. There have been made general statements, but a specific instance has not been mentioned.

There are many cases where the Bureau of Irrigation and Reclamation has to move forward on small projects and make surveys. It cannot go forward in the authorization of projects and the expenditure of money on a project until it has been approved by the Appropriations Committee. It is desired that we go further in checking on the Bureau of Irrigation and Reclamation than we do with the REA or any other Government agency. In these other cases we give the agencies the money, let them go out, spend it and allocate it as they see fit. In this instance we hold in check all authority until it has been found to be thoroughly feasible, then it is presented to the Congress through the Appropriations Committee.

Mr. Chairman, if this amendment is agreed to it will cripple the Bureau to the extent that we cannot have continued expansion in the West. I know there are some people who would move their lips in friendship for irrigation and reclamation in the West but deep down in their hearts they do not want to see the West developed because they are afraid there might be some competition. But let me point out that we do not grow the same products out West that are grown in the Middle West. We buy the manufactured goods from eastern plants. When we develop one of these irrigation and reclamation projects it results in our buying large amounts of electrical equipment and farm equipment, which are produced in the East; therefore, it is to your advantage to see that this portion of the United States continues to develop. To shoot a hole in this particular law is to destroy the progress already made in the western part of the United States. Leave the law intact. For 22 years it has been working well.

Mr. CARROLL. Mr. Chairman, will the gentleman yield?

Mr. HARLESS of Arizona. I yield to the gentleman from Colorado.

Mr. CARROLL. I am very much interested in what the gentleman said about limiting surveys and investigations. In the last flood-control bill, for which the Bureau of the Budget set up some $5,000,000, we were limited to $125,000 by action of the House. This was modified by the Senate and raised to $2,000,000. The compromise passed this body. That is as much as could be spent for surveys and investigations. That is just another check in addition to the check that comes from the Appropriations Committee.

Mr. HARLESS of Arizona. I thank the gentleman from Colorado. In plain English, this law has been working well and for anyone to come in here with these amendments is to destroy its whole effectiveness. Please do not meddle with the law at this time. There are no instances mentioned here where there has been an abuse of authority. There has been a group of generalities. Leave the law as it is and let the Bureau of Reclamation and Irrigation continue to function. They function as efficiently as any department. These projects pay back to the United States all money invested. In addition thereto, I have in mind a project near my home town of Phoenix. We pay more money each year in income taxes from the resources that we get out of this project than was paid to construct the project. It is to the benefit of all of us. Let us not poke holes in this law. So, I plead with you, do not adopt any of these amendments.

Mr. MILLER of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. HARLESS of Arizona. I yield to the gentleman from Nebraska.

Mr. MILLER of Nebraska. I was going to observe that the Congress does not approve large road-building projects, nor do we approve sites for air landing strips, and so forth. There would be just as much sense having Congress approve that type of construction as it would be for these small irrigation projects.

Mr. HARLESS of Arizona. It is not our business to go out and approve particular, minute details. That is the reason we have experts. That is the reason we do not approve every irrigation project, because we would find it will not function, and that is the reason we should leave this particular law as it is.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. HARLESS of Arizona. I yield to the gentleman from Arizona.

Mr. MURDOCK. My colleague is right in pointing out the great economic benefit of irrigated areas. I would like to ask the gentlemen on either side of the aisle who have apparently been opposing reclamation here whether they can find anything in general in the history of reclamation from 1902 down to the present hour to complain of? Throughout those 45 years the Bureau of Reclamation has spent nearly a billion dollars and created wealth, tax-producible wealth, as the gentleman has said. My colleague refers to the great reclamation project in which we live in the Valley of the Sun. Yes indeed. That project has received from the Government a total of less than $25,000,000, three-fifths of which has already been repaid. In addition to the income tax mentioned, this project has created more than $200,000,000 in permanent wealth. That project has lately produced $40,000,000 in cash crops over 12 months.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. ROCKWELL. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from North Dakota [Mr. LEMKE].

Mr. LEMKE. Mr. Chairman, I rise in opposition to the amendment. I realize that this is a national issue, and I am sure every Member of the House does. I also realize that many Members do not realize that this is for reimbursable projects, and that every cent so far has been and will be repaid.

Yet, my friends say they are for reclamation, and then immediately try to give it the stiletto and murder it. Let us be fair with these western people that have done so much for the defense of this Nation, and for the welfare of this Nation, and let them point out wherein there have been any projects wherein the Bureau has abused its power.

It would be just as sensible to come in here and say that before the RFC makes a loan or even an estimate, whether the security is sufficient or not, they should refer it to Congress for congressional action. I wonder if some of them would not come in here and want Congress to pass upon whether or not they should button up their vests before they act.

You cannot put hobble skirts on an agency and expect it to function. We must give it an opportunity to step out and do the preliminary work, and then Congress does pass upon it, if they need money to continue or more money than will be paid back by the reimbursable provisions of the present law. The whole thing is confusion and misrepresentation and misunderstanding by men who have no knowledge of irrigation and reclamation, and yet they want to talk wisely about it.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Michigan.

Mr. CRAWFORD. As the gentleman has stated, here is a proposition where somebody in the United States advances some money to certain sections of our population to build irrigation and reclamation projects, which money is to be reimbursed. Why not do more of that, at least in line with the billions of dollars we are sending to other countries where we know good and well there will be no reimbursement? Is it not as much for national defense to provide for a large percentage of our population in the Western States as it is to do jobs abroad in Palestine, China, India, or somewhere else?

Mr. LEMKE. I would say a hundred times more so, and I will go further and say that it is just as important, and more important than the large appropriations we make each year without reimbursement for river and harbor improvement. My eastern colleagues ought to sit up and take notice. They may hear from us sometime if they continue their present obstructive practice connected with western irrigation projects.

The CHAIRMAN. The Chair recognizes the gentleman from Iowa [Mr. JENSEN].

Mr. JENSEN. Mr. Chairman, the amendments that have been offered today have been opposed on the ground that other agencies of Government do not have to come to Congress to get authorization. Now I ask you if that is not the primary reason why this Nation is in such a mess today? Mr. Chairman, I think it is about time that every agency of Government be required to come to Congress to get its authorization to spend the people's money. Until we do that, we will be going down the road to financial destruction and complete destruction of everything we hold dear in America.

I am fed up, sick, and tired of listening to some Members of Congress, men that you expect more than just lip service from, when they have something that is of particular interest to them, getting up and saying, "Let the bureaucrats run America and let Congress do the wishes of the New Deal socialists." We were elected to represent all the people of America as well as the people in our own district. I sincerely trust you will not vote against this simple amendment which provides that the Interior Department shall come to the Congress to get authorization for these great expenditures which will in the next few years amount to billions.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. JENSEN. I yield to the gentleman from Indiana.

Mr. MITCHELL. Does this amendment place any limitation on the size of the projects that will have to be approved by Congress?

Mr. JENSEN. No; it does not.

Here is what you are doing if this bill in its present form is made law. It will stir up a fight in Congress on reclamation projects, so sufficient appropriations for many worthy projects might be in jeopardy. You are doing a terrible disservice to reclamation and the development of the West by this kind of business; remember what I am telling you, my colleagues.

The CHAIRMAN. The Chair recognizes the gentleman from Wyoming [Mr. BARRETT].

Mr. BARRETT. Mr. Chairman, I am opposed to this amendment. The fact of the matter is that we have voted down an amendment that has the identical objective. There are just two ways to find a project feasible. In the first place, Congress has the power to consider individual projects and to declare them feasible, and that was done in the last session of this Congress. In the second place, this Congress since 1926 has delegated to the Secretary of the Interior the power to declare projects feasible under certain accepted rules and regulations as laid down by the Congress.

What is the effect of the amendment offered by the gentleman from New Hampshire? He says, "All right, the Secretary of the Interior can make these studies, he can make these findings, but the project will not become feasible and be authorized until adopted by the Congress." To my way of thinking that is absolutely absurd, because after all, what does that mean? It means that the Congress itself has to authorize the project. We have already voted on that particular issue. We have had it up. The gentleman from Iowa offered an amendment the effect of which was to say that a project could not be authorized except by a vote of the Congress. I think this is just a lot of horseplay, if you ask me. We have already voted down that proposal.

Mr. HARNESS of Indiana. Does not my good friend from Wyoming feel that it is the duty and the responsibility of Congress to recapture these delegations of power which were made at a time when they should not have been made and has not the gentleman himself criticized the Congress for having delegated power that the Congress itself ought to exercise?

Mr. BARRETT. What I criticize very severely is the abuse of the power the Congress delegates. That was the case in the matter of the Jackson Hole National Monument. I am sure that Congress recognized that fact when they repealed the action of the executive in establishing that monument.

I want to say furthermore that I think the gentleman is incorrect because we must delegate authority. We have delegated authority to the Interstate Commerce Commission to establish rates. We have delegated authority in hundreds of cases. As long as we safeguard these delegations of power with sufficient restrictions I am sure we are on safe ground.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Hampshire [Mr. COTTON].

The question was taken; and on a division (demanded by Mr. ROCKWELL) there were—ayes 51, noes 48.

Mr. ROCKWELL. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. ROCKWELL and Mr. COTTON.

The Committee again divided; and the tellers reported there were—ayes 58, noes 66.

So the amendment was rejected.

Mr. HOBBS. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. HOBBS: On page 7, line 5, after the period, strike out the remainder of the paragraph.

Mr. HOBBS. Mr. Chairman, please let me make clear at the very outset that this is not one of the amendments which is seeking to take anything away from the Bureau of Reclamation or the Secretary of the Interior that they have ever had before.

I believe this is an amendment which will help the bill, yea, which will save it from disastrous defeat; because it will never become the law with this joker in it that this amendment would eliminate.

I do not believe the committee realizes the extent to which these words go. I know there are Members of this House who are voting for the bill because it has always been said, and truly, that projects would be self-liquidating. Now, here is a proposition that authorizes the Secretary of the Interior to go back for 40 years, should he so desire, to the very beginning of the Bureau of Reclamation, and "make findings with respect to projects heretofore authorized as to that part of the cost thereof which should be allocated in accordance with the provisions of subdivision (7) hereof and in accordance with subsection (b) of this section, and such part of said costs shall, after transmittal to the President and the Congress of a report containing such findings, be nonreimbursable and nonreturnable. Operation and maintenance costs attributable to the purposes enumerated in subdivision (7) hereof shall, after the transmittal of any such report, be nonreimbursable and nonreturnable."

The only string tied to this unlimited grant of new power is, you will notice, that the allocation should be "in accordance with the provisions of subdivision (7) hereof and in accordance with subsection (b) of this section." This string refers only to the allocation and its purposes, and these purposes are stated to be, "(i) preservation and propagation of fish and wildlife pursuant to the act of August 14, 1946 (60 Stat. 1080), or (ii) recreation, including recreation by reason of the provision of enlarged or improved facilities or conditions specifically and reasonably required for such purposes, or (iii) general salinity control, or (iv) silt control. Costs allocated pursuant to such findings, together with the annual operation and maintenance costs attributable to the same purposes, shall be nonreimbursable and nonreturnable."

But if you will read carefully what this amendment seeks to eliminate, you will see that it ties itself only to the allocation and its purposes and eliminates from section 7 this vital condition precedent: "the part of the estimated cost," which effectually leaves out of all consideration the vital requirement that there should be an estimate of the cost of effectuating these purposes in the project.

Mr. MILLER of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. HOBBS. I will be so happy to yield to the distinguished gentleman from Nebraska.

Mr. MILLER of Nebraska. Will the gentleman point out in the portion he proposes to strike from the bill where that provision is found?

Mr. HOBBS. On page 7, line 5:

> The Secretary may make findings with respect to projects heretofore authorized.

I asked the Commissioner of Reclamation himself if I were correct in my interpretation that that would authorize him to go back to the foundation of his Bureau and in any project that subserved: (i) Preservation and propagation of fish and wildlife pursuant to the act of August 14, 1946 (60 Stat. 1080), or (ii) recreation, including recreation by reason of the provision of enlarged or improved facilities or conditions specifically and reasonably required for such purposes, or (iii) general salinity control, or (iv) silt control, the Secretary could make findings as to that part of the cost thereof which should be allocated, and that such part of said costs might become nonreimbursable and nonreturnable, he said, "Yes."

Mr. MILLER of Nebraska. He must of course report to the President and the Congress, and it must be accepted by the President and the Congress as to those provisions.

Mr. HOBBS. I am not entering into that debate; that is partisan, that has nothing to do with the merit of my amendment; but I submit that when the people from the arid lands of the West come to Congress and ask for irrigation and reclamation projects on the strength of their assurance written into the law that the users of the water, the users of the electrical energy would pay for the project eventually, they ought to live up to their contracts. I have supported every one of such bills since I have been here and would like to support this one. But I can never go back for 40 years and catch up the loose ends that never before have been mentioned in reference to projects some of which have been paid for, and take from the Federal Treasury money long since paid in good faith, by the provision that such funds shall become nonreimbursable and nonreturnable. So, it means that you may have a $40,000,000 joker in the bill. There is no excuse for it and no need for it. It does not help the bill. I submit that the amendment ought to be accepted by the Committee.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. CRAWFORD. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I take this time to ask the author of the amendment, the gentleman from Alabama [Mr. HOBBS] some questions. Does not the gentleman's amendment apply only to that portion of the projects mentioned in subparagraph 7, page 5, of the bill?

Mr. HOBBS. I do not think it even covers that much. It covers only the retroactive effect of that provision. We are leaving the provision in there as to all pending and future projects.

Mr. CRAWFORD. Let me submit my question this way: The amendment the gentleman offers would strike the language which appears in the bill now before us which has reference to that portion of projects heretofore built which deals only with the preservation and propagation of fish and wildlife. Is that correct?

Mr. HOBBS. And similar things in the past; yes.

Mr. CRAWFORD. In the past, all right. Now let us analyze the amendment for a moment. Suppose that 20 years ago a project was entered into which involved a cost, we will say, of $10,000,000, $50,000 of which at that time involved the preservation and the propagation of fish and wildlife, fish and wildlife being preserved in the interest of the general welfare of this country. Upon what grounds have we any right to burden a group of farmers who purchase water from a project so financed and built? It is making those farmers who buy that water pay for the portion of that project which was built for the preservation and propagation of fish and wildlife when the fish and wildlife are to be enjoyed by the people of this country generally. I think that is a fundamental issue which is raised by this amendment.

Mr. HOBBS. Mr. Chairman, will the gentleman yield?

Mr. CRAWFORD. I yield to the gentleman from Alabama.

Mr. HOBBS. I am delighted to reply to the gentleman. Assuming the hypothetical case which the gentleman mentions 25 years ago, they came, they offered to pay; nothing was said about the preservation of fish or the propagation of fish or wildlife; they have been paying on the basis of the original contract for all these 25 years. Some of these pay out completely in 40 years. This was never thought of then, nor were our fish hatcheries in existence then.

Now, all that I am saying is that as to those projects in which it is contemplated recreation, fish, game, or whatnot, anything you want to put in there, can be done now as to pending projects or future projects, but do not make a gift to these people who have been paying for 40 years out of the Treasury of the United States money for these purposes that was never contemplated, which projects in some instances have been paid out and liquidated in full.

Mr. CRAWFORD. I would like for the gentleman to say specifically whether the language of his amendment deals strictly and categorically only with the language preservation and propagation of fish and wildlife? It is limited to that, is it not?

Mr. HOBBS. No; it is not.

Mr. CRAWFORD. Let us see if it is not. Subparagraph 7, which the gentleman's amendment affects, says:

> The part of the estimated cost which can properly be allocated to (1) preservation and propagation of fish and wildlife pursuant to the act of August 14, 1946, or (2) recreation, including recreation by reason of the provisions of enlarged or improved facilities or conditions specifically and reasonably required for such purposes, or (3) general salinity control, or (4) silt control.

Mr. HOBBS. It applies to all those categories.

Mr. CRAWFORD. It applies to all those categories, I agree with the gentleman. That is a further reason why you have no moral right to impose such costs on a group of farmers who are buying water to irrigate their land. Let the general public pay for what they use and enjoy; don't impose it on the farmer.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. ROCKWELL. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. D'EWART. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I would like to call attention particularly to the wording of this paragraph. It goes further than has been indicated up to the present time:

> The Secretary may make findings with respect to projects heretofore authorized.

We have discussed up to now only projects that have been constructed. In the Missouri River Basin of Montana we have a lot of projects that have been authorized but not constructed, projects that extend along a river 2,500 miles long. Those projects were authorized in what is known as House Document 191. They have not as a whole been constructed; in fact, very few of them have even been started.

If the pending amendment is adopted those projects could not be reexamined to determine the amount of cost that should be charged to salinity, to silt control, to wildlife and other items that the Congress has indicated approval of in today's debate and which would be credited as nonreimbursable items. In other words, the farmers in those areas would

have to pay for such items if the projects are constructed.

We have in other parts of the country projects that have been authorized but not constructed. It seems to me if the Congress is going to adopt this principle in regard to future projects, projects that have been authorized but not constructed are entitled to the same treatment.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. D'EWART. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. As I understand the gentleman's position, he draws a real distinction between authorized projects of the past and projects actually constructed, and as I further understand, the gentleman's contention is that the language in the bill now does not apply to projects that have been completed.

Mr. D'EWART. The language of the amendment applies both to authorized projects that have not been constructed and authorized projects that have been constructed.

Mr. HOBBS. Mr. Chairman, will the gentleman yield?

Mr. D'EWART. I yield to the gentleman from Alabama.

Mr. HOBBS. I think the gentleman is very mistaken. It does not touch it. My amendment touches only those that were heretofore authorized and does not touch those that are now pending or in the future. If there is any question about it, I will be glad to call attention to section 7 and subsection (b) of section 9. There is not a word in my amendment that applies to anything but those heretofore authorized.

Mr. D'EWART. I would like to say in answer that no project that has been constructed in the past was constructed without first being authorized; therefore the amendment applies to not only projects authorized but also those that have been authorized and constructed.

Mr. CURTIS. Mr. Chairman, will the gentleman yield?

Mr. D'EWART. I yield to the gentleman from Nebraska.

Mr. CURTIS. The adoption of the amendment would certainly make the rule lack uniformity in the various sections of the West.

Mr. D'EWART. That is correct.

Mr. CURTIS. It seems to me that this committee has done a good job in working out this bill. I have voted against the previous amendments and I shall vote against this one and support the bill.

Mr. RIZLEY. Mr. Chairman, will the gentleman yield?

Mr. D'EWART. I yield to the gentleman from Oklahoma.

Mr. RIZLEY. For instance, in my own congressional district there are two projects, one known as the Optima Dam project, authorized by this Congress more than 10 years ago, but construction of the project has never even yet been commenced. Of course, the adoption of this amendment offered by my good friend from Alabama would impose a situation on my folks out there entirely different than these projects that are to be built in the future, because they have been authorized heretofore. This amendment clearly, I think, takes in those projects, all of the projects, that were heretofore authorized, even though no construction work has been done on them.

Mr. D'EWART. The gentleman is entirely correct. The amendment includes the authorized projects, whether constructed or not constructed.

I therefore oppose the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Colorado [Mr. HILL].

Mr. HILL. Mr. Chairman, on first appearance this would not be a bad amendment, but this is just another illustration of what happens when you try to write legislation on the floor. In my personal opinion this is going to sabotage the very thing we are trying to accomplish in this bill. Let me call your attention to a few of the things that might happen and do happen on these great western projects.

Let me read from section 9, paragraph (7) at the top of page 6 of the bill, "recreation, including recreation by reason of the provision of enlarged or improved facilities or conditions specifically and reasonably required for such purposes."

Now, a project could very easily be started, finished, and completed in every detail, and then this part that I have just read have no bearing or interest on the project for years after the project had been completed and in use.

Let me read clause (iii): "General salinity control."

Now, the control of the water itself is a very important project. I am referring to the changes in the water after you find out you have had it in this reservoir for months or years past. The very standing of the water in the reservoir and the condition of the soil may so affect the change of that water that the farmers cannot use it. I suppose on the floor of this House you want to rewrite this legislation and prepare it in such a way that no recourse could be had by the farmers who had irrigated their lands and established their ditches and prepared their land for water, and then to find themselves up against the proposition where none of the water was usable after a certain number of years. Still a worse condition exists, and that is this. I am talking about silt control. Silt can put an irrigated section out of business.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Michigan.

Mr. CRAWFORD. With reference to salinity, a man would need to go into the Central Valley of California and spend 3 or 4 weeks on the study of that one question alone before he would be prepared to discuss this thing intelligently.

Mr. HILL. Of course.

Mr. CRAWFORD. After the deal has been completed and been in operation for years, you may find the accumulation of silt that destroys the use of the water. Farmers have some rights in this the same as other people.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. HILL. I yield to the gentleman from Arizona.

Mr. MURDOCK. I call the attention of the Committee to the fact that in the Committee on Public Lands we had a discussion on almost every phase of this bill, and on this particular phase of the nonreimbursability of the items named, such as salinity control, there was no controversy. We were unanimous all the way through in making those items nonreimbursable. While that does not quite apply to the matter of making them retroactive, yet I think we ought to apply the rule now generally accepted uniformly.

Mr. HILL. In discussing this question of silt, let me say that only today in a discussion of this bill with some friends of mine I learned that the lake behind the great Boulder Dam, now called the Hoover Dam, in the course of a number of years will fill itself completely up with silt. If you apply that to many irrigation lakes in my own county and my own district, we have lake after lake that is beginning to be filled with silt.

If you accept the amendment of the gentleman from Alabama [Mr. HOBBS], for whom I have the highest respect as one of the real lawyers of this House, you will find yourself in difficulty on these projects, because when these reservoirs fill up with slit certainly the Interior Department has a responsibility in keeping their contract with those farmers using this water. The land under the Colorado-Big Thompson project has been bonded; it is a mortgage against every farm in that district. Would you come along and write words in here which you cannot justify and tell those farmers that after they have mortgaged their farms and paid the mortgages off, and the reservoirs fill up with silt, that they have no recourse on the Department of the Interior who provided the water?

In Colorado we have one of the first projects that was ever built by the Interior Department. Today there is a committee working to bring before this House legislation to provide some protection to the farmers in that particular district who find themselves in severe difficulty. At the time of building this project, or when completed and used for several years many of these problems or difficulties arose. Now if you adopt this amendment, the farmers on this project can have no possibility of ever receiving any assistance from the Interior Department in correcting their troubles. This amendment should be unanimously defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. HOBBS].

The amendment was rejected.

Mr. PICKETT. Mr. Chairman, I have two amendments at the Clerk's desk. Since they apply to the same section of the bill and deal with the same subject, I ask unanimous consent that they may be considered together.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. PICKETT:

On page 7, line 12, after the word "nonreturnable", insert the following: "only after provision has been made by act of Congress after the Secretary has transmitted to the

President and the Congress the report and findings involved."

On page 7, line 15, after the word "nonreturnable", insert the following: "only after provision therefor has been made by act of Congress enacted after the Secretary has submitted to the President and the Congress the report and findings involved."

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield for a parliamentary inquiry?

Mr. PICKETT. I yield.

Mr. ROCKWELL. Mr. Chairman, has not this amendment already been covered in other amendments that have been voted on today?

Mr. PICKETT. I insist on the amendment, Mr. Chairman. I cannot yield further. The situation is simply this, notwithstanding that you voted down the principle which I espoused a few moments ago, when I asked to make it mandatory that projects approved by the Bureau of Reclamation be submitted to the Congress for authorization, I think certainly that the problems presented by the gentleman from Alabama and the argument he offered in support of it is a further reason for the necessity for requiring that the approvals be given by an act of Congress rather than the Bureau of Reclamation or the Secretary of the Interior.

Now let us look at what you have here. Based on certain criteria upon the approval of the Secretary of the Interior, he may approve projects. Then as you go along and read your bill you find this language commencing on line 24, page 6:

If all such allocations do not equal said total estimated costs, then such new project, new division, or new supplemental works may be undertaken by the Secretary only after provision therefor has been made by act of Congress—

And so forth. That is what is in this bill. You are assuming apparently that the Congress will be more generous with your projects than the Secretary of the Interior would be because you have written in the bill language which purports to say that if under the criteria that he must consider he does not find it economically feasible and sound, then you ought to come to the Congress and you must come to Congress and get authorization for it; but where it happens to suit you or where it is deemed to be feasible and economic under the terms of this bill, you do not want to do anything except let him have carté blanche to authorize it. Why should you not be fish or fowl instead of fish and fowl as the case may be. It simply amounts to this, that basically and certainly under good and sound principles of government and good and sound practice by the Congress, we ought to require that all projects of the size and importance of reclamation projects be approved by act of Congress, just as we do with flood-control projects and rivers and harbors projects and other projects of that kind.

Mr. MILLER of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. PICKETT. I yield.

Mr. MILLER of Nebraska. Are not the amendments offered by the gentleman similar in principle to the amendment which the Committee defeated this afternoon?

Mr. PICKETT. I certainly agree that they are, and I would want to insist that the action of the House a few moments ago was erroneous if you are going to act under sound legislative principles and not delegate your authority to somebody in a Federal department, bureau, or agency.

I want to call your attention again to the language found in this bill where you say if it is not feasible under the criteria then come down to Congress and maybe Congress will be a little more generous with you. That is the effect of it. But if it is feasible, you say we still do not want to come down here and justify it before a committee of this House.

(Mr. PICKETT asked and was given permission to revise and extend his remarks and also to revise and extend the remarks he made previously.)

Mr. ROCKWELL. Mr. Chairman, I make the point of order that this amendment in substance was already voted down by the committee.

The CHAIRMAN. The point of order comes too late.

Mr. ROCKWELL. Mr. Chairman, I move that all debate on this amendment do now close.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. PICKETT].

The question was taken; and on a division (demanded by Mr. PICKETT) there were—ayes 19, noes 40.

So the amendment was rejected.

Mr. HARNESS of Indiana. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and eight Members are present, a quorum.

Are there any further amendments to this section? If not, the Clerk will read.

The Clerk read as follows:

SEC. 2. That section 9 (c) of the Reclamation Project Act of 1939 (U. S. C., 1940 ed., title 43, 485h (c)) is hereby amended to read as follows:

"The Secretary is authorized to enter into contracts to furnish water for municipal water supply or miscellaneous purposes. Any such contract either (1) shall require repayment to the United States over a period of not to exceed 40 years from the year in which water is first delivered for the use of the contracting party, with interest not exceeding the rate of 2½ percent per annum on the unpaid balance if the Secretary determines an interest charge to be proper, of an appropriate share as determined by the Secretary of that part of the construction costs allocated by him to municipal water supply or other miscellaneous purposes; or (2) shall be for such periods, not to exceed 40 years, and at such rates as in the Secretary's judgment will produce revenues at least sufficient to cover an appropriate share of the annual operation and maintenance cost and an appropriate share of such fixed charges as the Secretary deems proper, and shall require the payment of said rates each year in advance of delivery of water for said year. Any sale of electric power or lease of power privileges made by the Secretary in connection with the operation of any project or division of a project shall be for such period, not to exceed 50 years, and at rates as in his judgment will produce power revenues which, together with power revenues from all other sales or leases or power privileges, will be at least sufficient to cover (1) an appropriate share of the annual operation and maintenance cost, including reasonable provision for replacements; (2) the return, within 78 years from the date upon which each feature becomes revenue producing or the useful life of such feature, whichever may be the shorter, of an appropriate share of the construction investment properly allocable by the Secretary to commercial power, together with interest on the unpaid balance at a rate of not less than 2½ percent per annum; (3) the return, without interest, within a reasonable period of years not exceeding the useful life of the irrigation features, and with respect to each irrigation block, in a period conforming so far as practicable to the period within which water users are required to repay their share of the irrigation costs, of that share of the investment found by the Secretary pursuant to subsection 9 (a) hereof to be properly allocable to irrigation but assigned for return from net power revenues: *Provided*, That the power revenues to be applied toward the fulfillment of the obligation to return that share of the investment found by the Secretary pursuant to section 9 (a) hereof to be properly allocable to irrigation but assigned for return from net power revenues may include no more than one-fifth of the revenues derived from the interest component of power rates in addition to any and all sums otherwise assigned for such purpose from power revenues: *Provided further*, That all revenues derived from the interest component of power rates not so assigned shall be accounted for as interest and shall, together with all other moneys so required to be returned to the United States, be returned to the United States as provided by the act of May 9, 1938 (52 Stat. 291, 318); and (4) such other costs and fixed charges as the Secretary deems proper. In said sales or leases preference shall be given to municipalities and other public corporations or agencies; and also to cooperatives and other nonprofit organizations financed in whole or in part by loans made pursuant to the Rural Electrification Act of 1936 and any amendments thereof. Nothing in this subsection shall be applicable to provisions in existing contracts, made pursuant to law, for the use of power and miscellaneous revenue of a project for the benefit of users of water from such project, and the provisions of this subsection respecting the terms of sales of electric power and leases of power privileges shall be in addition to and alternative to any authority in existing laws relating to particular projects. No contract relating to municipal water supply or miscellaneous purposes or to electric or power privileges shall be made unless in the judgment of the Secretary it will not impair the efficiency of the project for irrigation purposes."

Mr. HARNESS of Indiana. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. HARNESS of Indiana: On page 8, line 21, strike out "seventy-eight" and insert "fifty."

Mr. HARNESS of Indiana. Mr. Chairman, this amendment is intended to continue the policy in connection with the retirement of the contribution of the Government loan on these projects at 50 years, the same as it is now. I understand the law does not specify any particular period over which the Government loan shall be amortized, but it has been the policy since the reclamation projects started to amortize the Government loan over a period of 40 years, allowing the first 10 years for the project to become self-sustaining.

The proposal in this bill is to increase the total period to 78 years. No project

has ever been carried over such a long period of time. Commercial loans are never based on such extended terms. This is simply subsidizing cheaper power rates, which power is simply an incident of the reclamation and irrigation project. I think it is entirely too long for the Government to wait for its money. It is true this bill provides for interest charges. The law as it is today provides for a rate of 3 percent, but the Solicitor of the Department of the Interior has ruled that interest should not go back into the Treasury. In other words, returns on Government loans could be used for other projects in connection with the Interior Department program.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. HARNESS of Indiana. In just a minute.

This bill proposes to reduce the interest rate to 2½ percent and cover back into the Treasury 2 percent of the 2½; but one-half percent is still left in the hands of the Secretary to play with just as he has been playing with the 3 percent.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield for a correction?

Mr. HARNESS of Indiana. In just a minute I will yield to the gentleman.

I think the ruling of the Solicitor was wrong and was not based upon any sound principle of law. It was never the intent of this Congress to waive interest on the loans that we made for these projects, even though they were covered back into the Treasury—2 percent interest.

It is proposed to increase the repayment period from 50 to 78 years. That is not good business, and I hope this Committee will adopt this amendment reducing the period of time to the number of years established by the Interior Department heretofore.

I now yield to the gentleman from New Mexico.

Mr. FERNANDEZ. The gentleman has twice said that the Secretary had 2 percent to use in any way he saw fit, to play with on other projects. I remind the gentleman that it can be used only on a particular project to remit irrigation charges and costs in that particular project.

Mr. HARNESS of Indiana. The gentleman perhaps is not familiar with the activities of the Interior Department in handling the money that has been placed at their disposal.

Is there anything wrong with maintaining the situation as it is today? Are we going to subsidize cheaper power rates in competition with private power up there by delaying the period of time in which the taxpayers are going to get back the money they lent? I think it is all right for the Government to lend this money on these projects, but I do not think it is fair for them to use the money over such a long period of time in order to cut down the rate on power which is only an incident of the original project.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. CARROLL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this is really the nub of the whole bill, this is the real issue that is before this body right now. These other amendments that we discussed, as I have said before, were not germane to this legislation, so this is the real issue that is before this body and I hope now we have unveiled the forces that are working against this piece of legislation. The gentleman has expressed it: Are we going to give the people cheap power? That is the issue in this whole piece of legislation.

Let me summarize for just a moment what has happened in the weeks, the months, and the years in the discussions that came before the committee. The real issue has been this, let us take for example the Colorado-Big Thompson project. It is a multiple-purpose project. In the Colorado-Big Thompson project, for example, the estimated cost of creating that project was $50,000,000, $25,000,000 allocated to irrigation and $25,000,000 for the sale of electric energy. There is a distinction between estimated costs and actual cost of construction. The estimated cost is based on a pay-out period of 50 years. As stated by the gentleman from Indiana, there is no law governing this except an opinion of the Solicitor General. That opinion, as the gentleman from Wyoming has pointed out on numerous occasions today, sets no limitation upon the pay-out period. It can be for the natural life of the project. This legislation for the first time imposes a limitation upon the power of the Secretary of the Interior. That limitation is 78 years or the useful life of the project, whichever is the shorter; in other words, a limitation of 78 years.

Mr. Chairman, it is the duty of the Secretary of the Interior to determine the economic feasibility of a project. What do I mean by that? When he goes out to estimate whether or not these projects are feasible he has to find out where you can sell the power and how much you can sell it for.

Let me tell you what has happened in the case of the Colorado-Big Thompson project. I mentioned the estimated cost of construction as $50,000,000. It has been said that the Bureau of Reclamation has not done a good job. As a result of the increase in the cost of material, labor, and some other factors, that original estimate of $50,000,000 has now gone to $131,000,000. The farmers of northern Colorado cannot and should not bear that increase. It has to come from some place. Where will it come from? It will come from the eventual sale of electrical energy.

What is the price now? Seven mills per kilowatt-hour—too high for sale in that area. They will be pricing themselves out of the market unless we enact this legislation. If there were no legislation at all and we used that 3-percent interest to pay for the cost of irrigation and the increased costs, then the power would sell for about 5.1 mills. They can sell it in that area for five and one-tenth. Under this law which extends the period from 50 to 78 years, we will have a comparable power rate.

Mr. WADSWORTH. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from New York.

Mr. WADSWORTH. May I ask the gentleman how the figure "78" was arrived at?

Mr. CARROLL. The figure "78" was reached, according to my best recollection, and I stand to be corrected, in this way: We had a certain problem to meet. There was the feeling that we should pay the interest component of 3 percent back into the Treasury. Obviously if we took the interest away from the cost of irrigation we would have to increase the power rate. Power is already carrying too large a load. But the Appropriations Committee insisted that we have got to pay the 3-percent interest money back into the Treasury. This legislation is the compromise coming out of the committee. There was a feeling that if we extended the pay-out period to 78 years we could meet all of the objections. We pay our way and we will pay the interest back into the Treasury of the United States. There will be no loss of money. At the same time we will not increase the power rate to take us out of the power market. It is just a sound business transaction.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. CARROLL. Mr. Chairman, I ask unanimous consent to proceed for two additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HARNESS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from Indiana.

Mr. HARNESS of Indiana. I hope the gentleman will bear with me for about a half a minute. I neglected to say when I offered this amendment that I was doing it on behalf of the gentleman from Iowa [Mr. JENSEN], who was momentarily called from the floor, he, of course, being chairman of the Subcommittee on Interior Department Appropriations and vitally interested in this matter. He asked me to say to the House in his behalf that this is one of the most important things that he had to contend with in this bill and he hoped the amendment would be adopted.

Mr. CARROLL. May I say to the gentleman from Indiana that is one of the reasons that we have recommended this legislation. It was to meet the urgent and repeated demands of the Subcommittee on Appropriations. I personally felt there was no need for this legislation but there was a feeling, because they were holding a club over the head of the West, that we had to return the percentage into the Treasury; therefore, in order to do that and meet the demand of the gentleman from Iowa [Mr. JENSEN], and a former Member of Congress from Ohio, Mr. Jones, we recommended this very legislation.

Using the Colorado-Big Thompson as an example, I say to you if your amendment prevails it will mean an uppage in the power rate that may destroy the economic feasibility of the Colorado-Big Thompson, and further I say to you as regards the Central Valley Authority in California, if the Members of California

support this amendment, you may destroy the operation of the Central Valley Authority; this same principle pertains to every great project in the West.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. PLOESER. Mr. Chairman, I ask unanimous consent that the gentleman be permitted to proceed for two additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. PLOESER. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from Missouri.

Mr. PLOESER. I merely wanted to point out to the gentleman that last year this Congress agreed to a 40-year amortization for TVA. That does not mean that TVA is actually on a 40-year amortization basis because probably the average age of TVA and its various projects is already 7 or 8 years. But, it was to stay within a projected 50-year period, and TVA cooperated with that sort of a program. TVA includes not only power; it includes navigation and flood control. We worked out, at least tentatively, and enacted into law, a 40-year amortization program which seems to be most reasonable. I want to see reclamation go forward. I want to see cheap power. I think it is part of the life stream of the economy of the Nation, and where there are excessive charges by private operators in the power field, I think the yardstick is a healthy one. But, let us not be uneconomic in whatever our plans may be. The authorities seem to feel that somewhere between 40 and 50 years is reasonable amortization. Now we say that some projects in some sections of the country will be 78 years and others will be 40 and 50. I do not think we are entirely logical in that.

Mr. CARROLL. May I interrupt the gentleman to say that we are not confronted with a theory; we are confronted with an economic fact, and the economic fact is this. The West is imposed upon, may I say. They insist that we shall pay the interest component into the Treasury instead of into the cost of irrigation.

Mr. PLOESER. Of course, TVA is paying back into the Treasury.

The CHAIRMAN. The time of the gentleman from Colorado has again expired.

Mr. PLOESER. I would like to ask for additional time if the Committee does not object. Mr. Chairman, I ask unanimous consent that the gentleman may be permitted to proceed for five additional minutes. I think his discussion is most intelligent.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CARROLL. I think the TVA, with which I am not familiar, may have different economic circumstances surrounding it, but from listening to hours and days of testimony, if the amendment offered by the gentleman from Indiana prevails, I know what it will do to the power rate all over the West, and I know that it will increase that power rate to such an extent that you may destroy the economic feasibility of the existing projects. May I finish by saying this, from a sound business standpoint the Government has invested millions of dollars from which it must receive a return on, from revenue which can only come from the sale of electric energy. That electric energy must be sold at a rate which is reasonable.

Mr. PLOESER. Well, but you have two factors to consider when you are trying to allocate your funds and make a division as between irrigation or flood control or whatever else you have and power. You are not going to build a project that has to price itself out of the market. If you are going to build one it must price itself within the competitive market for the users of power, and then it is only natural that you will get your project in such shape that you can be economic enough to do it within a reasonable amortization period, or else it is not beneficial to the Nation in the long run. It is still not too late to make proper allocation of the costs.

Mr. CARROLL. The allocation of the costs has already been made. Irrigation in the West can bear only a certain amount of the load of these great projects. The great brother that bears the load is power. If you put too much of a burden on power, you will destroy the great projects.

Mr. PLOESER. Beyond the point of what costs can be revised, if they can be revised in the light of facts from $50,000,000 to $120,000,000, which the gentleman is talking about, they can be revised in the light of the facts as to the proper allocation of the investment.

Mr. CARROLL. I am sorry I cannot agree with the gentleman.

Mr. PLOESER. One is just as good as the other.

Mr. CARROLL. It may be true as to future projects but clearly not as to existing projects.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. The gentleman from Missouri brings up the agreement that was reached with TVA on this repayment plan. This is an entirely different situation. It involves more than one project. TVA cost allocations were defined and fixed based on the amount of revenues being paid into the Treasury, but here you have numerous projects. You cannot treat them as individuals, the whole group must be taken into consideration.

Mr. CARROLL. The real point here is that the Government does not lose a dollar, not a dollar.

Mr. JONES of Alabama. Of course not.

Mr. CARROLL. We are investing not only in the future of the West but in the future of this Nation. There is a bill before this Congress that may ask for $2,000,000,000 for a great Air Force, continued expansion and production of electric energy is needed for this program.

Mr. JONES of Alabama. If we had just one project under this bill, we might agree to that.

Mr. CARROLL. Of course.

Mr. HARNESS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. CARROLL. I yield to the gentleman from Indiana.

Mr. HARNESS of Indiana. The project the gentleman mentions was one of those projects the Secretary of the Interior approved based upon an investigation by the engineers as to its feasibility under the policies then existing in the Department of the Interior.

Mr. CARROLL. I am not sure of that, but I think it is reasonably accurate.

Mr. HARNESS of Indiana. That is true. That policy was that amortization of the Government loan would be made upon a basis of 50 years.

Mr. CARROLL. That is right.

Mr. HARNESS of Indiana. Now, after the project is all established and after the Secretary has made his survey and recommended that it could be done feasibly and the rates would be low, the bill recommends that we extend the period from 50 to 78 years, so you can reduce the power rates even lower than that.

Mr. CARROLL. I think the gentleman misses the point. Year after year for over 10 years the Congress has appropriated money to take care of the expansion of this program, so by implication it has endorsed the change in the plans.

Mr. HARNESS of Indiana. By that very thing, by the expansion of the program, you are increasing the revenue. If it was right in the first place, it ought to stay that way now.

Mr. WADSWORTH. Mr. Chairman, I move to strike out the last word, and rise in support of the amendment.

Mr. Chairman, I cannot pose as having an intimate knowledge of this rather complicated problem involved in the reclamation undertakings. When we heard the description of the provisions of this bill before the Rules Committee, the thing that attracted my attention first was this particular provision for the extension of the amortization period to 78 years. In connection with that extension, I noted, as you all have, that compared with the current rate of interest charges, which is 3 percent, the rate has been reduced to 2½ percent, 2 percent to go into the Treasury, whereas none of the 3 percent went into the Treasury before, and one-half of 1 percent to be used by the Reclamation Service for assisting the project, I suppose, to meet unexpected emergencies. That feature of the bill I thought was excellent. I thought that was a distinct step in advance toward sound financing. It decreases the cost to the beneficiaries of the project by reducing the rate of interest from 3 to 2½ percent, and still leaves something in the hands of the Interior Department to the extent of one-half of 1 percent to be used for what might be termed emergencies.

I was somewhat dismayed, however, to find that when we decreased the burden to be placed upon the beneficiaries, we at the same time increased, from the standpoint of sound economics, the burden on the Federal Treasury by increasing the amortization period from 50 years, which has been the customary period, to 78 years. I do not pretend to be a highly educated economist. I have been in business for myself for some

years. I have yet to hear of a 78-year mortgage. It would be new to my experience or observation. I have never yet heard, or perhaps I am mistaken, of a bond running for 78 years. But there is another side to this which may not seem important to you. What I am interested in is that new projects shall be given fair consideration not only by the Committee on Public Lands of the House but by the Committee on Appropriations. The projects which are proposed in the future will be the more persuasive to the Congresses of the future if the amortization period is not beyond the normal period for amortization in business life. I fear, and I say this quite seriously, that this increase from 50 years, let us say, to 78 years in the amortization period will be a deterrent in the Committees on Appropriations of the future. I am not a member of the Committee on Appropriations nor of the Committee on Public Lands, but I have some ideas of the psychology of Congresses. It is going to be a pretty difficult thing for the proponents of a project to come before the Committee on Public Lands in the future, and especially the Committee on Appropriations in the future, and defend a project when the members of the committee will understand that it is going to be financed in a way that no other economic undertaking that I know of is ever financed in the United States. I honestly believe that the 78-year period will be a deterrent to new projects, and I ask the Members from the West who take such an interest in such things to bear that in mind.

Mr. MURDOCK. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, before I get to the matter of the amendment, I want to mention two things. A moment ago when the gentleman from Colorado had the floor, the gentleman from Indiana asked regarding the project mentioned in Colorado, the Big Thompson project. I gathered from what the gentleman from Indiana said that he thought the Big Thompson project was one of those established on a finding of feasibility by the Secretary of the Interior. I was in Congress at the time and I know that the Big Thompson project was duly authorized by Congress. It was handled by the Committee on Irrigation and Reclamation while I was a Member, and passed the House and Senate, as other authorization acts were passed. I want to make that correction and make it clear that this is not a project which was brought in by the Secretary of the Interior on a finding of feasibility.

May I refer to one other matter? I listen always with great interest to my friend the gentleman from New York. He is a sage and a philosopher. He said he had never heard of a mortgage running for 78 years. I do not know whether I have heard of a mortgage running for 78 years, but I have heard of 99-year leases. I think it is possible to have a sound business contract extending over a long period of time.

Mr. WADSWORTH. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. I am glad to yield to the gentleman.

Mr. WADSWORTH. Does the gentleman put mortgages and leases in the same category?

Mr. MURDOCK. May I point out to the gentleman that they are both business contracts or transactions, and really are not entirely dissimilar. The gentleman from New York says that the 78-year period is likely to deter future projects. Let me call attention to the fact that irrigation is growing, therefore the law must be undergoing evolution. At the present time we have irrigated about 10,000,000 acres of land in the United States. There are 20,000,000 acres, or a little more, that could be irrigated by the total development of our water resources. But, mind you, the easy projects have already been developed. From now on we shall have more difficult ones. The very first project was the Salt River Valley in the State of Arizona. Roosevelt Dam, begun in 1906 and finished in 1911, named after Theodore Roosevelt and dedicated by him, was really the Father Abraham big dam in the reclamation cause, and that was a comparatively easy program of development as compared with those in the future.

We are going to have to have more time for repayment. I want to call attention to the fact that in the evolution of the law we have progressively increased and lengthened the period of repayment. Ten years was first set, then 20 years, 30 years, 40 years, and 50 years. Those are the repayment periods specified in earlier reclamation acts. Now we come here with an act that proposes a 78-year period for repayment and I feel the nature of the investment amply justifies the longer period.

A year and a half ago I was at Hoover Dam and went through the great power plant for the third or fourth time, taking part in a celebration. They were celebrating the tenth anniversary of the beginning of the production of power at Hoover Dam. Well we might celebrate it. Think of the Hoover Dam and the Grand Coulee Dam and what they did during the war in connection with the production of power which was so necessary. But it was pointed out that in 10 years of production the power plants at Hoover Dam had paid 25 percent of the cost. Probably it ought to pay out in 40 years, or thereabouts. Will that dam last any longer than 40 years? It will last a thousand years if properly taken care of. Is it good security?

When the great Coolidge Dam was built in Arizona, on the Gila River, named after the late President Calvin Coolidge, they put two giant eagles as ornaments on the south face of that dam. There they are, with outspread wings, 50 feet from tip to tip. A cartoonist pictured those two giant eagles and had one eagle saying to the other, "Steady Brother; the first thousand years are the hardest." I appreciate that picture and that fact. I think those eagles will be standing there on Coolidge Dam for a thousand years. Now, is it too much to ask that we have 78 years to pay for such a permanent structure?

The CHAIRMAN. The time of the gentleman from Arizona [Mr. MURDOCK] has expired.

Mr. PHILLIPS of California. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, this is the amendment proposed by the gentleman from Iowa [Mr. JENSEN] who was unfortunately called away from the floor, and is now offered for him by the gentleman from Indiana.

I agree with the gentleman from Colorado who said it is the nub of the bill. I completely disagree with the reasons given by the gentleman from Colorado for saying it was the nub of the bill. I am in complete disagreement with him today, as I was yesterday, that this necessarily would raise power rates, or has any direct relation to an increase or decrease of the power rates.

Those who read the CONGRESSIONAL RECORD this morning read the colloquy between the gentleman from Colorado [Mr. CARROLL] and the gentleman from Montana [Mr. D'EWART] in which the gentleman from Montana, a member of the committee, also said that the evidence did not support the statement that a reduction to 50 years would change or increase the power rates.

I again call attention to the fact that I was for 4 years a member of the Committee on Irrigation and Reclamation, and I say that that evidence does not support the statement that this would increase power rates; that that is just an unsupported statement.

Now, to the gentleman from New York who asked about the length of time, the present custom and regulation in the Department is that a 40-year period, plus a 10-year construction period, without the payment of interest, makes the 50-year total. There is one project authorized as high as 67 years. There is no project, to my knowledge, authorized beyond that, and the figure 78 has no connection with any existing practice in the Department. I therefore do not call it a compromise in any sense of the word. I think a compromise would have been something between 50 and 67 years.

With reference to existing projects like, let us say, Central Valley, so ably represented by the gentlemen from California [Mr. JOHNSON and Mr. GEARHART], who are here, the evidence has shown that project can pay itself out in less time than any time that has been discussed here, and therefore does not enter into the picture. The question of cost of operation being charged against the project is more pertinent than the number of years.

I think Congress could properly investigate the costs of operation of some of these projects. We would find they could pay themselves out in less time than now contemplated. The fact remains that aside from everything else there is no justification for 78 years, and that this House should certainly support the soundness of the proposal to set a limit at 50 years.

I think it is unfortunate that when any Member stands on the floor of this House to defend the soundness of the finances of the United States, the integrity of the financial condition of the United States and its projects, there

should immediately be raised a charge of for or against reclamation, of for or against some hypothetical Power Trust. Those of us who speak for this amendment are just as much interested in reclamation as those who speak against it.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield to my distinguished friend from California.

Mr. WELCH. I hope my California colleague is not trying to convey the impression to the members of this Committee who are not as familiar with the mechanics of the laws or of the bill before us as some of us are, that the life of the project, whether it be 40, 60, or 78 years will cost the Government of the United States one additional penny.

Mr. PHILLIPS of California. They are reimbursable.

Mr. WELCH. They are reimbursable, but not out of the Public Treasury.

Mr. PHILLIPS of California. I can argue that point with the gentleman if he will get me additional time.

Mr. WELCH. This additional time of repayment does not cost the Federal Government one dollar.

Mr. PHILLIPS of California. I think it does; yes.

Mr. WELCH. It matters not whether those projects run, as I said, 40, 60, or 78 years, or to the life of the project.

Mr. PHILLIPS of California. It adds to it indirectly.

Mr. WELCH. It does not add to it indirectly, if I may say so.

Mr. PHILLIPS of California. All I am trying to impress upon the Committee today is that I think a limit of 50 years as suggested in the amendment of the gentleman from Iowa is a good limit.

Mr. PLOESER. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield.

Mr. PLOESER. I think it must be recognized by every one of us, whether it will cost the Government additional money or not, that no one can write a law today that will make any particular project live and be serviceable and useful 78 years from now. The law we write will not make it serviceable.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. ANGELL. Mr. Chairman, I ask unanimous consent to extend my own remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ANGELL. Mr. Chairman, there are no Members in this House who are more interested in the well-being of the West than those who reported out this bill. I am a good friend of reclamation. I do not want to do anything that will interfere with its successful operation. I do not want the Congress to take a position that will prevent the people from securing low-cost hydroelectric power. Therefore it pains me to state that H. R. 2873, as amended, in my judgment could be administered so as to be injurious to a vast region of our Western States. It needs clarification and safeguards. It could be construed in a way to break faith with the commitments already made and our agricultural economy. On page 4 of House report 880 on this bill it is shown how it came into being. With such a birth there is abundant opportunity for confused wording. From reading the bill I am convinced that we have such an ambiguous wording in the bill that no amount of amending on the floor can produce a safe result from the standpoint of the West or a proper return to the Treasury. It can be interpreted and applied in several ways. Confusion between the 78-, 50-, and 40-year periods mentioned in this bill is such that the interest-bearing power component period can be so staggered that the pay-out would be jeopardized. This could result in a power rate that would kill western industry and interfere with national defense. Such a rate could prevent a full return to the Treasury and could result in greatly reduced appropriation which would be a calamity to the West.

This bill will also likely injure western Army engineer projects. It goes into subject matter coming under the jurisdiction of the Public Works Committee. The use of the world "probably" throughout the bill nullifies any fixed formula that this bill purports to establish. This bill does not insure repayment on a sound basis. There has not been given opportunity for full consideration of the bill in order to secure safe and sound legislation. Therefore I feel that this bill should be given further study on the points I have raised either here in the House or in the other body.

Mr. LEMKE. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, this is a very important issue and it is the important issue in this bill. I realize that there is some misunderstanding. It is true that my friend from Indiana says he wants to maintain the present condition. Then he ought to be for the 78 years, because the 78 years fill in the gap to make feasible those projects that would not be feasible since in the bill we take the 3 percent interest component away from irrigation and give 2 percent of it to the Treasury and retain only one-half of 1 percent where it used to be 3. This is the issue.

Again you are mistaken when you say that all projects are to run for 78 years. That section of the bill provides "78 years or the life of the project, whichever is the shorter." That is the language of the bill itself.

Now let us analyze things a little further to see whether the Government loses any money or not. These are reimbursable projects. If for 50 years the Federal Government received nothing but the interest at 2 percent it would have received back its original investment 100 percent. You cannot get away from that. Suppose no part of the principal is paid for 50 years, the Government would have back its original investment 100 percent and still would have the original obligation coming from the power project. Consequently, it is wrong to assume that the Government is going to lose money on this.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from California.

Mr. JOHNSON of California. Is it not a fact that private companies do this very thing? For instance, the large utility in northern California refinances its bond issues all the time. When they come to the end of the 20-year or 40-year period they refinance and issue a new set of bonds.

Mr. LEMKE. The gentleman is absolutely correct.

The reason many of these things may not be understood by Members who are not on the committee, and this is no reflection upon them, is because this is a technical bill. There were different viewpoints, but we have gotten together.

Mr. Chairman, I want to read now a letter I have just received from the National Reclamation Association, one of the most powerful and useful organizations in America. This letter is addressed to me and is dated January 21, 1948:

DEAR REPRESENTATIVE LEMKE: The National Reclamation Association is much concerned as to the disposition which might be made of H. R. 2873 by the House of Representatives today.

This legislation is of vital concern to the Nation as well as to reclamation development in the West, as was so well pointed out by you in the debate on this bill Tuesday.

You and your colleagues also called attention in the House debate to the fact that last spring the report of the Appropriations Committee of the Senate contained a recommendation pointing out that legislation on this particular subject should be passed at the earliest possible moment.

Reason for such legislation comes from the necessity of clarifying the reclamation laws and bring to an end the continued controversy which has come from diverse interpretations of those laws.

The Irrigation and Reclamation Committee of the House has had such legislation under consideration for a period of more than 3 years. The legislation is difficult and involved. However, after extensive hearings the Public Lands Committee reported this amended bill which is now before the House. The language of the bill has been most carefully studied and considered, not only by interested parties but by the committee which heard the bill. To amend it further would most likely only lead to further misinterpretation and prolonged complications. It should also be observed that further amendments may bring difficult questions of administration.

The annual convention of the National Reclamation Association, held in October 1947 after this bill had been reported by the Public Lands Committee, unanimously endorsed it.

It is my conviction, Congressman, that this legislation is of such national import that it is worthy of the support of every section of the country, and it is my earnest hope that it may be approved in its present form.

Sincerely yours,

HARRY E. POLK, *President.*

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. PHILLIPS of California. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for two additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PHILLIPS of California. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from California.

Mr. PHILLIPS of California. I am not clear on the gentleman's statement that you have to have 78 years because of the change in the interest component. How can the gentleman say that when the Solicitor's opinion was not handed down until 1944 and these projects were approved before that? It is perfectly evident to me that 78 years is not essentially a figure involved in the approval of the project.

Mr. LEMKE. I would say that reclamation is growing. We are spending millions of dollars in the Missouri River Basin alone; I think something like two hundred or three hundred million dollars, and there are many new projects connected with that that are absolutely essential to make it feasible.

These are perfectly sound, the same as a loan by the Federal land banks. That is feasible if they give me enough time to pay it, but if they do not give me enough time, it is not feasible. But still it is perfectly sound. Therefore, in view of the fact that the private corporations keep on renewing many of their loans, running far more than 78 years—some of them run up to 100 years or more—I feel there can be no legitimate objection to 78 years.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. CRAWFORD. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, when you go out West and look at those dams, if you know anything about depreciation, you will not come to the conclusion that they are going to disappear within a few months or a few years. If we are building dams out there and putting our money into them with the idea that they are not going to be any good 50 years from now, you better stop your building. If you ride over New England, you will find frame homes in perfect condition that have lasted anywhere from 75 to 125 years. You can go into the South and see log cabins that have been standing for 75 to 80 years, and still habitable, and if you put a little new plaster on the walls, they will probably be in good shape for another 50 years.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. CRAWFORD. I yield.

Mr. McDONOUGH. That certainly is not the point of this amendment.

Mr. CRAWFORD. Oh, yes. I will make another point. That is just one point.

Mr. McDONOUGH. I think in fairness the gentleman should state it is not that the project is no longer——

Mr. CRAWFORD. Just a moment. The gentleman has not heard what I am going to say, so I decline to yield further.

Mr. McDONOUGH. It is a question for the Government to get out of the picture so that we can loan money on other projects.

Mr. CRAWFORD. I did not yield further.

Now, we have another point. You are proposing to sell water and power. You are proposing to sell it to them. If you sell goods and services to the American people, you generally have to sell them at a price that the buyer is willing to buy; at a price that he is willing to pay. So, when I go out here and build a factory or to buy an automobile or a truck, I figure on what the cost of the truck is and how long it will last me and what it will be worth to me while I am using it, and if the price is out of reach, I do not buy it. So, you can go out here and make a study and see whether or not the project is feasible from an economic standpoint; that is, whether or not it will produce something that you can sell at a price which the market will absorb. You have two propositions. You have the life of the project and you have the proposition as to whether or not the customer can afford to pay for it. Now, that is another point I wanted to make before the gentleman drew a conclusion about what I was going to say. If the project is going to depreciate and disappear within 50 years, certainly you do not want to extend your time to 50 or 78 years. If it is going to stand there 100 years and you can sell its products to the people and let them pay out on the basis of 78, that is just as sound as any other project we have in the United States. You could depreciate a factory so rapidly you could not compete in the market.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. CRAWFORD. I yield to the gentleman from New Mexico.

Mr. FERNANDEZ. Going one step further, you do not sell those power projects to the people. When you get through paying for them under this program, they still belong to the Government. The Government is building them for the use of the people and requiring them to pay for them in 50 years when, as a matter of fact, when they get through paying for them they still belong to the Government and not the people.

Mr. CRAWFORD. Now, let us get down to the question of changing the time from 67 to 78 years by mutual consent, you might say. The people who have done the calculating as to how this thing will work out from an amortization standpoint say this, and I am now referring to the Assistant Secretary of the Department of the Interior in his statement to a member of the committee, referring to the 67-year proposition which had previously been established. The Department accepted that.

> This was not unacceptable to the Department, in the light of the fact that it was coupled with provision for application, in aid of irrigation, of all of the interest returned on the power investment. However, when it appeared that only a portion of the interest returned on the power investment might be used to help pay off irrigation costs, then it became necessary to extend the period for amortization of power costs, if rates were to be kept at a level that would permit the disposition of large blocks of power.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. CRAWFORD. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CRAWFORD. You cannot continue to run Grand Coulee and Bonneville on an economically feasible basis unless you sell those big blocks of power. Go up there and look at the situation. The transmission lines are tied in like a piece of fabric through your whole Pacific Northwest. Seattle, Tacoma, Portland, and the other towns are tied into the piece. Your communities are all tied together. You are today furnishing 65 percent of the kilowatt hours used by all the people. It is accepted by everybody. The people who own the private transmission lines and the private power companies are just as agreeable to this as the people who have no financial interest whatever in the transmission or the power plants. You have made it a part of the economic structure of that section of the country, and you have to provide rates which will take care of the stand-by call for big blocks of power at a rate the public can afford to pay. That is the economic fact you are up against. So the Assistant Secretary of the Interior says:

> It became necessary to extend the period for amortization of power costs if rates were to be kept at a level that would permit the disposition of large blocks of power. The compromise, therefore, included extension of the amortization period from the 67 years you had originally proposed to 78 years. By formal communication from the Commissioner of Reclamation to the chairman of the Public Land Committee, the 78-year amortization period was specified as the minimum which the Department could approve in the light of the limitation proposed in the division of the interest rates.

It is a question of calculations as minute as those which determine the mortality tables in our insurance contracts between private holders of insurance policies and the insurance companies themselves. It comes down to the cold-blooded economic facts. You should not disturb this situation here by this amendment.

Mr. ROCKWELL. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto close in 20 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Arizona [Mr. HARLESS].

Mr. HARLESS of Arizona. Mr. Chairman, a great deal has been said here concerning whether or not the Government is going to lose money in permitting the extension of these projects to a period of 78 years. I can point out to you where the Government will actually lose money if you do not permit the extension of the projects to a longer period than 50 years. When many of the projects which are now under construction were authorized, the cost of construction was much lower than it is now. It has taken 10 years to complete some of these projects. But when the authorization was made, the labor and

material costs and other items of cost of construction were low compared to what they are now. To fix the period of amortization at 50 years for these projects which were started, let us say, 10 years ago, or 8 years ago, or which were authorized for a period of time 7 years ago, would be manifestly unfair and unreal. Let us take the Big Thompson project in Colorado, as an example, where the cost jumped from $55,000,000 to over $100,000,000 purely because the cost of construction went up. To amortize that project over a period of 50 years would put the project out of business. The Federal Government has already invested up to $50,000,000 or more on that project. It would mean the Government would lose that investment. If this project is held to a 50-year amortization period it will fail. This is not an expenditure; it is an investment of money. The Government in 50 years on the interest alone will receive its return, if you permit the projects to go forward in a healthy condition. All you want to do is to get the Government's money back and to make these particular projects healthy. If the Government is going to come out on this proposition, we must make the project healthy. Anyone who will fight to limit the period of time so as to prevent a project from becoming healthy is not in favor of irrigation and reclamation.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. HARLESS of Arizona. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Coming from a district which has no reclamation project in it, but always having voted as I felt for what was in the national interest and not from a sectional viewpoint, it seems to me that the argument made by the gentleman from Michigan [Mr. CRAWFORD] is a very powerful and convincing one on this particular question. Whatever doubts I may have had prior to that, I want to state frankly that the gentleman from Michigan [Mr. CRAWFORD], in his clear and analytical way, dissipated them. Some of these projects that are being built are going to last for hundreds of years. They will serve a public purpose. I feel that my people in New England will receive benefits indirectly from these great projects. That is a matter of national concern. It seems to me that the convincing logic of the various speakers, and particularly spearheaded by the gentleman from Michigan [Mr. CRAWFORD], has convinced the Members that we ought to support the committee. Bear in mind that this is a unanimous report of the committee, and they are all hard-headed individuals representing all shades of thought and opinion.

Mr. HARLESS of Arizona. I wish to thank the distinguished gentleman from Massachusetts. He has shown wise and fair judgment in his actions. We from the West wish we had more eastern Congressmen who would exercise such broad and forward-looking viewpoints.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. SMITH].

Mr. SMITH of Ohio. Mr. Chairman, I do not believe there is a Member of Congress who can look ahead 78 years. But every Member does know that the 78-year amortization period will have the effect of loading more of the cost onto our posterity.

Mr. CASE of South Dakota. Mr. Chairman, will the gentleman yield?

Does the gentleman think anyone can look ahead to infinity? The fact is that the present law leaves it to the discretion of the Secretary of the Interior without any limitation as to the number of years. It is his judgment as to what is a reasonable term of years. He looks ahead to infinity before prescribing the rates.

Mr. SMITH of Ohio. Are you suggesting that he ought to make it 100 years or 150 years?

Mr. CASE of South Dakota. No, I am not. But I am saying that under the present law he can. This bill proposes to change the law by placing a limitation when at the present time there is no limitation.

Mr. SMITH of Ohio. The proper answer to your position would be to make it 50 years, if you want to place a limitation, as you suggest.

Mr. CASE of South Dakota. Then the debate should be on what would be reasonable economics.

Mr. SMITH of Ohio. I do not believe that changes my proposition in the least. I still contend that the burden will fall largely upon our posterity. Of course, that is quite in keeping with the mentality of the Congress—charge it to future generations.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. SMITH] has expired.

Mr. FERNANDEZ. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the gentleman from New York [Mr. WADSWORTH] asked the gentleman from Arizona [Mr. MURDOCK] a question, rather in jest I think. He asked him if he thought a 99-year lease could be compared to a mortgage such as they were talking about here. When you come to think about it, that is exactly what it is, a lease and not a mortgage. When the people who are paying the power rates sufficient to reimburse the Government for the principal and interest, have paid out the principal, the Government still owns the plant. As a matter of fact, they have not paid a mortgage, else they would own the plant. They have paid on a lease for a definite term of years that we have provided, at a power or rental rate sufficient to repay the Government in that period of years, but after it has paid out the Government still owns the project and can continue charging the same rate.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I yield.

Mr. JONES of Alabama. Is it not inescapable that if they put a limitation of 50 years in here we will have to raise the electric rates on some of these projects?

Mr. FERNANDEZ. Undoubtedly. I do not have the record before me, but you will find the record is replete with evidence to that effect. On some projects we will have to raise the rates considerably; not only that, but charts were made, both by the proponents and the opponents of this matter, and they are in the record. What we started to do was to amend the 3 percent and see to it that the principal and interest were paid. Then they asked us to put in a limitation of 50 years. That was entirely too short. Some projects cannot be built and paid for in 50 years. They just would not be built. As to Congress being reluctant to allow more than 50 years, as stated by the gentleman from New York, perhaps that is the reason the Bureau of Reclamation has never asked for more than 50 years or 69 years, and the latter was in one case only. So they would no doubt continue to do the same thing under this law, and will ask for an additional period only where absolutely necessary. But undoubtedly the Bureau of Reclamation will continue to try to get projects to pay out in 50 years where possible.

Mr. MANSFIELD. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I yield.

Mr. MANSFIELD. Is it not true that the point in this legislation is not so much the rate of the interest or the period for which these projects will repay themselves as it is the fact that primarily this is helping to develop the country and looking after the welfare of the people?

Mr. FERNANDEZ. Undoubtedly. There are some of these projects now that simply cannot be built unless this Government builds them; unless the Government invests the money, and leases it to the people at a rate which will eventually pay back the Government the money it has invested. That is all the law provides. That is all that is required. But the Government still owns the plant when it is paid for. Under the circumstances, I do not think we are out of order in considering it different from a mortgage, in giving a longer period of time in such cases where it is necessary. As far as I am concerned, I think the life of the project should be the limit. But members of the committee finally compromised on this 78-year period. I hope that this committee will back up the Committee on Public Lands who studied this matter so seriously and so carefully over such a long period of time.

The CHAIRMAN. The time of the gentleman from New Mexico has expired.

The gentleman from South Dakota [Mr. CASE] is recognized for 4 minutes.

Mr. CASE of South Dakota. Mr. Chairman, I think it will help the Members if we understand what the present law provides, and compare that with what the pending bill proposes.

At the present time there are two agencies of the Government that build dams for power; one is the Army engineers and the other is the Bureau of Reclamation. They are the two agencies which construct dams that produce hydroelectric energy.

What is the present law on power charges?

I have in my hand the Flood Control Act of 1944—Public Law 534, Seventy-eighth Congress. It prescribes rates and how they shall be fixed on power dams built by the Army engineers where the power is sold by the Secretary of the Interior. The present law states:

SEC. 5. Electric power and energy generated at reservoir projects under the control of the War Department and in the opinion of the Secretary of War not required in the operation of such projects, shall be delivered to the Secretary of the Interior, who shall transmit and dispose of such power and energy in such manner as to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles, the rate schedules to become effective upon confirmation and approval by the Federal Power Commission. Rate schedules shall be drawn having regard to the recovery (upon the basis of the application of such rate schedules to the capacity of the electric facilities of the projects) of the cost of producing and transmitting such electric energy, including the amortization of the capital investment allocated to power over a reasonable period of years. Preference in the sale of such power and energy shall be given to public bodies and cooperatives. The Secretary of the Interior is authorized, from funds to be appropriated by the Congress, to construct or acquire, by purchase or other agreement, only such transmission lines and related facilities as may be necessary in order to make the power and energy generated at said projects available in wholesale quantities for sale on fair and reasonable terms and conditions to facilities owned by the Federal Government, public bodies, cooperatives, and privately owned companies. All moneys received from such sales shall be deposited in the Treasury of the United States as miscellaneous receipts.

The pertinent sentence is this one:

Rate schedules shall be drawn having regard to the recovery (upon the basis of the application of such rate schedules to the capacity of the electric facilities of the projects) of the cost of producing and transmitting such electric energy, including the amortization of the capital investment allocated to power over a reasonable period of years.

It will be noted there are really three components to figure in determining rates—the cost of producing and transmitting, including amortization of capital investment. This means operation and maintenance in reclamation language, and construction charges with interest to amortize the capital investment.

In other words, the law on Army engineer projects is that the power sold by the Secretary of the Interior from Army engineer dams must keep up operation and maintenance and repay construction charges with interest, but has infinity as to the number of years within which the construction costs may be repaid. The law—read it for yourself—does not say 50 years or 75 years. It simply says "over a reasonable period of years."

And what is the law with respect to power from projects constructed by the Secretary of the Interior and the Bureau of Reclamation?

I call your attention to the existing law, which you will find on page 6 of the committee report, section 9 (c), the latter half of which, dealing with power, reads as follows:

Any sale of electric power or lease of power privileges, made by the Secretary in connection with the operation of any project or division of a project, shall be for such periods not to exceed 40 years and at such rates as, in his judgment, will produce power revenues at least sufficient to cover an appropriate share of the annual operation and maintenance cost, interest on an appropriate share of the construction investment at not less than 3 percent per annum, and such other fixed charges as the Secretary deems proper: *Provided further*, That in said sales or leases preference shall be given to municipalities and other public corporations or agencies; and also to cooperatives and other nonprofit organizations financed in whole or in part by loans made pursuant to the Rural Electrification Act of 1936 and any amendments thereof. Nothing in this subsection shall be applicable to provisions in existing contracts made pursuant to law for the use of power and miscellaneous revenues of a project for the benefit of users of water from such project. The provisions of this subsection respecting the terms of sales of electric power and leases of power privileges shall be in addition and alternative to any authority in existing laws relating to particular projects. No contract relating to municipal water supply or miscellaneous purposes or to electric power or power privileges shall be made unless, in the judgment of the Secretary, it will not impair the efficiency of the project for irrigation purposes.

So the present law provides three components for the power from reclamation-built dams. First, enough to cover an appropriate share of the annual operation and maintenance; second, interest on a proper share of the construction investment of not less than 3 percent, and third, such other fixed charges as the Secretary deems proper.

The present reclamation law then places no limit as to the number of years for the repayment that the Secretary of the Interior provides. Not only that, it does not even require the Secretary of the Interior to get back the cost of construction. He only has to get back operation and maintenance and 3 percent interest.

This point in this bill, as I understand its history, came up because someone had ruled that that was all the Secretary had to provide, that he did not have to provide any more than the collection of operation and maintenance, plus 3 percent, perhaps for infinity. And here is the simple wording of the act to support that interpretation.

There is no requirement that the Secretary get back construction costs. The law merely says "And such other fixed charges as the Secretary deems proper." If he deemed no other fixed charges proper, he would assess none and there was no requirement that he ever get back any construction other than a minimum of 3 percent interest. The only reference to years is the limitation of 40 years on the life of a sales contract to a power distributor or consumer; that has nothing to do with the time for repayment to the Government. So, again there is no time limit within which repayment must be made, only infinity for interest.

The bill before us proposes to change all that and requires that there shall be four components in the charge for power. First, operation and maintenance; second, the return within 78 years of the cost of construction, plus interest at 2½ percent. It combines those two components in one clause (2), construction costs coming back within 78 years plus 2½ percent interest; and then finally in clause (3) a further interest charge of one-half of 1 percent may be made and the funds from that would be used to help irrigation.

In other words, the bill is infinitely better than the present law and the committee is to be commended for having put some brakes on the situation.

Under permission given in the House, I will insert the language from the bill for convenient comparison with the existing law which I have cited:

Any sale of electric power or lease of power privileges made by the Secretary in connection with the operation of any project or division of a project shall be for such period, not to exceed 50 years, and at rates as in his judgment will produce power revenues which, together with power revenues from all other sales or leases or power privileges, will be at least sufficient to cover (1) an appropriate share of the annual operation and maintenance cost, including reasonable provision for replacements; (2) the return, within 78 years from the date upon which each feature becomes revenue producing or the useful life of such feature, whichever may be the shorter, of an appropriate share of the construction investment properly allocable by the Secretary to commercial power, together with interest on the unpaid balance at a rate of not less than 2½ percent per annum; (3) the return, without interest, within a reasonable period of years not exceeding the useful life of the irrigation features, and with respect to each irrigation block, in a period conforming so far as practicable to the period within which water users are required to repay their share of the irrigation costs, of that share of the investment found by the Secretary pursuant to subsection 9 (a) hereof to be properly allocable to irrigation but assigned for return from net power revenues: *Provided*, That the power revenues to be applied toward the fulfillment of the obligation to return that share of the investment found by the Secretary pursuant to section 9 (a) hereof to be properly allocable to irrigation but assigned for return from net power revenues may include no more than one-fifth of the revenues derived from the interest component of power rates in addition to any and all sums otherwise assigned for such purpose from power revenues: *Provided further*, That all revenues derived from the interest component of power rates not so assigned shall be accounted for as interest and shall, together with all other moneys so required to be returned to the United States, be returned to the United States as provided by the act of May 9, 1938 (52 Stat. 291, 318); and (4) such other costs and fixed charges as the Secretary deems proper. In said sales or leases preference shall be given to municipalities and other public corporations or agencies; and also to cooperatives and other nonprofit organizations financed in whole or in part by loans made pursuant to the Rural Electrification Act of 1936 and any amendments thereof. Nothing in this subsection shall be applicable to provisions in existing contracts, made pursuant to law, for the use of power and miscellaneous revenue of a project for the benefit of users of water from such project, and the provisions of this subsection respecting the terms of sales of electric power and leases of power privileges shall be in addition to and alternative to any authority in existing laws relating to particular projects. No contract relating to municipal water supply or miscellaneous purposes or to electric or power privileges shall be made unless in the judgment of the Secretary, it will not impair the efficiency of the project for irrigation purposes.

The CHAIRMAN. The time of the gentleman from South Dakota has expired.

The gentleman from Wyoming [Mr. BARRETT] is recognized for 4 minutes.

Mr. BARRETT. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I believe we should know precisely what the situation is at the present time as far as the law is concerned. The gentleman from Indiana made the statement that these projects have a 10-year development period and then they are required to be paid out at the end of a 40-year period thereafter. He is mistaken about that. The gentleman from South Dakota has stated the situation precisely as it exists. I can see where this confusion arises. It is true that as far as that part of the cost of construction that is to be repaid by the farmers is concerned, there is a 10-year development period and the farmer is then required to pay the cost of construction allocated to him over a period of 40 years without interest.

Now, what is the situation as far as the power portion of the cost of construction is concerned? As the gentleman from South Dakota has pointed out, the law at the present time requires that that portion of the construction cost allocated to power must be repaid over a reasonable period of years, limited only by the useful life of the project.

What is the effect of the pending amendment? The effect of the gentleman's amendment is to prejudice the irrigation farmer. It has no effect whatsoever on the power end of the project, but it is a terrific handicap to the irrigation farmer. That is all it is.

I may say to the gentleman from Indiana that under the law as it exists at the present time and under the practice followed by the Bureau of Reclamation, the great majority of these power projects are paid out over a period of 60 years and not 50 years. So his amendment is really a restriction on the practice that exists at the present time.

Mr. HARNESS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. BARRETT. I yield to the gentleman from Indiana.

Mr. HARNESS of Indiana. The gentleman knows that all of the projects that have been authorized thus far have been based on a policy of 50 years' amortization; does he not?

Mr. BARRETT. No; I do not know that.

Mr. HARNESS of Indiana. It is not going to cause any more hardship to continue that practice; is it?

Mr. BARRETT. I do not agree with the gentleman.

Mr. HARNESS of Indiana. They have not suffered in the past. Why does the gentleman now say it is going to cause them a great deal of harm?

Mr. BARRETT. The gentleman is mistaken. The projects are estimated so far as cost is concerned over a period of 50 years in the beginning, that is true, but as far as the actual pay-out is concerned the average pay-out is 60 years. So the gentleman is absolutely mistaken when he says it does not affect the irrigation farmer.

Now, why does it affect the irrigation farmer? The fact of the matter is that irrigation can only pay a portion of the cost of constructing its part of the project. Power must pay the balance. If we provide that power can repay its portion of the cost over a period of 78 years, it is a certainty that it can pay more than if we require it to repay the cost of construction of the power installation over a period of 50 years.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

All time has expired. The question is on the amendment offered by the gentleman from Indiana [Mr. HARNESS].

The question was taken; and on a division (demanded by Mr. HARNESS of Indiana), there were—ayes 48, noes 59.

So the amendment was rejected.

Mr. ROCKWELL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DONDERO, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939, had come to no resolution thereon.

EXTENSION OF REMARKS

Mr. MANSFIELD asked and was given permission to extend his remarks in the RECORD and include an editorial appearing in the Washington Evening Star, January 21.

Mr. SADOWSKI asked and was given permission to extend his remarks in the RECORD and include a resolution adopted by the Detroit Teachers Association.

Mr. KILBURN asked and was given permission to extend his remarks in the RECORD and include a statement by his colleague, the gentleman from New York [Mr. GAMBLE].

Mr. DAWSON of Utah asked and was given permission to extend his remarks in the RECORD and include a statement he made before a Senate committee.

Mr. McDONOUGH asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. PLOESER asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. CASE of South Dakota. Mr. Speaker, in revising the remarks I made in Committee this afternoon, I ask unanimous consent that I may insert the exact provision of the law to which I referred.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. LEMKE. Mr. Speaker, in connection with the remarks I made in Committee this afternoon I ask unanimous consent to include a letter.

The SPEAKER. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. ARNOLD asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

NATIONAL HEART ACT

Mr. KEEFE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. KEEFE. Mr. Speaker, I take this moment simply to call attention to the fact that I am today introducing a piece of legislation which I conceive to be of far-reaching importance to the people of America which is entitled and may be cited as the National Heart Act. It relates to an effort on part of those interested in the public-health activities of the United States to do some reclaiming of the human reserves of these United States. We have spent a lot of time talking about reclamation in the last few days, and the people of America are much interested in what this Congress is going to do in initiating and carrying forward the program which we started last year to provide adequate research into the entire field of cardiovascular diseases. This bill is the next step in implementing that program that the people of America are demanding.

The SPEAKER. Under previous order of the House, the gentleman from Vermont [Mr. PLUMLEY] is recognized for 20 minutes.

POLITICAL PHILOSOPHY

Mr. PLUMLEY. Mr. Speaker, some years ago I compiled and revised a pamphlet which I called The Making of a Congressman.

I have made it a practice to see that each newly elected Member has had a copy. As a result many have sought to amplify the information contained in the pamphlet by seeking further information from me.

I have found that what bothers the newly elect most is to know how to find out how to vote; what and how much attention should he pay to pressure groups, so-called, or/and to hostile criticism of his votes; and a half dozen other matters growing out of the three questions above suggested. So when they have come to me, after I have tried to tell them the sources of information on which they can rely, I have called their attention to the statement of Edmund Burke relating to the duties and obligations of a representative of the people, and to the philosophy of Benjamin Franklin, antedated by that of Epictetus, and followed by that of Abraham Lincoln.

I have been asked to prepare and make this speech and later to have it made a part of The Making of a Congressman, which latter I intend to do.

EDMUND BURKE

Edmund Burke said:

Certainly, gentlemen, it ought to be the happiness and glory of a representative to live in the strictest union, the closest correspondence, and the most unreserved communication with his constituents. Their wishes ought to have great weight with him; their opinion high respect; their business unremitted attention. It is his duty to sacrifice his repose, his pleasure, his satisfactions, to theirs, and above all, ever and in all cases, to prefer their interest to his own.

But, his unbiased opinion, his mature judgment, his enlightened conscience, he ought not to sacrifice to you; to any man, or to any set of men living. These he does not derive from your pleasure; no, nor from the law and the Constitution. They are a trust from Providence, for the abuse of which he is deeply answerable. Your representative owes you, not his industry only, but his judgment; and he betrays, instead of serving you, if he sacrifices it to your opinion.

BENJAMIN FRANKLIN

Benjamin Franklin said:

We must not in the course of public life expect immediate approbation and immediate grateful acknowledgment of our services, but let us persevere through abuse and even injury. The internal satisfaction of a good conscience is always present, and time will do us justice in the minds of the people, even of those at present the most prejudiced against us.

EPICTETUS

Epictetus said, long before that:

Is a little oil spilt,
A little wine stolen,
Say to yourself—
This is the purchase
Paid for peace, for
Tranquillity, and nothing
Is to be had for nothing.
Be content to be
Thought foolish and stupid.
Do not wish to be thought
To know—and though
You appear to others
To be somebody—distrust
Yourself!
Remember that
You are an actor
In a drama of
Such a kind as the
Author pleases to make it.
If short, of a short one;
If long, of a long one.
It is your business
To act well the character
Assigned you; to choose it
Is another's.

POLITICAL EXPEDIENCY

Then I have volunteered out of experience to venture the statement that there are no such words as "political expediency" in the vocabulary of anybody who "hews to the line of right," does and votes as he sees the right, let the chips fall where they may.

ABRAHAM LINCOLN

And finally, we all may well listen to Lincoln, who said:

Let us have faith that right makes might, and in that faith let us to the end dare to do our duty as we understand it.

EXTENSION OF REMARKS

Mr. MURDOCK asked and was given permission to revise and extend his remarks and include a letter.

The SPEAKER. Under previous order of the House, the gentleman from Kansas [Mr. REES] is recognized for 10 minutes.

A PRELIMINARY REPORT ON A SURVEY AND STUDY OF THE POSTAL SERVICE

Mr. REES. Mr. Speaker, the House Post Office and Civil Service Committee has unanimously approved a preliminary report to this House, summing up activities of the committee pursuant to House Resolution 176. This resolution, among other things, authorized and directed the committee to conduct a survey and study of the postal service. When this study was directed, Members of this House pointed to the need for a survey as a preliminary to action on the rate-revision bill recommended by the Post Office and Civil Service Committee. Hope was expressed by some that ways and means might be found whereby the entire postal deficit of $300,000,000 annually might be resolved by economies.

This report represents the combined efforts of the members of the committee who have diligently concerned themselves with this problem and approached it in a constructive manner. I want again to commend the membership of our committee for their fine cooperation in dealing with this important problem. We have pointed to substantial savings. Our committee estimates that, based upon its findings, there could be savings in the amount of $50,000,000 annually if certain changes are made in organization, procedures, and use of modern mechanical equipment.

The suggested savings of an estimated $50,000,000 are considered in such items as replacing postal notes and money orders by a prepunched card; by complete utilization of space, reduction of deficiency time, and using less expensive forms of transportation in the railway mail service; elimination of unnecessary special-delivery forms and clerical work; the proper allocation of the air-mail subsidy; simplifying the payment of insurance claims; and items included in additional new services.

All these items are discussed in the preliminary report and I commend them for your study and consideration. I believe there are a number of changes in mechanization in the handling of mail that would result in annual savings of several million dollars. Such changes, of course, would require time to procure equipment, train the employees, and amortize the initial cost of such equipment.

It should be pointed out that even though savings can be made in line with the committee's report, costs of the postal service are rising rather rapidly. For example, since this study was authorized the Interstate Commerce Commission has granted an interim increase in payments to railroads to carry mail in the amount of $37,000,000 annually. At the same time there is a continual loss of $9,000,000 per month in the delay in the enactment of the postal-rate increase. This deficiency is, of course, charged to the Federal Treasury.

The members of the Post Office and Civil Service Committee have spent considerable time and effort since the end of the first session in exploring every possible avenue of savings. We have proceeded with this study with a minimum expenditure of funds by utilizing to the maximum the committee staff, the facilities of the General Accounting Office, and the traffic engineers on the staffs of large mailers. We are supplementing this by the assignment of specific problems to management engineers.

Seven of the largest post offices have been visited by members of the committee and the staff as a means of seeking out where economies might be made. They have discussed postal problems and ideas for improvements with local postal officials and employees, and held public hearings at which large mailers, editors and publishers, and the general public participated. These visits also served as a means of checking, on the ground, recommendations which were being considered.

Fifteen subcommittees were appointed to consider matters of general concern to the postal service and to determine within their respective jurisdiction:

First. What new services could be added which would pay their own way and possibly show a profit?

Second. What charges are being assessed against the service not properly the responsibility of the service?

Third. Where could economies be placed into effect?

Fourth. Where could the service be improved?

We have found several answers to these questions. Answers that I believe you Members of the House, should know. Answers that I should like to outline briefly.

For every dollar of indemnity paid on insured mail, it is costing the Post Office Department $5.50 in administrative and investigative expense.

In one Federal building where the postal service is paying $561,000 annually for maintenance and custodial services, less than 7 percent of the space is occupied by the post office.

There is a need for better controls over subsidy payments to air lines for carrying air mail. For example, one air line was paid seven times as much money in 9 months of 1947 than it received in all of 1946, and in this 9 months carried 200,000 less pounds of air mail than in 1946.

Under the current rate set up for mail pay, railroads are paid on a round-trip basis and it is more profitable for them to send the cars back empty than to fill them with nonpostal commodities and freight. This empty space is paid for by the Department at the rate of over $18,000,000 annually.

This year in the old-line departments and agencies—excepting the Department of National Defense—the use of penalty mail increased almost 4,000,000 pieces over last year.

The results of the surveys of the large post offices, subcommittee hearings and digests of material submitted for the consideration of the committee, appear in a summarized form at the beginning of the preliminary report of the committee.

I am including this summary in the RECORD for the information of the Members.

Again, let me suggest that I believe Members of the House will find the information in this report to be worthy of your attention in the consideration of problems relating to the postal service.

COMMITTEE SURVEYS OF SEVEN OF THE LARGEST POST OFFICES

Surveys were made by members of the committee, and the committee staff, at the following large post offices: New York City, Chicago, San Francisco, Dallas, Houston, Minneapolis, and Los Angeles. Similar surveys and studies were scheduled at New Orleans and Nashville, but were postponed because of the special session of Congress. With

respect to the committee surveys of the seven post offices referred to above, the findings of the committee are as follows:

1. Mechanization of the facing, primary, and secondary separation operations will result in savings not only in these operations, but in reducing the costly separation of mails in transit.

As an example of what might be anticipated in mechanization of primary and secondary separation functions of the Post Office Department, one machine, manufactured under a foreign patent, will sort 3,000 items per man-hour as compared to 1,200 to 1,600 items per man-hour by hand.

This machine also has the following advantages:

(a) As already stated, by using the machine 3,000 items may be sorted per man-hour as compared to the speed of sorting by hand which is 1,600 articles per hour for preliminary sorting and 1,200 for final sorting.

(b) In the case of mechanical sorting, mail can be sorted for some hundreds of destinations in one single operation by less experienced personnel.

(c) Owing to the fact that the machines automatically collect in one receptacle all articles for the same destination though dealt with at different keyboards, further collection becomes unnecessary. This greatly simplifies transport, and precludes errors in dispatch as the result of inadvertently combining batches of letters for different destinations.

(d) The postal matter to be sorted is conveniently placed within the operator's reach. Each letter is automatically carried to the same spot in front of him, a slight movement of the hand being all that is required to deal with each article.

(e) The number of articles sorted is registered by a counting apparatus, thus affording an additional means of checking the output of each operator.

(f) Each article sorted is so marked that it is easy to trace by whom a sorting error has been made.

(g) A reduction in the number of appliances used, tending to simplify the task of supervision.

(h) The number of supervisors can be reduced because the output of each sorter is automatically registered and fewer sorters are required.

(i) In the case of the sorting installation, the letters are dropped into a slot from which the receptacles are at some distance. Consequently, the emptying of the receptacles in no way disturbs the staff operating the machines.

(j) The machine sorts the articles into receptacles, automatically stacking them in regular piles. In the case of sorting by hand this stacking depends on the individual sorter's sense of neatness.

(k) In the case of a sorting machine, the keyboard represents the area of operation. This can easily be lighted artificially. To obtain a similar effect in using a sorting case, each pigeonhole would have to be artificially lighted.

2. Replacing the money order and postal note by a machine-record card, keypunched for electrical accounting at the time of issue, will substantially reduce the $35,000,000 annual loss in these items.

3. One large post office maintains daily records of operating costs, which are used for management purposes. Savings directly attributed to these data are far in excess of the cost of keeping such records. Some post offices collect cost data by periodic checks. These data have been helpful in determining the costs of handling the various classes of mail. The collection of both types of data on a standard method basis at all large post offices would be advantageous from the standpoint of management control and comparing the unit costs of such post offices, so that waste and deficiencies may be found and corrected.

4. The Department experiences a large loss resulting from the present method of paying for return movements of mail storage cars at the same rate as is paid for outgoing movements. The procedure for making such payments is established by the Interstate Commerce Commission. If it is to be continued, consideration should be given to a more complete utilization of this space for mail and for other Government shipments. (See letter to Comptroller General, appendix 1.)

5. The Post Office Department provides custodial and maintenance services for other Government agencies in its buildings. The cost of these services, which is paid from post office operating funds, amounts to millions of dollars. In New York City, the annual cost is $1,000,000, and in Chicago, $600,000. In Los Angeles, the Post Office Department pays $561,084 annually for the maintenance of the main post office building although postal facilities utilize only 7 percent of the entire space of the building.

6. The storage and disposition of unclaimed parcel post at the larger post offices is a major problem. Better enforcement of packing requirements at the point where parcel post matter is accepted for mailing will reduce this cost.

7. There is excessive loss in insured mail due largely to investigations and record keeping. In 1947 the expenditures for insured mail were $17,200,000; while the actual amount paid out in indemnity was only $2,641,667. In other words, the clerical and administrative cost of insured mail was 6.6 times as much as the actual indemnities paid.

Authorizing settlement of claims below $10 on insured mail at the office of entry would eliminate much of the excessive administrative cost and place the insured mail on a paying basis, and eliminate the annual loss of $4,500,000 in handling insured mail.

8. Mail bags which are in short supply are accumulated at large post offices because they are in need of repair. The only repair point is Washington, D. C. Decentralizing this operation would save in transportation and repair cost, as well as put into service many thousands of needed mail bags.

9. The periodic inspection of post offices by postal inspectors amounts to a routine check of the observance of postal laws and regulations. These inspections do not include investigations to determine how to improve the operation of the post offices to secure better efficiency and more economy. Detailed surveys of large post offices for this purpose were discontinued 7 years ago and have not been resumed. (See letter of Postmaster General, appendix 2.)

10. Preparation of individual lists of special delivery items on Post Office Form 3959 takes approximately 20 percent of the special delivery messengers' time and the information is seldom used. The elimination of this form would result in a saving of $350,000 annually in the postal service.

11. Operating buildings of the Post Office Department, as well as the railroad terminal buildings, are not constructed with loading docks and other facilities which are required to utilize fully, modern mechanical equipment such as lift trucks, tow motors, and the like. Buildings of more recent design, such as the postal concentration center used by the New York Post Office for overseas mail, have wide ramps and floor arrangements permitting full use of mechanical equipment.

12. Savings would result if, in addition to seniority, postal employees were required to possess minimum qualifications before being transferred to positions within the Post Office Department.

13. Only 7 of the 51 central accounting offices possess electrical accounting machines. This causes delay and additional expense since money order data must be transferred to points where electrical accounting machine units are located.

14. The 51 central accounting offices in the postal service receive funds collected by the post offices in their area. This money is counted many times after it is received by the central accounting office. Savings would result if these funds were counted at the opening unit and an interoffice receipt system used.

15. Valuable floor space is wasted by poor building design and inadequate lighting.

16. Some equipment, e. g., parcel-post slides, is improperly designed and use of it results in damage to parcels and excessive rewrapping costs.

PRESENTATIONS OF LARGE MAILERS

Large users of the mails who appeared at the rate-revision hearings were invited to submit for the consideration of the committee such suggestions as they deemed appropriate. It was contemplated that the traffic managers and postal specialists on the staffs of these organizations would draft for the use of the committee, detailed suggestions as to improvements which could be made in the postal service and practices which have proved economical in private industry which could be adapted to the postal operation.

At the time a subcommittee visited the Chicago Post Office, conferences were held with the National Council on Business Mail and the Postal Committee of the National Industrial Traffic League. Both organizations circularized their members to obtain their views on how improvements and savings could be made in the postal service. A summary of the suggestions made as a result of this action appears in appendixes 3 and 4.

The transportation committee of the National Association of Magazine Publishers presented its views as to what could be done to improve the transportation methods of the postal service. This presentation appears in appendix 5. This organization will later present memoranda covering other phases of postal operations.

Correspondence containing suggestions for improvement in postal service has been submitted by the American Newspaper Publishers Association. This letter appears in appendix 6.

The suggestions made in these presentations will be thoroughly examined.

AIR MAIL

Hearings on the general subject of air mail were held by a subcommittee on December 10, 12, and 15, 1947. At these hearings it was testified that:

1. The scheduled air lines receive subsidies in the form of air-mail pay. Of the $25,000,000 these lines will receive for carrying air mail in 1947, in excess of $15,000,000 may be considered a subsidy.

2. Payments to the air lines are based upon need rather than the service performed. Such a system does not place a premium on efficiency. In commenting on this situation, Secretary of Commerce W. Averell Harriman stated:

"I believe that we should critically examine the habit and method of subsidizing air carriers. We should evaluate the situation to see if there is not a dulling of incentive resulting from the method of fixing of payments. I fully recognize the current need for a sympathetic—and even generous—attitude toward the needs of the air carriers, but we must not get into cost-plus habits in industry. When increased costs do not affect profits, it seems reasonable to presume

that some of the incentive toward efficiency and progress will be lost." [1]

3. A new group of carriers carrying only freight, and not eligible for air-mail subsidies since they are not certificated carriers, has become involved in a rate war with the scheduled carriers. Many of the scheduled carriers have reduced air freight rates in the commodities and at the shipping points available to the air-freight carriers, while at the same time they have applied for increased air-mail pay. This appears to place the Post Office Department in the position of financing a rate war between two groups of air carriers.

4. Separation of the amount of subsidy paid domestic air lines from purely compensatory payments for carrying air mail will correct many evils in the existing situation.

5. In paying the air-mail subsidy, the Post Office Department is called upon to finance inefficient management, parties, hotel suites, entertainment, excessive public relations costs, and to finance competition between existing scheduled carriers.

6. There is a real demand for an air parcel post service by the air carriers and the public. However, such service must be made available to the public at reasonable rates to attract volume. Air parcel post rates should not be affected by the subsidy element and such service should be made available from its inception at points where sufficient volume of air parcel post will be generated to warrant reasonable rates. It is estimated that 144,000,000 parcels will be sent by air parcel post annually. (Draft of a proposed bill appears in appendix 7.)

FOREIGN POSTAL SERVICES

The committee requested the Secretary of State to obtain information concerning the postal services from a number of foreign countries in order to determine whether any foreign postal procedures could be adapted to the United States postal service. (See appendix 8 for correspondence.) This material has been received and is being studied.

RATE-MAKING PROCEDURES

Hearings were held regarding rate-making procedures for the postal service on December 16 and 18, 1947. These hearings developed that—

1. The Post Office Department is without an established rate-making procedure despite the fact that it depends upon rates for $1,800,000,000 annually in postal revenues.

2. Present postal rates do not reflect the many differences in service. This is due largely to the fact that there is no established procedure for analyzing and recommending comprehensive revisions in postal rates to meet changing needs.

3. There is an established procedure for revising rates for fourth-class mail using the facilities of the Interstate Commerce Commission. This procedure requires initiating action by the Postmaster General when parcel-post rates are not sufficiently high to pay for the cost of handling such mail. The Postmaster General has not taken such action although expenditures for handling parcel post are exceeding revenues at the rate of $50,000,000 annually. (See appendix 9 for letter to the Attorney General requesting views on existing law.)

4. Most large users of the mails agree there is a need for a fact-finding unit in the Post Office Department to resolve controversial issues in the many technical problems concerned with rates and costs of specific postal services. A bill drafted as a result of subcommittee hearings, H. R. 4953, which would create such a board and provide for an affirmative postal rate recommendation annually to the Congress appears in appendix 10.

POSTAL SAVINGS

In 1947 deposits in the postal-savings account of the Post Office Department reached $3,396,000,000. This is comparable to deposits in any one of the largest banks in the United States. In analyzing the situation as it relates to postal savings, the committee has determined that there is a need for creating a more flexible postal savings system. The committee finds that—

1. The Postal Savings System is regarded by most depositors as a safe and convenient depository for their savings rather than as an investment. As an investment, United States saving bonds will yield a better return in the long run.

2. The interest rate on postal-savings deposits has remained unchanged since 1910, when the Postal Savings System was established.

3. A reduction in the interest paid on postal savings from the present rate of 2 percent to 1 percent would result in a savings to the Federal Government of approximately $20,000,000 annually, after taking into consideration the withdrawals resulting from the interest-rate reduction.

4. The present 2-percent rate of interest on postal-savings deposits is more than the interest rate paid by most privately owned savings institutions. While the interest rate on postal savings has remained unchanged, the average rate of interest paid on deposits by mutual savings banks fell by more than one-half, from about 3.9 percent in 1910 to about 1.7 percent in 1946. The average rate paid by commercial banks fell even more, from about 3.7 percent in 1910 to about 1 percent in 1946.

REORGANIZATION OF THE POSTAL SERVICE

The committee is in the process of examining the basic organization of the postal service. It believes that the organization of the Post Office Department does not follow the fundamental requirements of a modern business organization. The committee points to the following phases of the Department's organization which do not meet present-day business standards:

1. Each of the four Assistant Postmasters General operates a field organization.

2. Theoretically, 42,000 postmasters report directly to one official in the Post Office Department in Washington.

3. Each bureau has its own budget and in many instances economies in the service are not effected because the expenditure is from one bureau's budget while the saving is in another.

4. Much of the supervision of the field functions of the Department is conducted by use of reports of the inspection service. This limits the personal contact of the officers responsible for specific field functions.

5. The Post Office Department does not have available unit-cost data or management statistics which may be used to compare the efficiency of specific operations or the relative efficiency of post offices of comparable size. (See appendix 11 for correspondence that such cost data be developed for the information of the committee.)

6. The present gross receipts standard for rating post offices has many shortcomings.

7. No independent Government agency checks the efficiency of the postal service. The General Accounting Office has never made a survey of the postal service until requested by the committee on August 13, 1947.

8. Limiting competition for the position of postmaster to individuals within delivery limits of the respective post offices has made it possible to continue the political factor in the selection of postmasters and prevents the promotion of postmasters of demonstrated ability from smaller post offices to larger post offices.

9. There is no uniform organization of the postal service in the field. For example, the railway mail service is organized on a regional basis, while the post offices operate within limited local areas.

10. Fifty-one of the larger post offices are designated as central accounting offices. While these offices have the responsibility of keeping all the accounts of post offices within their area, they lack authority to take direct corrective action when accounts are not submitted properly.

MECHANIZATION OF THE POSTAL SERVICE

The problem of mechanization of the postal service concerns both the type of equipment and the manner in which such equipment is utilized. An analysis is being made of the motor-vehicle equipment of the Post Office Department presently in use and on order. A summary of the status of this equipment appears in appendix 12.

The manner in which most of such equipment is utilized is a part of the project assigned to a management engineering firm which is conducting a detailed study of urban mail delivery.

RESEARCH AND DEVELOPMENT

Although the Post Office Department is a business with operating expenditures in excess of $1,500,000,000 anually, little has been done in the way of research and development to improve and to modernize the operations of the postal service. The following examples may be cited:

(a) The Department does not make maximum use of technical design advancement of the automotive industry when specifications are made for new motortrucks.

(b) The employees' suggestion program of the Department has resulted in only a few suggestions from the employees being considered of sufficient merit for cash awards.

The extent to which the Post Office Department should be authorized to institute a research and development program, the use to be made of existing research and development facilities of the Government and the results which could reasonably be expected if such a program were placed into effect are being studied by a subcommittee.

Engineering studies of mechanical devices used in mail distribution in major foreign countries have been obtained. These will be analyzed to determine their practicability in United States post offices.

RAILWAY MAIL SERVICE

Preliminary studies by the committee show that—

1. Deficiency time (the difference between the individual's daily average hours on duty and the maximum hours of the assignment set by law) can be reduced by improving coordination between post offices, railroads, and the railway mail service.

2. Under rates set by the Interstate Commerce Commission, the Post Office Department pays for storage cars on a round-trip basis. The space deadheaded on the return movement costs $15,000,000 annually. In many instances these "storage cars" are freight cars. (See appendix 13.)

3. Employees assigned to railroad and airport terminals are under the jurisdiction of the railway mail service, and are rarely given road assignments.

4. The responsibility of the railroads for unloading and loading mail from baggage cars is not strictly observed.

5. In connection with the railway mail pay increase applications of the railroads, a one-time compilation was made of all space utilization. This appears in appendix 13.

[1] Statement of the Honorable W. Averell Harriman, Secretary of Commerce, to the President's Air Policy Commission, November 26, 1947.

6. More economical means of mail transport should be explored. The following table is an example of comparative transportation costs for periodicals:

Rate from Philadelphia

[All rates shown are per 100 pounds]

	Freight		Truck		Express		Mail (50 percent advertising)
	Less than carload	Carload	Less than truckload	Truckload	Less than carload	Carload	
New York City rate	$0.78	$0.22	$0.60	$0.22	$1.50	----------	$1.50
Transit time	[1] 1	[1] 1	[2] 5	[2] 5	[1] 1	[1] 1	[1] 1
Washington, D. C., rate	$0.88	$0.418	$0.88	$0.30	$1.50	----------	$1.50
Transit time	[1] 1	[1] 1	[2] 6	[2] 6	[1] 1	[1] 1	[1] 1
Chicago rate	$2.024	$0.77	$1.40	$0.96	$1.74	$0.80	$2.75
Transit time	[1] 4	[1] 3	[1] 3	[1] 3	[1] 2	[1] 2	[1] 3
San Francisco rate	$4.774	$1.485	(3)	(3)	$6.07	$3.00	$4.25
Transit time	[1] 10	[1] 9	----------	----------	[1] 6	[1] 4	[1] 7

[1] Days. [2] Hours. [3] No service.

7. Terminal employees' record cards contain data as to the amount of mail distributed and sacked. These data could be compiled and the relative efficiency of terminal operations compared.

A recent order by the Interstate Commerce Commission (No. 9200, Railway Mail Pay, Dec. 4, 1947) has increased payments to railroads by $37,000,000 annually. This emphasizes the need for carefuly computing payments for space in the most complete manner possible.

The problem of accounting for space used by the Post Office Department in baggage cars is being explored by the General Accounting Office. It is also examining the possibility of a more complete utilization of unused space in railway baggage cars for Government shipments both by mail and for other than mail. (See letter from committee requesting this study and reply in appendix 1.)

GOVERNMENT SERVICES

A study is being made of the services performed for other Federal establishments by the Post Office Department for which the Department does not receive revenue. (See appendix 14 for summary of cost to the Post Office Department for furnishing custodial and other services to other Government departments.)

A study will be made of the use of penalty mail by Federal departments and agencies. A statement of the use of penalty mail by Government departments and agencies indicates that the old-line Government departments and agencies (other than Department of National Defense) increased their use of penalty mail during the fiscal year 1947 by about 4,000,000 pieces. This penalty mail in 1946 represented, in actual cost to the Post Office Department, $24,034,005.32. (For a complete report, see appendix 15.) This increase in the use of penalty mail requires a detailed analysis to determine how reductions can be achieved.

A subcommittee held hearings attended by 50 west coast publishers at San Francisco, November 12, 13, and 14, 1947, at which time one of the chief complaints was the excessive use of penalty mail for sending mimeographed press releases to newspapers. Government press releases were submitted to the committee which showed that little thought is given to the local value of such releases and indicated emphasis was on volume rather than on quality or public interest.

Prior to 1933 all post-office building maintenance employees in the field service were under the Treasury Department. In 1933 these employees were transferred to the Post Office Department. At the time of the transfer there were 7,990 such employees, but at the present time there are 19,000.

In some post-office buildings the preponderance of expenditures is for custodial and maintenance services to other Government departments. (See appendix 16 for chart showing cost distribution of space in the main post-office building at Los Angeles, Calif.)

PERSONNEL UTILIZATION

Eighty percent of the expenditures of the Post Office Department are for personnel. Therefore, the proper utilization of this personnel is of utmost importance.

The Post Office Department is engaged in converting war-service appointments to permanent positions. Employees are now being certified to positions from regularly established civil-service registers. While in most instances these certifications have been made in accordance with civil-service regulations, in some cases the manner in which the competitive examinations were held is open to question. In one large post office, only 5 days were allowed in which to file applications. This was later extended to 8 days, but little publicity was given the 3-day extension. The register was exhausted before all the war-service employees were replaced. The result of this action limited the participation of veterans in the examination, and made available for certification and appointment those persons who barely met the minimum requirements. Such a procedure deprives the Government of the best qualified employees.

The Post Office Department lacks a uniform personnel policy. Each of the Assistant Postmasters General operate directly postal facilities in the field service, and each has his own personnel organization in these field installations. This has resulted in four different personnel policies relating to pay, promotions, and administration.

PROCUREMENT AND CONTRACT PROCEDURES

Based upon preliminary studies, it appears that the following are among those phases of the problem which will be considered by the committee:

1. The extent to which the postal service has delegated its authority to make contracts for material and services to the respective postmasters will be examined.

2. There is duplication between the responsibility administratively assigned to the Fourth Assistant Postmaster General and that given the purchasing agent by law.

The Post Office Department has been requested to provide the committee with all directives relating to contracts and procurement. This material was furnished on January 6. The letter of transmittal is as follows:

POST OFFICE DEPARTMENT,
OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., January 6, 1948.

Hon. EDWARD H. REES,
Chairman, Committee on Post Office and Civil Service,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN: Further reference is made to my reply of November 12, 1947, to your letter of October 30, 1947, requesting that there be furnished for the information of the Committee on Post Office and Civil Service copies of all directives issued within the Post Office Department and to postmasters in the field concerning procurement of supplies and contracts for services.

There are submitted herewith the directives requested. For your information the First Assistant Postmaster General issues directives in connection with telephone contracts and service, contract vehicle service, contract stations and branches, and miscellaneous services and rentals.

The Second Assistant Postmaster General issues directives pertinent to international postal transport boat service, surface postal transport printing, leasing of quarters for terminals, special contracts, star-route service, mail messenger service, and the Alaska star-route and power-boat service.

The Third Assistant Postmaster General issues no general directives concerning the procurement of supplies and contracts for services.

The Fourth Assistant Postmaster General issues directives and instructions concerning the purchase of fuel for use in leased and rented post-office quarters; local purchases of gasoline, motor vehicle parts, office machines, letter boxes, clocks, and ice. He also issues directives concerning maintenance and operation of vehicles in the motor vehicle service and all contracts related thereto; the procurement and drayage of coal and fuel oil in Federal buildings; telephone and switchboard service; furniture, carpets, and safes; snow and ice removal; window-cleaning services; local purchases of miscellaneous supplies and services, and public-utility services. A copy of the booklet of instructions to postmasters for the operation of public buildings with marked sections and pages is herewith.

The Chief Clerk and Director of Personnel uses the contracts as made by the Federal Bureau of Supply, Treasury Department, for contract services for the Department. Therefore, his office is governed by the directives issued by the Treasury Department.

The chief inspector issues no general directives with respect to the procurement of supplies and contracts for services. Two copies of Form 512, Notice of Reward, are submitted because the notice commits the Postmaster General to pay for services rendered if the conditions prescribed therein are met.

The purchasing agent issues to postmasters in the field routine instructions, samples of which are enclosed.

The solicitor makes no contracts for services and issues only such directives as are amendments to the Postal Laws and Regulations, based on enactments of Congress or suggestions from bureaus and officers of the Department. Copies of such amendments are enclosed. The regulations concerning contracts are embodied in chapter 7, title I, and in sections 227, 244, 250, 480, 575, 706, 1017, 1036 to 1044, 1056, 1376, 1726, 1751, 1827, and 2030 of the Postal Laws and Regulations of 1940.

The comptroller issues no instructions or directives concerning other than the preparation of vouchers and the claiming of credit for payments under contracts.

Officers of the Department will be glad to explain to your committee any features of the directives that you may desire.

Sincerely yours,

J. M. DONALDSON,
Postmaster General.

EXTENSION AND IMPROVEMENT OF THE POSTAL SERVICE

A subcommittee has been appointed to explore means of increasing the volume of mail and postal activities which most nearly pay their own way.

Contract stations as distinguished from substations have proved profitable to the Post Office Department and their use should be

extended. The number of contract stations has been reduced considerably since 1940. The Post Office Department has testified that in 1945 contract stations provided $46,000,000 in revenue and cost only $2,242,000.

The committee believes that more extensive use of the mails should be made for parcels shipped by the Government in excess of 4 pounds. The penalty mailing privilege given to Government departments extends only to parcels weighing less than 4 pounds. In cases of parcels weighing more than 4 pounds the Government departments have turned to other transportation service.

Extending the use of metered mail and stamp-vending and other automatic machines will result in a more economical operation of the postal service.

Means and methods for increasing percentage of zoned mail should be developed. Tests show that zoned mail for delivery in cities where zones have been established constitutes approximately 40 percent of first-class mail, 45 percent of second-class mail, and 45 percent of third-class mail, and that the cost of separating nonzoned mail is approximately 30 percent greater than separating zoned mail.

Means will be explored for increasing postal revenues by making additional lock boxes available to patrons.

SURVEYS BY GENERAL ACCOUNTING OFFICE

Two General Accounting Office units are making detailed surveys of two of the largest post offices. The letter of the chairman of the committee requesting such surveys and indicating their scope, together with the reply of the Comptroller General, are as follows:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON POST OFFICE
AND CIVIL SERVICE,
Washington, D. C., August 13, 1947.

Hon. LINDSAY C. WARREN,
Comptroller General of the United States,
General Accounting Office Building,
Washington, D. C.

DEAR SIR: Investigation by the House Committee on Post Office and Civil Service has revealed that the General Accounting Office does not investigate the post offices in the United States except upon specific complaint or as a result of information which would lead to uncovering evidence of misuse of Federal funds.

It is requested that the Investigations Division of the General Accounting Office conduct a complete investigation of the 17 largest post offices in the United States and report its findings to the House Post Office and Civil Service Committee by December 1, 1947. It is requested that reports of investigations furnished the committee contain information relating to the expenditure of Federal funds, collection of postal receipts, accounting procedures, unauthorized use of Post Office Department facilities, and all other matters which come under the jurisdiction of the General Accounting Office for investigation with respect to the Post Office Department's handling of Federal funds.

Also, it is requested that the committee be furnished, as soon as possible, the decision of the Comptroller General with respect to whether the funds of the Chicago Post Office Canteen are Federal funds and whether the profits resulting from the operation of such canteen are funds which belong to the Federal Government.

Your cooperation in these matters will be greatly appreciated.

Sincerely yours,
EDWARD H. REES,
Chairman.

GENERAL ACCOUNTING OFFICE,
Washington, D. C., August 22, 1947.

Hon. EDWARD H. REES,
Chairman, Committee on Post Office and Civil Service, House of Representatives.

MY DEAR MR. CHAIRMAN: I have your letter of August 13, 1947, requesting that the Investigations Division of the General Accounting Office conduct an investigation of certain post offices and report its findings to your committee, and that the committee be furnished my decision with respect to the status of the funds of the Chicago Post Office Canteen.

Following receipt of your letter yesterday, a conference was held in my office this morning attended by Mr. Moore and Mr. Belen of the staff of your committee and by members of my staff. It was brought out at such conference that it would be impossible to fulfill completely the request in your letter, in view of the stringent personnel reductions which this Office is undergoing, and of the large degree of reliance heretofore placed on administrative inspections of post offices, which would necessitate the building up of an additional force in the General Accounting Office to do the work requested. However, as always, I am desirous of lending your committee as much assistance as possible commensurate with the size of our staff and the condition of our work.

Accordingly, it has been decided with the concurrence of your representatives that an investigation of two post offices, the locations of which are to be agreed upon with members of your staff, will be conducted and reports thereof will be furnished to your committee as soon as practicable.

With reference to the funds of the Chicago Post Office Canteen there has been no decision as to whether such funds are Federal funds and whether the profits resulting from the operations of such canteen belong to the Federal Government. The operations of this canteen are within the scope of a study now being made in this Office with respect to concession activities conducted on Federal property. When this study is completed it is my present plan to report the results thereof to the Congress for its consideration.

There has also been received from Mr. Moore a letter of August 13 requesting a list of the defalcations by postmasters during the past 10 years with certain descriptive material. I will be glad to have this information furnished to the extent that it is available in the records of the General Accounting Office.

Sincerely yours,
LINDSAY C. WARREN,
Comptroller General of the United States.

MANAGEMENT ENGINEERING SURVEYS

One of the major problems which has developed and which requires on-the-spot analysis is that of city delivery service. It has been pointed out to the committee that there has been little change in city delivery service methods in over 100 years. However, there have been many advances in transportation facilities and methods used by commercial delivery services, and which are adaptable to the postal service.

The extent to which the delivery service may be improved is being explored by the Trundle Engineering Co. The results of this survey will present solutions to a number of general over-all postal problems such as special-delivery service, utilization of truck transport, motor-vehicle service, and personnel utilization.

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. MULTER] is recognized for 30 minutes.

A FRANK ANSWER TO A RANK MISSTATEMENT ABOUT THE HOLY LAND

Mr. MULTER. Mr. Speaker, under some circumstances it may be just as well to permit erroneous statements to get lost in oblivion by the simple expedient of ignoring them. However, when the erroneous statements are of such a nature as to constitute a slander, and when, as now, they may be quoted as a part of the CONGRESSIONAL RECORD, thus giving a semblance of authentication, they must be corrected. The motives that brought about the insertion of these remarks in the RECORD are quite immaterial. Attributing to the gentleman from Mississippi [Mr. RANKIN] only the most patriotic of motives coupled with a sincere belief in the truth of what he read to this House, nevertheless the facts are that the contents of the letter he has read are vicious; they are malicious; they are untrue; they are libelous. The prefatory statement of the gentleman from Mississipppi [Mr. RANKIN] intimating that all Jews are Communists and that all Zionists are Communists is such utter nonsense that it needs no comment from me. Was the Jew a Communist who gave to New Orleans the hospital which gave such great comfort to the late Senator Bilbo in his dying days? Is my own boy who served overseas in World War II a Communist? Are the millions of Jews who have fought for freedom of all peoples throughout the world all Communists? But I am digressing. I want to talk to the House about the letter that one Benjamin H. Freedman wrote.

The gentleman from Mississippi [Mr. RANKIN] says Benjamin H. Freedman is, and I quote from the RECORD, "a great American Jew." I take issue with that statement only to demonstrate to you the invidious intent that must have prompted the authorship of that letter. I say that Freedman is neither great nor American nor a Jew.

I was born and bred in New York City. I have been associated with the legal profession there for almost 30 years. I know of nothing, and have been able to find out nothing that Freedman has ever done that entitles him to be called great. As to his being an American, I say that as an immigrant received by this country and permitted by this country to enjoy freedom and liberty equally with its citizens, he has no right to sow dissension among them. No one has the right to call himself an American who sets class against class, religion against religion, or race against race. Hatemongering has no place in America. The real Americans of our country want peace and neighborliness between individuals, between states, and between nations.

Whatever Freedman may be is immaterial, except insofar as he may pretend to speak as something that he is not. I feel compelled to refer to his so-called Jewishness only because he has held himself out as a Jew and pretends to speak as a Jew and for Jews.

I have been very active in Jewish affairs all my life, both in local and in national circles. I have made inquiries about this pretender. I have found no one who has ever known Freedman as a Jew. I have found no Jewish institution that he has ever been or is now connected with. I have here a photostatic copy of his marriage license and certificate. It shows that he was married civilly by a local justice of our municipal court. He has never, so far as the record shows, been married in a religious ceremony. That is quite immaterial except when one professes to be a Jew, he should be ready to establish that fact by showing that he subscribes to the Jewish

tenets, and that he subscribes to and practices the beliefs and the preachments of Judaism. None of these things does Freedman do.

Accident of birth has never made anyone a Jew or a Christian. It is what he does and how he lives that measures him.

No one will pretend that when Earl Browder was speaking as leader of the Communist Party, he was talking for Christian ministers, a ministry that he deserted for communism.

No one has the right to claim that all Jews or all Zionists are Communists.

I respect the opinion of those Jews, few in number though they may be, who disagree with the millions of Jews who, like myself, believe in Zionism. We find no division in patriotic allegiance to the United States in that belief. We are no less patriotic in that belief than when we sustain the right of free peoples everywhere to resist aggression.

Possibly I have no right to find fault with Freedman for his allying himself and his money on the side of the Arabs and against the Jews. That is his right.

What is it, then, that this nonentity has said that disturbs me so much? I quote from his letter which appears on page 204 of the CONGRESSIONAL RECORD of January 15, 1948. Referring to Palestine, he says:

> The reason it [Palestine] is called the Holy Land today is because Jesus of Nazareth lived and died there. To Christians He [Jesus] is the Son of God and Saviour. To Mohammedans he is a great prophet. To official Jewry he is an executed blasphemer.

That last sentence is what I take issue with.

I want now to destroy that malicious slander, which I believe was made by him with full knowledge of its entire falsity.

First, let me make plain that there is no such thing as an official Jewry. There are, and have been for thousands of years, Jews in every part of the world—native Chinese, native East Indians, Europeans, Asiatics, Africans, and Americans—who have subscribed to and followed the tenets of the Jewish religion. Never since the dispersion of the Jews from the Holy Land, never since the destruction of the second temple, has there been a united Jewry or an official Jewry.

Like Christians, we Jews have our religious differences. We have our Orthodox, our Conservative, and our Reform Jews. We have no world-wide chief rabbi; we have no national chief rabbi. Even the Jewish laity is not organized into one single unit. Obviously, no one has the right to speak for official Jewry—least of all this renegade Freedman.

Now, let us see if there is any substance to his nefarious charge.

Has any Jew, official or unofficial, anywhere or at any time said anything disparaging about Jesus? I could call before this House outstanding clergymen and laymen, whose greatness, whose Americanism, and whose Jewishness could not be questioned, who would unanimously and vigorously deny Freedman's venomous insult. Instead of doing that, let me quote, from authoritative sources, the answer to this calumny—answers written by persons who never heard of Freedman; answers written without any idea that their words would be quoted here.

Let me first quote this statement from a work written by Milton Steinberg entitled "Basic Judaism." There we find this:

> To Jews, Jesus appears as an extraordinarily beautiful and noble spirit, aglow with love and pity for men, especially for the unfortunate and lost, deep in piety, of keen insight into human nature, endowed with a brilliant gift of parable and epigram.

That is the most recent word on the subject.

Let me quote another which was written in 1920 by a renowned rabbi, H. G. Enelow, entitled "A Jewish View of Jesus." There we find this:

> Of course, it must be stated that there is no official attitude of modern Jews to Jesus. Neither the Jewish people nor any considerable part of it has made any formal declaration on the subject.

He concludes his treatise as follows:

> The love He has inspired, the solace He has given, the good He has engendered, the hope and joy He has kindled—all that is unequaled in human history. Among the great and the good that the human race has produced, none has even approached Jesus in universality of appeal and sway. He has become the most fascinating figure in history. In Him is combined what is best and most mysterious and most enchanting in Israel—the eternal people whose child He was. The Jew cannot help glorying in what Jesus thus has meant to the world; nor can he help hoping that Jesus may yet serve as a bond of union between Jew and Christian, once His teaching is better known and the bane of misunderstanding at last is removed from His words and His ideal.

I suggest that the gentleman from Mississippi [Mr. RANKIN] move to expunge the offending document from the CONGRESSIONAL RECORD.

As to those who agree with the sentiments of Freedman, I give them the last words uttered on earth by Jesus:

> Father, forgive them for they know not what they do.

EXTENSION OF REMARKS

Mrs. ROGERS of Massachusetts asked and was given permission to extend her remarks in the Appendix of the RECORD and include therein a bill she introduced today together with a brief description thereof.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. FOOTE, for today, on account of illness.

To Mr. CHIPERFIELD (at the request of Mr. JOHNSON of California), indefinitely, on account of illness.

ENROLLED BILL SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 3111. An act for the relief of Louis H. Deaver.

ADJOURNMENT

Mr. HALLECK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 8 minutes p. m.) the House adjourned until tomorrow, January 22, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1231. A letter from the Secretary of the Interior, transmitting a report and financial statement of the Bonneville Administrator covering the transmission and sale of electric energy for the fiscal year ended June 30, 1947; to the Committee on Public Works.

1232. A letter from the Archivist of the United States, transmitting a report on records disposed under the provisions of section 7 of the act approved July 7, 1943, as amended July 6, 1945 (57 Stat. 382; 59 Stat. 434); to the Committee on House Administration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOFFMAN: Committee on Expenditures in the Executive Departments. Seventh intermediate report concerning an investigation of the disposition of a steam power-generating plant at Oklahoma Ordnance Works, near Chouteau, Okla.; without amendment (Rept. No. 1250). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BLAND:

H. R. 5063. A bill to provide for assistance by the Federal Government in the repair of damage caused by erosion by waves and currents to the shores of the United States and in the prevention of future damage to such shores; to the Committee on Public Works.

By Mr. KEATING:

H. R. 5064. A bill to increase the personal exemption, reduce income taxes, and for other purposes; to the Committee on Ways and Means.

By Mr. MITCHELL:

H. R. 5065. A bill to amend section 1700 (a) (1) of the Internal Revenue Code so as to exempt hospitalized servicemen and veterans from the admissions tax when admitted free; to the Committee on Ways and Means.

By Mr. NODAR:

H. R. 5066. A bill to provide for the issuance of a special postage stamp in honor of the war dead of all wars in which the United States has participated; to the Committee on Post Office and Civil Service.

By Mrs. NORTON:

H. R. 5067. A bill to provide for the bonding of Federal officials and employees; to the Committee on Expenditures in the Executive Departments.

By Mr. POAGE:

H. R. 5068. A bill for the retirement of the public debt; to the Committee on Appropriations.

By Mr. SASSCER:

H. R. 5069. A bill for the relief of the State of Maryland; to the Committee on the Judiciary.

By Mr. STIGLER:

H. R. 5070. A bill to authorize an appropriation in the amount of $500,000 for the expansion of hospital facilities at the United

States veterans hospital at Muskogee, Okla.; to the Committee on Veterans' Affairs.

By Mr. WELCH:

H. R. 5071. A bill to extend the public-land laws of the United States to certain lands, consisting of islands, situated in the Red River in Oklahoma; to the Committee on Public Lands.

By Mr. WHITTEN:

H. R. 5072. A bill to provide for the application of 10 percent of the annual revenue of the United States on the national debt; to the Committee on Ways and Means.

By Mr. REED of Illinois:

H. R. 5073. A bill to amend the acts providing for the parole of United States prisoners; to the Committee on the Judiciary.

H. R. 5074. A bill to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto; to the Committee on the Judiciary.

By Mr. ALLEN of Louisiana:

H. R. 5075. A bill to provide additional compensation for employees of the postal service; to the Committee on Post Office and Civil Service

By Mr. BEALL:

H. R. 5076. A bill to authorize the purchase of a new post-office site at Westerport, Md.; to the Committee on Public Works.

H. R. 5077. A bill to authorize the purchase of a new post-office site at Woodsboro, Md.; to the Committee on Public Works.

H. R. 5078 A bill to authorize the purchase of a new post-office site at Lonaconing, Md.; to the Committee on Pubic Works.

H. R. 5079. A bill to authorize the purchase of a new post-office site at Kensington, Md.; to the Committee on Public Works.

H. R. 5080. A bill to authorize the purchase of a new post-office site at Thurmont, Md.; to the Committee on Public Works.

H. R. 5081. A bill to authorize the purchase of a new post-office site at Williamsport, Md.; to the Committee on Public Works.

H. R. 5082. A bill to authorize the purchase of a new post-office site at Emmitsburg, Md.; to the Committee on Public Works.

H. R. 5083. A bill to authorize the purchase of a new post-office site at Brunswick, Md.; to the Committee on Public Works.

H. R. 5084. A bill to authorize the purchase of a new post-office site at Gaithersburg, Md.; to the Committee on Public Works.

H. R. 5085. A bill to authorize the purchase of a new post-office site at Hancock, Md.; to the Committee on Public Works.

By Mr. TOWE:

H. R. 5086. A bill to equalize the terms of service required of cadets and midshipmen, and for other purposes; to the Committee on Armed Services.

By Mr. KEEFE:

H. R. 5087. A bill to provide for research and control relating to diseases of the heart and circulation; to the Committee on Interstate and Foreign Commerce.

By Mrs. ROGERS of Massachusetts:

H. R. 5088. A bill to amend the National Service Life Insurance Act to protect the insurance against lapse by crediting to the insured dividends from the excess of premiums over death costs chargeable thereto and by automatic payment of premiums from the accumulated credits; to the Committee on Veterans' Affairs.

By Mr. HAGEN:

H. R. 5089. A bill to provide for relief to needy Indians of Minnesota; to the Committee on Public Lands.

By Mr. REES:

H. R. 5090. A bill to provide for the extension of the air-mail postal service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mrs. ROGERS of Massachusetts:

H. R. 5091. A bill to increase the rates of service-connected death compensation payable to certain widows, children, and dependent parents of persons who served in the active military or naval service, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. DAVIS of Georgia:

H. J. Res. 304. Joint resolution to authorize the issuance of a special series of stamps commemorative of the one hundredth anniversary of the birth of Joel Chandler Harris, author of the Uncle Remus stories; to the Committee on Post Office and Civil Service.

By Mr. HARLESS of Arizona:

H. J. Res. 305. Joint resolution authorizing the issuance of a special series of stamps commemorative of the fiftieth anniversary of the organization of the Rough Riders (First Volunteer United States Cavalry) of the Spanish-American War; to the Committee on Post Office and Civil Service.

By Mr. LARCADE:

H. Res. 445. Resolution making H. R. 4278, a bill to enact the National Security Training Act of 1947, a special order of business; to the Committee on Rules.

By Mr. LANE:

H. Res. 446. Resolution authorizing the Committee on Interstate and Foreign Commerce to investigate aircraft accident at Logan International Airport, Boston, January 21, 1948; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. COLE of New York:

H. R. 5092. A bill for the relief of Hans Oscar Hansen; to the Committee on the Judiciary.

By Mr. GWINN of New York:

H. R. 5093. A bill to record the lawful admission of Ernest J. Hoffmann to the United States for permanent residence; to the Committee on the Judiciary.

By Mr. PFEIFER:

H. R. 5094. A bill for the relief of Gen. Wincenty Kowalski; to the Committee on the Judiciary.

By Mr. POTTER:

H. R. 5095. A bill for the relief of Miss Sirkka Aiiri Saarelainen; to the Committee on the Judiciary.

By Mr. RUSSELL:

H. R. 5096. A bill for the relief of Primitivo Urcelay-Ruiz; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1184. By Mr. ANDREWS of New York: Resolution adopted January 18, 1948, by Lodge No. 3077 of the International Workers Order, repudiating false accusations and allegations of the Attorney General and wholeheartedly endorsing and supporting general council of the International Workers Order in all legal and other actions aimed at protecting the good name, integrity, and security of their organization as well as the rescinding of the Attorney General's list; to the Committee on Un-American Activities.

1185. By Mr. HALLECK: Petition of citizens of La Fayette, Ind., opposing compulsory military training and expressing accord with House Resolution 73; to the Committee on Armed Services.

1186. Also, petition of citizens of Kosciusko County, Ind., favoring the establishment of a system of universal military training; to the Committee on Armed Services.

1187. By Mr. JENKINS of Ohio: Petition of Emmett A. Classing and a large number of other residents of Lawrence County, Ohio, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1188. Also, petition of K. L. Cleland and other residents of Athens County, Ohio, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1189. Also, petition of Mrs. Florence E. Pendergrass and other residents of Chauncey, Ohio, expressing disapproval of H. R. 4278, a bill providing for compulsory military training; to the Committee on Armed Services.

1190. Also, petition of George E. Burkett, post adjutant, and members of Drew Webster Post, No. 39, American Legion, Pomeroy, Ohio, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1191. Also, petition of Frank Harvey and other residents of Athens County, Ohio, in support of legislation establishing a system of universial training; to the Committee on Armed Services.

1192. Also, petition of H. M. Bennett and a large number of residents of Athens County, Ohio, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1193. Also, petition of Mrs. Thora Olson and a large number of residents of Athens County, Ohio, in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1194. Also, petition signed by Mrs. C. J. Ailstock and 230 residents of Athens County, Ohio, in support of legislation to establish a system of universal military training; to the Committee on Armed Services.

1195. By Mr. LEWIS: Petition of 131 residents of Steubenville, Ohio, and vicinity, circulated by the Argonne Post, No. 33, of the American Legion, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1196. Also, petition of 99 residents of Adena, Ohio, and vicinity, circulated by American Legion Post, No. 525, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1197. By the SPEAKER: Petition of Townsend Recovery Plan, Tacoma, Wash., petitioning consideration of their resolution with reference to enactment of H. R. 16; to the Committee on Ways and Means.

HOUSE OF REPRESENTATIVES

THURSDAY, JANUARY 22, 1948

The House met at 12 o'clock noon.

Rev. Dominic Brady, of the Order of Preachers, Province of St. Albert the Great, River Forest, Ill., offered the following prayer:

In the name of the Father and of the Son and of the Holy Ghost. Amen.

Our Father, who art in Heaven, hallowed be Thy name; Thy kingdom come; Thy will be done on earth as it is in heaven. O God, unfailing support of those who seek it of Thee, source of freedom and peace to all who ask it of Thee, life of those who believe in Thee, we call upon Thee in behalf of these Thy servants. We pray Thee, O Lord of power, wisdom, and justice, through whom all authority is rightly administered, and just laws are enacted, to inspire with Thy spirit of counsel, fortitude, and love the lawmakers of our Nation. Guide and direct their deliberations so that the laws they propose for

the preservation of our temporal welfare may accord with Thy divine plan for the government of our people in freedom and peace.

Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 929. An act to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564).

The message also announced that the Senate insists upon its amendments to the bill (H. R. 1799) entitled "An act for the relief of Eva L. Dudley, Grace M. Collins, and Guy B. Slater," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. WILEY, Mr. COOPER, and Mr. MCCARRAN to be the conferees on the part of the Senate.

ADJOURNMENT OVER

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

CALENDAR WEDNESDAY BUSINESS DISPENSED WITH

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the call of the committees in order on Wednesday next be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

EXTENSION OF REMARKS

Mr. COUDERT asked and was given permission to extend his remarks in the RECORD and include an article from the New York Times.

Mr. GALLAGHER asked and was given permission to extend his remarks in the RECORD in two instances, in one to include an editorial from the Washington Times-Herald of January 21, 1948, dealing with fuel oil, and in the other to include an article that appeared in the Washington Post of January 21, 1948.

EUROPEAN RECOVERY PROGRAM

Mr. ELLIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. ELLIS. Mr. Speaker, a few days ago I received a letter from a gentleman who is one of the largest lumber dealers on the eastern seaboard. He does not reside in my district.

The writer is the type of man whose observations should be of value to the Members of the House. I will read the part of his letter referring to the Marshall plan:

There is one suggestion I would like to mention that may be of interest.

As you know, I travel considerably. Everywhere I go, north or south, people are really opposed to excessive continued spending of our money in Europe.

The only places I find in favor of it are in the newspapers or on the radio.

I do not see how the newly elected Congress can go along with even part of the program. You know it will lead to higher prices, higher taxes, OPA controls or equivalent, and quite possibly defeat of the Republican Party. That would be a calamity.

I know what you are doing about this spending. I am giving you my observations to encourage you as much as possible.

This is a story that comes from every section of the country. From the noise the administration is making through every channel of communication, it is evident they realize that the people are overwhelmingly opposed to their foreign spending program. The people, from long experience, have learned to detect the artificial crises the administration builds up periodically, and too often, to serve a sinister purpose. The taxpayers are getting tired of this spending, and the Members of the House, above all others, should know it.

EXTENSION OF REMARKS

Mr. DAGUE asked and was given permission to extend his remarks in the RECORD and include an article appearing in Pathfinder magazine by Felix Morley.

Mr. CRAWFORD asked and was given permission to extend his remarks in the RECORD in five instances; to include in one a letter received from Mr. Carl Holm regarding the matter of commercial fishing in the Trustee Island territory; in one to extend his remarks on proposed rubber legislation; and in three to include a statement of a Government official concerning the vital subject of our rubber program.

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the RECORD in two instances; to include in one two articles, and in the other a letter.

Mr. BOGGS of Delaware asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. BENNETT of Missouri asked and was given permission to extend his remarks in the RECORD.

THE NEAR EAST SITUATION IS CRITICAL

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include an editorial.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SMITH of Wisconsin. Mr. Speaker, I am sure that the Members of this House and the public generally do not appreciate the serious situation that exists in the Near East as the result of the partitioning of Palestine which was approved of by United Nations Assembly on last November 29. We are in trouble in the Near East. A release has just been issued showing what Russia is up to. She is determined to get control of the Dardanelles and will do so at any cost. Hitler wanted that control also and now Stalin follows the same course. The men who are in charge of the Armed Services are alarmed, and justly so. Last evening an editorial which appeared in the Star quotes Secretary Forrestal as saying that there is a problem that has been complicated by conflict in Palestine and the generally disturbed situation in the Middle East. Mr. Speaker, unless we take care of this situation now, we are headed straight for war. The Palestine partition action by the United Nations Assembly at this time has created a critical national-security problem. It is fraught with great danger to our country.

The editorial I refer to is as follows:

OIL AND NATIONAL DEFENSE

Secretary of Defense Forrestal has presented to the House Armed Services Committee a thoroughly alarming picture of the military oil problem. It is a problem that has been complicated by the conflict in Palestine and by the generally disturbing situation in the Middle East. For the vast oil reserves in the Middle East play a vital role in our military planning. It would be bad enough if we were to be cut off from this supply and worse if it should fall into the hands of an enemy.

Secretary Forrestal says that if war were to break out tomorrow, we would be face to face with a shortage of 2,000,000 barrels a day needed for all-out military operations. During World War II our armed forces consumed nearly that amount every day and our experts predict that double that amount will be needed for another conflict. Our peak-production capacity of the late war thus would have to be doubled to supply what Mr. Forrestal describes as the "lifeblood of the military machine." Today the Army, Navy, and Air Force are having trouble getting the 343,000 barrels a day needed for peacetime operations.

There is still a lot of oil underground in this country, but military authorities are loath to lean completely on this natural supply. Therefore there is increasing interest in development of a synthetic-oil industry that will guarantee enough oil for military purposes in any emergency. Mr. Forrestal stressed the importance of building up such an auxiliary source, so that this country would be wholly independent of any foreign supply of the fuel.

The Bureau of Mines already is giving intensive study to the synthetic-oil problem. Oil may be made synthetically from coal, natural gas, and oil shale. There are virtually limitless supplies of coal in this country, which could be turned into oil. The Bureau will open a laboratory and pilot plant for oil-synthesis research in Bruceton, Pa., this year. Other test plants are in operation or are planned in other coal regions. Tests with oil shale in the Rocky Mountain beds have been very encouraging.

But it will take much more research and large investments by industry or by the Government to bring about a synthetic-oil supply sufficient to meet the war needs of our planes, ships, and other war machines. This is a national-defense problem which is of concern more to the Military Establishment than to private oil interests. If development of a synthetic industry is to be accelerated, therefore, the impetus—and probably most of the funds—will have to come from the Government. It is urgent that the Senate and House Armed Services Committees give special consideration to this pressing phase of national preparedness.

OIL SHORTAGE

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, the gentleman from North Carolina said the other day, after I had stated that I thought we should stop the shipment of oil to Canada, which has increased, I think, 385 percent in a very few months' time, that it was slapping a friendly country in the face and that they would very likely retaliate by stopping sending us wood pulp which is needed as part of our national defense. Canada knows even better than we do the importance to them of our being strong, and I cannot for 1 minute believe that Canada would be so shortsighted as to stop sending us pulpwood if we stopped sending oil to Canada that we so vitally need in order to keep our people from suffering from the cold. I believe in some of our sections of the United States the people are suffering more than in New England, although we have suffering there which will increase if action is not taken to prevent it.

The SPEAKER. The time of the gentlewoman from Massachusetts has expired.

ALLOCATION OF MEAT

Mr. JAVITS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JAVITS. Mr. Speaker, the meat-allocation bill offered by Senator FLANDERS and me has been termed "mischievous" on the floor here, for two reasons: First, because it is claimed that per capita meat supply this year will be above average consumption in recent years before 1947, and, second, because even discussion of the problem it is said may encourage hoarding. The figures given on consumption do not prove anything about demand, because people consume only what is available, but it is demand that makes prices go up and demand is estimated at about 165 pounds per capita in 1948 against admitted supply of only 146 pounds. The answer is that beef and veal prices were 18½ percent higher in November 1947 than in November 1946.

I have no desire to engage in characterizations, but assume we are all here to serve the public interest sincerely and according to our lights. We do face a dilemma in anti-inflation measures, for Congress has passed a bill placing its faith in voluntary agreements, but the agency to obtain these is the Executive, who says he needs rationing and price control powers over all cost-of-living items to do the job. Our bill proposes a compromise. It enables Congress to name what it wants rationed and to pass on the rationing plan before it becomes effective and it avoids price control; but it does try to tailor demand to supply. Equal distribution of what is available is authoritatively given much credit for the success of British wartime food rationing. If there is a better plan advanced to help the city dweller with admittedly run-away prices, and perhaps also the meat producers to avoid the consequences of an inevitable crash, or if voluntary controls can really be implemented to accomplish these objectives seasonably, I, and I believe Senator FLANDERS, will certainly be pleased.

Though discussion is objected to, I believe that discussion may have done some real good already; in any case, I was taught in the hard school of earning a living to believe that the customer was generally right—at least he was worth listening to. I am speaking for constituents who are customers. Prices on retail items generally have increased from an index number—Bureau of Labor Statistics—of 119 in 1940 to 165 in 1947, but food prices have increased from an index number of 97 in 1940 to 203 in 1947. I can assure my colleagues that for millions of middle-income families like those in my district there are no deep freezers and that a few days' supply of meat will crowd the refrigerator so that the housewife can hardly get it shut. There is no danger of the average American family hoarding perishable meat. There is danger that we may price ourselves out of prosperity.

EXTENSION OF REMARKS

Mr. RICH asked and was given permission to extend his remarks in the RECORD and include an address delivered over the radio on January 12 by Henry J. Taylor on Exactly Who Gets the Money?

FUEL OIL SHORTAGE

Mr. CLASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CLASON. Mr. Speaker, last Tuesday I told the House of the difficulties facing the people of New England at this moment due to the critical shortage in their fuel-oil supply. At that time I spoke of the splendid attitude of President M. J. Rathbone, of the Standard Oil Co. of New Jersey, as expressed in his testimony before Senator TOBEY'S investigating committee with which I have been associated. At that time he suggested that by changing the percentage of distillation of products from crude oil, it might be possible to increase the supply of fuel oil from 5 to 7 percent. This testimony was given during the special session of Congress.

A short time ago I telegraphed to President Rathbone asking him for information concerning the increase in fuel oil refined throughout the industry under the program which he suggested. It is my understanding that owners of oil refineries have not adopted this program or else have not been able to carry it into full effect. However, the answer which I received from President Rathbone is most encouraging and shows the real efforts being made by his company and him to overcome the shortage by every possible means. His telegram is as follows:

Our Everett, Mass., refinery is running for maximum distillate fuel production and latest figures we have show a December distillate fuel yield of 40.5 percent. January yield estimated to be approximately 43 percent. This compares with a yield of 35 percent for November or an increase of 10 percent in yield of distillate fuels from crude refined. All our other refineries are also running for maximum yield of distillate fuels, and Massachusetts is receiving its fair share of our total production. Figures just compiled for the Tobey committee show that in Bureau of Mines Districts I, II, and III, entire industry distillate fuel yield was 17.7 percent in the 4 weeks' period ending December 6 and 18.5 percent for the 4-week period ending January 3. This increase in industry yield plus increased crude runs by all refineries resulted in a 7.6 percent increase in production of distillate fuel by the industry in these three Bureau of Mines districts. This increase in production amounts to 2,436,000 gallons daily. The Tobey subcommittee estimated a 5 to 7 percent increase in production of distillate fuels was possible and above figures show this forecast was conservative. However, feel some refineries can and should go further in direction of increasing distillate fuel yield to meet increased consumer demands. Figures on individual companies' yields not available to our committee, but Tobey is trying to secure them. Reference your question regarding supplies made available to New England State fuel coordinators to take care of hardship cases, our committee does not have such figures but you should be able secure same from State fuel coordinators themselves.

M. J. RATHBONE,
President, Standard Oil Co. of New Jersey.

However, the action of Standard Oil Co. of New Jersey alone is not sufficient to accomplish the complete elimination of the shortage. It is my understanding that oil executives are meeting in Washington today with Government officials. They are going to work on a voluntary agreement whereby they can pool their resources to some extent to further the general purposes sought by our committee and by their previous recommendations. I was surprised to learn that the Federal Government may cause a serious loss of time in carrying out any agreement which they may reach. I was told by an official yesterday that any such agreement will have to be checked and approved first by the Secretary of the Interior; second, by the Secretary of Commerce; and, third, by the Department of Justice, in accordance with a delegation of the authority granted to President Truman to approve such voluntary agreements in accordance with the law passed at the recent special session. I was told these checks would require at least 3 weeks.

It will be a shock to the people of the United States and, particularly, those who are actually suffering from lack of fuel oil in New England and along the eastern seaboard to learn that their government is so ineffectively administered. I could scarcely believe that such a delay could be warranted in view of the serious situation which has developed. On December 19 the Massachusetts delegation of Congressmen unanimously adopted a resolution urging President Truman to request the oil executives to enter into such a voluntary agreement as soon as

he approved the law. The law was approved by President Truman on December 29. It is now January 22 and the voluntary agreement can probably be put into words within a few hours, so far as the oil companies are concerned. It seems to me that 3 weeks is far too long to determine whether or not the oil companies shall be allowed to pool some of their fuel oil for the purpose of giving to State coordinators sufficiently large quantities of fuel oil for the State coordinators to meet the demands of all hardship cases of individual householders and to help independent distributors who no longer are able to secure adequate supplies for delivery to their customers.

Any voluntary agreement to bring about full relief should become effective immediately. Instead of tying it up for 3 weeks, I hope that the President's approval may be possible in 3 days. In wartime such agreements were carried out effectively. With that background, it ought to be possible to put any such agreement into operation almost immediately following its adoption by the oil companies, some of whom have indicated their unwillingness to furnish oil to the State coordinators because of the provisions of the Sherman Antitrust Act and other Federal laws.

EUROPEAN RECOVERY PROGRAM

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, General Marshall is a great general, but in my judgment he is not such a hot Secretary of State, because he is doing too much for other countries to the great detriment of America. Our State Department is outdiplomatized by foreign diplomats. They ask for $17,000,000,000 for these foreign countries. Let me show you what we have been doing for some of these foreign countries.

Let us take Great Britain. In 1945 a great many of you voted to give Great Britain $4,400,000,000 to put them on their feet. Now they are in here asking for $5,348,000,000 out of this $17,000,000,000. If they were put on their feet in 1945, what do they want this great amount of money for? That is almost $10,000,000,000 for Great Britain. They have spent their $4,400,000,000 in socializing the country. You bought their railroads, you bought their electric companies, you bought their mines, you bought their gas companies, and now they want you to go over there and pay all their high fees to royalty for running their Government. That is none of your business, but it is your business to take care of your own people. You should get busy now and do that, do not wreck America for any foreign country, especially when they can pay their own way.

Now let us see where some more of that money will go. Holland gets $2,436,000,000, Denmark $582,000,000, and Ireland, that never was in the war, $497,000,000. That is supposed to stop communism. Those three countries get $3,500,000,000 more. Where are you going to get that money? Do you think there is any communism in Ireland? Do you think there is any communism in Holland or Denmark? Certainly not. You are just fooling yourselves if you do think they have more than we have in America. The people who are advocating that in order for us to spend this money think we are nothing but a bunch of boobs. Show them that we are not, and when the time comes for this $17,000,000,000 vote, just vote against it. Save America.

Why, they are asking for $380,000,000 for Iceland; is there any Communist that can live in Iceland? No; everybody has to work in Iceland to keep warm. Norway gets $234,000,000; only 7 percent of the people are Communists there. Portugal gets $150,000,000; they were not in the war. Why? Seven hundred million dollars go to countries that were neutral in the war, Sweden, Switzerland, and others. Why tax our people for countries that became rich during the conflict.

Why, do you know we are talking of giving, out of the seventeen billion, six billion to our enemies during the war—Germany, Austria, and Italy. Did you vote for six hundred and seventy-five million for them in November? Are you trying to wreck America? Boys, it is time now to look after our own country before it is wrecked. I say to you Congressmen, wake up before it is too late.

LOUISE M. CLARKSON

Mr. LECOMPTE. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 410) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That there shall be paid out of the contingent fund of the House to Louise M. Clarkson, wife of Frank Clarkson, late an employee of the House, an amount equal to 6 months' salary at the rate he was receiving at the time of his death, and an additional amount not to exceed $250 toward defraying the funeral expenses of the said Frank Clarkson.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GEORGIA REED

Mr. LECOMPTE. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 432) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That there shall be paid out of the contingent fund of the House to Georgia Reed, mother of Ruth A. Reed, late an employee of the House of Representatives, an amount equal to 6 months' salary at the rate she was receiving at the time of her death, and an additional amount not to exceed $250 toward defraying the funeral expenses of said Ruth A. Reed.

The resolution was agreed to.

A motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mr. LARCADE asked and was given permission to extend his remarks in the RECORD in two instances and include therein newspaper articles.

Mr. PEDEN asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. GOSSETT asked and was given permission to extend his remarks in the RECORD and include a short resolution from the Public Affairs Luncheon Club, of Dallas, Tex.

OUR MERCHANT MARINE

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, revise and extend my remarks, and include a newspaper item.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BRADLEY. Mr. Speaker, I noted an article in the Washington Star last night stating that British shipyards now have over 2,000,000 tons of merchant ships under construction, a record high for ship construction during the last 25 years. The article also recalls the fact that President Truman, in his message to Congress, suggested that, because of a steel shortage, shipbuilding programs should be curtailed, but that the British Government, which allocates all steel in the British Isles, has stated that its shipbuilders will receive the same allocations of steel in 1948 that they received in 1947.

Mr. Speaker, the United States sells its tankers abroad and our own people shiver and freeze for lack of oil transport; we sell our cargo carriers to foreign lands and throw our own seamen out of jobs and force their families to exist on unemployment insurance; we ship our steel across the sea to permit foreigners to reach new record highs in ship construction while we refuse authority for the construction of needed tonnage in the United States because of a steel shortage; we throw away the favorable position we have earned in world shipping; we sacrifice the needs of the national security; we play directly into the hands of our competitors as we accept the policies deduced by a few "bright boys" in the State Department, whose experience with ships is likely limited to celluloid toys in family bathtubs.

Mr. Speaker, is it any wonder that the people are appealing to this Congress to save them from their own public officials?

The article from the Washington Star follows:

TWO MILLION TONS OF SHIPS BEING BUILT IN BRITAIN

LONDON, January 21.—Lloyd's Register reported yesterday that more than 2,000,000 tons of merchant ships, a record figure for the last 25 years, were under construction in British and northern Ireland yards during the last quarter of 1947.

Shipbuilding is one of Britain's busiest industries, and the level of production about equals the prosperous years of the early 1920's.

Capacity production, however, is deterred by a shortage of materials. President Truman, in his message to Congress December 20, suggested that "because of world steel shortages," countries participating in the Marshall plan should curtail or defer their shipbuilding programs. The British Government, which controls steel allocations, later announced that shipbuilders would receive in 1948 the same steel allocations as in 1947.

COMMITTEE ON VETERANS' AFFAIRS

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that the Committee on Veterans' Affairs may sit on Monday during the session of the House while the House is engaged in general debate.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

Mr. RANKIN. Mr. Speaker, I thought it was the rule of the House that committees would not be permitted to sit during general debate but only during debate under the 5-minute rule.

Mr. Speaker, of course, I like to attend the hearings and I am quite scrupulous in my desire to attend the meetings of the House. It seems to me that we could hold these hearings in the morning during the time that the House is not in session and not have the Members on double duty. Of course, I am not going to object, but I think it is a wrong policy.

Mr. HALLECK. Mr. Speaker, reserving the right to object, I take this opportunity to announce, not only for the benefit of the gentlewoman from Massachusetts, but for the benefit of the membership, generally, that earlier we had thought we might call up the bill H. R. 4040, the so-called Hinshaw bill, for consideration today. It has been determined not to call that bill up. The House has just agreed to adjourn over until Monday, so I might suggest to the gentlewoman from Massachusetts that if she would amend her request to cover such time as the House might be in session after the disposition of the bill now being considered under the 5-minute rule, I am quite sure there would be no objection. In other words, the only thing involved then would be such special orders as may be scheduled for today.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. CELLER. Is it the purpose of the leadership to bring up the Hinshaw bill on Monday?

Mr. HALLECK. A little later in the day I shall announce the program for next week. At the moment that has been tentatively determined, but I would prefer not to make any definite statement about it but to make certain further determinations as to the program.

The SPEAKER. The Chair would say that the request of the lady from Massachusetts was that the committee be permitted to sit on Friday and Monday. Of course, the House not being in session on Friday, that request is not necessary.

Mrs. ROGERS of Massachusetts. For Monday, in accordance with the gentleman's suggestion. It may not be necessary to sit on Monday, but there are certain witnesses to appear before the committee, and the committee dislikes very much to keep them too long.

The SPEAKER. The gentlewoman from Massachusetts revises her request, that the committee may be allowed to sit on Monday during general debate. Is there objection?

Mr. RICH. Reserving the right to object, I understand the majority leader is going to announce the program later. Then, after the program is announced, the gentlewoman from Massachusetts could have the information that she desires. However, she asks that it be granted now, and I feel she should wait. Therefore, I object.

EXTENSION OF REMARKS

Mr. COLE of Missouri asked and was granted permission to extend his remarks in the RECORD and include an editorial from the New York Daily Mirror of January 20.

STRIKES IN GOVERNMENT CAFETERIAS

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN. Mr. Speaker, the Washington Post, which lets out a squawk every time you prick a pink or a Red, is at it again today. They are mad because a congressional committee wants to know by what authority the administration, the President, and the Secretary of Labor, Mr. Schwellenbach, disregard the Taft-Hartley Act and advocate closing two cafeterias operated in Federal buildings for the benefit of Federal employees. As I tried to explain yesterday, the officials of the union whose members operate this cafeteria refuse to sign anti-Communist affidavits. Why should the President, unless he wants the political support of the CIO, interest himself or ask his Secretary of Labor to interest himself in behalf of that union which refuses to deny it is in control of the Communists? The closing of these cafeterias keeps all those people who want to be served there from eating there and keeps those who want to work there out of their jobs. I cannot understand the President's action.

The SPEAKER. The time of the gentleman from Michigan has expired.

FOREIGN RELIEF

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi [Mr. RANKIN]?

There was no objection.

Mr. RANKIN. Mr. Speaker, it seems that organized pressure is being brought to bear continuously through the press and over the radio on Members of Congress to swallow the so-called Marshall plan, without investigation, or reservation.

Yet, when we ask for a small amount to begin the construction of one of the greatest inland waterway projects in America, that would not amount to a drop in the bucket compared to the amount they are asking us to put into Europe and Asia, we are told that we do not have the money.

I always respect the military when they are doing their duty.

I submit that the greatest military leader this Nation has ever seen was Robert E. Lee. Theodore Roosevelt said he was undoubtedly the greatest commander of the English-speaking race, although he said his last and greatest antagonist was the equal of Marlborough or Wellington.

Major General Maurice of the British Army in the First World War wrote a book entitled "Lee, the Soldier." He wound up by saying:

> I place Lee above Wellington as the greatest commander of the English-speaking race.

One day General Lee was walking down the streets of Richmond during the height of the War Between the States, when it looked as if the South was going to win. One of his enthusiastic supporters met him and said: "General, as soon as this war is over we are going to elect you President to succeed Jefferson Davis." If you remember, we had a 6-year term provided for in the Confederate constitution, and the President could not succeed himself. General Lee said: "No, sir; I do not believe in military Presidents or political generals."

CALL OF THE HOUSE

Mr. JENSEN. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

Mr. HALLECK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 3]

Barden	Gwinn, N. Y.	Miller, Calif.
Bell	Hardy	Morgan
Blatnik	Hartley	Morrison
Boggs, La.	Hays	Multer
Bolton	Hébert	Murray, Tenn
Buckley	Heffernan	Nixon
Buffett	Hendricks	Norton
Bulwinkle	Horan	O'Toole
Chadwick	Jenkins, Pa.	Passman
Chapman	Jones, N. C.	Philbin
Chiperfield	Judd	Poulson
Clark	Kee	Powell
Corbett	Kefauver	Price, Fla.
Cotton	Kerr	Richards
Cravens	Kilburn	Rivers
Davis, Wis	King	Rooney
Dawson, Ill.	Lane	Sabath
Dirksen	Lichtenwalter	Scott, Hardie
Domengeaux	Ludlow	Somers
Douglas	McDowell	Stratton
Fellows	Macy	Thomas, N. J.
Fulton	Marcantonio	Thomas, Tex.
Gamble	Mathews	Tibbott
Gavin	Meade, Ky.	West
Gillie	Merrow	Woodruff

The SPEAKER. On this roll call 355 Members have answered to their names; a quorum is present.

By unanimous consent, further proceedings under the call were dispensed with.

EXTENSION OF REMARKS

Mr. KEATING asked and was granted permission to extend his remarks in the RECORD and include two tables.

Mr. MORTON asked and was granted permission to extend his remarks in the RECORD on the subject of the distilling holiday.

Mr. HAGEN asked and was granted permission to extend his remarks in the RECORD and include a portion of a weekly news letter.

Mr. BRYSON asked and was granted permission to extend his remarks in the RECORD and include a poem.

Mr. PRICE of Illinois asked and was granted permission to extend his re-

marks in the RECORD and include a resolution adopted by the navy veterans of East St. Louis.

TO AMEND THE RECLAMATION PROJECT ACT OF 1939

Mr. ROCKWELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 2873, with Mr. DONDERO in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday, the Clerk had read through section 2 of the committee amendment. Are there any further amendments to section 2?

Mr. SMITH of Ohio. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman is recognized for 5 minutes.

Mr. SMITH of Ohio. Mr. Chairman, the drive toward complete socialization or communization—Marx used the terms synonymously—of our industry and way of life, as the bill before us exemplifies, grows in intensity. The passage of this measure, H. R. 2873, should be a sharp reminder of the direction in which the Nation is headed and the speed at which it is traveling.

This proposal further sanctions and implements one of the New Deal's pet schemes for destroying the Constitution and the contract society that great charter vouchsafed the people of this land. I refer to the provisions in the bill which relate to the further political intrusion, on the national level, into the business of producing and distributing electric power.

This proposal would give point to the New Deal's recommendation for erecting a multiplicity of TVA's all over the country, the darling plan of all who regard liberty as an anachronism and who would make the good old United States of America completely over into the Russian model.

The TVA is held up as a paragon of political achievement. Gustave Le Bon, one of the outstanding students of socialism, pointed out that facts, however presented, can make no impression upon a socialist mentality because it is a stereotyped mentality. We see this illustrated by the devotees of TVAism in their persistent and dogmatic claim that the TVA is a self-liquidating project and that it furnishes electric current to the Nation at a lower rate than is generally charged by private concerns and implying that it has effected a reduction in the general cost of living when there is not a scintilla of evidence to support any of these claims.

The fact that the General Accounting Office and the private accounting firm that check the TVA's books have never approved the respective allocations to power development and flood control which the TVA hierarchy itself made and upon which rates are based makes no impression upon the minds of its defenders, except to elicit approval of such allocations. The artificially fixed low-interest rate which the TVA pays on the loans extended to it by the taxpayers under compulsion has no effect upon their thinking. Nor is there any evidence to substantiate the persistent claim being made that the philosophy back of TVAism has been influential in lowering electric rates generally in the sense of being a net gain to the economy as a whole, that is, in raising the general standard of living. But there is abundant evidence to the contrary.

What madness possesses us lawmakers to presume to obligate the taxpayers of the Nation for a period of 78 years for the development of hydroelectric power or irrigation or anything else? To what degree of anomalous thinking have we come when Members arise in their places and solemnly make assertions, as was done yesterday, that the term "reasonable," as it is used in connection with the administration of the provision of the law relating to the time limit for amortizing the cost of reclamation projects is synonymous with infinity, and that the 78-year period now provided in the bill seeks to do nothing more than obviate the existing infinity provision in the law? It seems to me that when rationalization has reached a point like this, the last hope for appeal to reason has completely vanished.

This body has no right, morally or legally, to obligate the taxpayers of the Nation, as this bill provides. It has only the might to do so.

Lenin said, "Communism means the power of the Soviets, plus electrification."

We can well adapt this statement to our own situation by saying, "Communism means the power of votes, plus electrification."

Mr. FENTON. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. Chairman, it was my very great privilege last September and October to visit the great reclamation projects in the West.

To all intents and purposes, most of the projects are worthy, and we hope that they will in the years to come prove meritorious. I have no doubt that the great majority of them will.

I had intended offering an amendment to this section which deals with municipal water supplies, but after consultation with the chairman of this subcommittee, Mr. ROCKWELL, and Dr. MILLER, member of the committee, I decided to make a few brief remarks or observations which are the result of the trip I made.

It is my contention that any of those multiple-purpose projects that include supplying municipalities with drinking water should not be contaminated by having recreational projects included in the same project. Certainly from a sanitation point of view it is ridiculous to include water supplies and recreation in the same project. However, since the State boards of health—if they are on their toes and look after the welfare of health in their respective States—have or should have control of such sanitary problems, I believe an amendment is not necessary.

But I did want to bring this situation to the attention of the House, and I see no reason why the State health authorities cannot take care of this problem. Certainly, it is not my intention to thwart the general over-all objectives of reclamation.

Mr. MURDOCK. Mr. Chairman, I move to strike out the last three words.

Mr. Chairman, I should like to have the attention of the gentleman from Colorado [Mr. ROCKWELL] so that I may ask him and the Committee a question. I refer to page 10 of the bill and to the language beginning in line 4 following the period down to and including line 11. I agree with and approve this language as I understand its meaning.

I want to ask specifically about the purpose of that language. Is it not the intent of this language of the bill at that point to make certain that no other act other than the one referred to in the bill is to be modified by its enactment? To be a little more specific may I illustrate by pointing out that in the Interior Department appropriation bill for 1947 appears the following language:

> Utilization of power revenues: No power revenues on any subject shall be distributed as profits before or after retirement of the project debt, and nothing contained in any previous appropriation act shall be deemed to have authorized such distribution: *Provided*, That the application of such revenues to the cost of operation, maintenance, and debt service of the irrigation system of the project, or to other purposes in aid of such irrigation system, shall not be construed to be such a distribution.

This is in existing law. The Comptroller General has ruled that such is permanent legislation. My question is: It is not the intent of the language cited on page 10 to repeal or modify that measure of 1944, is it? Am I correct?

Mr. ROCKWELL. The gentleman from Arizona is correct. The reenactment of section 9 (c) of the Reclamation Project Act of 1939, containing the language the gentleman refers to is not intended in any way to modify or affect the paragraph captioned "Utilization of power revenues," in the Interior Department Appropriation Act for 1947. The committee assures the gentleman that nothing in this bill is intended to affect or modify in any respect the provisions contained in the appropriation act to which the gentleman has referred.

Mr. MURDOCK. I thank the gentleman. That was my understanding. I wondered if it was part of the legislative history of the enactment of existing law that we have no intent to change.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. RANKIN. Mr. Chairman, I move to strike out the last four words.

Mr. Chairman, there are one or two points that I desire to discuss, and one of them is in answer to the distinguished gentleman from Ohio [Mr. SMITH] in his attack on the Tennessee Valley Authority.

As a matter of fact, those men who claim that we ought to charge up flood control and navigation to the power consumers of the Tennessee Valley area overlook the fact that not a single dollar that is spent for that purpose on either

the Ohio or the Mississippi or any other stream is charged to the power consumers in the area. They jump on the interest proposition and try to make several points on it. He says that it is an element of cost, but as any regulatory commission will tell him the interest is not a cost but a part of the return on the profits. It is included in the price we pay for the electric power.

Now, I know they keep talking about the TVA being socialistic. One of the greatest public power systems in America, or probably in the world, is at Cleveland, Ohio; and if the rest of the people in Ohio had received their electricity at the rates the people in Cleveland did last year they would have saved about $50,000,000.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. NICHOLSON. I would like to ask the gentleman from Mississippi if this bill does not give the Department of the Interior a lot of power.

Mr. RANKIN. The Department of the Interior, or whoever handles this proposition, ought to have a lot of power. I wish you would give them the power to fix the retail rates of electricity generated at these dams.

Now, they talk about the time element.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I yield to the gentleman from Iowa.

Mr. JENSEN. Of course, the gentleman from Mississippi and I have argued this question many times off the floor and on, but I want the gentleman to be reminded of one fact, and that is that the private utilities pay an average of 3 mills per kilowatt-hour in Federal and State income taxes on every kilowatt-hour they produce, and if they were not required to pay that Federal and State income tax their rates would be less than TVA rates are today, and the record will prove it.

Mr. RANKIN. Now, the gentleman from Iowa will please keep tuned in for my reply.

Mr. JENSEN. I will be right here, and I will say to my good friend that I never run away.

Mr. RANKIN. I know that.

Twenty years ago your party was in power and you were selling electricity produced at Muscle Shoals to the private power companies at 1.59 mills per kilowatt-hour.

Mr. JENSEN. I am talking about today, my friend.

Mr. RANKIN. Oh, I understand. I am talking about when you really had some authority, and you came in here and showed that it was at a profit that would pay the dam out in a reasonable number of years. Today the people I represent pay 4.72 mills per kilowatt-hour for that power; in other words, we add the amount that the gentleman talks about their paying as taxes.

Mr. JENSEN. Now, the gentleman knows better than that. You know you do not pay any Federal income taxes.

Mr. RANKIN. I did not say that. I said we pay that in the rate we pay for the power.

Mr. JENSEN. I am talking about Federal and State income taxes.

Mr. RANKIN. I know what the gentleman is talking about. You are repeating the same old Power Trust propaganda that we have had thrown at us for the last 15 years.

Mr. JENSEN. But the gentleman always runs when we talk about income taxes that the private power companies have to pay and that TVA does not, or any other power projects owned by the Government.

Mr. RANKIN. We are paying enough in addition to what you were selling this power to private power companies at to make up the difference.

Mr. JENSEN. Let us get up to date. Let us talk about today.

Mr. RANKIN. That dam was built about the time of the First World War.

Mr. JENSEN. Of course, I know that; but I am talking about today, not way back then.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. RANKIN. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. The gentleman ought to know that the private power companies have these vast holding companies fastened upon them. I might say stacked upon them. They remind me of that little verse:

Great fleas have little fleas upon their backs to bite 'em,
Little fleas have lesser fleas, and so, ad infinitum.

They are sucking the lifeblood out of the power consumers all over the country.

Mr. JENSEN. Let me remind the gentleman that we will not only have fleas on this Federal control, we will have bedbugs, rattlesnakes, and everything else eating up the American people.

Mr. RANKIN. If you did not have this reclamation and power development in the West there is no telling what you would have.

Let me get back to the time element. They are raising a great hue and cry about the time element. The Federal Government will not lose a dime as a result of the extension of this time. In 1926 on this floor the party in power then brought in a resolution to extend the life of the foreign loans 62 years. Remember that $2,000,000,000 of that was loaned to Italy. It was to help Mussolini's regime. They would have no objection to extending that loan for 62 years, but when you come to the proposition of aiding these farmers in the arid areas not only to develop their water power but to reclaim their arid lands, you squawk to high heaven about a 78-year period. I submit that the Government will not lose a dime, and that it will add probably billions of dollars to the Nation's wealth.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I am sorry for the gentleman from Massachusetts. His people pay the highest rates for electricity of anybody in the United States. They are almost freezing to death up there now because you will not help us develop either the Florida ship canal or the Tennessee-Tombigbee project so we can get oil to you. It is going to be worse in the years to come. The gentleman has the island of Nantucket in his district. Nantucket has the highest power rates in the world, probably. If you help us develop these inland waterways so we can get the oil from Mississippi up there to you, and the oil from Louisiana, Arkansas, Oklahoma, and Texas up there to you, you can develop electricity and distribute it just as cheaply as we do in the TVA area.

Let me say to my friend the gentleman from Iowa, if you would take a different attitude, you could generate power with natural gas, or with oil, or with coal, and distribute it at the TVA retail rates, probably.

Mr. HOFFMAN. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I yield to the gentleman from Michigan.

Mr. HOFFMAN. If we did get all that oil, the administration would ship it over to Greece and other foreign countries, so what is the use?

Mr. RANKIN. We would ship it to you and the gentleman from Massachusetts and the gentleman from Iowa. I want to take care of all of you.

Mr. JENSEN. Since the gentleman has talked about me, will he yield to me?

Mr. RANKIN. It has been in the best of humor.

Mr. JENSEN. I know it has.

Mr. RANKIN. I have the kindliest feeling for the gentleman.

Mr. JENSEN. I have great respect for the gentleman from Mississippi, who is fighting communism at every turn, but may I say to the gentleman that if the program that he recommends, of having an authority in every river basin in America, is followed out, you will have communism.

Mr. RANKIN. Oh, no.

Mr. JENSEN. You certainly will.

Mr. RANKIN. That is exactly the antithesis of communism. What is doing more to offset communism than to enable every American to live decently and comfortably in his own home and enjoy modern conveniences?

Rural electrification, which I have fostered, or I should say fathered, has done more to keep the farmers of America from following off after communism than anything else that has been done. We are making them feel that they are real Americans. It is American policy. Thank God they cannot ship our water power abroad. They have to use it within 350 miles of the place where it is generated.

Mr. JENSEN. The gentleman wants every river basin in America organized into an authority, each one controlled by about 3 men, so there will be about 30 men that will control the water-power resources of America. You can be sure that anyone who controls the water power and resources of America controls America.

Mr. RANKIN. That is the reason I am interested in fighting this little group

in New York that controls private power companies over the whole country.

We need more TVA's and fewer holding companies.

Mr. NICHOLSON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the gentleman from Mississippi would not yield to me so that I could ask him a question. Being a new Member, I realize that I cannot compete with him and I realize also that he is a very influential Member of the Congress.

Mr. Chairman, the bill which we are now considering, as I see it, gives the Department of the Interior a great deal of legislative business to do which we, the Congress, should be doing ourselves. It gives him the right to do what he wants. Before I take my seat, Mr. Chairman, I want to tell the gentleman from Mississippi with reference to the TVA that we, the people of Massachusetts, have to pay for it and we are more or less watching how much more we will have to spend. We do not want the Secretary of the Interior under the provisions of this bill to decide what we are going to be taxed. That is a function of the Congress. I do not mind these reclamation projects. I think they are good for New Mexico and Arizona and other States. But I also realize that we do not get anything down in Cape Cod from anybody, anywhere, anytime, and we are not asking you for anything of that sort. Of course if I do happen to have a bill I hope you will vote for it anyway.

Mr. Chairman, this bill, as I see it and I am only a freshman here, gives much authority to some department in the Government, authority which we the Congress ought to exercise. If we are going to pass laws here, the Congress should do it and not the Department of the Interior. I realize what I am up against here. I asked the gentleman from Mississippi to yield so that I could ask him a question, but he declined to yield. I was informed by a friend of mine from Massachusetts that I had better not clash horns with the gentleman from Mississippi or I would get beat.

Mr. RANKIN. Mr. Chairman, if the gentleman will yield, I would like to point out to the gentleman that there were three Members on their feet, and I yielded to the ones who were talking the loudest. Of course I did not mean to be discourteous to the gentleman from Massachusetts and would be glad to answer his question now, if I can.

Mr. HOFFMAN. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. Chairman, I ask unanimous consent that I may speak out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN. Mr. Chairman, back in 1935 the Congress found it necessary to pass a National Labor Relations Act. The American Federation of Labor had a great deal to do with the writing of that act. It was hailed throughout the country as labor's Magna Carta. Then certain factions of organized labor went so far that there came an overwhelming demand from the people to the Congress to amend it. We did amend the National Labor Relations Act by the passage of the Taft-Hartley Act. That act was vetoed by the President. But the Congress passed it over the veto. Then the President assured us and again in his last message he reassured us that the Taft-Hartley Act being the law of the land, he and those departments which would accept his advice would endeavor to enforce it wholeheartedly according to the letter and according to the spirit of the law. We were so assured by the Secretary of Labor.

You will recall that when the Congress passed the Taft-Hartley bill, because of certain acts and procedure on the part of the National Labor Relations Board, the Congress took from that Board the right to act as conciliators and mediators, and we put that power in a separate and distinct branch of the agency charged with its administration. So that brings us down to the morning press or the press of last night, which advises us that now the Secretary of Labor has asked the attorneys in his Department whether or not those labor organizations, which have not complied with the act, could bargain with employers. Of course, everyone knows that both before the passage of the original act, since the passage of that act, and since the Taft-Hartley enactment has been on the books, there is no law that prevents organized labor and employers from bargaining, if they so desire, outside of and beyond the provisions of the labor law. There is nothing anywhere on the books that says that this corporation and that union cannot get together and bargain without paying any attention to the national labor relations law. It is only when either the employer organization or a labor organization wants the benefits of the Taft-Hartley Act that they have to comply with its provisions.

If the President of the United States and the Secretary of Labor mean what they said when they told the people they were going along with the spirit and letter of the Taft-Hartley Act, I ask why is it that now they have closed the cafeterias in two Government buildings and taken the position that by their advice and counsel this corporation should be induced to bargain with a labor union whose officials refuse to accept that provision of the Taft-Hartley Act which requires them to sign an affidavit that they are not members of the Communist Party or do not follow the Communist Party line. Was the President sincere? Did he mean what he said when he told us he was going along and would enforce the Taft-Hartley Act? Why is it that last night he asked the Secretary of Labor to intervene in that strike? Of course, the President has the right, just the same as every one of the 435 Members of this House has the right, to put out a statement or to go to these people and say, "Why do you not get together?" But if the President, in good faith, intends to enforce the Taft-Hartley law which he vetoed, why does he follow a course which aids a union, whose officers refuse to deny that they are Communists, in closing these two cafeterias in Government buildings, thus discriminating against members of the A. F. of L., against would-be employees who do not belong to either union?

The CHAIRMAN. The time of the gentleman from Michigan [Mr. HOFFMAN] has expired.

Mr. ROCKWELL. Mr. Chairman, apparently there are no further amendments to section 2. I move that all debate on this section do now close.

The motion was agreed to.

The Clerk read as follows:

SEC. 3. Nothing in this act shall be construed to alter, amend, or modify in any way the provisions of section 1 of the act of December 22, 1944 (58 Stat. 887).

Mr. JENSEN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, now that the gentleman from Michigan has given the history of the labor bill, and that is all settled and we know exactly where we stand on that, I think it is proper that we talk about the history of the bill now before the House. It was hoped when the matter was first considered by the committee that this would be brought out as a simple bill to recapture the interest component which the Solicitor of the Interior Department some 5 years ago had ruled did not have to be covered into the Federal Treasury but could be kept by the Reclamation Bureau and spent at will. That, however, was not the kind of bill the bureaucrats in the Interior Department wanted, for there was not any additional power in such a bill, any additional authority for them; there was no extended period for the pay-out program.

The gentleman from Colorado [Mr. ROCKWELL] labored hard and long to bring out a simple bill to recapture the interest component. I heard on what I thought was very good authority that the chairman of the committee, the gentleman from California [Mr. WELCH], went so far as to lock the subcommittee door on the gentleman from Colorado [Mr. ROCKWELL] so that he could not get into the subcommittee room to write a bill. So they brought out the pending bill which was forced on them by certain Interior Department officials.

Mr. MILLER of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. JENSEN. Not right now.

Mr. WELCH. Mr. Chairman, will the gentleman yield?

Mr. JENSEN. I yield to the gentleman from California because I mentioned his name.

Mr. WELCH. The gentleman stated that he heard that I ordered the doors of my committee room locked so you could not enter.

Mr. JENSEN. Not me; no. I did not ask to enter the subcommittee room. But it came to me, my friend, very straight, now, since we have got into this thing, about you ordering the door locked so that the chairman of the subcommittee, the gentleman from Colorado [Mr. ROCKWELL], could not hold a hearing on his bill.

Mr. WELCH. Will the gentleman accept an answer to this absurd statement from the gentleman from Colorado [Mr. ROCKWELL]?

Mr. JENSEN. I will be glad to, if the gentleman from Colorado will state what he told me.

Mr. ROCKWELL. I feel quite sure, Mr. JENSEN, I did not say that because the gentleman from California [Mr. WELCH] did not lock me out of the committee room.

Mr. JENSEN. He did not put chains on you but he did keep the door locked.

Mr. ROCKWELL. I would not say that.

Mr. JENSEN. I am simply giving the membership an idea of the pressure that has been brought on the gentleman from Colorado [Mr. ROCKWELL] to bring out what they call a compromise bill.

Also, I do not mind telling you that the National Reclamation Association was just the same as backed into a corner by the "hot shots" in the Department of the Interior—to such an extent that they had to approve this bill at their national convention where I spoke the 29th of last October and knew what was going on. A number of Reclamation Association head men had a meeting with me at Phoenix and told me what was going on and what they were up against.

Mr. ELLIOTT. It was not this bill.

Mr. JENSEN. A very similar bill.

Mr. ELLIOTT. No.

Mr JENSEN. It had the 78-year period in it. I am just giving a little of the history of this thing.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. BATES of Massachusetts. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the question of these reclamation irrigation and power projects has been constantly before the Congress as long surely as I have been a Member and even preceding that period. Much has been said about the relative charges for power whether it happens to be from Massachusetts, Idaho, San Francisco, or some other place. Of course, we who come from the industrial East do not object to the development of these reclamation projects, irrigation projects, and power projects if they are economically sound and fill a need that cannot be met otherwise and if the beneficiaries of these projects pay the bill and do not pass it on to the great industrial sections of the country that derive no benefit except perhaps a part of the production of the farms that may be brought into being as a result of those irrigation and reclamation projects.

Let us take Bonneville as an illustration which originally was constructed for the purpose of navigation and reclamation and then after it was under construction, the possibilities of power were considered and then made part of the project. I well recall the project at the time it was built. It was built without any authority at all by the Congress. It was built under the direct authority of the President of the United States without coming to the Congress to get authority. That is the history of Bonneville. After they built the first segment of the dams they said, "Let us develop power." When the entire structure was completed they allocated a proportionate cost to power. We find as a result of the allocation of power costs that that represented about 22 percent of the entire cost. If we are going to establish a basis of charges to the consumers of power at 22 percent of the basic investment under such circumstances it is quite obvious that such a power-plant project can be developed at a very considerably less cost than a separate steam plant developing the same amount of power and therefore result in a lesser charge to the consumer. In addition to the extra cost of a steam plant taxes are assessed on it by the community in which the plant is located and it runs into considerable taxes. That is the basis on which we claim that we cannot have lower charges in the great industrial areas of the country than they can in these irrigation and reclamation areas.

So far as rates in these industrial areas are concerned, let me say that all States have what are called public service commissions which have full power to determine what the rates shall be. The members of those commissions are appointed by the governors of our various States. We have a change in governors. We have Democratic governors one year, we have Republicans other years, and those governors, whether Democrats or Republicans, have the power to replace those members of the public service commission who are not representing the interests of the public or the consumers of the State.

We have constantly before those public service commissions petitions for increases in rates. From time to time that occurs, although the power rates have gone down considerably in my State over a period of years.

Mr. Chairman, our complaint is not the building of the dams if there is justification for it and if those who get the benefit of the dams are willing to pay the cost; but certainly it is unfair to allocate that cost in the final analysis to the great industrial parts of this country that receive no direct benefit from it.

We get back now to the question of amortization. It seems to me that the Government outlay ought to be established on a sound basis. Up to the present time the allocation of costs is amortized on about a 50-year basis, in some cases 40 years. Under the provisions of this bill I understand that is fixed at 78 years. It seems to me 78 years is entirely too long.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. BATES of Massachusetts. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BATES of Massachusetts. Mr. Chairman, if we are going to increase the value of these lands, if we are going to make them available for agricultural development, if we are going to improve properties around that area so far as value is concerned, and also increase the value to the tenants and the producers on the lands, those people ought to be willing to pay the bill. Certainly there should be economic justification that the improvements thereon and the yield per year from those improved lands will be sufficient to amortize those projects over a period of 40 or 50 years.

I well recall going out to Boulder Dam some years ago and looking over that project. The city of Los Angeles gets its water from Boulder Dam.

As I understand, the amortization period is 50 years that the city of Los Angeles is compelled to pay in water charges toward the amortization of the water part of that project. Now, it seems to me, Mr. Chairman, that we are justified, first of all, in keeping the amortization period down to what it is today, 50 years, and we certainly are justified in compelling the Secretary of the Interior, before he embarks upon another prodigious program of public construction of irrigation and reclamation or power projects, to come to Congress for authorization, in the first instance, so that the Congress will know what is going on in this country of ours.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. FERNANDEZ. Mr. Chairman, I move to strike out the last five words.

Mr. Chairman, everybody in this House knows that I have no brief for the National Reclamation Association. They do not do my thinking, but since we are giving testimonials here this morning, I want to add my testimonial in order to keep the record straight. The gentleman from Iowa [Mr. JENSEN] a while ago said that the National Reclamation Association was backed up to the corner and was forced to accept this bill. Well, I was down at Phoenix for the convention myself. By the way, I heard your speech at Phoenix, Mr. JENSEN; it was a very fine speech. I will say to the gentleman from Iowa that I enjoyed it very much.

Mr. JENSEN. When will you get ready to put the knife in me?

Mr. FERNANDEZ. That I would never try to do. I also heard the great speech made by the president of the National Reclamation Association, Mr. Sawyer, who spent all his time up here while this bill was under consideration, telling the National Reclamation Association what a wonderful victory this was, this Rockwell bill, and recommending that everybody support it. That was his statement, and if you do not believe it you turn to the proceedings of the National Reclamation Association and read that great speech praising this bill.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last six words.

Mr. Chairman, as I listened to the debate yesterday and today by the opponents of the development of our natural resources rather than letting them go to waste——

Mr. JENSEN. Mr. Chairman, if the gentleman will yield, there are no opponents of the development of reclamation in the West in this House that I know of, on either side.

Mr. McCORMACK. I was not referring to the gentleman.

Mr. JENSEN. I am speaking for everybody.

Mr. McCORMACK. I am stating for the RECORD that I did not have the gentleman in mind. I will yield if the gentleman wants me to, but I would prefer to make a statement, because I like my friend, and when we have these colloquies

we sometimes inject a note that when we sit down we wish we had not made.

Mr. JENSEN. Will the gentleman name some enemy of reclamation in the House, please?

Mr. McCORMACK. I did not say "enemy." I said "opponents."

Mr. JENSEN. Oh, well.

Mr. McCORMACK. An enemy is different than an opponent. An enemy may be an opponent, but ar opponent may not be an enemy.

Mr. JENSEN. I thank the gentleman for that definition. Will he please say that those gentlemen in the House——

Mr. McCORMACK. I like to pray for my friend so that he will see the light——

Mr. JENSEN. That do not agree particularly with the gentleman's views are definitely opponents of reclamation?

Mr. McCORMACK. Well, my friend did not even know what I was going to say when he got up and wanted to place himself on record in the light that he feels represents his views, and I am glad he did. What I started out to say was that I listened to the opponents of this legislation in the House for 2 or 3 days—opponents of the development of power, in the building of dams, where flood control and power and reclamation and all of these important activities in the interest of our country can be carried on. I can remember back 9 or 10 years ago when I stood in the well of this House fighting for the passage of a bill which is now the organic law of the land, that would authorize the Federal Government to make 100-percent appropriations for flood-control projects and for flood-control dams.

Prior to that, as we will remember, it was a cooperative activity on the part of the Federal and the State Governments, where the States had to furnish land free and clear from encumbrances and had to pay the administrative expenses, as I recall. The Federal Government was authorized to appropriate money to build the dams. For all practical purposes, flood control, the building of dams to control floods was meaningless, because the burdens upon the several States were such that they could not comply with that part of the law.

I do not have a dam in my district. The only river in my district is the Neponset River, a small river, yet I introduced this legislation with no problem confronting the people of my district because from the time this legislation was first considered in this body, from the time I became a Member in 1928, and then throughout the early thirties, I always thought that flood control was a national challenge and that it should be assumed entirely by the Federal Government.

I can remember when that bill came out of committee, my very good friends on the Republican side, with few exceptions, voted against it, but particularly every one of my Republican friends from New England was hollering States' rights in opposition to flood-control legislation where the Federal Government would be authorized to make full appropriations for the building of the necessary dams.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. HARLESS of Arizona. Mr. Chairman, I ask unanimous consent that the gentleman from Massachusetts be permitted to proceed for two additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. McCORMACK. But that is over, that is through. We have gotten over the opposition on that ground. This is another subject. I do not agree with my friend the gentleman from Massachusetts [Mr BATES] when he talks about the allocation of cost to the industrial States of the country. I come from Massachusetts. A lot of the income the people of Massachusetts get comes from other States of the Union, from money invested there. I cannot look at this from a sectional angle. The development of this country has to be viewed from the angle of the national interest. I do not take the position that because we pay three or four dollars intc the Treasury and get only $1 back in Federal aid we should not help other sections of the country. That is a callous position to take. True, the people in Massachusetts, New York, and Pennsylvania make a much larger payment in the form of income and corporate taxes in proportion to other States, but a fair part of their income is earned in other States of the Union, from money invested in Kansas, Arizona, Texas, Montana, Mississippi, and other States, and as a result of the goods we manufacture in New England and sell in other parts of the country. I am speaking as one from Massachusetts. I cannot sit here and let that argument go by unanswered, because I cannot agree with it, respecting my friend's views as I do. I sharply disagree with that kind of an argument. It is purely a sectional argument which disregards the national interests of our country. We are a Union of 48 States.

Mr. CASE of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. CASE of South Dakota. I am very glad that the gentleman from Massachusetts has brought out that point. The insurance written on farms and farm buildings and properties throughout the West is paid to companies organized in Connecticut and Massachusetts and other States and the taxes that they pay on that business comes out of the earnings in the Western States, but the Eastern States get the credit for the taxes, as they do in other lines of activity where the home office pays the taxes.

Mr. McCORMACK. Exactly. The gentleman is right. As I see it, intellectual honesty does not permit that argument to dominate my thought in passing upon legislation affecting the 48 States comprising the Union, whether it is reclamation, farm legislation, or any other legislation that concerns any section of our country or a substantial segment of American society.

Mr. JOHNSON of California. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I want to reiterate a few of the things that have been mentioned here regarding this bill. I believe that if we understand what we are doing in our reclamation program, practically every Member of the House would agree to it. The last gentleman who addressed the House mentioned the fact that the allocation of costs was proper. I know they are. Here is what is done. When a multiple-purpose dam is built, it is determined what part of the cost of it is properly chargeable to flood control, and that is wiped out. Why? Because when we build a flood-control dam on the Connecticut River, the National Government pays for the whole thing, and Massachusetts and Connecticut do not pay one cent. That has been the national policy since 1938 and I think it is a good policy. When a certain amount is allocated for fish control, they figure out what that will be and then they wipe that out. It is a national policy to help the fisheries. When we come to irrigation or to a hydroelectric development, it is determined what part of the cost of the dam should be charged to each of those two functions. With respect to those allocations the water users pay back every single dollar which is allocated for irrigation. In other words, the irrigationists who get the benefit of the dam and the water stored behind it are the only people in the United States who pay for it. They pay back every dollar. When it comes to the allocation for hydroelectric features, the consumers of that power pay back every single dollar together with interest averaging about 2½ percent. In this bill we provide not over 20 percent of the amount that is paid in interest may be put back into the irrigation fund. That is not a very large item. It is not a very important one, and we could either wipe it out or leave it in. I see no objection to leaving it in.

There has been a great deal of confusion, in my opinion, over the 78-year amortization period. There is nothing to be horrified over that. After all, as I told you before, these people who pay for these projects, and remember these are dams that will stand for centuries and perhaps thousands of years, should pay for them over an appropriate number of years. Why should we not spread it over a period of 78 years? Why should the beneficiaries of these projects pay it all up in 40 years and let the rest of the people as long as the dam exists just pay for the maintenance costs?

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I gladly yield to the gentleman from Iowa.

Mr. JENSEN. Is there anyone in your district who is not willing to pay a sufficient rate for water and power so that these projects for which we are providing hundreds of millions and billions of dollars will be paid for in 50 years? I did not run across a single one of them on my 7 weeks' trip out in your State and in the 17 Western States.

Mr. JOHNSON of California. Perhaps there are not, but it is not a vital problem—you ought to know that.

Mr. JENSEN. Does the gentleman mean to say it is not vital to the Treasury of the United States at this time?

Mr. JOHNSON of California. The Government will get back every dollar

that your committee will appropriate, whether it be repaid in 50 or in 78 years.

Mr. JENSEN. Yes; about 70 years from now.

Mr. JOHNSON of California. Why should the people who get the benefit of it in the first 40 years have to pay for the whole thing? Why should they pay for the total capital investment which may continue to give benefits for centuries?

Mr. JENSEN. Why do you not try to save a little money for your children?

Mr. JOHNSON of California. I am sorry I do not really get the point that the gentleman is trying to make.

Mr. JENSEN. Why do you insist on spending all the money and making your children and your grandchildren pay?

Mr. JOHNSON of California. Our children or our grandchildren are going to get the benefit of this capital investment and therefore I have no hesitancy for my boy to pay for something that he is going to get the benefit of. That is the answer to the gentleman's question. My boy, and even his children, should be glad to pay for part of the capital investment in a dam, which will exist long after he is gone, from which he gets direct benefits.

Mr. JENSEN. But they will not have any money to pay for anything at the present rate that money is being spent.

Mr. JOHNSON of California. No. I challenge you to show me one district where payments are in default.

Mr. JENSEN. I am talking about everything we are spending.

Mr. JOHNSON of California. But I am talking about this reclamation proposition.

Mr. JENSEN. There will be no money to spend for reclamation if we keep on spending as we have in the past 15 years, to every Tom, Dick, and Harry in the United States and every nation in the world, wasting money by the billions and billions.

Mr. JOHNSON of California. There will be plenty of money if you will give us the money for reclamation. We bring you back your appropriations a thousandfold by reclamation, in the way of increased value of land and its enhanced productivity because of the water and power which the reclamation project made possible.

Mr. JENSEN. Have I not been liberal?

Mr. JOHNSON of California. I agree with you. But you could be more generous.

Mr. JENSEN. Now you are throwing a monkey wrench into the machinery. I am not so sure I will be as liberal in the future.

The CHAIRMAN. The time of the gentleman from California [Mr. JOHNSON] has expired.
